Briefings on How To Use the Federal Register— For information on briefings in Tampa, FL, Fort Lauderdale, FL, Washington, DC, and Boston, MA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

THE FEDERAL REGISTER

WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

TAMPA, FL

WHEN: March 24; at 9:30 a.m.

WHERE: Auditorium
Tampa-Hillsborough County Public Library
900 North Ashley Drive, Tampa, FL.

Rules and Regulations

Federal Register
Vol. 53, No. 45
Tuesday, March 8, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 630

Absence and Leave; Temporary Leave Transfer Program

AGENCY: Office of Personnel Management.

ACTION: Interim rule with request for comments.

SUMMARY: The Office of Personnel Management is establishing a temporary leave transfer program that permits Federal employees to donate annual leave for the use of other Federal employees for medical or family emergency or other handship situations. This rule sets forth procedures under which a potential leave recipient may submit an application to his or her employing agency and establishes rules for agencies to administer the program. This program was authorized by Pub. L. 100–202 and will terminate on September 30, 1988.

DATES: This interim rule becomes effective on March 8, 1988, and will expire on September 30, 1988; comments must be received on or before April 7, 1988.

ADDRESS: Comments may be sent or delivered to Barbara L. Fiss, Assistant Director for Pay and Performance Management, Personnel Systems and Oversight Group, U.S. Office of Personnel Management, Room 7H28, 1900 E Street, NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Martha Hoehn, (202) 632–5056.

SUPPLEMENTARY INFORMATION: Public Law 100–202, December 22, 1987, Further Continuing Appropriations for Fiscal Year 1988, directs the Office of Personnel Management to establish by regulation a program under which the unused accrued annual leave of officers or employees of the Federal Government may be transferred for use by other officers or employees who need such leave because of a personal emergency. This authority will terminate on September 30, 1988. The program established by these regulations continues and expands the temporary leave transfer program established under Public Laws 99–500 and 99–591 and Executive Order 12589 of March 18, 1987, which authorized leave transfer in three cases of personal emergency.

The expanded temporary leave transfer program has Governmentwide applicability and will continue to test the concept of providing income protection through the transfer of annual leave to an employee affected by a personal emergency. Under the interim regulations, an employee who has been affected by a personal emergency *on or after December 22, 1987,* may submit an application to his or her employing agency to become a leave recipient. Annual leave transferred under the interim regulations will be available for use on a current basis or may be retroactively substituted for leave without pay or used to liquidate advanced annual or sick leave granted to an *approved* leave recipient on or after October 30, 1986 (the date of enactment of Pub. L. 99–591), in response to the personal emergency.

Because the interim regulations delegate to each Federal agency the responsibility for approving applications to become a leave recipient, each Federal agency must establish procedures for administering this program as quickly as possible. Before approving an application to become a leave recipient, the interim regulations require the potential leave recipient's employing agency to determine that the absence from duty without available paid leave because of the personal emergency is (or is expected to be) at least 10 workdays. Though an agency must accept applications to become a leave recipient before establishing its administrative procedures, the approval and actual transfer of annual leave to a leave recipient cannot be accomplished until those procedures have been established.

We anticipate that the needs of most leave recipients can be satisfied through the transfer of annual leave from other employees of the leave recipient's employing agency. However, if the leave recipient's employing agency determines that the amount of annual leave transferred by leave donors within the agency may not be sufficient to meet the needs of the leave recipient, the employing agency may accept the transfer of annual leave from a leave donor of another agency. In addition, the interim regulations limit the total amount of annual leave that may be donated by any employee in a leave year to ensure that each leave donor retains some annual leave for personal use and to control the donation of annual leave that otherwise would be subject to forfeiture at the end of the leave year.

Under 5 U.S.C. 7351, an employee is prohibited from soliciting a contribution from another employee for a gift to an official superior, making a donation as a gift to an official superior, or accepting a gift from an employee receiving less pay. Therefore, the interim regulations prohibit a leave recipient's employing agency from transferring annual leave to a leave donor's official superior or an employee in a position at a higher grade or pay level than the leave donor.

A leave recipient may use transferred annual leave for the same purposes as if he or she had accrued the leave. However, the transferred annual leave will not be the basis for a lump-sum payment upon separation of the recipient. As required by Pub. L. 100–200, to the extent administratively feasible (as determined by the leave recipient's employing agency), any transferred annual leave remaining to the credit of the leave recipient will be restored to the leave donors when the personal emergency terminates. The interim regulations also provide that if a leave recipient's application for disability retirement has been approved by the Office of Personnal Management, the leave recipient may not receive or use any additional transferred annual leave, and the personal emergency is considered to be terminated.

Pursuant to section 553 (b)(3)(B) and (d)(3) of title 5, United States Code, I find that good cause exists for waiving the general notice of proposed rulemaking and for making this amendment effective in less than 30 days. The notice and the 30-day delay in the effective date are being waived because of the need to facilitate the implementation of the temporary leave transfer program by Federal agencies.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they will affect only Federal employees and agencies.

List of Subjects in 5 CFR Part 630

Government employees, Employee benefit plan.

U.S. Office of Personnel Management.
Constance Horner,
Director.

Accordingly, the Office is amending Part 630 of Title 5 of the Code of Federal Regulations as follows:

PART 630—ABSENCE AND LEAVE

1. The authority citation for Part 630 is revised to read as set forth below:

Authority: 5 U.S.C. 6311; Section 630.303 also issued under 5 U.S.C. 6133(a); Section 630.601 and Subpart F also issued under E.O. 12228; Subpart G also issued under 5 U.S.C. 6305; Subpart H issued under 5 U.S.C. 6326; Subpart I also issued under Pub. L. 100–202.

2. In Part 630, Subpart I is revised to read as follows:

* * * * *

Subpart I—Temporary Leave Transfer Program

Sec.

630.901 Purpose and applicability.
630.902 Definitions.
630.903 Administrative procedures.
630.904 Application to become a leave recipient.
630.905 Approval of application to become a leave recipient.
630.906 Transfer of annual leave.
630.907 Limitations on donation of annual leave.
630.908 Use of transferred annual leave.
630.909 Termination of personal emergency.
630.910 Restoration of transferred annual leave.
630.911 Prohibition of coercion.
630.912 Records and reports.
630.913 Termination of temporary leave transfer program.
630.914 Treatment of leave recipients selected under Public Laws 99–500 and 99–591 and Executive Order 12589 of March 18, 1987.

Subpart I—Temporary Leave Transfer Program

§ 630.901 Purpose and applicability.

(a) *Purpose.* The purpose of this subpart is to set forth procedures and requirements for a temporary leave transfer program under which the unused accrued annual leave of one agency officer or employee may be transferred for use by another agency officer or employee who needs such leave because of a personal emergency.

(b) *Applicability.* This subpart applies to officers and employees to whom subchapter I of chapter 63 of Title 5, United States Code, applies.

§ 630.902 Definitions.

"Agency" means an "Executive agency," as defined in 5 U.S.C. 105.

"Employee" has the meaning given that term in 5 U.S.C. 6301(2).

"Leave donor" means an employee whose voluntary written request for transfer of annual leave to the annual leave account of a leave recipient is approved by his or her own employing agency.

"Leave recipient" means a current employee for whom the employing agency has approved an application to receive annual leave from the annual leave accounts of one or more leave donors.

"Personal emergency" means a medical or family emergency or other hardship situation that is likely to require an employee's absence from duty for a prolonged period of time and to result in a substantial loss of income to the employee because of the unavailability of paid leave.

"Representative rate" has the meaning given that term in § 536.102 of this chapter.

§ 630.903 Administrative procedures.

Each Federal agency shall establish procedures to administer the temporary leave transfer program established by the Office of Personnel Management under Pub. L. 100–202 and this subpart.

§ 630.904 Application to become a leave recipient.

(a) An employee who has been affected by a personal emergency on or after December 22, 1987, may make written application to his or her employing agency to become a leave recipient. If such an employee is not capable of making application on his or her own behalf, another employee of the potential leave recipient's employing agency may make written application on his or her behalf.

(b) Each application shall be accompanied by the following information concerning each potential leave recipient:

(1) The name, position title, and grade or pay level of the potential leave recipient;

(2) A brief description of the nature, severity, and anticipated duration of the medical, family, or other hardship situation affecting the potential leave recipient; and

(3) Any additional information that may be required by the potential leave recipient's employing agency, including medical documentation, if appropriate.

§ 630.905 Approval of application to become a leave recipient.

(a) The potential leave recipient's employing agency shall review an application to become a leave recipient under procedures established by the employing agency for the purpose of determining that the potential leave recipient has been affected, on or after December 22, 1987, by a "personal emergency," as defined in § 630.902 of this part.

(b) Before approving an application to become a leave recipient, the potential leave recipient's employing agency shall determine that the absence from duty without available paid leave because of the personal emergency is (or is expected to be) at least 10 workdays.

(c) In making a determination as to whether a "personal emergency" is likely to result in a substantial loss of income, an agency shall not consider factors other than whether the absence from duty without available paid leave is (or is expected to be) at least 10 workdays.

(d) If the application is approved, the employing agency shall notify the leave recipient (or another employee who made application on behalf of the leave recipient), within 30 calendar days after the date the application was received (or the date the employing agency established its administrative procedures, if that date is later), that—

(1) The application has been approved; and

(2) Other employees of the leave recipient's employing agency may request the transfer of annual leave to the account of the leave recipient.

(e) If the application is not approved, the employing agency shall notify the applicant (or another employee who made application on behalf of the potential leave recipient), within 30 calendar days after the date the application was received (or the date the employing agency established its administrative procedures, if that date is later)—

(1) That the application has not been approved; and

(2) Of the reasons for its disapproval.

§ 630.906 Transfer of annual leave.

(a) An employee may submit a voluntary written request to his or her own employing agency that a specified number of hours of his or her accrued

annual leave be transferred from his or her annual leave account to the annual leave account of a specified leave recipient. Except as provided in paragraph (e) of this section, annual leave may be transferred only to a leave recipient employed by the leave donor's employing agency.

(b) Except as provided in paragraph (c) of this section and subject to the limitations on the amount of annual leave that may be donated by a leave donor under § 630.909 of this part, all or any portion of the annual leave requested under paragraph (a) of this section may be transferred to the annual leave account of the specified leave recipient under procedures established by the leave recipient's employing agency.

(c) A leave recipient's employing agency shall not transfer annual leave to a leave donor's official superior or an employee in a position at a higher grade or pay level than the leave donor. In the case of annual leave transfers between employees under different pay schedules or pay systems, the representative rate of the grade or pay level of the leave recipient shall be compared with the representative rate of the grade or pay level of the potential leave donor. If the representative rate of the grade or pay level of the leave recipient is greater than the representative rate of the grade or pay level of the potential leave donor, the leave recipient's employing agency shall not transfer annual leave from the potential leave donor to the leave recipient.

(d) Annual leave transferred under this section may be substituted retroactively for periods of leave without pay (LWOP) or used to liquidate an indebtedness for advanced annual or sick leave granted on or after October 30, 1986, or a later date fixed by the leave recipient's employing agency as the beginning of the period of personal emergency for which LWOP or advanced annual or sick leave was granted.

(e) A leave recipient's employing agency may accept the transfer of annual leave from leave donors employed by one or more other agencies when, in its judgment, the amount of annual leave transferred from leave donors employed by the leave recipient's employing agency may not be sufficient to meet the needs of the leave recipient. Before accepting the transfer of annual leave from a leave donor of another employing agency, the leave recipient's employing agency shall verify that the leave donor's employing agency has approved the leave donor's request to transfer annual leave to the specified leave recipient.

§ 630.907 Limitations on donation of annual leave.

(a) In any one leave year, a leave donor may donate no more than a total of one-half of the amount of annual leave he or she would be entitled to accrue during the leave year in which the donation is made.

(b) A leave donor who is projected to have annual leave that otherwise would be subject to forfeiture at the end of the leave year under 5 U.S.C. 6304(a) may donate no more than the number of hours remaining in the leave year (as of the date of the transfer) for which the leave donor is scheduled to work and receive pay.

§ 630.908 Use of transferred annual leave.

(a) A leave recipient may use annual leave transferred to his or her annual leave account under § 630.906 of this part in the same manner and for the same purposes as if he or she had accured the annual leave under 5 U.S.C. 6303. However, annual leave that accrues to the account of the leave recipient shall be used before any transferred annual leave.

(b) The approval and use of transferred annual leave shall be subject to all of the conditions and requirements imposed by Chapter 63 of Title 5, United States Code, Part 630 of this chapter, and the employing agency on the approval and use of annual leave accrued under 5 U.S.C. 6303, except that transferred annual leave may accumulate without regard to the limitation imposed by 5 U.S.C. 6304(a).

(c) Transferred annual leave may not be—

(1) Transferred to another leave recipient under this subpart;

(2) Transferred to another Federal agency upon the leave recipient's transfer of employment;

(3) Included in a lump-sum payment under 5 U.S.C. 5551 or 5552; or

(4) Made available for recredit under 5 U.S.C. 6306 upon reemployment by a Federal agency.

§ 630.909 Termination of personal emergency.

(a) The personal emergency affecting a leave recipient shall terminate—

(1) When the leave recipient's employment is terminated by the agency that approved his or her application to become a leave recipient;

(2) At the end of the biweekly pay period in which the leave recipient's employing agency determines that the leave recipient is no longer affected by a personal emergency; or

(3) At the end of the biweekly pay period in which the leave recipient's employing agency receives notice that the Office of Personnel Management has approved an application for disability retirement for the leave recipient under the Civil Service Retirement System or the Federal Employees Retirement System.

(b) The leave recipient's employing agency shall continously monitor the status of the personal emergency affecting the leave recipient to ensure that the leave recipient continues to be affected by a personal emergency.

(c) When the personal emergency affecting a leave recipient terminates, no further requests for transfer of annual leave to the leave recipient may be granted, and any unused transferred annual leave remaining to the credit of the leave recipient shall be restored to the leave donors under § 630.910 of this part.

§ 630.910 Restoration of transferred annual leave.

(a) Under procedures established by the leave recipient's employing agency, any transferred annual leave remaining to the credit of a leave recipient when the personal emergency terminates shall be restored, to the extent administratively feasible (as determined by the leave recipient's employing agency), by transfer to the annual leave accounts of leave donors currently employed by a Federal agency and subject to Chapter 63 of Title 5, United States Code, on the date the personal emergency terminates, as provided in paragraphs (b) and (c) of this section.

(b) The amount of unused transferred annual leave to be restored to each leave donor shall be determined as follows:

(1) Divide the number of hours of unused transferred annual leave by the total number of hours of annual leave transferred to the leave recipient;

(2) Multiply the ratio obtained in paragraph (b)(1) of this section by the number of hours of annual leave transferred by each leave donor eligible for restoration under paragraph (a) of this section; and

(3) Round the result obtained in paragraph (b)(2) of this section to the nearest increment of time established by the leave donor's employing agency to account for annual leave.

(c) If the total number of eligible leave donors exceeds the total number of hours of annual leave to be restored, no unused transferred annual leave shall be restored. In no case shall the amount of annual leave restored to a leave donor exceed the amount transferred to the leave recipient by the leave donor.

(d) Transferred annual leave restored to the account of a leave donor before the beginning of the third biweekly pay period before the end of the leave year shall be subject to the limitation imposed by 5 U.S.C. 6304(a).

(e) Transferred annual leave restored to the account of a leave donor after the beginning of the third biweekly pay period before the end of the leave year shall not be subject to the limitation imposed by 5 U.S.C. 6304(a) until the end of the leave year following the leave year in which the transferred annual leave was restored.

§ 630.911 Prohibition of coercion.

(a) An employee may not directly or indirectly intimidate, threaten, or coerce, or attempt to intimidate, threaten, or coerce, any other employee for the purpose of interfering with any right such employee may have with respect to donating, receiving, or using annual leave under this subpart.

(b) For the purpose of paragraph (a) of this section, the term "intimidate, threaten, or coerce" includes promising to confer or conferring any benefit (such as an appointment or promotion or compensation) or effecting or threatening to effect any reprisal (such as deprivation of appointment, promotion, or compensation).

§ 630.912 Records and reports.

The Office of Personnel Management may require agencies to maintain records and report pertinent information to the Office concerning the administration of the temporary leave transfer program for the purpose of evaluating the desirability, feasibility, and cost of a voluntary leave transfer program.

§ 630.913 Termination of temporary leave transfer program.

(a) The temporary leave transfer program shall terminate on September 30, 1988.

(b) If the temporary leave transfer program terminates before the termination of the personal emergency affecting a leave recipient, any annual leave transferred to the leave recipient before the termination of the temporary leave transfer program shall remain available for use by the leave recipient until the termination of the personal emergency.

§ 630.914 Treatment of leave recipients selected under Public Laws 99–500 and 99–591 and Executive Order 12589 of March 18, 1987.

(a) Except as provided in paragraph (b) of this section, the regulations governing the program established by the Office of Personnel Management under Public Law 100–202 shall apply to leave recipients selected under Public Laws 99–500 and 99–591 and Executive Order 12589 of March 18, 1987.

(b) The authority to transfer sick leave to a leave recipient selected under Public Laws 99–500 and 99–591 and Executive Order 12589 of March 18, 1987, shall continue until April 7, 1988. After that date, no further transfers of sick leave may be permitted. However, any sick leave transferred to such a leave recipient before that date shall remain available for use by the leave recipient until the termination of the personal emergency.

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 907 and 908

Expenses and Assessment Rates for Specified Marketing Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule authorizes expenditures and establishes assessment rates under Marketing Order Nos. 907 and 908 for the 1987–88 fiscal year established for each order. Funds to administer these programs are derived from assessments on handlers.

EFFECTIVE DATES: November 1, 1987, through October 31, 1988 (§§ 907.225 and 908.227).

FOR FURTHER INFORMATION CONTACT: Patricia A. Petrella, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456; telephone: (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order Nos. 907 (7 CFR Part 907) and 908 (7 CFR Part 908), regulating the handling of California-Arizona navel and Valencia oranges. Both orders are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "nonmajor" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities.

While this action will impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs will be significantly offset by the benefits derived from the operation of the marketing orders. Therefore, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

A proposed rule was issued on January 27, 1988, and published in the **Federal Register** (53 FR 2850, February 2, 1988). That document contained a proposal to add §§ 907.225 and 908.227 to establish expenses and assessments for the Navel Orange Administrative Committee and the Valencia Orange Administrative Committee (Committees), respectively. That rule provided that interested persons could file comments through February 12, 1988. No comments were received.

It is found that the specified expenses are reasonable and likely to be incurred and that such expenses and the specified assessment rates to cover such expenses will tend to effectuate the declared policy of the Act.

These budgets and assessment rates should be expedited because the Committees need to have sufficient funds to pay their expenses which are incurred on a continuous basis. In addition, handlers are aware of this action which was recommended by the Committees at public meetings. Therefore, the Secretary also finds that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553).

List of Subjects in 7 CFR Parts 907 and 908

Marketing agreements and orders, California, Arizona, Oranges, Navel, Valencia.

For the reasons set forth in the preamble, §§ 907.225 and 908.227 are added as follows:

PARTS 907 AND 908—[AMENDED]

1. The authority citation for both 7 CFR Parts 907 and 908 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. New §§ 907.225 and 908.227 are added to read as follows: (*These sections will not appear in the Code of Federal Regulations.*)

§ 907.225 Expenses and assessment rate.

Expenses of $1,160,020 by the Navel Orange Administrative Committee are authorized, and an assessment rate of $0.026 per carton of navel oranges is established for the fiscal year ending October 31, 1988. Unexpended funds from the 1987–88 fiscal year may be carried over as a reserve.

§ 908.227 Expenses and assessment rate.

Expenses of $669,030 by the Valencia Orange Administrative Committee are authorized, and an assessment rate of $0.029 per carton of Valencia oranges is established for the fiscal year ending October 31, 1988. Unexpended funds from the 1987–88 fiscal year may be carried over as a reserve.

Dated: March 3, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

---

7 CFR Part 959

Onions Grown in South Texas; Amendment to Rules and Regulations To Authorize Collection of Planting Data

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule requires handlers to provide information to the South Texas Onion Committee on onion plantings periodically during the planting season. Planting times for onions are staggered so that the entire crop will not mature at the same time. By knowing when the onions were planted and the number of acres planted, the industry will be better able to judge the volume of available supplies during the shipping period and plan the activities of the marketing development program to coincide with the heaviest volume.

EFFECTIVE DATE: April 7, 1988.

FOR FURTHER INFORMATION CONTACT: Robert F. Matthews, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456; telephone 202–447–2431.

SUPPLEMENTARY INFORMATION: This rule is effective under Marketing Order No. 959 (7 CFR Part 959), regulating the handling of onions grown in South Texas. This order is authorized by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the information collection requirements included in this rule have been approved by the Office of Management and Budget (OMB) under OMB No. 0581–0074.

Notice was given in the December 28, 1987, **Federal Register** (52 FR 48826), affording interested persons 30 days in which to file written comments. None were filed.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act and rules issued thereunder are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 40 handlers of onions subject to regulation under the South Texas Onion Marketing Order and approximately 160 onion producers in the production area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of South Texas onions may be classified as small entities.

This rule requires handlers to report to the committee the acreage and planting dates of all onions that they anticipate handling during the shipping season. Growers typically contract with handlers prior to the beginning of the season to arrange for sorting, grading, packing and, in some cases harvesting. During this period, handlers and the growers they service usually decide jointly on planting schedules so that acreage that matures during a specific interval does not exceed the capacity of the handler's facilities. Hence, handlers are well aware of the size and timing of plantings since they took an active part in the planting phase.

For the past five seasons the South Texas Onion Committee has undertaken a market development program aimed at finding ways to increase the movement of production area onions. The program has expanded each year, its budget increasing from $25,000 the first season to $141,351 for the upcoming season. The program has centered around promoting South Texas onions within the trade, with emphasis on receivers, retailers, and food page editors.

Experience during the past five seasons has indicated a need for information concerning the anticipated volume of marketings on a weekly or bi-weekly basis during the shipping season. With this information available, plans can be developed before the season begins in order to allocate program resources to produce the best results. The committee believes the best method for obtaining the necessary information is to require handlers to report actual plantings to the committee every two weeks during the planting season. Additionally, the information developed from these reports will be made available to the industry, on a composite basis to avoid divulging individual handlers' operations. This should further aid growers and handlers in making marketing decisions during the season. Inasmuch as the information desired by the committee is already available, having been developed by the handlers themselves, the additional reporting burden will be minimal.

Based on the above, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of the information and recommendation submitted by the committee and other available information, it is found that adding § 959.115 will tend to effectuate the declared policy of the Act.

List of Subjects in 7 CFR Part 959

Marketing agreements and orders, Onions, Texas.

For the reasons set forth in the preamble, 7 CFR Part 959 is amended as follows;

PART 959—ONIONS GROWN IN SOUTH TEXAS

1. The authority citation for 7 CFR Part 959, Onions Grown in South Texas, continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Part 959, Subpart—Rules and Regulations, is hereby amended by adding a new § 959.115 as follows:

§ 959.115 Planting reports.

Each handler shall furnish every two weeks during the planting season to the committee, on a form provided by the committee, the number of acres of onions planted by the handler or growers for whom the handler packs onions during such period and the location of such plantings.

Dated: March 3, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Parts 1823, 1900, 1940, 1951, 1955, 1962, 1965, and 1980

Highly Erodible Land and Wetland Conservation

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to finalize an interim rule and to include servicing requirements which set forth the terms and conditions under which a person who has produced an agricultural commodity on highly erodible land or converted wetland shall be declared ineligible for insured and guaranteed Farmer Program loans and loans to Indian Tribes and Tribal Corporations administered by the Farmers Home Administration, as required by Subtitles B and C of Title XII of the Food Security Act of 1985 (Pub. L. 99–198). This rule implements and is consistent with the Department of Agriculture's rule for implementing Subtitles B and C which was issued in the **Federal Register** of September 17, 1987 (52 FR 35194).

EFFECTIVE DATE: March 8, 1988.

FOR FURTHER INFORMATION CONTACT: John E. Hansel, Environmental Protection Specialist, Farmers Home Administration, USDA, Room 6309, South Agricultural Building, 14th Street and Independence Avenue, SW., Washington, DC 20250, telephone (202) 382–9619.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1, which implements Executive Order 12291, and in conjunction with the Departmental rule on this subject has been classified as major. It has been determined that an annual effect on the economy of $100 million or more may result from implementation of the provisions of this rule and the Department's rule on this same subject. Copies of the Department's regulatory impact analysis are available upon request from Mr. Alex King, Program Specialist, Cotton, Grain, and Rice Price Support Division, Agricultural Stabilization and Conservation Service (ASCS), United States Department of Agriculture (USDA), P.O. Box 2415, Washington, DC 20013, telephone: (202) 382–9886.

It has been determined that this action in combination with the Department's rule on this same subject may have a significant economic impact on a substantial number of small entities. The Department's analysis prepared for this action includes a regulatory flexibility analysis.

Intergovernmental Consultation

For the reasons set forth in 7 CFR Part 3015, Subpart V, "Intergovernmental Review of Department of Agriculture Programs and Activities" (December 1, 1983), Emergency Loans (10.404), Farm Operating Loans (10.406), Farm Ownership Loans (10.407) and Indian Tribes and Tribal Corporations (10.421) are excluded from the scope of Executive Order 12372. This order requires intergovernmental consultation with State and local officials.

Programs Affected

These changes affect the following FmHA programs are listed in the Catalog of Federal Domestic Assistance:

10.404—Emergency Loans
10.406—Farm Operating Loans
10.407—Farm Ownership Loans
10.421—Loans to Indian Tribes and Tribal Corporations

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." Based on the Department's environmental assessment prepared for the interim rule and the review of this assessment made in connection with issuance of the Department's final rule (See 52 FR 35194), it has been determinated that the final action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

Discussion of Final Rule

The interim rule was published by the Office of the Secretary, USDA, and Farmers Home Administration (FmHA), on June 27, 1986, in the **Federal Register** (51 FR 23496–23514). The Department has finalized all of the interim rule except for the FmHA portion which is being finalized by this publication.

Memorandum of Law

I have reviewed the regulations which the Farmers Home Administration (FmHA) is issuing as a final rule to implement Subtitles B and C of Title XII of the Food Security Act of 1985 (Pub. L. 99–198). I find that these regulations comply with that statute and that FmHA has the authority to issue such regulations pursuant to section 339 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1989) and section 1244 of the Food Security Act of 1985 (16 U.S.C. 3844).

Christopher Hicks,

General Counsel.

December 11, 1987.

The Farmers Home Administration (FmHA) consequently amends its regulations to provide for the requirements of Subtitles B and C of Title XII of the Food Security Act of 1985 (the Act), 16 U.S.C. 3801 *et seq.* Those provisions of the Act remove any incentives that the FmHA financial assistance programs could provide recipients to cultivate highly erodible land or to convert wetlands for the purpose of producing an agricultural commodity. Sections 1211 and 1221 of the Act provide, generally, that any person who, in any crop year, produces an agricultural commodity, without an approved conservation system, on a nonexempt field in which highly erodible land is predominant or produces an agricultural commodity on any wetland converted after December 23, 1985, will be ineligible for loans made, insured, or guaranteed under any provision of law administered by the FmHA if it is determined that the proceeds of such loan will be used for a purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetland for agricultural commodity production.

Discussion of Comments and FmHA's Responses

Section 1940.304—Special policy: Seven comments were received concerning the FmHA wetland protection policy contained within this section. Respondents were concerned that this policy was weaker than that required by the wetland conservation provisions of the Food Security Act. After reviewing the comments received on this point, it is evident that there is a

misunderstanding and that clarifications are necessary.

The reason for the confusion is that this section predates the Act. The wetland protection policy within it was originally based upon the requirements of Executive Order 11990, Protection of Wetlands, and applies to all FmHA financial assistance programs. Under the requirements of the Executive Order, FmHA will not finance the conversion of a wetland unless there is no practicable alternative to the conversion and all practicable mitigation measures have been included in the proposal.

On the other hand, the wetland conservation provisions of the Food Security Act apply only to Farmer Program loans and loans to Indian Tribes and Tribal Corporations and are more restrictive than the Executive Orders. No discretion is provided FmHA. Financial assistance cannot be provided for the conversion of a nonexempt wetland in order to produce an agricultural commodity.

The interim rule amended this section and incorporated for the above-mentioned activities the more restrictive provisions of the Act by a cross-reference to the FmHA implementation requirements contained in Exhibit M of Subpart G of Part 1940 of this chapter. Since the cross-reference has resulted in confusion, the section has been further amended to clarify that the Act's wetland conservation requirements supersede those of the Executive Order for these activities.

Exhibit M of Subpart G of Part 1940, Paragraph 2.—Applicability: Numerous FmHA field offices have asked why the interim rule does not apply to loans for the sale of inventory property, loans to Indian Tribes and some loan servicing actions on loans made prior to the effective date of the Food Security Act. Some servicing actions can be the equivalent of new financial assistance and, therefore, this is a valid question. After reviewing these concerns, it has been determined that the following loan servicing actions fall under the requirements of Exhibit M: subordinates, transfers, and assumptions. Loans to Indian Tribes and Tribal Corporations as well as loans for the sale of inventory property have also been included under the scope of Exhibit M.

Exhibit M of Subpart G of Part 1940, Paragraph 3.b.—Highly Erodible Land Conservation: Six comments were received indicating that Exhibit M only provides for approval of conservation plans and conservation systems by the SCS. Since conservation districts also have these approval authorities, the commenters requested that the district's authorities also be referenced. This change has been made at all relevant points in Exhibit M with the provision that FmHA will consult with SCS to determine if a conservation district has approved a conservation plan or system.

Exhibit M of Subpart G of Part 1940, Paragraph 3.c.—Wetland conservation: As requested by one commenter, the language in this subparagraph has been revised to repeat the definition of a converted wetland contained in Section 12.2(a)(6) of Subpart A of Part 12 of this chapter.

Exhibit M of Subpart G of Part 1940, Paragraph 3.d.—Use of loan proceeds: One commenter strongly supported the FmHA requirement that if FmHA loan proceeds are substituted to pay other farming costs while non-FmHA funds are used by the borrower to undertake a prohibited activity, this substitution will be deemed to be a violation of the provisions of Exhibit M. Another commenter stated that this was a restrictive approach. Three others recommended that since it will be very difficult for FmHA to prove that such a substitution of resources has occurred, FmHA should conclude that substitution has occurred whenever during the term of a loan covered by Exhibit M, the borrower undertakes a prohibited activity with non-FmHA funds. Since the Agency's field staff has frequently raised the same concern over the difficulty of identifying a substitution of resources, Exhibit M has been changed in the manner recommended. Affected borrowers who believe that they have not substituted resources will be able to explain the facts of their case to the Agency and appeal any adverse decision under the Agency's appeal process.

Also under paragraph 3.d., another party commented that it was unfair of FmHA to deny a farm ownership loan to an applicant because a previous owner had converted a wetland on the property after the date of the act. This is not a correct understanding of Exhibit M's requirements. FmHA would not categorically deny such a loan request. FmHA could approve the loan and meet the requirements of Exhibit M if (1) the applicant agreed not to cultivate the converted wetland for at least ten crop years after the crop year in which the wetland was converted and (2) the applicant can demonstrate, should it desire to cultivate the converted wetland, that after the expiration of the ten-year period it will be able to repay the loan without reliance upon any USDA financial assistance programs subject to wetland conservation restrictions. As was stated in the preamble to the interim rule, the ten-year prohibition is necessary in order to provide an economic disincentive to the approach of using non-FmHA funds to convert a wetland and then applying to FmHA for a loan to assist in cultivating the converted wetland.

Exhibit M of Subpart G of Part 1940, Paragraph 6.—FmHA's application review: FmHA field officials recommended that rather than inserting into loan approval documents on a case by case basis special loan conditions for compliance with Exhibit M, these conditions should be printed on FmHA loan approval documents. This recommendation has been followed and paragraphs 6 and 7 of the exhibit have been revised accordingly. So that borrowers will not miss the significance of these conditions, affected borrowers will be notified of the conditions by letter at the time of loan acceptance.

Exhibit M of Subpart G of Part 1940, Paragraph 11.c.—Exemptions from wetland conservation: In addition to amending the interim rule in response to public comments, additional amendments are included in this final rule in order to incorporate the changes made by the Department's final rule. The most important of these incorporations implements for FmHA's inventory property the Department's position regarding abandonment of crop production on a converted wetland. (See § 12.32 of 52 FR 35208) Whenever abandonment occurs and wetland conditions return, the affected area is considered to be wetland again for purposes of the rule. FmHA has determined that for its inventory properties, crop production will be considered to have been abandoned on a converted wetland either at the earlier of the time the former owner so abandoned crop production or at the time FmHA caused crop production to be abandoned after the property comes into FmHA's inventory. Additionally, should FmHA inventory property containing a converted wetland be leased, the lease will restrict the converted wetland from crop production.

Finally, the interim rule has been amended to provide editorial changes and clarifications where our experience showed that some confusion existed. All portions of the interim rule that have been amended are reprinted below in this **Federal Register** publication Unchanged portions are not reprinted and are effective as originally published.

Therefore, Chapter XVIII, Title 7, Code of Federal Regulations is amended as follows:

PART 1823—ASSOCIATION LOANS AND GRANTS—COMMUNITY FACILITIES, DEVELOPMENT, CONSERVATION, UTILIZATION

1. The authority citation for Part 1823 continues to read as follows:

Authorities: 25 U.S.C. 490; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Under Secretary for Small Communities and Rural Development, 7 CFR 2.70.

Subpart N—Loans to Indian Tribes and Tribal Corporations

2. Section 1823.405 is revised to read as follows:

§ 1823.405 Ineligible Loan Purposes.

Loan funds may not be used for any improvement or development purposes, acquisition or repair of buildings or personal property, payment of operating costs, refinancing of debts, payment of finder's fees, or similar costs. Loans also may not be made for any purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity, as further explained in Exhibit M of Subpart G of Part 1940 of this chapter.

PART 1900—GENERAL

3. The authority citation for Part 1900 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70

Subpart B—Farmers Home Administration Appeal Procedure

4. Section 1900.55 is amended by redesignating paragraphs (c) through (f) as (d) through (g), and by changing the references to paragraphs (c) and (d) in the first sentence of the newly redesignated paragraphs (f) and (g) to (d) and (e), and by adding a new paragraph (c) to read as follows:

§ 1900.55 FmHA actions to limit the need for appeals.

* * * * *

(c) Appeals from applicants for, or borrowers of, Farmer Programs loans or loans to Indian Tribes and Tribal Corporations who are denied assistance based on reasons relating to highly erodible land, wetland or converted wetland (see Exhibit M of Subpart G of Part 1940 of this chapter for applicable FmHA requirements) will be handled as follows: Appeals questioning either the presence of a wetland, converted wetland, or highly erodible land on a particular property or application to a property of the exemptions identified in paragraph 11 b and c of Exhibit M of Subpart G of Part 1940 of this chapter must be filed directly with the USDA agency making the determination in accordance with its administrative appeal procedures. If the denial of assistance involves an adverse decision based on determinations made both by FmHA and another USDA Agency, the appeal will be handled by both agencies in two separate appeals which as much as possible should be handled concurrently. See § 12.12 of Subpart A of Part 12 of Subtitle A (Attachment 1 of Exhibit M of Subpart G of Part 1940 of this chapter which is available in any FmHA office).

* * * * *

PART 1940—GENERAL

5. The authority citation for Part 1940 is revised to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 16 U.S.C. 3844; 7 CFR 2.23; 7 CFR 2.70.

Subpart G—Environmental Program

6. Section 1940.304 is amended by revising paragraph (a)(1) to read as follows:

§ 1940.304 Special policy.

(a) * * *

(1) FmHA recognizes that its special mission of assisting rural areas composed of farms and rural towns, goes hand-in-hand with protecting the environmental resources upon which these systems are dependent. Basic resources necessary to both farm and rural settlements include important farmlands and forestlands, prime rangelands, wetlands, and floodplains. The definitions of these areas are contained in the Appendix to Departmental Regulation 9500–3, "Land Use Policy," which is included as Exhibit A. For assistance in locating and defining floodplains and wetlands, the locations and telephone numbers of the Federal Emergency Management Agency's regional offices have been included as Exhibit J, and similar information for the U.S. Fish and Wildlife Service's Wetland Coordinators has been included as Exhibit K. Given the importance of these resources, as emphasized in the Departmental Regulation, Executive Order 11988, "Floodplain Management," and Executive Order 11990, "Protection of Wetlands," it is FmHA's policy not to approve or fund any proposals that, as a result of their identifiable impacts, direct or indirect, would lead to or accommodate either the conversion of these land uses or encroachment upon them. The only exception to this policy is if the approving official determines that—

(i) There is no practicable alternative to the proposed action,

(ii) The proposal conforms to the planning criteria identified in paragraph (a)(2) of this section, and

(iii) The proposal includes all practicable measures for reducing the adverse impacts and the amount of conversion/encroachment.

For Farmer Program loans and guarantees and loans to Indian Tribes and Tribal Corporations, Exhibit M of this subpart imposes additional and more restrictive requirements regarding wetland and highly erodible land conservation. Unless otherwise exempted by the provisions of Exhibit M, the proceeds of any Farmer Program loan or loan to an Indian Tribe or Tribal Corporation made or guaranteed by FmHA cannot be used (i) for a purpose that will contribute to excessive erosion of highly erodible land (as defined in Exhibit M) or (ii) for a purpose that will contribute to conversion of wetlands (as defined in Exhibit M) to produce an agricultural commodity.

* * * * *

7. Exhibit C to Subpart G is amended by revising paragraph 1. to read as follows:

Exhibit C—Implementation Procedures for the Farmland Protection Policy Act; Executive Order 11988, Floodplain Management; Executive Order 11990, Protection of Wetlands; and Departmental Regulation 9500–3, Land Use Policy

1. *Background.* Subtitle I of the Agriculture and Food Act of 1981, Pub. L. 97–98, created the Farmland Protection Policy Act. The Act requires the consideration of alternatives when an applicant's proposal would result in the conversion of important farmland to nonagricultural uses. The Act also requires that Federal programs, to the extent practicable, be compatible with State, local government, and private programs and policies to protect farmland. The Departmental Regulation 9500–3, "Land Use Policy" (the Departmental Regulation), also requires the consideration of alternatives, but is much broader than the Act in that it addresses the conversion of land resources other than farmland. The Departmental Regulation is included as Exhibit A to this subpart. For additional requirements that apply to some Farmer Program loans and guarantees and loans to Indian Tribes and Tribal Corporations and that cover the conservation of wetlands and highly erodible land, see Exhibit M of this subpart.

* * * * *

8. Exhibit M to Subpart G is revised to read as follows:

Exhibit M—Implementation Procedures for the Conservation of Wetlands and Highly Erodible Land Affecting Farmer Program Loans and Loans to Indian Tribes and Tribal Corporations

1. *Background.* This exhibit implements the requirements of Subtitle B, Highly Erodible Land Conservation, and Subtitle C, Wetland Conservation, of Title XII of the Food Security Act of 1985, Pub. L. 99–198. The purposes of these Subtitles are to: Reduce soil loss due to wind and water erosion; protect the Nation's long term capability to produce food and fiber; reduce sedimentation; improve water quality; assist in preserving the Nation's wetlands; create better habitat for fish and wildlife through improved food and cover; and curb production of surplus commodities by removing certain incentives for persons to produce agricultural commodities on highly erodible land or converted wetland.

2. *Applicability.* The provisions of this exhibit apply to insured and guaranteed Farmer Program loans and loans to Indian Tribes and Tribal Corporations, subordinations, transfers and assumptions of such loans and leases and credit sales of inventory property. For the purpose of this exhibit, "Farmer Program loans" means Farm Operating Loans, Farm Ownership Loans, Emergency Loans, and Soil and Water Loans. As used in this exhibit, the word loan is meant to include guarantee as well. Applicant means an applicant for either an insured or guaranteed loan and borrower means a recipient of either an insured or guaranteed loan.

3. *FmHA prohibited activities.* Unless otherwise exempted by the provisions of this exhibit, the proceeds of any Farmer Program loan or loan to an Indian Tribe or Tribal Corporation made or guaranteed by FmHA will not be used either (a) for a purpose that will contribute to excessive erosion of highly erodible land, or (b) for a purpose that will contribute to conversion of wetlands to produce an agricultural commodity. (See § 12.2(a)(1) of Subpart A of Part 12 of Subtitle A of Title 7, which is Attachment 1 of this exhibit and is available in any FmHA office, for the definition of an agricultural commodity.) Consequently, any applicant proposing to use loan proceeds for an activity contributing to either such purpose, will not be eligible for the requested loan. Any borrower that uses loan proceeds in a manner that contributes to either such purpose will be in default on the loan.

a. *U.S. Department of Agriculture (USDA) definitions.* In implementing this exhibit, FmHA will use the USDA's definitions of the terms found at § 12.2 of Subpart A of Part 12 of Subtitle A of Title 7 (Attachment 1 of this exhibit which is available in any FmHA office).

b. *Highly erodible land conservation.* FmHA will conclude that excessive erosion of highly erodible land results or would result whenever (1) a field on which highly erodible land is predominant, as determined by the Soil Conservation Service (SCS), is or would be used to produce an agricultural commodity without conformance to a conservation system approved either by SCS or the appropriate conservation district, as evidenced by a statement from SCS, and (2) such field is not exempt from the provisions of this exhibit.

c. *Wetland conservation.* FmHA will conclude that a conversion of wetlands to produce an agricultural commodity has occurred or will occur whenever, as determined by SCS, (1) a wetland has or will be drained, dredged, filled, leveled, or otherwise manipulated (including any activity that results in impairing or reducing the flow, circulation, or reach of water) that makes possible the production of an agricultural commodity without further application of the manipulations described herein if (a) such production would not have been possible but for such action and (b) before such action such land was wetland and was neither highly erodible land nor highly erodible cropland; and (2) neither the affected wetland nor the activity affecting the wetland is exempt from the provisions of this exhibit.

d. *Use of loan proceeds.* To use loan proceeds for a purpose that contributes to either the excessive erosion of highly erodible land or the conversion of wetlands to produce an agricultural commodity means that loan proceeds will or have been used in a way that contributes to either excessive erosion of highly erodible land or the conversion of wetlands to produce an agricultural commodity by paying the costs of any of the following:

(1) The purchase of the affected land;

(2) Necessary planning, feasibility, or design studies;

(3) Obtaining any necessary permits;

(4) The purchase, contract, lease or renting of any equipment or materials necessary to carry out the land modification or conversion to include all associated operational costs such as fuel and equipment maintenance costs;

(5) Any labor costs;

(6) The planting, cultivating, harvesting, or marketing of any agricultural commodity produced on nonexempt highly erodible land to include any associated operational or material costs such as fuel, seed, fertilizer, and pesticide costs;

(7) Within the crop year in which the wetland conversion was completed plus the next ten crop years thereafter, the planting, cultivating, harvesting, or marketing of any agricultural commodity produced on the affected land to include any associated operational or materials costs such as fuel, seed, fertilizer and pesticide costs; or

(8) For the same time period as in subparagraph 3d(7) above, any costs associated with using for on-farm purposes an agricultural commodity grown on the affected land.

(9) Additionally, if loan proceeds will be or have been substituted to pay other costs at anytime during the life of the loan so that non-loan funds can be used to pay any of the above costs, it is deemed that loan proceeds will be or have been used for a purpose that contributes to the prohibited activities described in this paragraph.

4. *Prohibited activities under other USDA financial assistance programs.* Unless otherwise exempted, a person becomes ineligible for a variety of USDA financial assistance programs if that person produces in any crop year an agricultural commodity on either a field on which highly erodible land is predominant or a converted wetland. This ineligibility extends to any commodity produced during the crop year that the prohibited action occurs. The programs for which the person would be ineligible include price support payments, farm storage facility loans, disaster payments, crop insurance, payments made for the storage of an agricultural commodity, and payments received under a Conservation Reserve

Program Contract. Farmer Program applicants and borrowers and applicants for, and borrowers of, loans to Indian Tribes and Tribal Corporations, therefore, can be affected not only by the FmHA prohibited activities but also by the broad USDA sweep of the Subtitles B and C restrictions. Should such an applicant rely or plan to rely on any of these other USDA financial assistance programs as a source of funds to repay its FmHA loan(s) and then fail to meet the other program(s)' eligibility criteria related to wetland or highly erodible land conservation, repayment ability to FmHA or the lender of and FmHA guaranteed loan may be jeopardized. Consequently, those applicants who are applying for a loan and those borrowers who receive a loan after the effective date of Subtitles B and C, as designated in Part 12 of Subtitle A of Title 7, and who include in their projected sources of repayment, potential funds from any USDA program subject to some form of Subtitle B or C restrictions will have to demonstrate as part of their applications, and for borrowers, as part of their farm plan of operation, their ability to meet the other program(s)' eligibility criteria. Failure to meet the criteria will require the applicant or borrower either to document an alternative, equivalent source of revenues or, if possible, agree to undertake any steps necessary to gain eligibility for the other program(s). See paragraph 6 of this exhibit for a discussion of such steps.

5. *Applicant's responsibilities.*

a. *Required information.* Every applicant for a Farmer Program loan or a loan to an Indian Tribe or Tribal Corporation will be required to provide the following information and, as applicable, certification as part of the application for financial assistance. An application will not be considered to be complete until this information and certification are provided to FmHA. Once an applicant has provided FmHA with information from SCS on the presence of any highly erodible land, wetland, or converted wetland this information need not be provided again for a subsequent loan unless there is either a change in the property upon which FmHA loan proceeds will be applied or a change in the previous information, such as a change in the status of an exemption. There is a continuing responsibility on FmHA borrowers using other USDA financial assistance programs for repayment purposes to provide the County Supervisor with an executed copy of any similar certification required by the other USDA agency at the time of each required certification.

(1) A statement from the SCS indicating whether or not the applicant's farm property or properties contain either highly erodible land, wetland, or converted wetland and, if so, whether or not the applicant qualifies for a particular exemption to the provisions of this exhibit and as further detailed in paragraph 11 below. The property or properties will be listed and described in accordance with the Agriculture Stabilization and Conservation Service's (ASCS) farm records system. SCS's execution of Form SCS–CPA–26, "Highly Erodible Land and Wetland Conservation Determination," is necessary to meet this information requirement.

(2) If either highly erodible land, wetland, or converted wetland is present, the applicant's properly executed original or carbon copy of Form AD–1026, "Highly Erodible Land and Wetland Conservation Certification."

b. *Required actions.* If at any time during the application review process any of the information or basis for an applicant's certification changes, the applicant (or the lender in the case of a guaranteed loan) must immediately notify FmHA. If an applicant intends to produce an agricultural commodity on a nonexempt field on which highly erodible land is predominant, the applicant must develop a conservation system approved by SCS or the appropriate conservation district, demonstrate that it is or will be in compliance with the system at the time the field is to be used, and provide SCS's concurrence with this position.

6. *FmHA's application review.* The FmHA County Supervisor will review the information provided by the applicant from SCS regarding the presence of any highly erodible land, wetland, or converted wetland and any possible exemptions and take the actions warranted by the presence of one or more of the circumstances described below. In carrying out these actions, FmHA will consider the technical decisions rendered by the SCS and the ASCS, as assigned to these agencies by Subparts A, B, and C of Part 12 of Subtitle A of Title 7 and further explained in this exhibit, to be final and controlling in the remaining FmHA decisionmaking process for this exhibit. It must also be understood that the definition of a wetland used by SCS in implementing this exhibit applies only to this exhibit and not to other wetland protection provisions of Subpart G of Part 1940.

a. *No highly erodible land, wetland, or converted wetland present.* The requested loan can be approved under the provisions of this exhibit and, except for documenting this result in accordance with paragraph 8 of this exhibit, no further action is required.

b. *Converted wetland present.* The County Supervisor will consult with the applicant (and lender, in the case of a guaranteed loan) and the appropriate local office of the ASCS in order to determine if the converted wetland qualifies for the exemption specified in subparagraph c (1) of paragraph 11 of this exhibit. If so, no further action is necessary with respect to the converted wetland except for documenting the result. If the converted wetland does not qualify for an exemption, the County Supervisor will complete one or both of the following steps as the identified circumstances dictate.

(1) Step one. Review both the date that the wetland was converted and the proposed use of loan proceeds in order to determine if loan proceeds will be used for a prohibited activity as defined in subparagraph d of paragraph 3 of this exhibit. If not, the County Supervisor will so document this as specified in paragraph 8 of this exhibit; complete step two immediately below; and, if an insured loan will be approved, notify the applicant in writing, coincident with the transmittal of Form FmHA 1940–1, "Request For Obligation of Funds," and by using Form Letter 1940–G–1, "Notification of The Requirements of Exhibit M of FmHA Instruction 1940–G," that the loan approval instruments will contain compliance requirements affecting the applicant's converted wetland. If loan proceeds will be used for a prohibited activity, the applicant (and lender, in the case of a guaranteed loan) will be advised of the applicant's ineligibility for the FmHA loan being requested. The applicant (and lender, in the case of a guaranteed loan) will be advised of any modifications to the application that could cure the ineligibility. Not growing an agricultural commodity on the converted wetland would cure the ineligibility, but the substitution of non-FmHA funds to grow an agricultural commodity on the converted wetland would not.

(2) Step two. The County Supervisor will review the applicant's sources of loan repayment to determine if they include funds from a USDA financial assistance program(s) subject to wetland conservation restrictions. If so, the County Supervisor will implement the actions in subparagraph e of this paragraph.

c. *Highly erodible land or wetland present.* The County Supervisor will discuss with the applicant (and lender, in the case of a guaranteed loan) and review the intended uses of the FmHA loan proceeds as evidenced in any relevant application materials.

(1) *Proceeds to be used for prohibited activity.* If proceeds would be used for a prohibited activity, the applicant (and lender, in the case of a guaranteed loan) will be advised of its ineligibility for the FmHA loan. The applicant (and lender, in the case of a guaranteed loan) will be informed of any modifications to its application that could cure the ineligibility, including financially feasible eligible loan purposes that could be helpful in implementing a conservation plan or installing a conservation system, should either be an appropriate cure. Substitution of non-FmHA monies to accomplish the prohibited activity would not cure the ineligibility, but actual elimination of the activity from the applicant's farm plan of operation would.

(2) *Proceeds not to be used for a prohibited activity.* If loan proceeds are not planned to be used for a prohibited activity, the County Supervisor will perform the following tasks:

(a) Document the above determination in the applicant's file as specified in paragraph 8 of this exhibit.

(b) If an insured loan will be approved and the requirements of subparagraph c (2)(c) of this paragraph do not apply, notify the applicant in writing, coincident with the transmittal of Form FmHA 1940–1, "Request For Obligation of Funds," and by using Form Letter 1940–G–1, "Notification of The Requirements of Exhibit M of FmHA Instruction 1940–G," that the loan approval instruments will contain compliance requirements affecting the applicant's highly erodible land and/or wetland.

(c) Review the term of the proposed loan and take the following actions, as applicable.

(i) *Loan term exceeds January 1, 1990, but not January 1, 1995.* If the term of the proposed loan expires within this period and the applicant intends to produce an

agricultural commodity on highly erodible land that is exempt from the restrictions of this exhibit until either 1990 or two years after the SCS has completed a soil survey for the borrower's land, whichever is later, the County Supervisor will determine if it is financially feasible for the applicant, prior to loss of the exemption, to actively apply a conservation plan approved by SCS or the appropriate conservation district. See § 12.23 of Subpart A of Part 12 of Subtitle A of Title 7, which is Attachment 1 of this exhibit and is available in any FmHA office, for a definition of actively applying a conservation plan. Prior to loan approval, the applicant, the lender (if a guaranteed loan is involved), FmHA and SCS will resolve any doubts as to what extent production would be able to continue under application of a conservation plan and as to the financial implications on loan payment ability from both the potential costs of actively applying the conservation plan and the potential loss of revenues from any reduced acreage production base. The loan approval official will determine the financial implications of actively applying a conservation plan to the applicant's highly erodible land by developing a projected farm plan of operation or other farm financial projections that reflect adequate repayment on the full scheduled installments for all debt obligations at the time the conservation plan is being actively applied. If in making this determination, loan repayment ability cannot be demonstrated, FmHA will deny the loan application. If loan repayment ability can be demonstrated and an insured loan will be approved, the applicant will be advised in writing, coincident with the transmittal of Form FmHA 1940–1, "Request For Obligation of Funds," and using Form Letter 1940–G–1, "Notification of The Requirements of Exhibit M of FmHA Instruction 1940–G," that the loan approval instruments will contain compliance requirements affecting the applicant's highly erodible land. The applicant will also be advised that a statement from the SCS issued prior to either January 1, 1990, or two years after the SCS has completed a soil survey of the applicant's land (whichever is later) and stating that the applicant is actively applying an approved conservation plan will be considered adequate demonstration of compliance on the highly erodible land affected by

(ii) *Loan term exceeds January 1, 1995.* If the term of the proposed loan would exceed this date and the borrower intends to produce an agricultural commodity on highly erodible land that is exempt from the restrictions of the exhibit up until that date (see subparagraph b (4) of paragraph 11 of this exhibit) the County Supervisor will determine if it is financially feasible for the applicant, after January 1, 1995, to produce an agricultural commodity on the highly erodible land in compliance with a conservation system approved by SCS or the appropriate conservation district. Prior to loan approval, the applicant, the lender (if a guaranteed loan is involved), FmHA and SCS will resolve any doubts as to what extent production would be able to continue under a conservation system and as to the financial implications on loan repayment ability from both the potential costs of the conservation system and the potential loss of revenues from any reduced acreage production base. The loan approval official will determine the financial implications of compliance with a conservation system using the financial projection method(s) indicated in subparagraph c (2)(c)(i) of this paragraph. If loan repayment ability cannot be demonstrated, the application will be denied. If loan repayment ability can be demonstrated and an insured loan will be approved, the applicant will be advised in writing, coincident with the transmittal of Form 1940–1, "Request for Obligation of Funds," and using Form Letter 1940–G–1, "Notification of The Requirements of Exhibit M of FmHA Instruction 1940–G," that the loan approval instruments will contain compliance requirements affecting the applicant's highly erodible land. The applicant will also be advised that a statement from SCS issued prior to January 1, 1995, and stating that the applicant is in compliance with an approved conservation system will be considered adequate demonstration of compliance.

(d) Implement the actions in subparagraph e of this paragraph if the applicant plans to repay a portion of the loan with funds from a USDA financial assistance program subject to wetland or highly erodible land conservation restrictions.

d. *Highly erodible land present that was or is planted in alfalfa.* If the applicant plans to cultivate highly erodible land for the purpose of producing an agricultural commodity and that highly erodible land during each of the 1981 to 1985 crop years was planted in alfalfa in a crop rotation determined by SCS to be adequate for the protection of highly erodible land, the applicant is exempt until June 1, 1988, from the requirement to fully implement an approved conservation system on the highly erodible land. The County Supervisor, following procedures similar to those indicated in subparagraph c (2)(c)(i) of this paragraph, will determine if it is financially feasible for the applicant to apply a conservation system to the highly erodible land prior to the loss of the exemption on June 1, 1988. If loan repayment ability cannot be demonstrated, the application will be denied. If loan repayment ability can be demonstrated and an insured loan will be approved, the applicant will be advised in writing that the loan approval instruments will contain compliance requirements affecting the applicant's highly erodible land. The applicant will also be advised that a statement from SCS issued prior to June 1, 1988 and stating that the applicant is in compliance with an approved conservation system will be considered adequate demonstration of compliance with this requirement.

e. *Highly erodible land, wetland, or converted wetland present and applicant intends to use the USDA financial assistance program(s), including crop insurance, to repay FmHA loan.* The County Supervisor will consult with the applicant (and lender, in the case of a guaranteed loan) and the other USDA agency(s) to determine if the applicant is eligible for the latter's financial assistance. If not eligible, the applicant will have to demonstrate that an alternative source(s) of repayment will be available in order for further processing of the application to proceed.

7. *Required provisions in loan approval documents.*

a. *Insured loans.*

(1) *Promissory Notes.* For all loans to which this exhibit applies, all promissory notes must contain the provision indicated below: (Form FmHA 1940–17, "Promissory Note," has been revised so that the language will no longer be inserted as an addendum, but the following provision must be inserted as an addendum to Form FmHA 440–22, "Promissory Note (Association or Organization)," if the loan is being made to an Indian Tribe or a Tribal Corporation.)

"Addendum for Highly Erodible Land and Wetland Conservation"

Addendum to promissory note dated ________________ in the amount of $____________ at an annual interest rate of ____ percent. This agreement supplements and attaches to the above note.

Borrower recognizes that the loan described in this note will be in default should any loan proceeds be used for a purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity, as further explained in 7 CFR Part 1940, Subpart G, Exhibit M. If (1) the term of the loan exceeds January 1, 1990, but not January 1, 1995, and (2) Borrower intends to produce an agricultural commodity on highly erodible land that is exempt from the restrictions of Exhibit M until either January 1, 1990 or two years after the U.S. Soil Conservation Service (SCS) has completed a soil survey for the Borrower's land, whichever is later, the Borrower further agrees that, prior to the loss of the exemption from the highly erodible land conservation restrictions found in 7 CFR Part 12, Borrower must demonstrate that Borrower is actively applying on that land which has been determined to be highly erodible a conservation plan approved by the SCS or the appropriate conservation district in accordance with SCS's requirements. Furthermore, if the term of the loan exceeds January 1, 1995, Borrower further agrees that Borrower must demonstrate prior to January 1, 1995, that any production after that date of an agricultural commodity on highly erodible land will be done in compliance with a conservation system approved by SCS or the appropriate conservation district in accordance with SCS's requirements.

____

(Name of Borrower)

____

(Signature of Executive Official)

____

(Signature of Attesting Official)

(2) *Mortgages, deeds of trust and security agreements.* State Directors will consult with the Office of General Counsel and ensure that for all loans to which this exhibit applies a covenant is included in all mortgages, deeds of trust, and security agreements which reads as indicated below. Form FmHA 440–15, "Security Agreement (Insured Loans to Individuals)," and Form FmHA 440–4,

"Security Agreement (Chattels and Crops)," have been revised accordingly. Equivalent forms required in State supplements must be similarly revised.

[For mortgages or deeds of trust:]

"Borrower further agrees that the loan(s) secured by this instrument will be in default should any loan proceeds be used for a purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity, as further explained in 7 CFR Part 1940, Subpart G, Exhibit M."

[For security agreements:]

"Default shall also exist if any loan proceeds are used for a purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity, as further explained in 7 CFR Part 1940, Subpart G, Exhibit M."

b. *Guaranteed loans.*

(1) *Form FmHA 449–14, "Conditional Commitment for Guarantee," and Form FmHA 1980–15, "Conditional Commitment for Contract of Guarantee (Line of Credit)."* These forms must contain a condition that includes the following provisions:

(a) Informs the lender that FmHA's commitment is conditioned upon loan proceeds not being used for a purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity, as explained in this exhibit;

(b) Informs the lender of the lender's monitoring responsibilities under paragraph 10 of this exhibit; and;

(c) Requires the lender, for all borrowers having highly erodible land, wetland, or converted on their farm properties, to include provisions in its loan instruments similar to those contained in subparagraphs a (1) and (2) of this paragraph.

(2) *Lender's loan and security instruments.* These instruments must be modified as specified in subparagraph b(1)(c) of this paragraph.

8. *Required FmHA documentation.* The actions taken and determinations made by FmHA to comply with the provisions of this exhibit will be documented as part of the environmental review of the application. All actions subject to this exhibit will undergo at a minimum the completion of Form FmHA 1940–22, "Environmental Checklist for Categorical Exclusions." On the reverse of this form, the preparer will document as applicable (a) whether or not highly erodible land, wetland, or converted wetland is present, (b) if any exemption(s) applies, (c) the status of the applicant's eligibility for an FmHA loan under this exhibit, and (d) any steps the applicant must take prior to loan approval to retain or regain its eligibility. If the application under review meets the definition of a Class I action as defined in § 1940.311 of this subpart, the above documentation will be included as an exhibit to Form FmHA 1940–21, "Environmental Assessment for Class I Action." If the application meets the definition of a Class II action as defined in § 1940.312 of this subpart, the required documentation will be included within the Class II assessment under the discussion of land use impacts. See paragraph IV.4. of Exhibit H of this subpart. Once an applicant's farm property has undergone an environmental review covering the provisions of this exhibit, the County Supervisor reviewing a subsequent loan request need not require the applicant to obtain further site information from SCS as long as there is no change in the farm property to be affected or any applicable exemptions.

9. *Borrowers' responsibilities.* In addition to complying with any loan requirements resulting from FmHA's implementation of this exhibit, a borrower must within ten days of receipt inform, in writing, the lender of a guaranteed loan and the County Supervisor for an insured loan of any ineligibility determinations received from other USDA agencies for violations of wetland or highly erodible land conservation restrictions. A borrower also has the responsibility to consult with the lender or County Supervisor, as applicable, if at any time the borrower is uncertain as to the borrower's duties and responsibility under the loan provisions.

10. *FmHA and lender monitoring.* As an element of insured loan servicing, to include development of a farm plan of operation for an upcoming crop year, scheduled farm visits, or other contracts with borrowers, FmHA staff will review and analyze the borrower's compliance with the provisions of this exhibit and any related loan requirements. If at anytime FmHA becomes aware of the borrower's violation of these provisions or related loan requirements, the borrower will be informed that the affected loan(s) is in default. In addition to directly monitoring borrowers, the County Supervisor will receive and review the monitoring results of other USDA agencies having restrictions on wetland and highly erodible land conservation. Whenever these results indicate that a borrower may have violated the loan conditions, the County Supervisor will further analyze the matter and respond, as indicated in this paragraph, should a violation be determined. Lenders of FmHA guaranteed loans must also monitor compliance as part of their servicing responsibilities.

11. *Exemptions and determining their applicability.* Following is a list of exemptions from the provisions of this exhibit as well a description of how FmHA will apply the exemptions to a proposed loan or activity under a loan. This list is intended to provide guidance on implementing the exemptions contained in Subparts A, B, and C of Part 12 of Subtitle A of Title 7 (Attachment 1 of this exhibit which is available in any FmHA office) and does not modify or limit any of those exemptions.

a. *Exemption from wetland and highly erodible land conservation.* Any loan which was closed prior to December 23, 1985, or any loan for which either Form FmHA 1940–1, "Request for Obligation of Funds," Form FmHA 449–14, "Conditional Commitment for Guarantee," or Form FmHA 1980–15, "Conditional Commitment for Contract of Guarantee (Line of Credit)," was executed prior to December 23, 1985, is exempt from the provisions of this exhibit.

b. *Exemptions from highly erodible land conservation.* The following exemptions exist from the restrictions on highly erodible land conservation. Whenever the County Supervisor is required to consult with another USDA agency in applying these exemptions, the County Supervisor's review of a properly completed Form SCS–CPA–26 will be considered adequate consultation if the needed information is presented on the form and no questions are raised by the FmHA review.

(1) Any land upon which an agricultural commodity was planted before December 23, 1985, is exempt for that particular planting. The County Supervisor will consult with the appropriate local ASCS office in applying this exemption and the ASCS determination is controlling for purposes of this exhibit.

(2) Any land planted with an agricultural commodity during a crop year beginning before December 23, 1985, is exempt for that particular planting. FmHA will consult with the ASCS State Executive Director and the latter's position will be controlling in determining the date that the crop year began.

(3) Any land that during any one of the crop years of 1981 through 1985 was either (a) cultivated to produce an agricultural commodity, or (b) set aside, diverted or otherwise not cropped under a program administered by USDA to reduce production of an agricultural commodity, is exempt until the later of January 1, 1990, or the date that is two years after the date that the SCS has completed a soil survey of the land. To apply this exemption, the County Supervisor will consult with ASCS to determine from the latter's records whether or not the land was cultivated or set aside during the required period. The ASCS determination will be controlling. However, the date of completion for any SCS soil survey will be determined by SCS and used by the County Supervisor.

(4) Beginning on January 1, 1990, or two years after SCS has completed a soil survey for the land, whichever is later, and extending to January 1, 1995, any land that qualified for the exemption in subparagraph b (3) of this paragraph is further exempt if a person is actively applying to it a conservation plan that is based on the local SCS technical guide and properly approved by the appropriate SCS conservation district or the SCS. To apply this exemption as well as the exemptions specified in subparagraphs b (5), (6), (7), and (8) of this paragraph, the County Supervisor will consult with the appropriate local SCS office and the SCS position will be controlling.

(5) Highly erodible land within a conservation district and under a conservation system that has been approved by a conservation district after the district has determined that the conservation system is in conformity with technical standards set forth in the SCS technical guide for such district is exempt.

(6) Highly erodible land not within a conservation district but under a conservation system determined by SCS to be adequate for the production of a specific agricultural commodity or commodities on any highly erodible land is exempt for the production of that commodity or commodities.

(7) Highly erodible land that is planted in reliance on a SCS determination that such land was not highly erodible is exempt. The exemption is lost, however, for any agricultural commodity planted after SCS determines that such land is highly erodible land.

(8) Highly erodible land planted or to be planted in an agricultural commodity that was planted in alfalfa during each of the 1981 and 1985 crop years in a crop rotation determined by SCS to be adequate for the protection of highly erodible land is exempt until June 1, 1988, from the requirement that the highly erodible land be planted in compliance with an approved conservation system.

c. *Exemptions from wetland conservation.* The following exemptions exist from the restrictions on wetland conservation. Whenever the County Supervisor is required to consult with another USDA agency in applying these exemptions, the County Supervisor's review of a properly completed Form SCS–CPA–26 will be considered adequate consultation if the needed information is presented on the form and no questions are raised by the FmHA review.

(1) A converted wetland is exempt if the conversion of such wetland was completed or commenced before December 23, 1985. The County Supervisor will consult with ASCS whose determination as to when conversion of a wetland commenced will be final for FmHA purposes. Additionally, the County Supervisor will request evidence of ASCS's consultation with the U.S. Fish and Wildlife Service on each commenced determination reached for an FmHA applicant or borrower. SCS will determine if a wetland is a converted wetland using the criteria contained in § 12.32 of Subpart C of Part 12 of Subtitle A of Title 7 (Attachment 1 of this exhibit which is available in any FmHA office). Under these criteria, however, a converted wetland determined to be exempt may not always remain exempt. The criteria include the provision that if crop production is abandoned on a converted wetland and the land again meets the wetland criteria, that land has reverted to a wetland and is no longer exempt. For purposes of FmHA inventory farm properties, crop production will be considered to have been abandoned on a converted wetland either at the earlier of the time the former owner so abandoned crop production or at the time FmHA caused crop production to be abandoned after the property came into FmHA's inventory. While in its inventory FmHA will not lease the converted wetland for the purpose of producing an agricultural commodity. Whether or not the wetland criteria are met on the abandoned land will be determined by SCS immediately before FmHA's lease or sale of the property.

(2) The following are not considered to be a wetland under the provisions of this exhibit: (a) An artificial lake, pond, or wetland created by excavating or diking non-wetland to collect and retain water for purposes such as water for livestock, fish production, irrigation (including subsurface irrigation), a settling basin, colling, rice production, or flood control; (b) a wet area created by a water delivery system, irrigation, irrigation system, or application of water for irrigation and (c) lands in Alaska identified by SCS as having a predominance of permafrost soils. The County Supervisor will consult with SCS regarding the application of this exemption as well as the remaining exemptions in this paragraph and the SCS position will be controlling.

(3) A wetland is exempt if the production of an agricultural commodity is possible (a) as a result of a natural condition, such as drought, and (b) without action by the producer that destroys a natural wetland characteristic. This exemption is lost whenever condition (a) or (b) no longer exists.

(4) Production of an agricultural commodity on a converted wetland is exempt is SCS determines that the effect of such action, individually and in connection with all other similar actions authorized in the area by USDA agencies, on the hydrological and biological aspect of wetland is minimal.

12. *Appeals.* Any applicant or borrower that is directly and adversely affected by an administrative decision made by FmHA under this exhibit may appeal that decision under the provisions of Subpart B of Part 1900 of this chapter (see especially § 1900.55).

13. *Working with other USDA agencies.*

a. *Coordination.* FmHA State Directors will consult with SCS State Conservationists and ASCS State Executive Directors to assess and coordinate loan processing workloads in order to minimize delays in responding to FmHA requests for site information or for the application of the exemptions contained in paragraph 11 of this exhibit. State Directors will ensure that FmHA field staff understand and can use the ASCS farm records system and will request ASCS training as needed. Also, management systems for sharing the information discussed in subparagraph b of this paragraph will be established.

b. *Information exchange.* FmHA State Directors will develop with ASCS State Executive Directors a system for FmHA to routinely receive notification whenever a violation has occurred under ASCS's wetland and highly erodible land conservation restrictions. FmHA State Directors will in turn provide to any interested USDA agency the following information.

(1) Upon request, copies of site information or exemption decision made by SCS for FmHA application reviews;

(2) Upon request, copies of exemption decisions made by FmHA; and

(3) Notice of any violations of the provisions of this exhibit identified by FmHA as a result of the monitoring activities identified in paragraph 10 of this exhibit.

14. *Relationship of the requirements of this exhibit to the wetland protection requirements of Exhibit C of this subpart.* The provisions of this exhibit determine (a) whether or not an applicant for a Farmer Program insured or guaranteed loan or a loan to an Indian Tribe or Tribal Corporation is eligible to be considered for such a loan, and (b) whether or not a recipient of such a loan is properly using the loan proceeds with respect to the requirements of this exhibit. On the other hand, the requirements in Exhibit C of this subpart regarding wetland protection cover all FmHA loan and grant programs and address not questions of eligibility but the potential environmental impacts of a proposed action on a wetland and alternatives to the action. Consequently, those applications covered by this exhibit and which may be approved under this exhibit must also meet the requirements of Exhibit C of this subpart. For example, an application covered by this exhibit (M) that proposed to convert a wetland into a tree farm would be exempt from this exhibit (M) because trees are not an agricultural commodity, i.e., there is no conversion in order to produce an agricultural commodity. However, before FmHA could make the loan, the requirements of Exhibit C of this subpart would have to be met to include an FmHA finding that no practicable alternative exists to the conversion of the wetland. In summary, any proposed wetland conversion that is not prohibited by this exhibit (M) must next meet the requirements of Exhibit C of this subpart before FmHA approval of the requested financial assistance could be provided.

PART 1951—SERVICING AND COLLECTIONS

9. The authority citation for Part 1951 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480, 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart E—Servicing of Community Program Loans and Grants.

10. Section 1951.207 is amended by adding a new paragraph (e)(1)(xii) to read as follows:

§ 1951.207 General Servicing actions.

* * * * *

(e) * * *

(1) * * *

(xii) For Indian Tribes and Tribal Corporations, the loan funds will not be used for any purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity as further explained in Exhibit M of Subpart G of Part 1940 of this chapter. This requirement will be monitored throughout the term of the loan.

* * * * *

11. Section 1951.210 is amended by adding a new paragraph (a)(8) to read as follows:

§ 1951.210 Transfer of security and assumption of loans.

(a) * * *

(8) For Indian Tribes and Tribal Corporations, the requirements found in Exhibit M of Subpart G of Part 1940 of this chapter are met.

* * * * *

BEST COPY AVAILABLE

PART 1955—PROPERTY MANAGEMENT

12. The authority citation for Part 1955 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart B—Management of Property

13. Section 1955.66 is amended by revising paragraph (a)(2)(iii) to read as follows:

§ 1955.66 Lease of real property.

(a) * * *

(2) * * *

(iii) *Farm property.* Any CONACT property with a dwelling (whether located on or off the farm) that is possessed and occupied as a principal residence by one who was personally liable for a Farmer Program loan must be considered for dwelling retention under § 1955.73 of this subpart prior to lease under this section. The County Supervisor may approve the lease of farm property. When a lease with an option to purchase is signed, the lessee should be told that FmHA cannot make a commitment to finance the purchase of the property in the future. Except for leases with an option to purchase, special stipulations will be made a part of farm leases to provide that the Government may terminate the lease in order to sell the farm, but in that event the lessee will retain the right to harvest growing crops and rental payment will be prorated between the Government and the purchaser of the property. The County Supervisor shall report all leases of farms to the local Agricultural Stabilization and Conservation Service (ASCS) office and all subsequent changes in leases or sale of the property. Leases for mineral exploration and/or development will be on a form approved by OGC. In approval of a lease for mineral purposes, consideration will be given to impact on the environment, preservation of land for agricultural purposes as required by Subpart G of Part 1940 of this chapter, as well as effect on sale of the property.

(A) The Administrator may issue directives (available in any affected FmHA office) restricting the leasing of property which could be used to produce agricultural products determined to be in surplus supply. Chattel property will not normally be leased unless it is attached to the real estate as a fixture or would normally pass with the land.

(B) The property may not be used for any purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity, as further explained in Exhibit M to Subpart G of Part 1940 of this chapter. All prospective lessees will be notified in writing of the presence of highly erodible land, converted wetlands and wetlands on inventory property. This notification will enclose a copy of Form SCS–CPA–26, "Highly Erodible Land and Wetland Conservation Determination," which identifies whether the property contains wetland or converted wetland or highly erodible land. The notification will also state that the lease will contain a restriction on the use of such property and that FmHA's compliance requirements for wetlands, converted wetlands, and highly erodible land are contained in Exhibit M to FmHA Instruction 1940–G (which is available in any FmHA office and which is the same as Exhibit M to Subpart G of Part 1940 of this chapter). If converted wetlands are present, the notification will also state that FmHA will not lease converted wetlands for the purpose of producing an agricultural commodity. Additionally, a copy of Form SCS–CPA–26 will be attached to the lease and the lease will contain a special stipulation as provided on the FMI to Form FmHA 1955–20, "Lease of Real Property," prohibiting the use of the property as specified above.

* * * * *

Subpart C—Disposal of Inventory Property

14. Section 1955.106 is amended by adding paragraph (e)(7) to read as follows:

§ 1955.106 Sale of suitable property (CONACT).

* * * * *

(e) * * *

(7) Property sold on credit sale may not be used for any purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity, as further explained in Exhibit M to Subpart G of Part 1940 of this chapter. Additionally, all prospective buyers will be notified in writing as a part of the property advertisement of the presence of highly erodible land and wetlands on inventory property.

15. Section 1955.107 is amended by revising the introductory paragraph to read as follows:

§ 1955.107 Sale of surplus property (CONACT).

Except where a lessee is exercising the option to purchase under § 1955.73 of Subpart B of this part, concerning dwelling retention, surplus property will be offered for public sale by sealed bid or auction in accordance with § 1955.147 or § 1955.148 of this subpart as soon as possible after it has been declared surplus and made available for sale. Suitable property which has been in inventory for 3 years must be offered for sale as surplus; however, if the buyer is eligible for FmHA assistance, any surplus property which is actually suitable will be reclassified to suitable by the authorized official and sold on eligible terms. The basis for this redetermination must be documented in the running record. On a credit sale the property may not be used for any purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity, as further explained in Exhibit M of Subpart G of Part 1940 of this chapter. Additionally, all prospective buyers will be notified in writing as a part of the property advertisement of the presence of highly erodible land, converted wetlands and wetlands on inventory property.

* * * * *

PART 1962—PERSONAL PROPERTY

16. The authority citation for Part 1962 continues to read as follows:

Authority: 7 U.S.C. 1989; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Servicing and Liquidation of Chattel Security

17. Section 1962.30 is amended by adding a new paragraph (b)(8) to read as follows:

§ 1962.30 Subordination and waiver of FmHA liens on chattel security.

* * * * *

(b) * * *

(8) The loan funds will not be used for any purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity as further explained in Exhibit M to Subpart G of Part 1940 of this chapter. This requirement will be monitored throughout the term of the loan.

* * * * *

18. Section 1962.34 is amended by adding paragraphs (a)(4) and (b)(5) to read as follows:

§ 1962.34 Transfer of chattel security and EO property and assumption of debts.

* * * * *

(a) * * *

(4) The requirements found in Exhibit M to Subpart G of Part 1940 of this chapter are met.

(b) * * *

(5) The requirements found in Exhibit M to Subpart G of Part 1940 of this chapter are met.

* * * * *

PART 1965—REAL PROPERTY

19. The authority citation for Part 1965 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Servicing of Real Estate Security for Farmer Program Loans and Certain Note—Only Cases

20. Section 1965.12 is amended by adding paragraph (a)(9) to read as follows:

§ 1965.12 Subordination of FmHA mortgages to permit refinancing, extension, increase in amount of existing prior lien, to permit a new prior lien, or to permit reamortization.

* * * * *

(a) * * *

(9) The funds obtained will not be used for any purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity as further explained in Exhibit M to Subpart G of Part 1940 of this chapter. This requirement will be monitored throughout the term of the loan.

* * * * *

21. Section 1965.27 is amended by revising paragraph (b)(20) to read as follows:

§ 1965.27 Transfer of real estate security.

* * * * *

(b) * * *

(20) *Environmental requirements.* Applicable provisions of Subpart G of Part 1940 of this chapter are met, as well as those requirements found in Exhibit M to Subpart G of Part 1940.

* * * * *

PART 1980—GENERAL

22. The authority citation for Part 1980 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—General

Appendix B to Subpart A—[Amended]

23. Appendix B to Subpart A is amended by adding a new paragraph IX C 12 to read as follows:

Lender's Agreement

* * * * *

IX * * *

C. * * *

12. Monitoring the use of loan funds to assure they will not be used for any purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity, as further explained in 7 CFR Part 1940, Subpart G, Exhibit M.

* * * * *

Appendix E to Subpart A—[Amended]

24. Appendix E to Subpart A is amended by adding a new paragraph IX C 12 to read as follows:

Lender's Agreement

* * * * *

IX * * *

C. * * *

12. Monitoring the use of loan funds to assure they will not be used for any purpose that will contribute to excessvie erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity as further explained in 7 CFR Part 1940, Subpart G, Exhibit M.

* * * * *

Subpart B—Farmer Program Loans

25. Section 1980.113 is amended by adding paragraph (d)(12) to read as follows:

§ 1980.113 Receiving and processing applications.

* * * * *

(d) * * *

(12) Applicable items required in Exhibit M of Subpart G of Part 1940 of this chapter, including Form SCS–CPA–26, "Highly Erodible Land and Wetland Conservation Determination," and Form AD–1026, "Highly Erodible Land and Wetland Conservation Certification."

* * * * *

Exhibit A to Subpart B—[Amended]

26. Exhibit A to Subpart B, Attachment 1—FARMERS HOME ADMINISTRATION APPROVED LENDER PROGRAM (ALP) is amended by adding a new paragraph VII C 12 to read as follows:

Lender's Agreement (Loan Note Guarantees Only) for Guaranteed Operating Loans (OL) and Guaranteed Farm Ownership Loans (FO)

* * * * *

VII * * *

C * * *

12. Monitoring the use of loan funds to assure they will not be used for any purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity, as further explained in 7 CFR Part 1940, Subpart G, Exhibit M.

* * * * *

27. Exhibit A of Subpart B, Attachment 2—FARMERS HOME ADMINISTRATION, APPROVED LENDER PROGRAM (ALP) is amended by adding a new paragraph VII C 12 to read as follows:

Lender's Agreement for Operating Line of Credit Guarantee (Contract of Guarantee Cases)

* * * * *

VII * * *

C * * *

12. Monitoring the use of loan funds to assure they will not be used for any purpose that will contribute to excessive erosion of highly erodible land or the conversion of wetlands to produce an agricultural commodity, as further explained in 7 CFR Part 1940, Subpart G, Exhibit M.

BILLING CODE 3410-07-M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 310

Privacy Act Regulations

AGENCY: Federal Deposit Insurance Corporation ("FDIC").

ACTION: Final rule.

SUMMARY: The FDIC is amending the title of a Privacy Act system of records listed as exempt by regulation from certain provisions of the Privacy Act in order to reflect a name change made to the system as amended.

DATE: Effective May 23, 1988, unless a superseding notice to the contrary is published before that date.

FOR FURTHER INFORMATION CONTACT: Robert E. Feldman, Assistant Executive Secretary, FDIC, 550 17th Street NW., Washington, DC 20429, telephone (202) 898–3811.

SUPPLEMENTARY INFORMATION: Section 310.13(a) of the FDIC's regulations (12 CFR 310.13(a)) currently lists a Privacy Act system of records entitled "Bank and proposed bank irregularity records system" (FDIC 30–64–0002) as a system exempt from certain provisions of the Privacy Act. As part of its continuing review of its Privacy Act systems of records, the FDIC is elsewhere in today's issue of the **Federal Register** amending the system, including its name. To accommodate the change in the name of the system, the FDIC hereby amends 12 CFR 310.13(a) as described below.

Because the amendment is simply a "housekeeping" matter, it is being published in final form without opportunity for public comment under authority of section 553(b)(A) of the Administrative Procedure Act, which exempts from required publication for comment interpretive rules, general statements of policy, and rules of agency practice and procedure. As these amendments neither alter any existing nor create any new recordkeeping or reporting requirements, the Paperwork Reduction Act is inapplicable. Finally, the requirements of the Regulatory Flexibility Act are inapplicable as the amendments are not subject to required public comment under the Administrative Procedure Act.

List of Subjects in 12 CFR Part 310

Privacy.

For the foregoing reason, 12 CFR Part 310 is amended to read as follows:

1. The authority citation for Part 310 continues to read as follows:

Authority: 5 U.S.C. 552a.

§ 310.13 [Amended]

2. Paragraph (a) of § 310.13 is amended by removing the words "Bank and proposed bank irregularity records system" and adding, in their place, the words "Financial institutions investigative and enforcement records system."

By order of the Board of Directors.

Dated at Washington, DC, this 1st day of March 1988.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FARM CREDIT ADMINISTRATION

12 CFR Parts 620 and 621

Disclosure to Shareholders; Accounting and Reporting Requirements; Effective Date

AGENCY: Farm Credit Administration.

ACTION: Notice of effective date.

SUMMARY: The Farm Credit Administration published final amended regulations under Parts 620 and 621 on February 5, 1988 (53 FR 3335). The final amendments to Part 620 relate to disclosure of the condition or classification of loans to senior officers and directors and their immediate families and affiliated organizations and the final amendment to Part 621 deletes references to FCA examining classifications. In accordance with 12 U.S.C. 2252, the effective date of the final rule is 30 days from the date of publication in the **Federal Register** during which either or both Houses of Congress are in session. Based on the records of the sessions of Congress, the effective date of the regulations is March 8, 1988.

EFFECTIVE DATE: March 8, 1988.

FOR FURTHER INFORMATION CONTACT:

Dorothy J. Acosta, Senior Attorney, Office of General Counsel, Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102-5090, (703) 883-4020, TDD (703) 883-4444.

FEDERAL FINANCIAL INSTITUTIONS EXAMINATION COUNCIL

12 CFR Part 1101

Description of Office, Procedures, and Public Information

AGENCY: Federal Financial Institutions Examination Council (Council).

ACTION: Final rule.

SUMMARY: The Council has adopted a final rule implementing recent amendments to the Freedom of Information Act (FOIA). The amendments to FOIA and this final rule concern Exemption 7 (law enforcement records) and the provisions of FOIA relating to fees and fee waivers.

EFFECTIVE DATE: March 8, 1988.

ADDRESS: Federal Financial Institutions Examination Council, 1776 G Street, Suite 701, Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: Robert M. Fenner, General Counsel, National Credit Union Administration, 1776 G Street, NW., Washington, DC 20456, telephone: (202) 357-1030.

SUPPLEMENTARY INFORMATION: Recent amendments to the FOIA modified Exemption 7 (relating to disclosure of law enforcement records) and the provisions concerning charging and waiving of fees. The amendments required that agency regulations contain a fee schedule that conforms to guidelines issued by the Office of Management and Budget (OMB). OMB issued final guidelines on March 27, 1987. (See 52 FR 10012, March 27, 1987). On August 6, 1987, the Council issued proposed rules implementing these amendments and updating its address. (*See* 52 FR 29865, August 12, 1987.)

The Council received only one comment letter on its proposed rules. The comment letter, submitted by an association of reporters, raised three issues discussed below.

The first issue concerns the definition of "representative of the news media" found in § 1101.4(b)(5)(i)(H) of the rules. (Representatives of the news media are to be charged only for duplication costs under the amended FOIA.) The definition, taken from OMB's guidelines, is:

> any person gathering news for an entity that is organized and operated to publish or broadcast news to the public. The term "news" means information that is about current events or that would be of current interest to the public.

The commenter suggested that either (1) the definition be deleted; (2) the word "news" in the first phrase be changed to "information"; or (3) the second sentence defining news be deleted. The commenter reasons that Council personnel should not be determining what is or is not newsworthy and that the term "representative of the news media" is self-explanatory. The Council has determined not to change the definition. Since the Council, pursuant to the FOIA amendments, must establish a FOIA fee schedule in conformance with OMB guidelines, it has adopted OMB's definition. The Council believes that adoption of the definition is in conformance with the FOIA amendments and that Council personnel will be able to determine who are representatives of the news media using the definition.

The second issue concerns Department of Justice (DOJ) guidelines with respect to FOIA fee waivers and reductions. As noted in the proposed rule, (§ 1101.4(b)(5)(ii)(H) concerns waiving and reducing fees and is based upon guidelines issued by the Department of Justice. The commenter expressed concern that the Council's regulation does not set forth the fact that when a requester is a "representative of the news media" that status will be taken into account in determining the public understanding criteria of the fee waiver or reduction test. The fact that a requester is a "representative of the news media" is a logical consideration in determining whether waiver or reduction of fees will further the public understanding of the operations or activities of the government. It is neither necessary nor practical, however, to set forth all such considerations in the regulation. The commenter states further that, in promulgating the FOIA amendments, Congress intended to exclude the Department of Justice guidance on fee waivers. The FOIA refers to Department of Justice efforts to encourage agency compliance with the FOIA. (*See* 5 U.S.C. 552(e).) It has provided the fee waiver guidance in this capacity.

Lastly, the commenter was concerned with the requirement in the rule for advance payment of FOIA fees. The commenter noted that advance payment will be required of all requesters who do not have previous payment records for FOIA requests. The proposed and final rules require advance payment of requesters with no history of payment however, *only* if the estimated bill exceeds $250. (*See* § 1101.4(b)(5)(vii).) The FOIA amendments specifically allow for advance payment under these circumstances. In addition, Council has rarely, if ever, received a FOIA request where the estimated cost exceeds $250. The Council believes the advance payment requirement is in compliance with the FOIA amendments and is not unduly burdensome.

Regulatory Procedures

Regulatory Flexibility Act

The Council has determined and certifies that the final rule will not have a significant economic impact on a substantial number of small entities. The regulations do not place burdens on requesters of information under the FOIA. Accordingly, the Council has determined that a Regulatory Flexibility Analysis is not required.

Paperwork Reduction Act

The commenter stated that the provisions on fee waiver or reduction (§ 1101.4(b)(5)(ii)(H)) may cause requesters to submit information to the Council that would invoke clearance from OMB under the Paperwork Reduction Act. The Paperwork Reduction Act and its implementing regulation define collections of information in part to mean information collected from ten or more persons. (*See* 5 CFR 1320.7(c).) The Council has never received ten requests for fee waivers in one year. Further, submission of FOIA requests and any attendant requests for fee waivers or reductions are entirely voluntary. They simply facilitate the provision of information and determination of fees under the FOIA. Accordingly, FOIA requests would not be subject to the Paperwork Reduction Act.

By the Federal Financial Institutions Examination Council on March 1, 1988.

March 3, 1988.

Robert J. Lawrence,

Executive Secretary, Federal Financial Institutions Examination Council.

Accordingly, the Council amends its regulations as follows:

PART 1101—[AMENDED]

1. The authority citation for Part 1101 is revised to read as follows:

Authority: 5 U.S.C. 552; 12 U.S.C. 3307.

2. Section 1101.3(e) is revised to read:

§ 1101.3 [Amended]

* * * * *

(e) *Council address.* Council offices are located at 1776 G Street, NW., Suite 701, Washington, DC 20006.

3. Section 1101.4(b)(1)(vii) is revised to read:

§ 1101.4 [Amended]

* * * * *

(b) * * *

(1) * * *

(vii) Records or information compiled for law enforcement purposes, including records relating to a proceeding by a financial institution's regulatory agency for the issuance of a cease-and-desist order, or order of suspension or removal, or assessment of a civil money penalty and the granting, withholding, or revocation of any approval, permission, or authority, but only to the extent that the production of such law enforcement records or information (A) could reasonably be expected to interfere with enforcement proceedings; (B) would deprive a person of a right to a fair trial or an impartial adjudication; (C) could reasonably be expected to constitute an unwarranted invasion of personal privacy; (D) could reasonably be expected to disclose the identity of a confidential source, including a state, local, or foreign agency or authority or any private institution which furnished information on a confidential basis, and, in the case of a record or information compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source; (E) would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law; or (F) could reasonably be expected to endanger the life or physical safety of any individual.

4. Section 1101.4(b)(5) is amended to read:

§ 1101.4 [Amended]

* * * * *

(b) * * *

(5) *Fees for document search, review, and duplication; waiver and reduction of fees*—(i) *Definitions*—(A) *Direct costs* means those expenditures which the Council actually incurs in searching for, duplicating, and reviewing documents to respond to a FOIA request.

(B) *Search* means all time spent looking for material that is responsive to a request, including page-by-page or line-by-line identification of material within documents. Searches may be done manually or by computer using existing programming.

(C) *Duplication* means the process of making a copy of a document necessary to respond to a FOIA request.

(D) *Review* means the process of examining documents located in response to a request that is for a commercial use (*see* § 1101.4(b)(5)(i)(E)) to determine whether any portion of any document located is permitted to be withheld and processing such documents for disclosure.

(E) *Commercial use request* means a request from or on behalf of one who seeks information for a use or purpose that furthers the commercial, trade, or profit interests of the requester or the person on whose behalf the request is made.

(F) *Educational institution* means a preschool, an elementary or secondary school, an institution of undergraduate higher education, an institution of graduate higher education, an institution of professional education, and an institution of vocational education, which operates a program or programs of scholarly research.

(G) *Noncommercial scientific institution* means an institution that is not operated on a "commercial" basis as that term is referenced in § 1101.4(b)(i)(E), and which is operated solely for the purposes of conducting scientific research, the results of which are not intended to promote any particular product or industry.

(H) *Representative of the news media* means any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the public. The term "news" means information that is about current events

ISS
45
MR
8
988
MI

or that would be of current interest to the public.

(ii) *Fees to be charged.* The Council will charge fees that recoup the full allowable direct costs it incurs. The Council may contract with the private sector to locate, reproduce, and/or disseminate records. Provided, however, that the Council has ensured that the ultimate cost to the requester is no greater than it would be if the Council performed these tasks. Fees are subject to change as costs change. In no case will the Council contract out responsibilities which the FOIA provides that it alone may discharge, such as determining the applicability of an exemption, or determining whether to waive or reduce fees.

(A) *Manual searches and review.* The Council will charge fees at the following rates for manual searches for and review of records:

(*1*) If search/review is done by clerical staff, the hourly rate for GS-7, step 5, plus 16 percent of the rate to cover benefits;

(*2*) If search/review is done by professional staff, the hourly rate for GS-13, step 5, plus 16 percent of the rate to cover benefits.

(B) *Computer searches.* The Council will charge fees at the hourly rate for GS-13, step 5, plus 16 percent of the rate to cover benefits, plus the hourly cost of operating the computer for computer searches for records.

(C) *Duplication of records.* (*1*) The per-page fee for paper copy reproduction of a document is $.25;

(*2*) The fee for documents generated by computer is the hourly rate for the computer operator (at GS 7, step 5, plus 16 percent for benefits if clerical staff, and GS 13, step 5, plus 16 percent for benefits if professional staff) plus the cost of materials (computer paper, tapes, labels, etc.).

(*3*) If any other method of duplication is used, the Council will charge the actual direct cost of duplicating the documents.

(D) If search, duplication and/or review is provided by personnel of member agencies of the Council, fees will reflect their actual hourly rates, plus 16 percent for benefits.

(E) *Fees to exceed $25.* If the Council estimates that duplication and/or search fees are likely to exceed $25, it will notify the requester of the estimated amount of fees, unless the requester has indicated in advance his/her willingness to pay fees as high as those anticipated. In the case of such notification by the Council, the requester will then have the opportunity to confer with Council personnel with the object of reformulating the request to meet his/her needs at a lower cost.

(F) *Other services.* Complying with requests for special services is entirely at the discretion of the Council. The Council will recover the full costs of providing such services to the extent it elects to provide them.

(G) *Restriction on assessing fees.* The Council will not charge fees to any requester, including commercial use requesters, if the cost of collecting a fee would be equal to or greater than the fee itself.

(H) *Waiving or reducing fees.* The Council shall waive or reduce fees under this section whenever disclosure of information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester.

(*1*) The Council will make a determination of whether the public interest requirement above is met based on the following factors:

(*i*) The subject of the request: Whether the subject of the requested records concerns the operations or activities of the government;

(*ii*) The informative value of the information to be disclosed: Whether the disclosure is likely to contribute to an understanding of government operations or activities;

(*iii*) The contribution to an understanding of the subject by the general public likely to result from disclosure: Whether disclosure of the requested information will contribute to public understanding;

(*iv*) The significance of the contribution to the public understanding: Whether the disclosure is likely to contribute significantly to public understanding of government operations or activities.

(*2*) If the public interest requirement is met, the Council will make a determination on the commercial interest requirement based upon the following factors:

(*i*) The existence and magnitude of a commercial interest: Whether the requester has a commercial interest that would be furthered by the requested disclosure; and if so

(*ii*) The primary interest in disclosure: Whether the magnitude of the identified commercial interest of the requester is sufficiently large in comparison with the public interest in disclosure; that disclosure is primarily in the commercial interest of the requester.

(*3*) If the required public interest exists and the requester's commercial interest is not primary in comparison to it, the Council will waive or reduce fees.

(iii) *Categories of requesters.* (A) Commercial use requesters. The Council will assess fees for commercial use requesters which recover the full direct costs of searching for, reviewing for release, the duplicating the records sought. Commercial use requesters are not entitled to two hours of free search time nor 100 free pages of reproduction of documents.

(B) Requesters who are representatives of the news media, educational and noncommercial scientific institution requesters. The Council shall provide documents to requesters in these categories for the cost of reproduction alone, excluding fees for the first 100 pages.

(C) All other requesters. The Council shall charge requesters who do not fit into any of the categories above fees which recover the full reasonable direct cost of searching for and reproducing records that are responsive to the request, except that the first 100 pages of reproduction and the first two hours of search time shall be furnished without a fee.

(D) All requesters must specifically describe records sought.

(iv) *Interest on unpaid fees.* The Council may begin assessing interest charges on an unpaid bill starting on the 31st day following the day on which the bill was sent. Interest will be at the rate prescribed in section 3717 of Title 31 U.S.C. and will accrue from the date of the billing.

(v) *Fees for unsuccessful search and review.* The Council may assess fees for time spent searching and reviewing, even if it fails to locate the records or if records located are determined to be exempt from disclosure.

(vi) *Aggregating requests.* A requester(s) may not file multiple requests each seeking portions of a document or documents, solely in order to avoid payment of fees. If this is done, the Council may aggregate any such requests and charge accordingly. In no case will the Council aggregate multiple requests on unrelated subjects from the same requester.

(vii) *Advance payment of fees.* The Council will not require a requester to make an assurance of payment or an advance payment unless:

(A) The Council estimates or determines that allowable charges that a requester may be required to pay are likely to exceed $250. The Council will notify the requester of the likely cost and obtain satisfactory assurance of full payment where the requester has a history of prompt payment of FOIA fees, or require an advance payment of an amount up to the full estimated charges

in the case of requesters with no history of payment; or

(B) A requester has previously failed to pay a fee charged in a timely fashion. The Council may require the requester to pay the full amount owed plus any applicable interest as provided in § 1101.4(b)(5)(iv) or demonstrate that he/she has, in fact, paid the fee, and to make an advance payment of the full amount of the estimated fee before the Council begins to process a new request or a pending request from that requester.

(C) When the Council acts under § 1101.4(b)(5)(vii) (A) or (B), the administrative time limits prescribed in subsection (a)(6) of the FOIA (i.e., 10 working days from receipt of initial requests and 20 working days from receipt of appeals from initial denial, plus permissible extensions of these time limits) will begin only after the Council has received the fee payments described.

[FR Doc. 88-5053 Filed 3-7-88; 8:45 am]

BILLING CODE [illegible]

SMALL BUSINESS ADMINISTRATION

13 CFR Part 120

[Rev. 7; Amdt. 2]

Business Loan Policy

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: This final rule permits the Small Business Administration (SBA) to suspend or revoke the privilege of lenders, brokers, dealers and registered holders to sell or otherwise deal in section 7(a) secondary market loan or pool certificates for significant violations of the Rules and Regulations of the secondary market and for certain other offenses. It also clarifies that the disclosure requirements for individual loan certificates and pool certificates apply equally to certificates placed into or used as the backing for a trust, investment pool, mutual fund or any other security. Finally, it modifies the existing regulatory requirements for pool assembles eligibility to require that pool assemblers be regulated by the appropriate regulatory agency, as defined in the Government Securities Act of 1986 (Pub. L. 99-571, 100 Stat. 3208). On November 4, 1987, SBA published in the Federal Register (52 FR 42305) a notice of proposed rulemaking.

EFFECTIVE DATE: March 8, 1988.

FOR FURTHER INFORMATION CONTACT: Allan S. Mandel, Assistant Deputy Associate Administrator for Financial Assistance, (202) 653-6696.

SUPPLEMENTARY INFORMATION: Under the authority of sections 5(f)-5(h) of the Small Business Act (15 U.S.C. 634(f)-(h)) ("Act"), SBA operates a secondary market in SBA guaranteed loan and pool certificates. The process works as follows: A lender, previously approved by SBA to make guaranteed loans under section 7(a) of the Act, makes such a loan to a small business. The lender may sell the guaranteed portion of the loan to a secondary market broker-dealer, which then resells the loan to an investor. Alternatively, broker-dealers that are approved by SBA as pool assemblers may form pools backed by the guaranteed portions of several SBA guaranteed loans, and sell certificates representing total or fractional ownership in such pools to investors.

The final rules described herein enable SBA to carry out its responsibilities to develop such procedures as are necessary for the facilitation, administration, and promotion of secondary market operations (section 5(f)(3) of the Act); require the seller of a certificate to disclose to a purchaser information on the terms, conditions and yield of the security (section 5(h)(3) of the Act); and regulate brokers and dealers in this market (section 5(h)(4) of the Act).

SBA is amending its regulations to permit the Agency to suspend or revoke the privilege of lenders, brokers, dealers and registered holders to sell or otherwise deal in loan or pool certificates under certain circumstances.

Section 120.605 as amended permits SBA to suspend or revoke the privilege of a lender, broker, dealer or registered holder to sell, purchase, or deal in loans, loan certificates or loan pool certificates if such lender, broker or registered holder commits a significant violation, as determined by SBA, of the Rules and Regulations of the Secondary Market. SBA is also authorized to suspend or revoke such entities for (1) a significant violation, as determined by SBA, of any of the provisions of the contracts entered into by the parties, including, but not limited to, Standard Forms 1085, 1086, 1088 and 1454 or (2) knowingly submitting false or fraudulent information in support of its participation in the Secondary Market to SBA or the fiscal and transfer agent (FTA). SBA would provide written notice of such determination at least 10 business days prior to the effective date of such determination. The notice would inform the broker, dealer, or registered holder of the opportunity for a hearing pursuant to Part 134 of this chapter. During the period of any proceedings under Part 134 the action of the SBA remains in effect. It should also be noted that action under this regulation would not preclude SBA from taking additional action to debar or suspend a lender, broker, dealer or registered holder under the Nonprocurement Debarment and Suspension rule scheduled to be published in final form in May of 1988 in cases where the SBA believes that such action is warranted. (Proposed Nonprocurement Debarment and Suspension Rule published October 20, 1987, at 52 FR 39015.)

Subparts G (pooling of SBA guaranteed portions) and H (individual SBA guaranteed portions sold into the secondary market) of Part 120 of this chapter are amended to exclude any broker or dealer from selling or otherwise dealing in pool certificates if the broker's or dealer's authority to engage in the securities business has been revoked or suspended by a supervisory agency. When such authority has been suspended, the broker or dealer would be suspended by SBA for the duration of the suspensions by the supervisory agency. If the broker or dealer has been indicted or otherwise formally charged with a misdemeanor or felony bearing on its fitness to participate in the market for pool certificates, the broker or dealer may be suspended while the charge is pending. Upon conviction, participation may be terminated. When the broker or dealer has suffered an adverse final civil judgment, holding that the broker or dealer has committed a breach of trust or violation of law or regulation protecting the integrity of business transactions or relationships, participation in the market for certificates may be terminated.

Under the final regulation, SBA could, for any of the reasons stated above, suspend or revoke the privilege of any broker or dealer to participate in this market. SBA would give written notice at least ten business days prior to the effective date of such an action. The notice shall inform the broker or dealer of the opportunity for a hearing pursuant to Part 134 of this Chapter. During the period of any proceedings under Part 134 the action of the SBA shall remain in effect. It should also be noted that action under this regulation would not preclude SBA from taking additional action to debar or suspend a broker or dealer under the Nonprocurement Debarment and Suspension rule scheduled to be published in final form in May of 1988 in cases where the SBA believes that such action is warranted. (Proposed Nonprocurement Debarment and Suspension Rule published October 20, 1987 at 52 FR 39015.)

These regulatory changes are counterparts of the existing regulations on suspension and termination of brokers and dealers in the Small Business Investment Company (13 CFR 107.201(c)(4)) and Development Company (13 CFR 108.505(1)) programs. As such, they make the regulations of the section 7(a) secondary market consistent on this subject with those of the other two programs.

SBA received two comments on this aspect. The first commentator stated its support of each of the proposed changes. However, it suggested that the hearings and appeals procedure must be spelled out specifically. SBA believes that the hearings and appeals procedure is detailed quite specifically in Part 134 of its Regulations, pertaining to the Office of Hearings and Appeals (13 CFR Part 134).

The second commentator raised two issues. First, it was concerned that ten days' prior notice of any suspension or revocation is insufficient. "We believe that it is more appropriate for the SBA, should it have any objection to an SBA lender's course of conduct, to first take steps to work out the problem with the lender before the SBA resorts to suspension or revocation * * *. Alternatively, we suggest that the proposed regulations be amended to require the SBA to use best efforts to resolve a problem with the lender before the SBA gives notice of suspension or revocation."

SBA has used and will continue to use its best efforts to work out solutions to problems without resorting to suspension or revocation. However, SBA disagrees with the commentator's implicit assumption that suspension or revocation are unwarranted as long as the offending party agrees to cease its rule violations. SBA believes that it must reserve the right of suspension or revocation with ten days notice where such action is required in the public interest. Such cases would include but not be limited to instances in which the suspended party has a history of repeated rule violations, where there is a pattern of concurrent violations, or where the violation is egregious.

This commentator also raised the issue of SBA's proposal that, during the period of any appeal proceedings under Part 134, the action of the SBA (suspension or revocation) would remain in effect. "We believe that, given the severity of suspension or revocation, a fairer result would be to allow the SBA lender to continue operations pending a final determination under Part 134." As we discussed above, SBA believes that it must reserve the right of suspension with ten days notice where such action is required in the public interest.

As an alternative the commentator suggests "that the lender should have the opportunity, at the initiation of any proceedings under Part 134, to seek a stay of the SBA's action pending resolution of the appeal under Part 134." In response, SBA notes that its regulations already provide the alternative that the commentator requests. Under Part 134 a judge has authority to issue protective orders, as follows: "Under motion by a party, or by any person from whom discovery is sought, for good cause shown, or upon his or her own motion, the judge may issue such orders as justice requires to protect a party or person from harassment, embarrassment, oppression, or undue burden or expense, or from breach of confidentiality of material or information warranting protection." 13 CFR 134.18(c) In addition, a judge has the authority to "issue decisions and orders" and to "take any other appropriate action authorized by this Part or the Delegations of Authority to the Office [of Hearings and Appeals]." 13 CFR 134.18(b) (11) and (12).

Sections 120.713 and 120.809 of this Part 120 requires a seller of individual loan and pool certificates to disclose to the purchaser information on the terms, conditions and yield of the security as described in the Secondary Market Program Guide. The final regulations clarify that this requirement applies equally to loan or pool certificates placed into or used as the backing for a trust, investment pool, mutual fund or any other security. In such cases the same disclosure information must be provided to investors through the prospectus and any promotional material and any other written description of the security. If loan or pool certificates are placed into or used as the backing for money market funds, the yield calculation on the SBA loan or pool certificate portion of such funds must be calculated according to the methodology and assumptions described in the Secondary Market Program Guide.

SBA and the Public Securities Association have agreed upon a methodology for estimating yields on these securities, pursuant to SBA's responsibilities under section 5(h)(3) of the Act. The methodology for estimating the yield on these securities must be carefully specified because SBA guaranteed loans may be prepaid prior to the scheduled maturity if (1) the borrower defaults and SBA honors its guaranty or (2) the borrower voluntarily prepays. (SBA loans may be prepaid by the borrower without penalty.) The occurrence of either of these events cannot be predicted with certainty. Prepayment has a significant impact upon yield, particularly with certificates priced substantially away from par.

The purpose of the disclosure requirements is to provide investors with a benchmark constant annual prepayment rate (CPR) based upon an analysis of the prepayment history of SBA guaranteed loans. The purpose of the benchmark is twofold: (1) to produce a cash flow yield calculation based upon the past performance of SBA loans and (2) to help investors choose between alternative SBA loan and pool certificates and between SBA loan and pool certificates and alternative investments. The elements that form the disclosure requirements enable investors to know the facts and assumptions used to develop the benchmark cash flow yield estimate.

These final regulatory changes are necessary because a mutual fund backed by SBA guaranteed portions is sold in the same marketplace as SBA pool and individual loan certificates. Accuracy and consistency in the quoting of yields are necessary to prevent investor confusion, to maintain an orderly and credible market, and to provide accurate information to investors.

Under the authority of the Small Business Secondary Market Improvements Act, enacted in 1984 (98 Stat 329), SBA has required pool assemblers to be (1) regulated by a state or federal financial regulatory agency, (2) regulated by SBA, or (3) a member of the National Association of Securities Dealers (13 CFR 120.703(a)). The passage of the Government Securities Act of 1986 (100 Stat. 3208) established for the first time a Federal Government-wide system for regulation of brokers and dealers who transact business exclusively in government securities or a government securities business combined with business in certain other activities. Accordingly, SBA is revising § 120.703(a) to require pool assemblers to be regulated by the appropriate regulatory agency as defined in section 3(a)(34)(G) of the Securities Exchange Act of 1934 as amended (15 U.S.C. 78c(a)(34)(G)), pursuant to the mandate of the Government Securities Act of 1986.

For purposes of the Regulatory Flexibility Act (5 U.S.C. 605(b)), SBA certifies that this rule is likely to have a significant economic impact on a substantial number of small entities. This action is being taken to ensure that the secondary market for SBA guaranteed loans is operated efficiently, honestly, and openly. Section 5 of the

Small Business Act authorizes SBA to develop procedures for the facilitation, administration, and promotion of secondary market operations. The statute requires disclosure of information to purchasers and allows SBA to regulate brokers and dealers. These regulations implement the statutory authority. It is not possible or feasible to estimate how many of the existing or potential lenders, brokers, dealers, or registered holders are or will be small entities, but it may be safely assumed that of the total universe there will be a large number of small entities. There are no reporting or recordkeeping requirements created by these regulations. The entities operating in the secondary market, in the nature of things, must operate properly, and the thrust of these regulations is to give SBA the authority to revoke the privilege of participating in the SBA secondary market from a broker or dealer which is acting improperly. There are no Federal rules which duplicate, overlap or conflict with the final rule. There are no significant alternatives since the final regulations are consistent with existing SBA regulations on the suspension and termination of brokers and dealers in the Small Business Investment Company and Development Company programs. Further, the Agency must implement the provisions of the Government Securities Act which was effective in July 1987 in regulating brokers and dealers which transact business in government securities.

SBA certifies that this rule does not constitute a major rule for the purpose of Executive Order 12291, since the changes are not likely to result in an annual effect on the economy of $100 million or more.

This final rule contains no new reporting or recordkeeping requirements subject to the Paperwork Reduction Act. 44 U.S.C. Ch. 35. The disclosure requirements set forth in §§ 120.808 and 120.809 are clarifications of preexisting requirements, which have already received OMB approval under the Paperwork Reduction Act.

List of Subjects in 13 CFR Part 120

Loan programs/business, Small business.

Accordingly, pursuant to the authority contained in section 5(b)(6) of the Small Business Act (15 U.S.C. 634(b)(6)), SBA amends Part 120, Chapter I, Code of Federal Regulations, as follows.

PART 120—BUSINESS LOAN POLICY

1. The authority citation for Part 120 continues to read as follows:

Authority: 15 U.S.C. 634(b)(6) and 636(a) and (h).)

2. Section 120.605–1 is amended by revising the first sentence to read as follows:

§ 120.605–1 Transferability.

Except as indicated below in § 120.605–2, certificates issued by the FTA shall be freely transferable. * * *

§ 120.605–3 [Redesignated from § 120.605–2]

3. Section 120.605–2 is redesignated as § 120.605–3, and a new § 120.605–2 is added to read as follows:

§ 120.605–2 Violation of Secondary Market Rules and Regulations.

SBA reserves the right to suspend or revoke the privilege of a lender, broker, dealer or registered holder to sell, purchase, broker, or deal in loans, loan certificates or loan pool certificates if such lender, broker, dealer or registered holder:

(a) commits a significant violation, as determined by SBA, of the Rules and Regulations of the Secondary Market (Subparts F, G and H of this Part);

(b) commits a significant violation, as determined by SBA, of any of the provisions of the contracts entered into by the parties, including, but not limited to, Standard Forms 1085, 1086, 1088 and 1454; or

(c) knowingly submits false or fraudulent information in support of its participation in the SBA Secondary Market to SBA or the FTA. SBA shall provide written notice of such determination at least 10 business days prior to the effective date of such determination. Such notice shall inform the lender, broker, dealer, or registered holder of the opportunity for a hearing pursuant to Part 134 of this chapter. During the period of any proceedings under Part 134 the action of the SBA shall remain in effect.

4. Section 120.703 is amended by revising paragraph (a)(1) to read as follows:

§ 120.703 Eligible pool assemblers.

(a) * * *

(1) Is regulated by the appropriate regulatory agency as defined in Section 3(a)(34)(G) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(34)(G));

* * * * *

§§ 120.705—120.712 [Redesignated as §§ 120.706—120.713]

5. Section 120.705 through 120.712 are redesignated as §§ 120.706 through 120.713, and a new § 120.705 is added to read as follows:

§ 120.705 Suspension or revocation of broker or dealer.

(a) In addition to the provisions of Section 120.605–2, SBA may exclude any broker or dealer from selling or otherwise dealing in certificates:

(1) If such broker's or dealer's authority to engage in the securities business has been revoked or suspended by a supervisory agency. When such authority has been so suspended, such broker or dealer will be suspended by SBA for the duration of such suspension by the supervisory agency.

(2) If such broker or dealer has been indicted or otherwise formally charged with a misdemeanor or felony bearing on its fitness to participate in the market for certificates, such broker or dealer may be suspended while the charge is pending. Upon conviction, participation may be terminated.

(3) When such broker or dealer has suffered an adverse final civil judgment, holding that such broker or dealer has committed a breach of trust or violation of law or regulation protecting the integrity of business transactions or relationships, participation in the market for certificates may be terminated.

(b) SBA may, for any of the reasons stated above, suspend or revoke the privilege of any broker or dealer to participate in this market. SBA shall give written notice at least ten (10) business days prior to the effective date of such action. Such notice shall inform the broker or dealer of the opportunity for a hearing pursuant to Part 134 of this Chapter.

(c) Procedures for appealing the decision to suspend or revoke are found in Part 134 of this chapter. During the period of any proceedings under Part 134 the action of the SBA shall remain in effect.

6. Section 120.713, as redesignated, is revised to read as follows:

§ 120.713 Disclosure requirements.

Prior to any sale, the pool assembler or any subsequent seller of a certificate must disclose to the purchaser, either orally or in writing, information on the terms, conditions and yield as described in the Secondary Market Program Guide. In addition, such information must be provided in writing on the transfer document at the time it is submitted to the FTA. The FTA will, subsequent to the sale, provide such disclosure information in writing to the purchaser. If all or part of a pool certificate is placed into or used as the backing for a trust, investment pool, mutual fund or any other security, this same disclosure information must be provided to investors through the prospectus and any promotional material.

7. Section 120.809 is revised to read as follows:

§ 120.809 Disclosure requirements.

Every registered holder of the guaranteed portion must, prior to any sale, disclose to the purchaser either orally or in writing the terms and conditions and yield of such instrument as described in the Secondary Market Program Guide. In addition, such information must be provided in writing on the transfer document at the time it is submitted to the FTA. The FTA will, subsequent to sale, provide such disclosure information in writing to the purchaser. If all or part of a certificate is placed into or used as the backing for a trust, investment pool, mutual fund or any other security, this same disclosure information must be provided to investors through the prospectus and any promotional material.

8. Section 120.810 is added to read as follows:

§ 120.810 Suspension or revocation of broker or dealer.

(a) In addition to the provisions of § 120.805–2, SBA may suspend or revoke any broker or dealer from selling or otherwise dealing in certificates:

(1) If such broker's or dealer's authority to engage in the securities business has been revoked or suspended by a supervisory agency. When such authority has been so suspended, such broker or dealer will be suspended by SBA for the duration of such suspension by the supervisory agency.

(2) If such broker or dealer has been indicted or otherwise formally charged with a misdemeanor or felony bearing on its fitness to participate in the market for certificates, such broker or dealer may be suspended while the charge is pending. Upon conviction, participation may be terminated.

(3) When such broker or dealer has suffered an adverse final civil judgment, holding that such broker or dealer has committed a breach of trust or violation of law or regulation protecting the integrity of business transactions or relationships, participation in the market for certificates may be terminated.

(b) SBA may, for any of the reasons stated above, suspend or revoke the privilege of any broker or dealer to participate in this market. SBA shall give written notice at least ten (10) business days prior to the effective date of such suspension or revocation. Such notice shall inform the broker or dealer of the opportunity for a hearing pursuant to Part 134 of this chapter.

(c) Procedures for appealing the decision to suspend or revoke are found in Part 134 of this chapter. During the period of any proceedings under Part 134 the action of the SBA shall remain in effect.

Date: January 28, 1988.

James Abdnor,

Administrator.

[FR Doc. 88-5015 Filed 3-7-88; 8:45 am]

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87-NM-172-AD; Amdt. 39-5867]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 747 series airplanes, which requires repetitive inspections of the Auxiliary Power Unit (APU) fuel supply line for leaks and repair, if necessary. Replacement of existing APU fuel line shroud drain tube and APU fuel pump drain tube assemblies with new parts terminates the need for repetitive inspections. This action is prompted by a report of fuel leak at a coupling on the APU fuel line shroud. Fuel was found in the forward cargo compartment and in several of the overwing floor beam bays. This condition, if not corrected, could result in a fire.

EFFECTIVE DATE: March 25, 1988.

ADDRESSES: The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Sulmo Mariano, Propulsion Branch, ANM-140S; Telephone (206) 431-1970. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: There has been a recent report of fuel found in the forward cargo compartment and in several of the overwing floor beam bays on a Boeing Model 747 airplane. A fuel leak was found at a coupling on the APU fuel line shroud. The source of the fuel in the shroud was attributed to a leaking APU engine fuel pump seal. The pump drain line is connected to the fuel line shroud by a tee adjacent to the common drain exit. The flow from the pump was sufficient to pressurize the fuel line shroud through the tee connection. Operation of an airplane with a fuel leak such as this could result in a fire.

The FAA has reviewed and approved Boeing Commercial Airplane Company Service Bulletin 747-49-2051, dated November 5, 1987 which describes replacement of the existing APU fuel line shroud drain tube and APU fuel pump drain tube assemblies with independent drain tube assemblies and routing separate locations in the drain mast. The service bulletin also describes replacement of the turbine drain tube assembly and routing the new tube assembly to a newly created body drain.

Since this condition is likely to exist or develop on other airplanes of the same type design, this AD requires repetitive inspection of the APU fuel supply line for leakage and repair, if necessary. Replacement of the existing APU fuel line shroud drain tube and other APU fuel drain system components, and changes in the turbine drain assembly, in accordance with the service bulletin previously mentioned, terminates the requirement for inspection.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required).

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation of Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 747 series airplanes, as listed in Boeing Service Bulletin 747-49-2051, dated November 5, 1987, certificated in any category. Compliance required as indicated, unless previously accomplished.

To eliminate the potential for a fire due to fuel leaking from the auxiliary power unit (APU) drain system, accomplish the following:

A. Within the next 30 days after the effective date of this AD, and at intervals not to exceed 30 days thereafter, inspect the APU fuel supply line for fuel leaks, in accordance with Boeing Model 747 Maintenance Manual Section 28-25-00, page 601, dated August 25, 1987, or later FAA-approved revision. If leakage is detected, repair in accordance with the Maintenance Manual, before further flight.

B. Modification of the APU fuel line drain system, fuel pump drain, and turbine drain assembly, in accordance with Boeing Service Bulletin 747-49-2051, dated November 5, 1987, or later FAA-approved revision, constitutes terminating action for the repetitive inspection requirement of paragraph A., above.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective March 25, 1988.

Issued in Seattle, Washington, on February 26, 1988.

Wayne J. Barlow,

Director, Northwest Mountain Region.

[FR Doc. 88-4945 Filed 3-7-88; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 87-NM-151-AD; Amdt. 39-5870]

Airworthiness Directives; British Aerospace Model H.S. 748 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain British Aerospace Model H.S. 748 series airplanes, which requires inspection of certain inboard main landing gear pivot bracket forgings for cracks. This amendment is necessary because cracks have been reported in airplanes on which Modification 6175 has been accomplished. This condition, if not corrected, could lead to collapse of the main landing gear.

EFFECTIVE DATE: April 18, 1988.

ADDRESSES: The applicable service information may be obtained from British Aerospace, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Bob Huhn, Standardization Branch, ANM-113, telephone (206) 431-1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive, applicable to certain British Aerospace Model H.S. 748 series airplanes, which requires inspection of certain inboard main landing gear pivot bracket forgings for cracks, was published in the Federal Register on December 11, 1987 (52 FR 47015).

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received in response to the proposal.

After careful review of the available data, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

Currently, no Model H.S. 748 airplanes of U.S. registry will be affected by this AD. However, should a Model H.S. 748 airplane be imported to the U.S. in the future, it will take approximately 12 manhours per airplane to accomplish the required actions, and the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of this AD to a U.S. operator will be $480 per airplane.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the critiera of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities, because of the minimal cost of compliance per airplane ($480). A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

British Aerospace: Applies to all Model H.S. 748 series airplanes, on which Modification 6175 has been accomplished (post Mod 6175), certificated in any category. Compliance required as indicated, unless previously accomplished.

To detect cracks and prevent collapse of the main landing gear, accomplish the following:

A. Prior to accumulating 25,000 landings or within the next 750 flight hours after the effective date of this AD, whichever occurs later, and thereafter at intervals not to exceed 1,500 landings, perform an inspection of inboard main pivot bracket assemblies in accordance with paragraph 2A of the British Aerospace H.S. 748 Service Bulletin 57/59, Revision No. 1, dated April 1984. Any assembly found to exhibit corrosion, loose bolts, and/or cracks must be repaired in accordance with paragraph 2D of the above mentioned service bulletin. If corrosion to a depth greater than 0.080-inch is found, repair in accordance with a method approved by the FAA.

B. An alternative means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to British Aerospace, Librarian for Service Bulletins, P.O. Box 17414 Dulles International Airport, Washington, DC 20041. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective April 18, 1988.

Issued in Seattle, Washington, on February 29, 1988.

Wayne J. Barlow,

Director, Northwest Mountain Region.

[FR Doc. 88-4946 Filed 3-7-88; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 88-NM-06-AD; Amdt. 39-5860]

Airworthiness Directives; The de Havilland Aircraft Company of Canada, A Division of Boeing of Canada, Ltd; Model DHC-8 Series Airplanes Equipped With Eldec Proximity Switch Electronic Control Unit (PSEU) P/N 8-410-03 or 8-410-04

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the Federal Register and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective as to all known U.S. owners and operators of certain de Havilland Model DHC-8 series airplanes by individual telegrams. This AD requires a revision to the airplane flight manual (AFM) to include a pre-flight check of the nose gear cockpit indication system, and repair, if necessary. This action is prompted by a report of a fault identified in the PSEU which can result in the nose gear failing to extend and an incorrect gear position indication in the cockpit.

DATES: Effective March 25, 1988.

This AD was effective earlier to all recipients of telegraphic AD T88-03-51, dated January 28, 1988.

ADDRESSES: The applicable service information may be obtained from The de Havilland Aircraft Company of Canada, A Division of Boeing of Canada, Ltd., Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the FAA, New England Region, New York Aircraft Certification Office, 181 South Franklin Avenue, Room 202, Valley Stream, New York.

FOR FURTHER INFORMATION CONTACT: Mr. C. Kallis, Systems Branch, ANE–173, New York Aircraft Certification Office, FAA, New England Region, 181 South Franklin Avenue, Room 202, Valley Stream, New York, 11581; telephone (516) 791–6427.

SUPPLEMENTARY INFORMATION: On January 2, 1988, an incident occurred wherein a de Havilland Model DHC-8 series airplane landed with the nose gear retracted and nose gear doors closed. This was contrary to the cockpit display (three green lights), which indicated that the gear was in the down and locked position. While in flight prior to this landing, there had been an unsafe indication (red nose gear in transit light and amber nose gear light illuminated), which was cleared by cycling the gear. Because the cockpit display erroneously indicated that the nose gear was in the extended position, the pilot did not use the alternate gear extension system.

It has been determined that this incident was caused by a certain fault in the proximity switch electronic control unit (PSEU). The existence of such a fault can be detected while performing the anti-skid check listed in the airplane flight manual (AFM), as part of the cockpit pre-flight check. This fault does not affect the alternate gear extension system.

On January 28, 1988, the FAA issued telegraphic AD T88-03-51, applicable to certain de Havilland Model DHC-8 series airplanes, which requires an AFM revision to include a pre-flight check of the nose gear cockpit indication system prior to each flight, and repair, if necessary. This is considered to be an interim action until final action has been identified, at which time the FAA may consider further rulemaking.

Paragraph C. of the final rule has been revised to require concurrence of the FAA Principal Maintenance Inspector in requests by operators for use of alternate means of compliance. Paragraph C. has also been revised to delegate the authority for adjustment of the compliance time to the Manager of the New York Aircraft Certification Office. The FAA has determined that these changes will not increase the economic burden on any operator, nor will they increase the scope of the AD.

Since a situation existed, and still exists, that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The Federal Aviation Administration has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required).

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

de Havilland Aircraft Company of Canada, A Division of Boeing of Canada, Ltd.: Applies to de Havilland Model DHC-8-101 and -102 series airplanes, certificated in any category, equipped with Eldec Proximity Switch Electronic Control Unit (PSEU), P/N 8-410-03 or 8-410-04. Compliance is required within 24 hours after the effective date of this AD.

To preclude the possibility of the nose gear cockpit indication system indicating erroneous nose gear position, accomplish the following:

A. Add the following to the Limitations Section of the airplane flight manual (AFM) and notify all crew members. This may be accomplished by inserting a copy of this AD in the AFM:

"1. Perform the following check prior to each flight. This check is to be performed even when the airplane is being operated with the anti-skid inoperative under the minimum equipment list:

a. Anti-skid switch—'OFF'

b. Anti-skid switch—'ON'

c. Check that inboard and outboard anti-skid caution lights illuminate, and then extinguish within 6 seconds. Should the lights fail to function as noted above, dispatch is prohibited until maintenance action clears the fault."

"2. While performing the 'After Take Off' and 'Approach' procedures:

a. Monitor the landing gear indication system during landing gear retraction and extension.

b. If there is any irregularity in gear indication or operation at any time throughout the flight, the gear must be confirmed 'DOWN AND LOCKED' using the alternate down-lock verification system, irrespective of a gear 'DOWN AND LOCKED' (green) indication on the normal landing gear indicating system."

B. Any in-flight landing gear irregularity must be corrected after landing by maintenance action prior to further flight.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of the Principal Maintenance Inspector, may be used when approved by the Manager, New York Aircraft Certification Office, FAA, New England Region.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the maintenance requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer, may obtain copies upon request to The de Havilland Aircraft Company of Canada, A Division of Boeing of Canada, Ltd., Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the FAA, New England Region, New York Aircraft Certification Office, 181 South Franklin Avenue, Room 202, Valley Stream, New York.

This amendment becomes effective March 25, 1988.

It was effective earlier to all recipients of telegraphic AD T88-03-51, dated January 28, 1988.

Issued in Seattle, Washington, on February 26, 1988.

Wayne J. Barlow,

Director, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 87-ASW-32]

Amendment of Control Zone; Altus, OK, and Amendment of Transition Area; Hobart, OK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This final rule will amend the existing control zone located at Altus, OK, and amend the existing transition area located at Hobart, OK. The development of two new standard instrument approach procedures (SIAP) for the Altus Municipal Airport, Altus, OK, has made this multiple amendment necessary. The intended effect of this multiple amendment is to provide additional controlled airspace for aircraft executing the new SIAP's to the airport.

EFFECTIVE DATE: 0901 UTC, May 5, 1988.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530, telephone (817) 624-5561.

SUPPLEMENTARY INFORMATION:

History

On September 19, 1987, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by amending the control zone located at Altus, OK, and the transition area located at Hobart, OK (52 FR 35586).

Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is that proposed in the notice.

Sections 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations were republished in Handbook 7400.6C, dated January 2, 1987.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations will amend the control zone located at Altus, OK, and the transition area located at Hobart, OK. The development of two new SIAP's to the Altus Municipol Airport, Altus, OK, has necessitated this multiple amendment. The intended effect of this multiple amendment is to provide additional controlled airspace for aircraft executing the two new SIAP's to the airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. Section 71.171 is amended as follows:

Altus, OK [Amended]

By deleting the words, "excluding that airspace within a 1½-mile radius of the Altus Municipal Airport (latitude 34°41′57″ N.,

VOL.
53
ISS
45
MR
8
988
UMI

longitude 99°20′21″ W.);" and by adding the words, "and within a 5-mile radius of the Altus Municipal Airport (latitude 34°42′00″ N., longitude 99°22′00″ W.)."

§ 71.181 [Amended]

3. Section 71.181 is amended as follows:

Hobart, OK [Amended]

By deleting the words, "within an 8-mile radius of the Altus AFB;" and by adding the words, "within an 11-mile radius of the Altus AFB."

Issued in Fort Worth, TX, on February 24, 1988.

Larry L. Craig,

Manager, Air Traffic Division, Southwest Region.

[Airspace Docket No. 87–ASW–34]

Revision of Transition Area; Johnson City, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment will revise the transition area located at Johnson City, TX. The closure of the Shepherd Farm Airport, the decommissioning of the Johnson City Nondirectional Radio Beacon (NDB), and the subsequent cancellation of the associated standard instrument approach procedures (SIAP) have made this revision necessary. The intended effect of this revision will release that controlled airspace no longer required for aircraft executing the SIAP's to the Shepherd Farm and Johnson City Airports. This revision will provide adequate controlled airspace for the VOR–B SIAP now serving the Johnson City Airport. Coincident with this action, the instrument flight rules (IFR) status of the Shepherd Farm Airport is canceled.

EFFECTIVE DATE: 0901 UTC, May 5, 1988.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530, telephone (817) 624–5561.

SUPPLEMENTARY INFORMATION:

History

On December 2, 1987, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by revising the transition area located at Johnson City, TX (52 FR 48715). Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C, dated January 2, 1987.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations will revise the transition area located at Johnson City, TX. The closure of the Shepherd Farm Airport, the decommissioning of the Johnson City NDB, and the cancellation of the associated SIAP's necessitated the need for this revision. The intended effect of this revision will release that controlled airspace no longer required for aircraft executing the respective SIAP's to the Shepherd Farm and Johnson City Airports. This revision will reduce the existing 700-foot transition area to a 7-mile radius of the Johnson City Airport and will provide adequate controlled airspace for the VOR–B SIAP now serving the Johnson City Airport. Coincident with this action, the IFR status of the Shepherd Farm Airport is canceled.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Johnson City, TX [Revised]

That airspace extending upward from 700 feet above the surface within a 7-mile radius of the Johnson City Airport (latitude 30°15′05″ N., longitude 98°37′21″ W.).

Issued in Fort Worth, TX, on February 25, 1988.

Larry L. Craig,

Manager, Air Traffic Division, Southwest Region.

14 CFR Part 71

[Airspace Docket No. 87–AGL–5]

Alteration of VOR Federal Airways; Knox, IN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the descriptions of Federal Airways V–126 and V–340 located in the vicinity of Knox, IN. The current alignment of these airways has created operational and navigational problems due to the reduced reliability of the O'Hare very high frequency omni-directional radio range and tactical air navigational aid (VORTAC). This action improves safety and reduces controller workload.

EFFECTIVE DATE: 0901 UTC, May 5, 1988.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Branch (ATO–240), Airspace—Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–9250.

SUPPLEMENTARY INFORMATION:

History

On July 14, 1987, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the descriptions of VOR Federal Airways V–126 and V–340 located in the vicinity of Knox, IN (52 FR 26350). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, and changes to V–126 and V–340 by substituting the Peotone,

IL, radial for the Chicago Heights radial, this amendment is the same as that proposed in the notice. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the descriptions of VOR Federal Airways V–126 and V–340 located in the vicinity of Knox, IN. Currently, the navigation fix for arrival aircraft for O'Hare and satellite airports utilizes the O'Hare VORTAC and Chicago Heights radials, however, the O'Hare radial is not reliable and this action changes those radials.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR Federal airways.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.123 [Amended]

2. Section 71.123 is amended as follows:

V–126 [Amended]

By removing the words "From Chicago Heights, IL; Goshen, IN;" and substituting the words "From INT Peotone, IL, 053° and Knox, IN, 297° radials; INT Knox 297° and Goshen, IN, 270° radials; Goshen;"

V–340 [Revised]

From INT Peotone, IL, 053° and Knox, IN, 297° radials; Knox; Fort Wayne, IN, to Richmond, IN.

Issued in Washington, DC, on February 26, 1988.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

14 CFR Part 71

[Airspace Docket No. 87–ANM–22]

Alteration of VOR Federal Airways; Missoula, MT

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the descriptions of several Federal Airways located in the vicinity of Missoula, MT. Changes to instrument flight procedures to the Missoula Airport now require the Salt Lake City Air Route Traffic Control Center (ARTCC) controllers to position arriving aircraft on published routes or approach transition prior to transfer of control to the Missoula Air Traffic Control Tower. This action is compatible with the new instrument approach procedures thus expediting the traffic in the Missoula terminal area and increasing flight safety.

EFFECTIVE DATE: 0901 UTC, May 5, 1988.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–9250.

SUPPLEMENTARY INFORMATION:

History

On September 28, 1987, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the descriptions of VOR Federal Airways V–2, V–120, V–257 and V–343 located in the vicinity of Missoula, MT (52 FR 36278). Changes to the instrument flight procedures at the Missoula Airport now require the Salt Lake City ARTCC to position arriving aircraft on a published route prior to transfer of control to the Missoula Air Traffic Control Tower. This procedure involves radar vectors at altitudes compatible with the instrument approach procedures. This proposed action would reduce the vectoring requirement, thereby reducing the controller workload and improving traffic flow. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations changes the descriptions of several Federal Airways located in the vicinity of Missoula, MT. Changes to instrument flight procedures to the Missoula Airport now require the Salt Lake City ARTCC controllers to position arriving aircraft on published routes or approach transition prior to transfer of control to the Missoula Air Traffic Control Tower. This action is compatible with the new instrument approach procedures thus expediting the traffic in the Missoula terminal area and increasing flight safety.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR Federal airways.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.123 [Amended]

2. Section 71.123 is amended as follows:

V–2 [Amended]

By removing the words "Mullan Pass, ID; 5 miles, 53 miles, 91 MSL, Missoula, MT; 6 miles, 84 MSL, Drummond, MT; 11 miles, 84 MSL," and by substituting the words "Mullan Pass, ID; Missoula, MT; Drummond, MT;"

V–120 [Amended]

By removing the words "Mullan Pass, 5 miles, 55 miles, 96 MSL, 43 miles, 125 MSL," and by substituting the words "Mullan Pass;"

V–257 [Amended]

By removing the words "22 miles, 85 MSL"

V–343 [Revised]

From Dubois, ID; Bozeman, MT; to Drummond, MT.

Issued in Washington, DC, on March 1, 1988.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

14 CFR Parts 71 and 73

[Airspace Docket No. 87–AWP–36]

Subdivision of Restricted Areas R–3104 and R–3107; Hawaii

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment subdivides Restricted Areas R–3104 and R–3107 in Hawaii into R–3104A, R–3104B, R–3107A and R–3107B with changes in altitude structures and times of use. After reviewing the subject restricted areas, the FAA and the U.S. Navy have determined that the alteration of these areas will enable the using agency U.S. Navy to release previously restricted airspace for public use.

EFFECTIVE DATE: 0901 UTC, May 5, 1988.

FOR FURTHER INFORMATION CONTACT: Andrew B. Oltmanns, Airspace Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–9254.

The Rule

These amendments to Parts 71 and 73 of the Federal Aviation Regulations subdivides Restricted Areas R–3104 and R–3107 in Hawaii with changes in altitude structures and times of use. This action also amends the Continental Control Area. Because this would amend the time of designation to reflect actual times of use and would reduce the time the restricted areas are in effect, I find that notice and public procedure under 5 U.S.C. 553(b) are unnecessary because these actions are minor technical amendments in which the public would not be particularly interested. Sections 71.151 and 73.31 of Parts 71 and 73 of the Federal Aviation Regulations were republished in Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Parts 71 and 73

Aviation safety, Continental control area and restricted areas.

Adoption of the Amendments

Accordingly, pursuant to the authority delegated to me, Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) are amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.151 [Amended]

2. Section 71.151 is amended as follows:

R–3104B Island of Kahoolawe, HI [New]

R–3107B Kaula Rock, HI [New]

PART 73—SPECIAL USE AIRSPACE

3. The authority citation for Part 73 continues to read as follows:

Authority: 49 U.S.C 1348(a), 1354(a), 1510, 1522; E.O.10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 73.31 [Amended]

4. Section 73.31 is amended as follows:

R–3104 Island of Kahoolawe, HI [Removed]

R–3104A Island of Kahoolawe, HI [New]

Boundaries. Beginning at lat. 20°34'20" N., long. 156°40'30" W.; thence clockwise 1 mile from and parallel to the shoreline to lat. 20°36'20" N., long. 156°36'30" W.; to lat. 20°36'20" N., long. 156°34'50" W.; to lat. 20°35'20" N., long. 156°31'45" W.; thence clockwise 1 mile from and parallel to the shoreline to lat. 20°30'20" N., long. 156°31'45" W.; to lat. 20°30'00" N., long. 156°31'00" W.; to lat. 20°28'30" N., long. 156°30'45" W.; thence clockwise 3 nautical miles from and parallel to the shoreline to lat. 20°35'25" N., long. 156°43'00" W.; to the point of beginning.

Designated altitudes. Surface to but not including 5,000 feet MSL.

Time of designation. Continuous.

14 CFR Part 73

[Airspace Docket No. 87–ACE–8]

Alteration and Establishment of Restricted Areas; Fort Leonard Wood, MO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: These actions alter the times of use of Restricted Areas R–4501A, B, C, and D and establish R–4501F, G, and H located near Fort Leonard Wood, MO These actions provide the Department of Army the necessary airspace to accommodate increased training activities.

EFFECTIVE DATE: 0901 UTC, May 5, 1988.

FOR FURTHER INFORMATION CONTACT: Andrew B. Oltmanns, Airspace Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–9254.

SUPPLEMENTARY INFORMATION:

History

On December 11, 1987, the FAA proposed to amend Part 73 of the Federal Aviation Regulations (14 CFR Part 73) to alter the times of use of Restricted Areas R–4501A, B, C, and D and to establish R–4501F, G, and H located near Fort Leonard Wood, MO (52 FR 47021). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 73.45 of Part 73 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The Rule

This amendment to Part 73 of the Federal Aviation Regulations will alter the times of use of Restricted Areas R–4501A, B, C, and D and will establish R–4501F, G, and H located near Fort Leonard Wood, MO. This action will increase the total number of restricted areas from four to seven. The establishment of R–4501F, G, and H will be located adjacent to the existing R–4501A, B, C, and D located at Fort Leonard Wood, MO. R–4501F and G located just southwest of the Forney Army Air Field (AAF) is established from the surface to 3,200 feet MSL to contain hazardous training activities. R–4501H located just east of Forney AAF is also established from the surface to 3,200 feet MSL to contain hazardous training activities.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 73

Aviation safety, Restricted areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 73 of the Federal Aviation Regulations (14 CFR Part 73) is amended, as follows:

PART 73—SPECIAL USE AIRSPACE

1. The authority citation for Part 73 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510, 1522; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 73.45 [Amended]

2. Section 73.45 is amended as follows:

R–4501A, B, C, and D Fort Leonard Wood, MO [Amended]

By removing the present time of designation and substituting the following:

Time of designation. 0700–1800 Monday-Saturday; other times by NOTAM issued at least 24 hours in advance.

R–4501F Fort Leonard Wood, MO [New]

Boundaries. Beginning at lat. 37°41'00" N., long. 92°09'04" W.; to lat. 37°41'00" N., long. 92°10'52" W.; to lat. 37°43'02" N., long. 92°12'10" W.; to lat. 37°43'10" N., long. 92°08'45" W.; to the point of beginning.

Designated altitudes. Surface to 3,200 feet MSL.

Time of designation. 0700–1800 daily; other times by NOTAM issued at least 24 hours in advance.

Controlling agency. FAA, Kansas City ARTCC.

Using agency. U.S. Army, Headquarters U.S. Army Training Center, Fort Leonard Wood, MO.

R–4501G Fort Leonard Wood, MO [New]

Boundaries. Beginning at lat. 37°41'00" N., long. 92°10'52" W.; to lat. 37°41'00" N., long. 92°14'08" W.; to lat. 37°44'48" N., long. 92°12'19" W.; to lat. 37°44'48" N., long. 92°08'45" W.; to lat. 37°43'10" N., long. 92°08'45" W.; to lat. 37°43'02" N., long. 92°12'10" W.; to the point of beginning.

Designated altitudes. Surface to 3,200 feet MSL.

Time of designation. By NOTAM issued at least 24 hours in advance.

Controlling agency. FAA, Kansas City ARTCC.

Using agency. U.S. Army, Headquarters U.S. Army Training Center, Fort Leonard Wood, MO.

R–4501H Fort Leonard Wood, MO [New]

Boundaries. Beginning at lat. 37°42'50" N., long. 92°07'20" W.; to lat. 37°44'00" N., long. 92°07'15" W.; to lat. 37°44'45" N., long. 92°05'40" W.; to lat. 37°44'50" N., long. 92°04'48" W.; to lat. 37°46'15" N., long. 92°05'30" W.; to lat. 37°47'45" N., long. 92°06'00" W.; to lat. 37°48'00" N., long. 92°06'00" W.; to lat. 37°48'00" N., long. 92°02'40" W.; thence south and along the Big Piney River and Reservation boundary to lat 37°46'45" N., long. 92°01'40" W.; to lat. 37°42'30" N., long. 92°04'05" W.; to lat. 37°42'15" N., long. 92°06'05" W.; to the point of beginning.

Designated altitudes. Surface to 3,200 feet MSL.

Time of designation. 1500–1600 Wednesday; other times by NOTAM.

Controlling agency. FAA, Kansas City ARTCC.

Using agency. U.S. Army, Headquarters U.S. Army Training Center, Fort Leonard Wood, MO.

Issued in Washington, DC, on February 29, 1988.

BILLING CODE 4910-13-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 389

[Docket Nos. RM87-3-091, et al., Order No. 472-C]

Annual Charges Under the Omnibus Budget Reconciliation Act of 1986

Issued January 25, 1988.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order on rehearing; notice of OMB control numbers.

SUMMARY: The Federal Energy Regulatory Commission (Commission) issued Order No. 472-C on January 14, 1988 (53 FR 1748 (January 22, 1988)). This order on rehearing clarified several portions of the Commission's final rule and order on rehearing of the final rule in this docket. This notice states that the Office of Management and Budget has approved the information collection requirements of FERC Form Nos. 2 and 2A as revised in Order No. 472-C.

EFFECTIVE DATE: January 23, 1988.

FOR FURTHER INFORMATION CONTACT: Sandra S. Vincent, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357-8530.

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act, 44 U.S.C. 3501-3520 (1982) and the Office of Management and Budget's (OMB) regulations, 5 CFR Part 1320 (1987), require that OMB approve certain information collection requirements imposed by agency rules. On January 22, 1988, OMB approved the information collection requirements of FERC Form Nos. 2 and 2A as amended by Order No. 472-C under Control Numbers 1902-0028 and 1902-0030, respectively. Therefore, these revised forms are effective as of January 23, 1988. No amendment to the Table of OMB Control Numbers in 18 CFR 389.101(b) is necessary.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 500

Foreign Assets Control Regulations

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This rule clarifies the Office of Foreign Assets Control's interpretation of § 500.563 of the Foreign Assets Control Regulations, 31 CFR Part 500 ("the Regulations"), which pertains to transactions incident to travel to, from, and within Vietnam, Cambodia, and North Korea.

EFFECTIVE DATE: March 8, 1988.

FOR FURTHER INFORMATION CONTACT: Marilyn L. Muench, Chief Counsel, Office of Foreign Assets Control, Department of the Treasury, Washington, DC 20220 (Telephone: (202) 376-0392).

SUPPLEMENTARY INFORMATION: Due to the heightened interest in travel to Vietnam and Cambodia, the Office of Foreign Assets Control ("FAC") is issuing this revised version of § 500.563 of the Regulations, which authorizes certain transactions incident to travel to, from, and within Vietnam, North Korea, and Cambodia. The revisions clarify FAC's interpretation of this section. Certain technical amendments have also been made.

The rule makes clear that the only service travel service providers, including persons such as travel agents, tour operators, and carriers, may provide to persons subject to U.S. jurisdiction is the booking of passage aboard a third-country carrier traveling to or from Vietnam, North Korea, or Cambodia. Other transactions, such as the arrangement, promotion, or facilitation of group or individual tours; the arrangement, promotion, or facilitation of hotel accommodations, ground transportation, local tours, and similar travel activities in one of the designated countries; the entry into business arrangements with one of the designated countries; and the acceptance of fees, commissions, or other compensation from one of the designated countries, are prohibited. These prohibitions extend to dealings with or through third-country intermediaries, including the acceptance of compensation from a third-country source for referrals of business to the person.

With respect to transactions by individuals incident to travel within one of the countries designated under 31 CFR Part 500, the Regulations as amended now state explicitly that use of charge cards, including debit or credit cards, is prohibited. Likewise, the processing and payment of charge card transactions, as well as related transactions by persons subject to the jurisdiction of the United States, are prohibited.

Since the Regulations involve a foreign affairs function, the provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking; opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, does not apply. Because the Regulations are issued with respect to a foreign affairs function of the United States, they are not subject to Executive Order 12291 of February 17, 1981, dealing with Federal regulations.

List of Subjects in 31 CFR Part 500

Cambodia, North Korea, Travel restrictions, Vietnam.

For the reasons set forth in the preamble, 31 CFR Part 500 is amended as follows:

PART 500—FOREIGN ASSETS CONTROL REGULATIONS

1. The authority citation for Part 500 continues to read as follows:

Authority: 50 U.S.C. App. 5, as amended; E.O. 9193, 7 FR 5205, 3 CFR 1938-1943 Cum. Supp., p. 1174; E.O. 9989, 13 FR 4891, 3 CFR 1943-1948 Comp., p. 748.

2. Section 500.563 is revised to read as follows:

§ 500.563 Certain transactions incident to travel to and in North Korea, North or South Vietnam, or Cambodia.

(a) *Travel transactions by individuals.* The following transactions are authorized:

(1) All transactions by individuals ordinarily incident to their own travel to and from any foreign country designated under § 500.201 of this part.

(2) All transactions by individuals ordinarily incident to their own travel in any foreign country designated under § 500.201 of this part, including payment of living expenses and the acquisition of goods for personal consumption there.

(3) The purchase in any foreign country designated under § 500.201 of this part, and importation as accompanied baggage, of merchandise with a foreign market value not to exceed $100 per person for personal use only. Such merchandise may not be resold. Single copies of publications do not count against the $100 limit set forth in this paragraph. For purposes of this section, the term "publications" includes books, newspapers, magazines, films, phonograph records, tapes, photographs, microfilm, microfiche, posters, and similar materials. The authorization in this paragraph may be used only once in every six consecutive months.

(b) Persons who travel to any foreign country designated under § 500.201 of this part for the purpose of gathering news, making news films, engaging in professional research, or for similar activities, are authorized to acquire and import into the United States, as accompanied baggage or otherwise, such publications (as defined in paragraph (a) of this section) as are directly related to their professional activities, without limitation as to value. Such merchandise may only be acquired and imported for their own professional use or that of their employers at the time of the travel, and may not be resold to other persons.

(c) Persons who travel pursuant to the general licenses set forth in paragraph (a) of this section after March 18, 1977, and who prior to that date were not designated nationals of any foreign country designated under § 500.201 of this part, are licensed as unblocked nationals. This paragraph does not authorize any transactions prohibited by any other section of this part.

(d) *Travel Service Providers.* (1) All transactions by travel service providers are authorized in connection with the booking of passage to and from a foreign country designated under § 500.201 of this part aboard a third-country carrier, *i.e.*, a carrier that is neither owned, controlled, nor chartered by a person subject to the jurisdiction of the United States, an embargoed country, or a national of an embargoed country. The term "travel service providers" includes, but is not limited to, travel agents; commercial and noncommercial organizations that promote or arrange travel; persons arranging through transportation; persons chartering an aircraft or vessel on behalf of others; persons arranging hotel accommodations, ground transportation, local tours, and similar travel activities; carriers; and ticket agents.

(2) The provision of any service related to travel by individuals to a foreign country designated under § 500.201 of this part is prohibited, other than that licensed by paragraph (d)(1) of this section. Thus, no person subject to U.S. jurisdiction may arrange, promote, or facilitate group or individual tours or travel to any foreign country designated under § 500.201 of this part; arrange, promote, or facilitate hotel accommodations, ground transportation, local tours and similar travel activities within a designated country; enter into business agreements or arrangements with those countries or their nationals with respect to travel; or accept fees, commissions, or other compensation from them. These prohibitions extend to dealings with or through third-country intermediaries, including the acceptance of compensation in any form from a third-country source for referrals of business to the intermediary.

(e) *Use of Charge Cards.* (1) Unless specifically provided, neither this section nor any general or specific license contained in or issued pursuant to this section authorizes persons subject to U.S. jurisdiction to utilize charge cards, including, but not limited to, debit cards, credit cards or other credit facilities, for expenditures in a country designated pursuant to § 500.201 of this part. Such transactions are prohibited by § 500.201.

(2) This section does not authorize the processing and payment by persons subject to U.S. jurisdiction, such as charge card issuers or intermediary banks, of charge card instruments (*e.g.*, vouchers, drafts, or sales receipts) for expenditures in any country designated pursuant to § 500.201 of this part. Also, it does not authorize a domestic charge card issuer, or a foreign charge card firm owned or controlled by U.S. persons, to deal with an enterprise owned or controlled by a foreign country designated under § 500.201 of this part; a national of such a foreign country; or a third-country party, such as a franchisee, in connection with the extension of charge card services to any person in one of the countries designated under § 500.201 of this part.

Dated: February 5, 1988.

R. Richard Newcomb,

Director, Office of Foreign Assets Control.

Approved: February 16, 1988.

John P. Simpson,

Acting Assistant Secretary (Enforcement).

BILLING CODE 4810-25-M

---

31 CFR Parts 535, 540, 545, and 550

Iran, Nicaragua, South Africa, and Libya; Prepenalty and Penalty Procedures

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Final rule.

SUMMARY: The Office of Foreign Assets Control is amending the regulations concerning Iran (31 CFR Part 535), Nicaragua (31 CFR Part 540), South Africa (31 CFR Part 545), and Libya (31 CFR Part 550) by the addition of prepenalty and penalty procedures to Subparts G of these regulations. The amendments establish a procedure for imposition of civil monetary penalties for violations as provided in section 206(a) of the International Emergency Economic Powers Act, 50 U.S.C. 1705(a), and section 603(b)(1) of the Comprehensive Anti-Apartheid Act of 1986, 22 U.S.C. 5113(b)(1). These changes do not alter any substantive obligations imposed by the regulations, but set forth an additional enforcement tool to secure compliance with those obligations.

EFFECTIVE DATE: March 8, 1988.

FOR FURTHER INFORMATION CONTACT: Thomas F. Baker, Enforcement Advisor, Office of Foreign Assets Control, Department of the Treasury, Washington, DC 20220, 202/376-0970.

SUPPLEMENTARY INFORMATION: The Office of Foreign Assets Control of the Department of the Treasury (FAC) is entrusted with the responsibility of enforcing economic sanctions and restrictions imposed pursuant to the International Emergency Economic Powers Act, 50 U.S.C. 1701 *et seq.*, and the Comprehensive Anti-Apartheid Act of 1986, 22 U.S.C. 5001 *et seq.* Although both statutes provide explicitly for civil penalties, no procedural regulations have previously been issued, and only criminal prosecutions have been brought against violators. Establishment of a civil administrative procedure will provide additional flexibility in enforcement. The following regulations establish a system of administrative enforcement that will permit FAC directly to assess civil monetary penalties, with referral to the Department of Justice for collection when necessary.

Since the regulations involve a foreign affairs function, the provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, does not apply. Because the regulations are issued with respect to a foreign affairs function of the United States, they are not subject to Executive Order 12291 of February 17, 1981, dealing with Federal regulations.

List of Subjects in 31 CFR Part 535, 540, 545, and 550

Foreign assets, Foreign trade, Penalties.

For the reasons set out in the preamble, Title 31, Chapter V of the Code of Federal Regulations, is amended as set forth below.

31 CFR Part 535 is amended as follows:

PART 535—IRANIAN ASSETS CONTROL REGULATIONS

1. The authority citation for Part 535 continues to read as follows:

Authority: Secs. 201–207, 91 Stat. 1626; 50 U.S.C. 1701–1706; E.O. 12170, 44 FR 65729; E.O. 12205, 45 FR 24099; E.O. 12211, 45 FR 26685.

2. Section 535.702 is added to read as follows:

§ 535.702 Prepenalty notice.

(a) *When required.* If the Director of the Office of Foreign Assets Control (hereinafter "Director") has reasonable cause to believe that there has occurred a violation of any provision of this part or a violation of the provisions of any license, ruling, regulation, order, direction or instruction issued by or pursuant to the direction or authorization of the Secretary of the Treasury pursuant to this part or otherwise under the International Emergency Economic Powers Act, and the Director determines that further proceedings are warranted, he shall issue to the person concerned a notice of his intent to impose a monetary penalty. The prepenalty notice shall be issued whether or not another agency has taken any action with respect to this matter.

(b) *Contents*—(1) *Facts of violation.* The prepenalty notice shall: (i) Describe the violation.

(ii) Specify the laws and regulations allegedly violated.

(iii) State the amount of the proposed monetary penalty.

(2) *Right to make presentations.* The prepenalty notice also shall inform the person of his right to make a written presentation within thirty (30) days of mailing of the notice as to why a monetary penalty should not be imposed, or, if imposed, why it should be in a lesser amount than proposed.

3. Section 535.703 is added to read as follows:

§ 535.703 Presentation responding to prepenalty notice.

(a) *Time within which to respond.* The named person shall have 30 days from the date of mailing of the prepenalty notice to make a written presentation to the Director.

(b) *Form and contents of written presentation.* The written presentation need not be in any particular form, but shall contain information sufficient to indicate that it is in response to the prepenalty notice. It should contain responses to the allegations in the prepenalty notice and set forth the reasons why the person believes the penalty should not be imposed or, if imposed, why it should be in a lesser amount than proposed.

4. Section 535.704 is added to read as follows:

§ 535.704 Penalty notice.

(a) *No violation.* If, after considering any presentations made in response to the prepenalty notice, the Director determines that there was no violation by the person named in the prepenalty notice, he promptly shall notify the person in writing of that determination and that no monetary penalty will be imposed.

(b) *Violation.* If, after considering any presentations made in response to the prepenalty notice, the Director determines that there was a violation by the person named in the prepenalty notice, he promptly shall issue a written notice of the imposition of the monetary penalty to that person.

5. Section 535.705 is added to read as follows:

§ 535.705 Referral to United States Department of Justice.

In the event that the person named does not pay the penalty imposed pursuant to this subpart or make payment arrangements acceptable to the Director within thirty days of the mailing of the written notice of the imposition of the penalty, the matter shall be referred to the United States Department of Justice for appropriate action to recover the penalty in a civil suit in a Federal district court.

31 CFR Part 540 is amended as follows:

PART 540—NICARAGUAN TRADE CONTROL REGULATIONS

1. The authority citation for Part 540 continues to read as follows:

Authority: Secs. 201–207, 91 Stat. 1626; 50 U.S.C. 1701–1706; E.O. 12513.

2. Section 540.703 is added to read as follows:

§ 540.703 Prepenalty notice.

(a) *When required.* If the Director of the Office of Foreign Assets Control (hereinafter "Director") has reasonable cause to believe that there has occurred a violation of any provision of this part or a violation of the provisions of any license, ruling, regulation, order, direction or instruction issued by or pursuant to the direction or authorization of the Secretary of the Treasury pursuant to this part or otherwise under the International Emergency Economic Powers Act, and the Director determines that further proceedings are warranted, he shall issue to the person concerned a notice of his intent to impose a monetary penalty. The prepenalty notice shall be issued whether or not another agency has taken any action with respect to this matter.

(b) *Contents*—(1) *Facts of violation.* The prepenalty notice shall: (i) Describe the violation.

(ii) Specify the laws and regulations allegedly violated.

(iii) State the amount of the proposed monetary penalty.

(2) *Right to make presentations.* The prepenalty notice also shall inform the person of his right to make a written presentation within thirty (30) days of mailing of the notice as to why a monetary penalty should not be imposed, or, if imposed, why it should be in a lesser amount than proposed.

3. Section 540.704 is added to read as follows:

§ 540.704 Presentation responding to prepenalty notice.

(a) *Time within which to respond.* The named person shall have 30 days from the date of mailing of the prepenalty notice to make a written presentation to the Director.

(b) *Form and contents of written presentation.* The written presentation need not be in any particular form, but shall contain information sufficient to indicate that it is in response to the prepenalty notice. It should contain responses to the allegations in the prepenalty notice and set forth the reasons why the person believes the penalty should not be imposed or, if imposed, why it should be in a lesser amount than proposed.

4. Section 540.705 is added to read as follows:

§ 540.705 Penalty notice.

(a) *No violation.* If, after considering any presentations made in response to the prepenalty notice, the Director determines that there was no violation by the person named in the prepenalty notice, he promptly shall notify the person in writing of that determination and that no monetary penalty will be imposed.

(b) *Violation.* If, after considering any presentations made in response to the prepenalty notice, the Director determines that there was a violation by the person named in the prepenalty notice, he promptly shall issue a written notice of the imposition of the monetary penalty to that person.

5. Section 540.706 is added to read as follows:

§ 540.706 Referral to United States Department of Justice.

In the event that the person named does not pay the penalty imposed pursuant to this subpart or make payment arrangements acceptable to the Director within thirty days of the mailing of the written notice of the imposition of the penalty, the matter shall be referred to the United States Department of Justice, for appropriate action to recover the penalty in a civil suit in a Federal district court.

31 CFR Part 545 is amended as follows:

PART 545—SOUTH AFRICAN TRANSACTIONS REGULATIONS

1. The authority citation for Part 545 continues to read as follows:

Authority: 50 U.S.C. 1701 *et seq.*; E.O. 12532, 50 FR 36861, Sept. 10, 1985; E.O. 12535, 50 FR 40325, October 3, 1985. Pub. L. 99–440, 100 Stat. 1086; Pub. L. 99–631, 100 Stat. 3515; E.O. 12571, 51 FR 39505, Oct. 29, 1986.

2. Section 545.702 is added to read as follows:

§ 545.702 Prepenalty notice.

(a) *When required.* If the Director of the Office of Foreign Assets Control (hereinafter "Director") has reasonable cause to believe that there has occurred a violation of any provision of this part or a violation of the provisions of any license, ruling, regulation, order, direction or instruction issued by or pursuant to the direction or authorization of the Secretary of the Treasury pursuant to this part or otherwise under the Comprehensive Anti-Apartheid Act of 1986, and the Director determines that further proceedings are warranted, he shall issue to the person concerned a notice of his intent to impose a monetary penalty. The prepenalty notice shall be issued whether or not another agency has taken any action with respect to this matter.

(b) *Contents*—(1) *Facts of violation.* The prepenalty notice shall: (i) Describe the violation.

(ii) Specify the laws and regulations allegedly violated.

(iii) State the amount of the proposed monetary penalty.

(2) *Right to make presentations.* The prepenalty notice also shall inform the person of his right to make a written presentation within thirty (30) days of mailing of the notice as to why a monetary penalty should not be imposed, or, if imposed, why it should be in a lesser amount than proposed.

3. Section 545.703 is added to read as follows:

§ 545.703 Presentation responding to prepenalty notice.

(a) *Time within which to respond.* The named person shall have 30 days from the date of mailing of the prepenalty notice to make a written presentation to the Director.

(b) *Form and contents of written presentation.* The written presentation need not be in any particular form, but shall contain information sufficient to indicate that it is in response to the prepenalty notice. It should contain responses to the allegations in the prepenalty notice and set forth the reasons why the person believes the penalty should not be imposed or, if imposed, why it should be in a lesser amount than proposed.

4. Section 545.704 is added to read as follows:

§ 545.704 Penalty notice.

(a) *No violation.* If, after considering any presentations made in response to the prepenalty notice, the Director determines that there was no violation by the person named in the prepenalty notice, he promptly shall notify the person in writing of that determination and that no monetary penalty will be imposed.

(b) *Violation.* If, after considering any presentations made in response to the prepenalty notice, the Director determines that there was a violation by the person named in the prepenalty notice, he promptly shall issue a written notice of the imposition of the monetary penalty to that person.

5. Section 545.705 is added to read as follows:

§ 545.705 Referral to United States Department of Justice.

In the event that the person named does not pay the penalty imposed pursuant to this subpart or make payment arrangements acceptable to the Director within thirty days of the mailing of the written notice of the imposition of the penalty, the matter shall be referred to the United States Department of Justice for appropriate action to recover the penalty in a civil suit in a Federal district court.

31 CFR Part 550 is amended as follows:

PART 550—LIBYAN SANCTIONS REGULATIONS

1. The authority citation for Part 550 continues to read as follows:

Authority: 50 U.S.C. 1701 *et seq.*; E.O. 12543, 51 FR 875, January 9, 1986; E.O. 12544, 51 FR 1235, Jan. 10, 1986.

2. Section 550.703 is added to read as follows:

§ 550.703 Prepenalty notice.

(a) *When required.* If the Director of the Office of Foreign Assets Control (hereinafter "Director) has reasonable cause to believe that there has occurred a violation of any provision of this part or a violation of the provisions of any license, ruling, regulation, order, direction or instruction issued by or pursuant to the direction or authorization of the Secretary of the Treasury pursuant to this part or otherwise under the International Emergency Economic Powers Act, and the Director determines that further proceedings are warranted, he shall issue to the person concerned a notice of his intent to impose a monetary penalty. The prepenalty notice shall be issued whether or not another agency has taken any action with respect to this matter.

(b) *Contents*—(1) *Facts of violation.* The prepenalty notice shall: (i) Describe the violation.

(ii) Specify the laws and regulations allegedly violated.

(iii) State the amount of the proposed monetary penalty.

(2) *Right to make presentations.* The prepenalty notice also shall inform the person of his right to make a written presentation within thirty (30) days of mailing of the notice as to why a monetary penalty should not be imposed, or, if imposed, why it should be in a lesser amount than proposed.

3. Section 550.704 is added to read as follows:

§ 550.704 Presentation responding to prepenalty notice.

(a) *Time within which to respond.* The named person shall have 30 days from the date of mailing of the prepenalty notice to make a written presentation to the Director.

(b) *Form and contents of written presentation.* The written presentation need not be in any particular form, but shall contain information sufficient to indicate that it is in response to the prepenalty notice. It should contain responses to the allegations in the prepenalty notice and set forth the reasons why the person believes the penalty should not be imposed or, if

BEST COPY AVAILABLE

imposed, why it should be in a lesser amount than proposed.

4. Section 550.705 is added to read as follows:

§ 550.705 Penalty notice.

(a) *No violation.* If, after considering any presentations made in response to the prepenalty notice, the Director determines that there was no violation by the person named in the prepenalty notice, he promptly shall notify the person in writing of that determination and that no monetary penalty will be imposed.

(b) *Violation.* If, after considering any presentations made in response to the prepenalty notice, the Director determines that there was a violation by the person named in the prepenalty notice, he promptly shall issue a written notice of the imposition of the monetary penalty to that person.

5. Section 550.706 is added to read as follows:

§ 550.706 Referral to United States Department of Justice.

In the event that the person named does not pay the penalty imposed pursuant to this subpart or make payment arrangements acceptable to the Director within thirty days of the mailing of the written notice of the imposition of the penalty, the matter shall be referred to the United States Department of Justice for appropriate action to recover the penalty in a civil suit in a Federal district court.

Dated: January 14, 1988.

R. Richard Newcomb,
Director, Office of Foreign Assets Control.

Approved:

John P. Simpson,
Acting Assistant Secretary (Enforcement).

Defense Mapping Agency (DMA), Freedom of Information Act (FOIA) Program

AGENCY: Defense Mapping Agency, DoD.

ACTION: Final rule.

SUMMARY: This part is revised to conform with the revision of Department of Defense Freedom of Information Act Regulation, DoD 5400.7-R. It also implements 32 CFR Part 286.

EFFECTIVE DATE: January 21, 1988.

ADDRESS: Defense Mapping Agency Building 56, U.S. Naval Observatory, Washington, DC 20305-3000.

FOR FURTHER INFORMATION CONTACT: Mr. Del Malkie, Defense Mapping Agency, Building 56, U.S. Naval Observatory, Washington, DC 20305-3000, telephone (202) 653-1131.

SUPPLEMENTARY INFORMATION: In 40 FR 6336 appearing on Tuesday, February 11, 1975, the Defense Mapping Agency (DMA) published Part 295 of this title establishing the policy of the Defense Mapping Agency regarding the availability to the public of DMA information and implemented 5 U.S.C. 552. This rule states the policy of the DMA with regard to making DMA records available to members of the public and implements Department of Defense Directive 5400.7 and Department of Defense Regulation 5400.7-R, DoD Freedom of Information Act Program. (32 CFR Part 286).

List of Subjects in 32 CFR Part 295

Freedom of information.

Accordingly, 32 CFR Part 295 is revised as follows:

PART 295—DMA FREEDOM OF INFORMATION ACT (FOIA) PROGRAM

Sec.
295.1 Purpose.
295.2 Applicability and scope.
295.3 Definition of pertinent records.
295.4 Policy.
295.5 Responsibilities.
295.6 Procedures.
295.7 Coordination with Department of Justice.
295.8 Information requirements.
295.9 Component supplementation.
Appendix A—Sample Letter Complying with Request
Appendix B—Sample Letter Notifying Requester of Extension of Time
Appendix C—Sample Letter Denying Request or Partial Denial for Access to or for Obtaining Copy of Records
Appendix D—Sample Letter Notifying Requester of Misdirected Request

Authority: Sections 295.1 to 295.11 issued under 5 U.S.C. 301, 552 as amended by Act of November 21, 1974 (Pub. L. 93-502, 88 Stat 1-3).

§ 295.1 Purpose.

(a) To prescribe Defense Mapping Agency (DMA) policy and procedures for handling requests under the Freedom of Information Act (FOIA).

(b) To implement 5 U.S.C. 552 and DoD Directive 5400.7.[1]

§ 295.2 Applicability and Scope.

(a) The provision of this part apply to all elements of DMA.

(b) Maps, charts, map compilation manuscripts, map research materials software and data if not created or used as primary sources of information about organizations, policies, functions, decisions or procedures of a DoD Component are not considered "records" for the purposes of 5 U.S.C. 552, DoD Directive 5400.7, and DoD 5400.7-R.[2] For additional items not considered under the definition of "record," see paragraph 1-402 of DoD 5400.7-R.

(c) This part does not apply to requests from members of Congress, who are governed by DoD Directive 5400.4[3] or from the General Accounting Office, which is governed by DoD Directive 7650.1.[4]

§ 295.3 Definition of pertinent records.

For the purpose of this part records shall be considered "pertinent" if they concern either an individual who is, or foreseeably may become, involved in litigation involving the United States or a matter which is, or foreseeably may become, the subject of litigation involving the United States.

§ 295.4 Policy.

(a) *Creating a record.* A record must exist and be in the possession and control of DMA at the time of a request to be considered subject to the FOIA. There is no obligation to create nor compile a record to satisfy a FOIA request; however, a new record may be compiled when so doing would result in a more useful response to the requester, or be less burdensome to DMA, and the requester does not object. Cost of creating or compiling such a record may not be charged to the requester unless the fee for creating the record is equal to or less than the fee which would be charged for providing the existing record. (See paragraph 1-506 of DoD 5400.7-R).

(b) *Public requests.* It is DMA policy to make available to the public the maximum amount of information concerning its operations and activities. Exemptions to this policy are stated in 5 U.S.C. 552 and DoD 5400.7-R. However, exempt records may be released to the public when their disclosure would not be inconsistent with the Privacy Act, DMA Instruction 5400.11[5] or any other statutory requirements, and when no legitimate government purpose would be served by withholding them. DoD 5400.7-R provides additional policy guidance regarding the release of DMA records.

(c) *News media requests.* Requests from news media for records that would not be withheld under FOIA shall be released promptly in order to provide timely information to the public and eliminate the need to invoke the provisions of FOIA.

(d) *Contractor requests.* Guidance for the release of information received from a non-U.S. Government source is contained in paragraph 5-207 of DoD 5400.7-R.

(e) *Classified records.* If classified records are requested, see additional guidance outlined in Chapter VII, DMA manual 5200.1[6].

(f) *FOUO records.* (1) Information that has not been given a security classification pursuant to the criteria of an Executive Order, but which may be withheld from the public one or more of the reasons cited in FOIA Exemptions 2 through 9 shall be considered as being for official use only. No other material shall be considered or marked "For Official Use Only" (FOUO), and FOUO is not authorized as an anemic form of classification to protect national security interests.

(2) The prior application of FOUO markings is not a conclusive basis for withholding a record that is requested under FOIA. When such a record is requested, the information in it shall be evaluated to determine whether, under current circumstances, FOIA exemptions apply in withholding the record or portions of it. If any exemption(s) apply, the record may be released when it is determined that no governmental interest will be jeopardized by its release.

(g) *Historical paper.* Records such as notes, working papers and drafts retained as historical evidence of DoD Component actions enjoy no special status apart from the exemptions under the FOIA.

(h) *Fees.* Chapter VI, DoD 5400.7-R, should be consulted before fees are assessed. Fee application is discussed in paragraph 6-101, fee restrictions in paragraph 6-102, fee waivers in paragraph 6-103, and fee assessment in paragraph in 6-104.

§ 295.5 Responsibilities.

(a) The Director, Public Affairs (DMA(PA)), is designated Freedom of Information Officer and is responsible for administering the FOIA program within DMA.

(1) DMA(PA) will: (i) Receive, log, and prepare initial responses to all FOIA requests received at Headquarters. PA will coordinate its response with the office responsible for making the determination to release or withhold requested records, and the General Counsel (GC). Responses to appeals will be made by GC. All other correspondence relating to FOIA will be coordinated through PA.

(ii) Notify GC prior to release of requests for records which are pertinent to pending or potential litigation involving the United States.

(iii) Prepare an Annual Report on FOIA and forward it to the Office of the Assistant Secretary of Defense (Public Affairs) (OASD) (PA)), as directed.

(2) Component PAs (or those acting in that capacity) will: (i) Receive, log and prepare initial responses to all FOIA requests received. PA will coordinate its response with the office making the determination to release or withhold requested records, and the Component Associate General Counsel (AGC). All other correspondence relating to FOIA will be coordinated through PA.

(ii) Notify the Component Associate General Counsel prior to release about requests for records which are pertinent to pending or potential litigation involving the United States.

(iii) Submit an Annual Report to HQ DMA(PA) by 15 January each year. (See Chapter VIII of DoD 5400.7-R for guidance.)

(iv) Forward a copy of their Component supplement to DMA (PA) 90 days after receiving this part.

(b) The Chief of Staff and the Deputy General Counsel are delegated authority to initially deny release of DMA records at HQ DMA. This denial authority is also delegated to Component Directors and Associate General Counsels as follows:

(1) AGC AC—for AC and IAGS.
(2) AGC HTC—for HTC, CSC and DMS.
(3) AGC SC—for SC, OTS and RC.

This authority may not be redelegated. A copy of all Component denial letters will be forwarded to HQ DMA (GC).

(c) The DMA Deputy Director (DD) and GC are delegated authority to make final determinations on appeals in accordance with the provisions of Sections 3, Chapter V of DoD 5400.7-R.

(d) The DMA Director of Personnel (PO) will establish and implement appropriate procedures for responding to any corrective actions recommended by the Office of Personnel Management in cases involving arbitrary or capricious withholding or records by DMA officials pursuant to Section 4, Chapter V, DoD 5400.7-R. PO and PA shall implement training and information requirements as outlined in Chapter VIII, DoD 5400.7-R.

§ 295.6 Procedures.

(a) *Mandatory expeditious handling.*—(1) *Record released.* The initial determination of whether to release a record upon request will normally be made and a decision reported to the requester within 10 working days. The record requested will be forwarded promptly, usually with the initial response, provided the requester has met the criteria for release. A sample letter is shown at Appendix A.

(2) *Interim response.* If the requested record cannot be made available within 10 working days, an interim response will be forwarded. Any delay beyond the initial 10 working days may not exceed 10 additional working days and will be authorized only for the reasons described in Section 2, Chapter V, DoD 5400.7-R. A sample letter is shown at Appendix B.

(3) *Record denied.* If a request for a record is denied, in whole or in part, the requester will be given a written explanation for such a determination by an official designated in § 295.5. The requester will also be advised of his/her right to appeal the denial to the GC within 60 days from the date of the denial letter. The letter will also include the name and address of the official responsible for the denial. A sample letter is shown at Appendix C.

(4) *Request appealed.* Final determinations on appeals will normally be made within 20 working days of receipt by the Deputy Director or General Counsel. If, due to unusual circumstances, additional time is needed to decide the appeal, the final determination may be delayed for the number of working days, not to exceed 10, which were not used as additional time for responding to the initial request. Final denials to provide a requested record will be made in writing by the Deputy Director or General Counsel in accordance with appeal procedures prescribed in Section 3, Chapter V, DoD 5400.7-R.

(5) *Request referred.* If the record requested was originated by another Agency or Component, it will be referred promptly to the originating Agency or Component for disposition. The period allowed for responding to a request misdirected by the requester

---

[1] Copies may be obtained if needed, from the U.S. Naval Publication and Forms Center, ATTN: Code 1052, 5801 Tabor Avenue, Philadelphia, PA 19120.

[2] Copies may be obtained, at cost, from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161.

[3] See footnote 1 to § 295.1(b).

[4] See footnote 1 to § 295.1(b).

[5] Copies may be obtained, if needed, by written request to Defense Mapping Agency, Attn: AO, Building 56, U.S. Naval Observatory, Washington, DC 20305-3000.

[6] See footnotes 5 to § 295.4(b).

will not begin until it is received by the referral. A sample letter is shown at Appendix D.

(b) *Facilities for inspection and copying records.* (1) The handling of all requests from the public to inspect and copy records will be in strict accordance with the procedures prescribed in DoD 5400.7–R. Subject to exemptions contained in 5 U.S.C. 552, DMA will ensure easy access by the public for inspection and copying of records described in 5 U.S.C., unless such records have been published and copies offered for sale. This inspection and copying will take place in appropriate rooms designated by DMA(PA) and Components.

(2) HQ DMA and Components will make available current indexes which identify material described in paragraph (a)(2) of 5 U.S.C. 552.

(3) Use of DMA inspection and copying facilities by the public will be made by appointment only. Appointments will normally be requested by letter to FOIA officers or those acting in that capacity.

(c) *Identification of records requested.* Requests to inspect or obtain copies of records will normally be submitted by letter and should contain at least the following information:

(1) As complete an identification as possible of the desired record, including (if known) its title or a description thereof, date and the issuing office.

(2) With respect to matters of official record concerning civilian or military personnel, the first name, middle name or initial, and surname of the individual concerned, if known.

(3) A statement as to whether the requester wishes to inspect the record at a DMA facility or obtain copies thereof by return mail.

(d) *Addressing requests.* Requesters should address their inquiries to the appropriate official as follows:

(1) Director, Defense Mapping Agency, Bldg. 56, U.S. Naval Observatory, Washington, DC 20305–3000.

(2) Director, DMA Aerospace Center, 3200 South Second Street, St. Louis, Missouri 63118–3399.

(3) Director, DMA Hydrographic/Topographic Center, 6500 Brookes Lane, Washington, DC 20315–0030.

(4) Director, DMA Combat Support Center, 6101 MacArthur Blvd. Washington, DC 20315–0019.

(5) Director DMA Inter American Geodetic Survey, Bldg. 144 Fort Sam Houston, Texas 78234–5000.

(6) Director, DMA Systems Center, 8301 Greensboro Drive, Suite 800, McLean, Virginia 22100–3692.

(7) Director, DMA Office of Telecommunications Services, 1840 Michael Faraday Court, Reston, Virginia 22090–5304.

(8) Director, Defense Mapping School, Fort Belvoir, Virginia 20060–5828. If the requester is not certain to which DMA Component his inquiry should be addressed, it may be submitted to the Director, Defense Mapping Agency, Building 56, U.S. Naval Observatory, Washington, DC 20305 where prompt action will be taken to direct it into proper channels. The requester should always ensure that the words "Freedom of Information Act Request" are conspicuously placed on the front of the envelope of each FOIA request.

§ 295.7 Coordination with Department of Justice.

(a) *Policy.* The appropriate United States Attorney shall be notified prior to release about any FOIA request for records which are pertinent to pending litigation against the United States.

(b) *Procedure.* The DMA custodian of records sought under the FOIA shall determine whether such records are pertinent to pending or potential litigation involving the United States. The custodian may request the assistance of Counsel in making a determination. The custodian shall advise PA, in writing, whether any of the requested records have been determined to be pertinent to such litigation. Prior to release of such records, DMA PA shall notify GC of the request. Component PAs shall notify their Associate General Counsel; Components without PAs shall notify the Associate General Counsel assigned to their Component. GC or Component Associate Counsels shall notify the appropriate United States Attorney and shall coordinate the release of such records with DMA PA and the Department of Justice.

§ 295.8 Information requirements.

The reporting requirements prescribed by this part have been assigned Report Conrol Symbol DD–PA(A)1365 (See Chapter VIII, DoD 5400.7–R)

§ 295.9 Component supplementation.

Component supplementation is mandatory. Forward one copy of Component supplements to DMA(PA) within 90 days of receiving this part

Appendix A—Sample Letter Complying with Request

Dear———

We refer to your letter of

(date)

received in this office on

(date)

in which you requested (identify record requested).

After careful review and consideration of your request, we have determined that the record(s) you seek under the Freedom of Information Act, 5 U.S.C. 552, as amended, is releaseable and it is enclosed.

(See Chapter VI, DoD 5400.7–R, for guidance).

Sincerely,

(Signed)

(Signature block of releasing official)

Appendix B—Sample Letter Notifying Requester of Extension of Time

Dear———

We refer to your letter of

(date)

received in this office on

(date)

in which you requested (identify record requested).

In order to properly process your request for (record(s)) under the Freedom of Information Act, 5 U.S.C., section 552, as amended, an extension of time will be necessary because of (use one of the follow):

a. The need to search for, collect and properly examine a voluminous amount of separate and distinct records covered by your request;

b. The need to search for and collect the requested records from geographical separated elements within DMA;

c. The need for consultation, which will be conducted with all practicable speed, with another or geographical separated element of DMA having a substantial interest in the determination of your request.

d. Other.

A determination regarding your request will be made by

(date)

Sincerely,

(Signed)

—(Signature block of authorized official) ——

Note: Specify a date that will not result in an extension of time of more than the authorized 10 working days.

Appendix C—Sample Letter Denying Request or Partial Denial for Access to or for Obtaining Copy of Records

Dear———

We refer to your letter of

(date)

received in this office on

---

in which you requested (identify the record requested)

After careful review and consideration of your request, we have determined that (the) (a portion of the) document(s) you seek is exempt from disclosure under the Freedom of Information Act, 5 U.S.C., section 552, as amended. It is not releaseable because it contains information that (copy or paraphase the applicable exemption as set forth in DoD 5400.7–R).

The decision to withhold release of this record(s) may be appealed in writing to the General Counsel, Defense Mapping Agency, within 60 days from the date of this letter. You should include in your appeal any reasons for reconsideration you wish to present. A copy of this letter should be attached to your appeal, and should be forwarded to the Defense Mapping Agency, Attn: GC, Building 56, U.S. Naval Observatory, Washington, DC 20305–3000.

Note: If this is a partial denial, add the paragraph below if copies of releasable records are to be sent to the requester.)

Copies of the releaseable portion of the requested record(s) (are enclosed) (will be sent promptly under separate cover).

Note: Any deletions made in the records should be justified on the grounds of the exemptions provided in DoD 5400.7–R).

Sincerely,

(Signed)

(Signature block of authorized denial authority)

Note: This format should be varied to fit the situation.

Appendix D—Sample Letter Notifying Requester of Misdirected Request

Dear———

We refer to your letter of

(date)

I received in this office on

(date)

in which you requested (identify record requested).

Your letter was misdirected to this Agency. We have forwarded same to (activity or agency to which the request was referred). You may expect to hear from them shortly.

For further reference, any other requests for similar records should be addressed to (Name and address of agency).

Sincerely,

(Signed)

(Signature block of authorized official)

Note: This format should be varied to fit the situation. Notify GC or Component Counsel prior to forwarding any request to NSA or CIA.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

FEDERAL MARITIME COMMISSION

46 CFR Part 586

[Docket No. 87–6]

Actions to Adjust or Meet Conditions Unfavorable to Shipping in the United States/Peru Trade

AGENCY: Federal Maritime Commission.

ACTION: Reconsideration of final rule.

SUMMARY: The Federal Maritime Commission in response to a petition from three Peruvian carriers to reconsider its Final Rule in Docket No. 87–6 or, in the alternative, to stay the Final Rule under which Petitioners' tariffs would be suspended effective March 7, 1988, has determined to reconsider the Final Rule, insofar as the unfavorable conditions therein found to exist in the U.S./Peru trade arose from certain laws and decrees which have recently been rescinded by the Government of Peru. Further, the Commission has decided to continue the proceeding for the purposes of determining whether the unfavorable conditions previously found continue to exist and whether some other disposition is warranted with respect to the Final Rule. Interested parties are asked to submit comments, views and information.

Further, the Commission has denied a Petition from Empresa Naviera Santa, S.A., to reconsider and amend the Final Rule to exclude it from the remedies imposed in the Final Rule.

DATE: Comments due on or before March 31, 1988.

ADDRESS: Comments (Original and 15 copies) to: Joseph C. Polking, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573 (202) 523–5725.

FOR FURTHER INFORMATION CONTACT: Robert D. Bourgoin Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523–5740.

SUPPLEMENTARY INFORMATION: Compania Peruana de Vapores ("CPV"), Naviera Neptuno, S.A. ("Neptuno") and Empresa Naviera Santa, S.A. ("Santa") (jointly—"Petitioners") on February 4, 1988, filed a Petition for Reconsideration ("Petition") of the Federal Maritime Commission's ("Commission" or "FMC") Final Rule issued in this proceeding, or, in the alternative, to stay the Final Rule under which Petitioners' tariffs would be suspended effective March 7, 1988, pending certain events. Replies to this Petition were received from the Executive Agencies of the United States ("Executive Agencies"), [1] the Chemical Manufacturers Association ("CMA"), Shippers for Competitive Ocean Transportation ("SCOT"), Great Lakes Transcaribbean Line ("GLTL"), Compania Sud Americana de Vapores ("CSAV"), the Government of Chile, Crowley Caribbean Transport, Inc. ("CCT"), and Lykes Bros. Steamship Co., Inc. (Lykes").

Santa also filed a separate Petition for Reconsideration ("Santa Petition"), requesting that the Commission reconsider and amend the Final Rule to exclude Santa from its applicability. A Reply to this Petition was received from CSAV.

Background

On December 2, 1987, the Commission issued a Final Rule in this proceeding (52 FR 46356, December 7, 1987) stating that it finds "conditions unfavorable to shipping" within the meaning of section 19(1)(b) of the Merchant Marine Act, 1920, 46 U.S.C. app. 876(1)(b) ("Section 19"), exist in the foreign oceanborne trade between the United States and Peru ("Trade"). The Commission advised in its Final Rule that the Government of Peru ("GOP"), through its laws and regulations, imposed burdens on non-Peruvian-flag carriers which are not experienced by Peruvian-Flag carriers.

The GOP laws and regulations to which the Commission referred in its Final Rule include Supreme Decree No. 00986–TC [2] ("Decree 009–86"), which reserved 100 percent of all imported and exported ocean freight generated by Peru's foreign trade for Peruvian-flag carriers. The amount of cargo reserved by Decree 009–96 for Peruvian-flag carriers could be reduced: (1) On the basis of strict reciprocity;[3] (2) pursuant to government or commercial agreements [4] among non-Peruvian and

---

[1] This filing was submitted by the Department of Transportation on its own behalf and on behalf of the Department of State, Justice and Commerce.

[2] Decree 009–86 amended Supreme Decree No. 036–82–TC ("Decree 036–82"), effective in 1982. Decree 036–82 reserves Peruvian import and export cargoes for Peruvian-flag vessels and sets out waiver and cargo manifest certification requirements for non-Peruvian-flag carriers. The exact percentage of cargo reserved for Peruvian-flag carriers is not specified in Decree 036–82. Apparently, an earlier decree states that 50 percent of Peruvian import and export cargo is reserved for Peruvian-flag carriers.

[3] *E.g.*, U.S. carriers' access to Peruvian cargoes will be proportional to Peruvian carriers' access to U.S. cargoes.

[4] Non-Peruvian-flag carriers which become parties to such commercial agreements may be granted associate status upon approval by the GOP. Associate carriers are generally excepted from cargo manifest certification and waiver requirements under Decree Nos. 009–86 and 036–82.

Peruvian-flag carriers, preferably including CPV, the Peruvian state-owned shipping line; or (3) when the Peruvian Director General of Maritime Transportation or Peruvian Consuls grant non-Peruvian-flag or Non-associate carriers permission to carry Peruvian export or import cargoes. Authorization for the use of non-Peruvian-flag or non-associate carriers would be granted in the form of a waiver or cargo manifest certification when Peruvian-flag or associate carriers are not available and in position within 12 days [5] following the proposed date of shipment of non-perishable products, or within 4 days in the case of perishable products, or when no Peruvian-flag carrier serves the relevant port.

Subsequent to issuance of the Proposed Rule which initiated this proceeding,[6] regulations ("Regulations") [7] were issued by the GOP pursuant to a Memorandum of Understanding ("MOU") signed by the United States Government ("USG") and the GOP on May 1, 1987. These Regulations set forth new requirements and procedures that shipping lines operating third-flag vessels must observe in order to obtain authorizations from the GOP Ministry of Transportation and Communications ("Ministry") to participate in the Trade.[8] The GOP advised through the Department of State that the "authorization" system under the Regulations totally replaced the existing "waiver" system for granting third-flag carriers access to the Trade.

In its Final Rule the Commission advised that shippers had been deterred or restricted from employing the carrier of their choice. It was concluded, therefore, that the restrictions imposed by the GOP have had an injurious effect on carriers, shippers and the Trade, generally.

In addition, the Commission noted that while it recognized the good faith efforts made by the USG and GOP to address the situation in the Trade through diplomatic means, the resultant Regulations which implement the MOU do not satisfactorily resolve that situation. The Commission stated that, in fact, the Regulations, in effect, continue in place the very types of restrictions and impediments which prompted this proceeding in the first instance. Although third-flag carriers were no longer required to obtain "waivers" for individual shipments, they were to obtain "authorizations" to participate in the Trade. The Commission found this authorization process as inconsistent with free access to trade, as was the waiver system it replaced. In this regard, the Commission also added that it was unknown whether Chilean-flag carriers would be granted authorizations and allowed to operate in the Trade, particularly in light of the existence of Peruvian Resolution No. 044–86–TC/AC ("Resolution 044–86"), which excludes Chilean-flag carriers from certain Peru/third-country trades.

Finally, the Commission further indicated that it could not accept as a satisfactory resolution of this matter an accommodation which would permit the GOP to deny authorization to a third-flag operator in the Trade if the country of nationality of that operator bars participation to Peruvian-flag carriers in any of its third-country trades. The Commission explained that to accept the proposition that the GOP can settle disputes with foreign nations by imposing burdens on U.S. commerce, in effect would allow the GOP to hold the U.S.-Peru trade hostage to obtaining concessions elsewhere.

Thus the Final Rule suspended the tariffs of the Peruvian-flag carriers operating in the Trade, with the exception of Naviera Amazonica Peruana, S.A. ("NAPSA"), [9] unless such carriers obtain authorized status from the Commission.[10] The suspension of these tariffs was made effective March 7, 1988.

Petitions for Reconsideration

A. Petition of CPV, Neptuno and Santa

1. Summary of the Petition

Petitioners request that the FMC reconsider its Final Rule, or, in the alternative, stay the present effective date of the Final Rule on grounds that the rule is basically directed at Decree 009–86 of February 28, 1986, which has been rescinded by GOP Supreme Decree No. 004–88–TC ("Decree 004–88") of January 22, 1988.[11] Further, Petitioners submit that the Regulations which implement the MOU also have been rescinded.

Petitioners indicate that with such action by the GOP, Peruvian cargo preference law has reverted to its status prior to enactment of Decree 009–86, and prior to the initiation of this proceeding which resulted from complaints to the Commission about Decree 009–86. They contend that while Decree 009–86 reserved 100 percent of all Peruvian import and export cargoes, Decree 004–88 reestablishes legislation in existence between 1970 and 1986 which reserves 50 percent of Peruvian cargoes to Peruvian-flag or associated carriers. Petitioners take the position that since, as the Commission states in its Final Rule, this proceeding arose from complaints about the enactment, implementation and enforcement by the GOP of Decree 009–86, the Commission should now reconsider its Final Rule and terminate the proceeding due to the rescission of Decree 009–86.

As an alternative to reconsideration and termination of the proceeding, the Petitioners suggest that the Commission stay its Final Rule pending investigation of present conditions in the Trade or judicial review,[12] whichever is later, particularly if the Commission determines that it has insufficient knowledge of present conditions in the Trade to order termination of the proceeding. Petitioners contend that a stay would allow time for the Commission to gather any facts required for reconsideration and, if necessary, for the Court to clarify "serious legal issues in this proceeding."

2. Replies to the Petition

a. Comments of the Executive Agencies. The Executive Agencies state that although Decree 009–86 has been rescinded, the legislation currently in effect, Decree 036–82 and Ministerial Resolution No. 054–82–TC/AC ("M.R. 054"), depending on the GOP's implementation thereof, might have essentially the same effects on access to the Trade as Decree 009–86. They state that, "[i]n that event, it would be the view of the Executive Agencies that there were no basis upon which to reconsider the Final Rule or to stay its March 7, 1988, effective date."

The Executive Agencies submit that they are unable at this time to provide the Commission with a fully informed view concerning the GOP's implementation of Decree 036–82. They advise that they are arranging for consultations with the GOP, at the GOP's request, which should be concluded prior to the March 7 effective date of the Final Rule. During these consultations the Executive Agencies expect to obtain clarification regarding certain aspects of the operation of Decree 036–82. The Executive Agencies advise that after consultations with the Peruvians, they expect to be able to provide the Commission with a fully considered recommendation regarding the outcome of this proceeding.

b. *CMA.* CMA maintains that Petitioners have failed to justify the relief sought.[13] CMA asserts that Petitioners have provided no indication or assurance that the rescission of Decreee 009–86 will enable non-Peruvian-flag carriers to compete freely in the Trade. Thus CMA opposes Petitioners' request for reconsideration or stay. However, it does not oppose a short extension of the compliance deadline for tariff suspension, if such an extension were based on GOP assurances that it needed more time to comply with the Final Rule, *i.e.*, remove all restrictions on non-Peruvian-flag carrier access to the Trade.

c. *SCOT.* SCOT notes that Petitioners have provided no indication that unfavorable conditions in the Trade will be corrected with the rescission of Decree 009–86. SCOT also points out that Petitioners do not clarify whether waivers and cargo manifest certifications will continue to be required and third-flag carriers will be permitted to reenter the Trade promptly. Unless these unfavorable conditions are removed, SCOT asserts that there is no basis for reconsideration or stay of the Final Rule. Should the GOP provide the USG with assurances that it will remove these unfavorable conditions promptly, SCOT opines that "a stay of preferably 30 days or, at the most, 60 days might be acceptable."

d. *GLTL.* In view of the continued existence of cargo manifest certification and waiver requirements under Decree 036–82, GLTL contends that the rescission of Decree 009–86 has not opened the Trade. GLTL urges the Commission to reaffirm its Final Rule. It opposes any stay of the Final Rule unless assurances are received from the GOP that GLTL will be able to continue service in the Trade without applying for cargo manifest certificates or waivers and without fear of fines.

e. *CSAV.* CSAV contends that the grounds stated by Petitioners are not adequate to support the relief requested. It is CSAV's position that the rescission of Decree 009–86 falls short of meeting the Commission's requirement in its Final Rule that Peruvian carriers must provide evidence that no GOP law, regulation or policy will hinder free access to the Trade. CSAV notes that Petitioners do not state that all barriers to third-flag carrier access have been removed. Given the requirements under Decree 036–82, CSAV maintains that, for all practical purposes, Chilean-flag carriers would be prevented from carrying cargo in the Trade. CSAV submits that the Petition should be denied because unfavorable conditions to shipping continue to exist.

f. *The Government of Chile ("GOC").* The GOC submitted separate comments on the rescission of Decree 009–86 and Peruvian Resolution 044–86, which had as of September 1986, excluded Chilean-flag carriers from participating in certain Peru/third-country trades. With regard to the rescission of Decree 009–86, the GOC states that the legal regime in Peru applicable prior to the implementation of Decree 009–86 was that establishment by Decree 036–82 and M.R. 054. The GOC maintains that under this legislation foreign-flag vessels are required to obtain cargo manifest certification to carry Peruvian import cargoes and waivers for export cargoes should there be no Peruvian-flag vessels available within 15 days following the embarkation date. The GOC advises that these requirements do not apply to foreign-flag associate carriers.

The GOC maintains that Decree 036–82, when enacted in 1982, restricted access of foreign-flag carriers to Peruvian cargoes. It is explained that in April 1983, in an effort to resolve this problem, the GOC and GOP signed an "Accord" to provide Chilean and Peruvian-flag carriers free access to cargoes generated by the two countries' foreign trade. The GOC contends that this Accord was unilaterally invalidated by the GOP on June 18, 1986; as a result, Chilean-flag carriers were no longer granted free access to Peruvian cargoes. The GOC advises, however, that Peruvian-flag vessels have free access to Chilean cargoes.[14]

g. *CCT.* CCT fully supports the Petition. It advises that it has not experienced any operating difficulties in the Trade,[15] and, thus, urges the Commission to grant the relief requested by Petitioners.

h. *Lykes.* Lykes supports the Petition and requests that it be granted by the Commission. It is Lykes' position that because complaints were filed with the Commission due to the enactment, implementation and enforcement of Decree 009–86, the rescission of the Decree raises questions about the original basis for the Final Rule and has changed the factual underpinnings for the Rule enough to require the Commission to reconsider it in view of those changes. Further, Lykes believes that reconsideration is required because the implementation of the Final Rule would potentially disrupt the movement of cargo in the Trade.

---

[5] Supreme Decree No. 033–86–TC modified Decree 009–86 by reducing the number of days a shipment must wait for a Peruvian or associate carrier from 15 days to 12 days.

[6] *See* Notice of Proposed Rulemaking, 52 FR 11832, April 13, 1987.

[7] These Regulations were contained in Ministerial Resolution No. 027–87–TC/AC ("Resolution").

[8] Among other things, the Regulations provided that: (1) Prior authorization must be obtained by third-flag operators from the Ministry to participate with free access to the Trade; (2) the Ministry may deny authorization if the country of nationality of the third-flag operator bars participation with free access to Peruvian-flag carriers in any of its trade dealings with third countries, based on the principle of reciprocity; (3) any authorization granted will be valid for a period of two years and may be renewed for subsequent two-year periods; (4) the granting of any authorization implies an obligation by the operator obtaining it to abide by all GOP laws and regulations applicable to the activity to be performed; and (5) any authorization granted may be revoked if: The authorization was obtained through false statements, information or documents; the country of the operator's nationality has not maintained the reciprocity required; or, the authorized operator fails to comply with the commitments undertaken.

[9] Under the Final Rule, NAPSA's tariff, FMC No. 3, covering the U.S./Iquitos, Peru trade, would not be suspended because the Commission found this subtrade distinguishable from the Trade generally, and, therefore, entitled to different treatment. The Final Rule noted that the Commission did not receive any complaints regarding this subtrade. Further, it stated that there is no alternative to NAPSA's service in this subtrade. (*See* Docket No. 87–6, 52 FR 46362, December 7, 1987.)

[10] The Final Rule states that authorized status shall be conferred upon a Peruvian-flag carrier upon that carrier's submitting to the Commission a certificate from the GOP stating unequivocally that no law, regulation or policy of the GOP will:

(i) Preclude any non-Peruvian-flag carrier from competing in the Trade on the same basis as any other carrier;

(ii) Result in less than meaningful and competitive access by any non-Peruvian-flag carrier, to cargo designated as reserved under Supreme Decree No. 009–86–TC; and

(iii) Impose any administrative burden, including but not limited to the necessity to secure an authorization based on the national status of the carrier, or otherwide discriminate against any non-Peruvian-flag carrier in the Trade.

[11] Decree 004–88 was published in the Peruvian Official Gazette, "El Peruano," on January 25, 1988.

[12] A petition for review of the Final Rule was filed by the Peruvian-flag carriers in the U.S. Court of Appeals for the District of Columbia Circuit ("Court") on January 29, 1988. *Compania Peruana de Vapores, et al. v USA and FMC*, D.C. Cir No. 88-1073.

[13] Along with arguing the merits of the Petition, CMA, with certain other commentators, notes that the Petition was filed in an untimely manner pursuant to 46 CFR 502.261.

[14] In separate comments regarding the suspension on January 16, 1988, of Peruvian Resolution 044–86, the GOC takes the position that this suspension does not resolve the problem of access by Chilean-flag carriers to Peruvian cargoes. The GOC maintains that while Chilean-flag carriers would not be excluded specifically from the Trade as they had been under the Peruvian Resolution 044–86, they would continue to be subject to the restrictions contained in Decree 009–86. This comment appears to have been written and transmitted to the Chilean Embassy in the U.S. prior to the rescission of Decree 009–86.

Further, the GOC contends that the rescission of Peruvian Resolution 044–86 was in response to the GOC's March 1987 suspension of Resolution No. 2, which had excluded Peruvian-flag vessels from Chilean trade with the third countries. In defense of Chilean Resolution 2, the GOC submits that it was enacted on August 6, 1986, in response to Decree 009-86.

[15] CCT and Lykes are members of the U.S./Peru Equal Access Agreement, FMC Agreement No. 204-010986, thereby making them associate carriers.

B. Santa Petition

Santa requests that the Commission reconsider and amend its Final Rule to eliminate Santa from its scope and, thus, from the sanctions it would impose. It is Santa's position that because the focal point of the proceeding is Decree 009–86 and the alleged inadequate service of CPV, the Peruvian state-owned carrier and main beneficiary of Decree 009–86, the remedy of the Final Rule is unnecessarily broad and contrary to shipping interests in the U.S. trade. Santa contends that because Decree 009–86 reflects the special interest of the GOP and CPV, and Santa did not request the adoption of the Decree, a narrower remedy which excludes Santa, a privately-owned carrier, would satisfy the aims of the Commission.

Santa maintains that excepting it from the Final Rule will serve U.S. shipping interests and promote an atmosphere more conducive to resolving this matter through diplomatic channels. Further, Santa believes that such action would increase the likelihood of a reciprocally tempered response to the Final Rule from the GOP, *i.e.*, something less than the total exclusion of U.S.-flag carriers from the Trade.

In reply, CSAV requests that the Commission deny the Santa Petition. It contends that Santa has given no relevant reason why it should be excluded from the scope of the Final Rule. CSAV advises that in past submissions from Santa, it has been supportive of the GOP cargo preference restrictions under which it has been able to increase its market share in the Trade through the exclusion of third-flag carriers. It is CSAV's position that the Commission's Final Rule is no more severe than necessary to meet the requirements of U.S. law and policy which protect the rights of shippers to select the carrier of their choice. CSAV believes that if the Commission were to modify its section 19 actions because of potential retaliation by another government, it could never use section 19 in an effective manner.

Discussion

A. Petition for Reconsideration or Stay

The comments on the Petition for Reconsideration or Stay reflect a great degree of uncertainty as to the precise nature and operating characteristics of the shipping regime which will regulate traffic between the U.S. and Peru following the rescission of Decree 009–86. The actual effect of the rescission of Decree 009–86 on non-Peruvian-flag carriers' access to the Trade is largely unknown at this time. Most commentators express uncertainty as to the effects of rescission of Decree 009–86, or disbelief that its repeal will have any practical effect on access for third-flag carriers, such as CSAV.

The U.S.-flag carriers, Lykes and CCT, support the Petition, urging that the Commission reconsider the Final Rule and grant the relief requested by Petitioners. The Petition also requests that the Commission terminate this proceeding. Without regard to our action on the Final Rule itself, we are disinclined to terminate this proceeding before the situation in the Trade is clarified and some stable basis for participation of all carriers has been reached.

CSAV and the GOC suggest that rescission of Decree 009–86 will have no practical effect in terms of third-flag carrier access to the Trade, and therefore ask the Commission to permit the Rule to go into effect. GLTL is similarly pessimistic, and urges the Commission to reconsider and reaffirm the Final Rule. We believe these views may unreasonably minimize the GOP action.

The Executive Agencies express skepticism as to the ultimate effects of the recission of Decree 009–86 on the Trade, but suggest only that the Commission await notification by the Executive Agencies of the outcome of talks with the GOP to be held before March 7, 1988. This does not appear to us to be practical in view of the imminent effective date of tariff suspension under the Final Rule.

The remaining commentators, SCOT and CMA, indicate, in effect, that some recognition of the possible ameliorative effects of rescission of Decree 009–86 is appropriate. SCOT and CMA do not concede that the GOP action materially affects the unfavorable conditions found by the Commission, arguing that the Petition contains no grounds for either form of relief requested.[16] They nevertheless suggest that the Commission extend for a short period (30 to 60 days says SCOT), the date on which tariffs would be suspended under the Final Rule, but only upon the receipt of assurances from the GOP that the unfavorable conditions will be promptly removed.

The Commission first expressed its concern that conditions unfavorable to shipping appeared to exist in the Trade in April, 1986. This proceeding followed a period in which the various affected parties, including the GOP and the Executive Agencies of the United States, held discussions, reached agreements and understandings, and attempted to find some mutually acceptable basis for third-flag carrier participation in the Trade. At least until the latest GOP action, the numerous actions and assurances undertaken by the GOP during the past two years, notwithstanding the Executive Agencies' efforts and the Commission's forbearance, have not appreciably improved third-flag carriers' access or the burdens imposed on U.S. shippers by the decrees.

Events occurring since service of the Final Rule on December 2, 1987, have created a situation in flux, with great current uncertainty as to what the ultimate outcome of the new GOP initiatives will be. Because the Final Rule becomes fully effective on March 7, 1988, by suspending the tariffs of Peruvian-flag carriers, some action by the Commission is necessary to recognize the changed status of the issues brought about by the GOP's recent action and to avoid undue disruption of the Trade.

Initially, and as a technical legal matter, the rescission of Decree 009–86 and Resolution 044–86 appears to have undermined the basis cited in the Final Rule for the Commission's findings of conditions unfavorable to shipping in the Trade. At a minimum, some changes in the Final Rule, particularly in regard to references to Decree 009–86 in the certificate required under 46 CFR 586.1(b),[17] would appear necessary as a result of the rescission.

Possible technical adjustments in the Final Rule aside, however, the repeal of Decree 009–86, its implementing regulations, and Resolution 044–86, appears to be a dramatic and significant action. We note also that a Commission to re-examine Peruvian maritime policy was appointed in connection with the rescission of Decree 009–86. These actions by the GOP appear to reflect a serious commitment to resolve the problems in our maritime trade which were identified in this proceeding. We recognize, however, that rescission alone may not resolve the unfavorable conditions which the Final Rule addressed.

---

[16] CMA and other commentators opposed to the Petition also raised a procedural argument against granting reconsideration. They note that the Commission's Rules of Practice and Procedure, at 46 CFR 502.261, provide that requests for reconsideration of a Commission decision must be filed within 30 days of service of the order effecting that decision, and argue that the Petition is therefore untimely. Inasmuch as the GOP action rescinding these decrees occurred more than 30 days after service of the Final Rule, the Petitioners' failure to comply with this aspect of the Commission's rules appears reasonable. The Commission may, in any event, waive application of its Rules of Practice and Procedure.

[17] See footnote 16, *supra*.

In promulgating the Final Rule, the Commission consistently alluded to the detrimental effects of the waiver system implemented under Decree 009–86 as the basis for its original concern that conditions unfavorable to shipping might exist, as well as our determination that the "authorization" system which replaced the waiver system following conclusion of the MOU was not a material improvement in the inherently discriminatory system. If the discriminatory nature of the existing trade conditions remains in the absence of Decree 009–86, the Commission is prepared to act swiftly to reinstate the Final Rule on the basis of new findings that conditions unfavorable to shipping continue to exist because of continued exclusion of the Chilean or other third-flag carriers and compliance burdens placed on U.S. shippers and trade interests. Withdrawal of the Final Rule accompanied by termination of this proceeding, therefore, does not appear to be an appropriate Commission response in view of the totally unknown nature of the practical effects of the rescission of these enactments.

The Commission has determined not to grant Petitioners' request for a stay, but herein grants the request for reconsideration, withdrawing the Final Rule to await clarification of the GOP legal regime which will govern the Trade at present and the nature of the scheme which the GOP intends to put in place for the future. In order to accommodate further action on this matter, the proceeding will continue and to that end the Commission also requests further information from any interested party by March 31, 1988, including the Executive Agencies, carriers and shipper organizations who previously filed comments.

B. Santa Petition

No basis appears to exist for granting the Santa Petition on its merits. Although Santa may not have requested passage of the cargo preference decrees by the GOP, as it states, the preferences established by those decrees were intended to and did benefit *all* Peruvian-flag carriers directly by increasing their share of the market at the expense of their third-flag competitors. Neither Decree 009–86 nor Resolution 044–86 distinguished between state-owned and privately-owned carriers. Decree 009–86 imposed a waiver system on all non-Peruvian-flag carriers (except those which obtained "associate status" through agreements with Peruvian-flag carriers) without regard to the private or public nature of their owners. Similarly, Resolution 044–86 banned service by Chilean-flag carriers without regard to their ownership.

In its petition, Santa states that it previously had financial and management problems but began regular service in April 1986, under new management. Santa further states that its market share for the January 1986–July 1987 period was 25 percent. Santa's ability to garner such a large proportion of the Trade during this period suggests that its position was aided by the existence of the GOP decrees. In any event, Santa appears to have been a significant beneficiary of these decrees. The Santa Petition is, therefore, denied.

Therefore, pursuant to section 19(1)(b) of the Merchant Marine Act, 1920, 46 U.S.C. app. 876(1)(b), Reorganization Plan No. 7 of 1961, 75 Stat. 840, and 46 CFR Part 585, Part 586 of Title 46, Subchapter D of the Code of Federal Regulations, published at 52 FR 46362, December 7, 1987 is withdrawn for reconsideration. Interested parties are invited to submit comments, views and information on or before March 31, 1988, concerning whether the unfavorable conditions previously found in this proceeding continue to exist, whether other conditions unfavorable to shipping in the U.S. foreign trade with Peru now exist, and what action should be taken with respect to the Final Rule.

By the Commission.

Joseph C. Polking,

Secretary.

[FR Doc. 88–5009 Filed 3–7–88; 8:45 am]

BILLING CODE 6730-01-M

GENERAL SERVICES ADMINISTRATION

48 CFR Parts 501, 532, and 552

[Acquisition Circular AC–88–1]

Prompt Payment and Ratification of Unauthorized Commitments

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Temporary rule.

SUMMARY: This Acquisition Circular temporarily amends Parts 501, 532 and 552 of the General Services Administration Acquisition Regulation (GSAR), Chapter 5, to implement and supplement the Federal Acquisition Regulation (FAR) requirements on the ratification of unauthorized commitments; to add material to prescribe constructive acceptance or approval periods for recurring building services, supplies and other nonpersonal services, construction, architect-engineer and other professional services; to add and prescribe a Payments by Electronic Funds Transfer clause for use in solicitations and contracts when payments may be made by GSA and other agencies; to add and prescribe a Prompt Payment clause for acquisitions of leasehold interests in real property; and to make other miscellaneous changes for clarity. The intended effect is to implement FAR (FAC–84–33) and to provide guidance to GSA contracting activities pending a permanent revision to the regulation.

DATES:

Effective Date: March 8, 1988.

Expiration Date: March 7, 1989.

FOR FURTHER INFORMATION CONTACT: Ms. Shirley Scott, Office of GSA Acquisition Policy and Regulations (VP), (202) 523–4765.

SUPPLEMENTARY INFORMATION: This rule was not published in the **Federal Register** for public comment because it merely implements and supplements a higher level issuance that was previously published for public comment. The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. The exemption applies to this rule. The General Services Administration (GSA) certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The rule simply implements and supplements the FAR and OMB Circular A–125 requirements regarding the Prompt Payment Act. Accordingly, no regulatory flexibility analysis has been prepared. The rule does not contain any additional information collection requirements beyond those already imposed by OMB which require the approval of OMB under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) The information collection regarding electronic funds transfers was approved by OMB pursuant to a request from the Department of the Treasury. OMB Control No. 1510–0056 was assigned to this information collection.

List of Subjects in 48 CFR Parts 501, 532 and 552

Government procurement.

1. The authority citation for 48 CFR Parts 501, 532 and 552 continues to read as follows:

Authority: 40 U.S.C. 486(c).

2. 48 CFR Parts 501, 532 and 552 are amended by the following Acquisition Circular:

General Services Administration Acquisition Regulation Acquisition Circular (AC–88–1)

To: All GSA contracting activities.
Subject: Implementation of Federal Acquisition Circular (FAC) 84–33.

1. *Purpose.* This Acquisition Circular temporarily amends the General Services Administration Acquisition Regulation (GSAR) Chapter 5, (APD 2800.12) to implement and supplement the Federal Acquisition Regulation (FAR) as amended by FAC 84–33.

2. *Background.* The Federal Acquisition Regulation (FAR) was amended by FAC 84–33 to implement Office of Management and Budget (OMB) Circular A–125, "Prompt Payment." FAC 84–33 also amended the FAR to provide policy and procedures on ratification of unauthorized commitments. This Acquisition Circular amends the GSAR as necessary to conform to the FAR as amended by FAC 84–33.

3. *Effective date.* March 8, 1988. All solicitations issued on or after March 8, 1988, shall include the clauses prescribed by this Circular.

4. *Expiration date.* This Acquisition Circular expires March 7, 1989, unless canceled earlier.

5. *Reference to regulation.* Sections 501.675, 501.675–1, 501.675–2, 501.675–3, 532.111, 552.232–70, 552.232–71, 552.232–72, and 552.232–73 of the General Services Administration Acquisition Regulation.

6. *Explanation of changes.*

a. Section 501.602–3 is added to read as follows:

50.1.602–3 Ratification of unauthorized commitments.

(a) *Authority.* Subject to the limitations and in accordance with the procedures prescribed in FAR 1.602–3, contracting officers may ratify contractual commitments made by employees who do not have the requisite authority to enter into contracts on the Government's behalf if the head of the contracting activity (HCA) has approved the ratification action. The authority to approve ratification actions may not be redelegated.

(b) *Procedures.* (1) Generally, the Government is not bound by agreements or contractual commitments made by persons to whom contracting authority has not been delegated. Such unauthorized acts may be in violation of the Federal Property and Administrative Services Act, other Federal laws, the FAR, the GSAR, and good acquisition practice. Therefore, such unauthorized contractual commitments should be considered as serious employee misconduct and consideration given to initiating disciplinary action. In any instances where suspected irregularities may involve fraud against the Government, or any type of misconduct which might be punishable as a criminal offense, either the employee's supervisor or the contracting officer should immediately report the matter to the Office of the Inspector General with a request for a complete investigation.

(2) The individual who made the unauthorized commitment shall furnish the appropriate contracting director all records and documents concerning the commitment and a complete written statement of facts, including, but not limited to, a statement as to why normal acquisition procedures were not followed, why the contractor was selected and a list of other sources considered, description of work or products, estimated or agreed contract price, citation of appropriation available, and a statement regarding the status of the performance. Under exceptional circumstances, such as when the person who made the unauthorized commitment is no longer available to attest to the circumstances of the unauthorized commitment, the contracting director may waive the requirement that the responsible employee initiate and document the request for ratification, provided that a written determination is made stating that a commitment was in fact made by an employee who shall be identified in the determination.

(3) The appropriate contracting director will assign the request for ratification action to an individual contracting officer for processing. The contracting officer assigned the action will be responsible for preparing a summary statement of facts addressing the limitations in FAR 1.602–3(c) and making a recommendation as to whether the transaction should be ratified and stating the reasons therefore. Advice against ratification should include a recommendation for other appropriate disposition. When ratification is not permissible due to legal improprieties in the procurement, the contracting officer may recommend that payment be made for services rendered on a quantum merit basis (the reasonable value of work or labor) or for goods furnished on a quantum valebant basis (the reasonable value of goods sold and delivered) provided there is a showing that the Government has received a benefit. (See also FAR 1.602–3(d)).

(4) The request for ratification, the information required by paragraph (b)(3) above, and a recommendation for corrective action to preclude recurrence, must be forwarded, through appropriate channels, to the HCA for consideration.

(5) The HCA, upon receipt and review of the complete file, may approve the ratification if determined to be in the Government's best interest, or direct other disposition as appropriate. Acquisitions which have been approved for ratification shall be forwarded to the appropriate contracting officer for issuance of the necessary contractural documents. If the request for ratification is not justified, the HCA shall return the request without approval and provide an explanation for the decision not to approve ratification.

(6) Each HCA shall maintain a separate file containing a copy of each request for approval to ratify an unauthorized commitment. This file shall be made available for review by the Office of Acquisition Policy and the Inspector General.

b. Sections 501.675, 501.675–1, 501.675–2 and 501.675–3 are deleted.

c. Section 532.111 is amended by revising paragraphs (b) and (c) to read as follows:

532.111 Contract clauses.

* * * * *

(b) *Adjusting payments.* The contracting officer shall insert the clause at 552.232–78, Adjusting Payments, in all solicitations and contracts for recurring building services expected to exceed the small purchase limitation.

(c) *Final payment.* The contracting officer shall insert the clause at 552.232–79, Final Payment, in all solicitations and contracts for recurring building services expected to exceed the small purchase limitation.

* * * * *

d. Section 532.904 is added to read as follows:

532.904 Payment due date.

The time specified by the contracting officer for constructive acceptance or approval in subparagraph (a)(6)(i) of FAR basic clause 52.232–25, Prompt Payment, or subparagraph (a)(5)(i) of Alternate I shall usually be 1 day for recurring building services, 5 days for supplies and other nonpersonal services or 30 days for construction, architect-engineer and other professional or technical services, unless some other number of days is justified in the contract file.

e. Section 532.908 is added to read as follows:

532.908 Contract clause.

(a) The Contracting Officer shall insert the clause at 552.232–70 in solicitations and contracts when

payments may be made by GSA and other agencies. (e.g. multiple award schedule contracts).

(b) The contracting officer shall insert the clause at 552.232–71 in solicitations and contracts for the acquisition of leasehold interests in real property. Contracting officers shall use Alternate I instead of the basic clause if the lease contract will contain provisions for ordering alterations or overtime utility services. If payment may be made by electronic funds transfer, the contracting officer shall use Alternate II with the basic clause or Alternate I.

f. Section 552.232–70 is revised to read as follows:

552.232–70 Payments by electronic funds transfer.

As prescribed in 532.908(a), insert the following clause:

Payments by Electronic Funds Transfer (Feb 1988)

The requirement that the Contractor submit, no later than 14 days before an invoice or financing request, a designation of a financial institution for receipt of electronic fund transfer payments in paragraph (c) of the clause entitled "Prompt Payment" at FAR 52.232–25 (Alternate II) does not apply to this contract. Instead, the Contractor is directed to submit its designation of a financial institution for receipt of electronic funds transfer payments as a part of, or as an attachment to, each invoice requesting payment of $25,000 or more (exclusive of any discount for prompt payment) unless the invoice is submitted to the Department of Defense, the United States Postal Service, or the Tennessee Valley Authority. Information required for electronic funds transfer payments shall be furnished to the Veterans Administration in accordance with special instructions provided by that agency. Other agencies and departments thereof may waive the requirement for designation of a financial institution for receipt of electronic fund transfer payments and for submission of information required to make such payments by including a notice on delivery orders or otherwise notifying the Contractor.

(End of Clause)

g. Section 552.232–71 is revised to read as follows:

552.232–71 Prompt payment.

As prescribed in 532.908(b) insert the following clause:

Prompt Payment (Feb 1988)

Notwithstanding any other payment clause in this contract, the Government will make payments under the terms and conditions specified in this clause. Payment shall be considered as being made on the day a check is dated or an electronic funds transfer is made.

(a) *Payment due date.*

The initial monthy rental payment under this contract shall become due on the first workday of the month following the month in which the lease or supplemental agreement establishing commencement of the lease term is executed, or the first workday of the month following the month in which the occupancy of space is effective, whichever is later. Subsequent rent shall be paid in arrears, and will be due on the first workday of each successive month, and only as provided for by the lease.

(b) *Interest Penalty.*

(1) An interest penalty shall be paid automatically by the Government, without request from the Contractor, if payment is not made within 15 days after the due date.

(2) The interest penalty shall be at the rate established by the Secretary of the Treasury under Section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611) that is in effect on the payment date. This rate is referred to as the "Renegotiation Board Interest Rate," and it is published in the**Federal Register** semiannually on or about January 1 and July 1. The interest penalty shall accrue daily on the payment amount approved by the Government and be compounded in 30 day increments inclusive from the first day after the due date through the payment date.

(3) Interest penalties will not continue to accrue after the filing of a claim for such penalties under the Disputes clause or for more than 1 year. Interest penalties of less than $1.00 need not be paid.

(4) Interest penalties are not required on payment delays due to disagreement between the Government and Contractor over the payment amount or other issues involving contract compliance or on amounts temporarily withheld or retained in accordance with the terms of the contract. Claims involving disputes, and any interest that may be payable, will be resolved in accordance with the Disputes clause.

(End of Clause)

Alternate I (Feb 1988)

If the lease contract will contain provisions for ordering alterations or overtime utility services, the text of paragraph (a) of the basic clause should be designated as subparagraph (1) and the following subparagraph (a)(2) and paragraph (b) should be added. Paragraph (b) of the basic clause should be redesignated (c).

(a) *Payment due date.*

(2) The due date for making payments for alterations or overtime utilities by the designated payment office shall be the later of the following two events:

(i) The 30th day after the designated billing office has received a proper invoice from the Contractor.

(ii) The 30th day after acceptance of the service.

(b) *Invoice and inspection requirements for alterations and overtime utilities.*

(1) An invoice shall be prepared and submitted to the designated billing office specified in the contract. A proper invoice must include the items listed in subparagraphs (b)(1) (i) through (vii) of this clause. If the invoice does not comply with these requirements, then the Contractor will be notified of the defect within 15 days after receipt of the invoice at the designated billing office. Untimely notifications will be taken into account in the computation of any interest penalty owed the Contractor.

(i) Name and adddress of the Contractor.

(ii) Invoice date.

(iii) Lease number.

(iv) Order number or other authorization for delivery of services.

(v) Description, price, and quantity of property or services actually delivered.

(vi) Name and address of Contractor official to whom payment is to be sent (must be the same as that in the remittance address in the lease or the order).

(vii) Name (where practicable), title, phone number and mailing address of person to be notified in the event of a defective invoice.

(2) The Government agrees to inspect and determine the acceptability of alterations performed or services rendered within 10 calendar days after the date of completion of alterations or performance of services unless a different period is specified for inspection at the time the order is placed. If actual acceptance occurs later, for the purpose of determining the payment due date and calculation of interest, acceptance will be deemed to occur on the last day of the above stated inspection period. However, the Contractor is not entitled to payment of contract amounts or interest unless and until actual acceptance by the Government occurs.

(End of Clause)

Alternate II (FEB 1988)

If payment may be made by electronic funds transfer, add the following paragraph (c) to the basic clause. When Alternate I is used this paragraph should be designated (d).

(c) *Electronic funds transfer.* Payments under this contract will be made by the Government either by check or electronic funds transfer (through the Treasury Financial Communications System (TFCS) or the Automated Clearing House (ACH), at the option of the Government. Not later than 14 calendar days after receipt of a notice of award or request from the Contracting Officer or other Government official, the Contractor shall provide information necessary for check payment and/or designate a financial institution for receipt of electronic funds transfer payments. The Contractor shall submit this information to the Contracting Officer or other Government official, as directed.

(1) For payment by check, the Contractor shall provide the full name (where practicable), title, phone number, and complete mailing address of the responsible official(s) to whom check payments are to be sent.

(2) For payment through TFCS, the Contractor shall provide the following information:

(i) Name, address, and telegraphic abbreviation of the financial institution receiving payment.

(ii) The American Bankers Association 9-digit identifying number of the financing institution receiving payment if the institution has access to the Federal Reserve Communications System.

(iii) Payee's account number at the financial institution where funds are to be transferred.

(iv) If the financial institution does not have access to the Federal Reserve Communications System, name, address, and telegraphic abbreviation of the correspondent financial institution through which the financial institution receiving payment obtains electronic funds transfer messages. Provide the telegraphic abbreviation and American Bankers Association identifying number used for TFCS).

(3) For payment through ACH, the Contractor shall provide the following information:

(i) Routing transit number of the financial institution receiving payment (same as American Bankers Association identifying number used for TFCS).

(ii) Number of account to which funds are to be deposited.

(iii) Type of depositor account ("C" for checking, "S" for savings).

(iv) If the Contractor is a new enrollee to the ACH system, a "Payment Information Form," TFS 3881, must be completed before payment can be processed.

(4) In the event the Contractor, during the performance of this contract, elects to designate a different financial institution for the receipt of any payment made using electronic funds transfer procedures, notification of such change and the required information specified above must be received by the appropriate Government official 30 days prior to the date such change is to become effective.

(5) The document furnishing the information required in this paragraph (c) must be dated and contain the signature, title, and telephone number of the Contractor official authorized to provide it, as well as the Contractor's name and contract number.

(6) Contractor failure to properly designate a financial institution or to provide appropriate payee bank account information may delay payments of amount otherwise properly due.

(End of Clause)

552.232-72 and 552.232-73 [Removed and Reserved]

h. The current text of sections 552.232-72 and 552.232-73 is removed and the sections are reserved.

BILLING CODE 6820-61-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 653

[Docket No. 71279-7279]

Red Drum Fishery of the Gulf of Mexico; Extension of Effective Date

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Emergency interim rule; extension of effective date.

SUMMARY: An emergency interim rule that reduced the current annual recreational and commercial catch allowances of red drum to zero in the Gulf of Mexico exclusive economic zone (EEZ) is in effect through March 30, 1988. The Secretary of Commerce (Secretary) extends the emergency interim rule for an additional 90 days (through June 28, 1988) to allow the Gulf of Mexico Fishery Management Council (Council) sufficient time to prepare an amendment to the Fishery Management Plan for the Red Drum Fishery of the Gulf of Mexico (FMP) that would continue these zero catch allowances. The intent of this rule is to protect the red drum spawning stock in the EEZ from exploitation until the FMP amendment is implemented.

EFFECTIVE DATE: This rule is effective 0001 hours, local time, March 31, 1988, through 2400 hours, local time, June 28, 1988.

ADDRESS: Copies of documents supporting this action may be obtained from William R. Turner, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, FL 33702.

FOR FURTHER INFORMATION CONTACT: William R. Turner, 813-893-3722.

SUPPLEMENTARY INFORMATION: Under section 305(e)(2)(B) of the Magnuson Fishery Conservation and Management Act, the Secretary promulgated an interim emergency rule (53 FR 244, January 6, 1988) effective for 90 days, January 1 through March 30, 1988, in response to an emergency situation in the red drum fishery. The Secretary extends the emergency interim rule for an additional 90 days in accordance with section 305(e)(3)(B) of the Magnuson Act because conditions justifying the emergency action remain unchanged. The 90-day extension will prevent the resumption of red drum harvest in the EEZ.

The initial emergency interim rule prohibited the harvest or possession of red drum in the EEZ of the Gulf of Mexico based on the most recent scientific stock assessment, which indicated that an emergency situation existed regarding the red drum resource. The assessment concluded that red drum less than 12 years of age were poorly represented in the offshore population, and that continued harvest of adults would further reduce the spawning stock and increase the risk of collapse of this fishery.

The Council, at its meeting during the week of January 25, 1988, noted that there is no short-term solution to the resource conditions that exist and recommended that the emergency rule be extended for an additional 90 days. The Secretary reviewed this recommendation and concluded that this extension is consistent with provisions of the Magnuson Act, and will afford protection to the red drum resource while the Council proceeds with an FMP amendment that will continue the zero catch allowances until such time as the FMP objectives are obtained. A detailed discussion of the background, present situation, and classification of the rulemaking is set forth in the initial emergency interim rule and is not repeated here.

All provisions of the emergency interim rule remain effective through June 28, 1988.

This extension of the emergency interim rule is exempt from the usual review procedures of Executive Order 12291 as provided for in section 8(a)(1) of that order. The action is being reported to the Director, Office of Management and Budget, with an explanation of why it is not possible to follow the procedures of that Order.

List of Subjects in 50 CFR Part 653

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: March 2, 1988.

James E. Douglas, Jr.,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 53, No. 45
Tuesday, March 8, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 946

Washington Potatoes; Expenses and Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would authorize expenditures and establish an assessment rate under Marketing Order 946 for the 1988-89 fiscal period. Funds to administer this program are derived from assessments on handlers.

DATE: Comments must be received by March 18, 1988.

ADDRESS: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2085-S, Washington, DC 20090-6456. Comments should reference the date and page number of this issue of the Federal Register and will be available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Todd A. Delello, Marketing Order Administation Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456, telephone 202-475-5610.

SUPPLEMENTARY INFORMATION: This rule is proposed under Marketing Order No. 946 (7 CFR Part 946) regulating the handling of potatoes grown in the State of Washington. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 50 handlers of Washington potatoes under this marketing order, and approximately 360 Washington potato producers. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revneues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of the handlers and producers may be classified as small entities.

The marketing order requires that the assessment rate for particular fiscal period shall apply to all assessable potatoes handled from the beginning of such period. An annual budget of expenses is prepared by the committee and submitted to the Department of Agriculture for approval. The members of the committee are handlers and producers of potatoes. They are familiar with the committee's needs and with the costs for goods, services, and personnel in their local area and are thus in a position to formulate an appropriate budget. The budget was formulated and dicsussed in a public meeting. Thus, all directly affected persons have had an opportunity to participate and provide input.

The assessment rate recommended by the committee is derived by dividing anticipated expenses by expected shipments of potatoes. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the committee's expected expenses. A recommended budget and rate of assessment is usually acted upon by the committee before the season starts, and expenses are incurred on a continuous basis. Therefore, budget and assessment rate approval must be expedited so that the committee will have funds to pay its expenses.

The State of Washington Potato Committee met on February 10, 1988, and unanimously recommended a budget for the 1988-89 fiscal period of $33,000, and an assessment rate of $.004 per hundredweight of potatoes. This compares to the 1987-88 budget of $29,400 and an assessment rate of $.002 per hundredweight of potatoes. The proposed budget is $3,600 more than last year's, reflecting an increase of $1,000 in committee expenses and $2,600 in compliance audits. All other budget categories remain the same. The assessment rate since the 1983-84 fiscal period has been $.002. This rate was set to reduce what was considered an undesirably high reserve amount. Believing this this goal has been met, the 1988-89 recommended assessment rate is double the rate of the previous fiscal period in order to maintain an adequate reserve amount and meet new added expenses. Anticipated fresh market shipments of eight million hundredweight will yield $32,000. This, along with $1,000 from the reserve, will be adequate for budgeted expenses. Reserves are expected to amount to $18,000 at the end of the 1987-88 fiscal period and will be carried over into the next fiscal period.

While this proposed action would impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs would be significantly offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of AMS had determined that this action would not have a significant economic impact on a substantial number of small entities.

Based on the foregoing, it is found and determined that a comment period of less than 30 days is appropriate because the budget and assessment rate approval for this program needs to be expedited. The committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis.

List of Subjects in 7 CFR Part 946

Marketing agreements and orders, Potatoes (Washington).

For the reasons set forth in the preamble, it is proposed that § 946.241 be added (the following section prescribes annual expenses and assessment rate and will not be published in the Code of Federal Regulations):

PART 946—POTATOES GROWN IN STATE OF WASHINGTON

1. The authority citation for 7 CFR Part 946 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. A new § 946.241 is added to read as follows:

§ 946.241 Expenses and assessment rate.

Expenses of $33,000 by the State of Washington Potato Committee are authorized, and an assessment rate of $.004 per hundredweight of assessable potatoes is established for the fiscal period ending June 30, 1989. Unexpended funds may be carried over as a reserve.

Dated: March 3, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 88–4966 Filed 3–7–88; 8:45 am]

BILLING CODE 3410–02–M

Commodity Credit Corporation

7 CFR Part 1425

Cooperative Marketing Associations; Eligibility Requirements for Price Support

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commodity Credit Corporation (CCC) is proposing to amend the regulations governing cooperative marketing associations in order to: (1) Allow producers to place commodities in a pool of eligible commodities which may then be pledged by a cooperative as collateral for a CCC price support loan without the cooperative being required to distribute the loan proceeds within 15 days of their receipt if the commodities are redeemed within 15 days of such date; and (2) delete a repetitive provision found at 7 CFR 1425.19. The proposed amendment provides members of cooperative marketing associations the same marketing flexibility as individual producers.

DATE: Written comments must be received on or before April 8, 1988, in order to be assured of consideration.

ADDRESS: Send comments to Director, Cotton, Grain, and Rice Price Support Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Richard M. Ackley, Head, Cooperative & Analysis Section, Price Support Branch, Cotton, Grain, and Rice Price Support Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, DC 20013, (202) 447–6685.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed under U.S. Department of Agriculture (USDA) procedures established in accordance with provisions of Departmental Memorandum 1512–1 and Executive Order 12291, and has been classified "not major". It has been determined that these program provisions will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local governments or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

It has been determined that the Regulatory Flexibility Act is not applicable to this proposed rule since CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, no environment assessment or Environmental Impact Statement is needed.

The title and number of the Federal assistance program to which this proposed rule applies are: Title—Commodity Loans and Purchases: Number 10.051; as found in the Catalog of Federal Domestic Assistance. This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

The regulations governing the eligibility of cooperative marketing associations to receive price support loans and purchases from CCC are set forth at 7 CFR Part 1425. The regulations at 7 CFR 1425.16 provide that a pool of commodities shall be eligible to receive price support if certain conditions are met. The provisions at 7 CFR 1425.16(b)(1)(iii) currently provide that a cooperative must exclude commodities delivered by members for marketing from an eligible pool until the members delivering such commodities agree to accept an initial payment from the cooperative with respect to such commodities. The regulations at 7 CFR 1425.17 provide that net loan proceeds, less authorized charges, must be distributed to eligible pool members within 15 days from the receipt of such loan proceeds from CCC. Both these requirements were designed to ensure that price support loan proceeds are distributed to the cooperatives' producer members in a timely manner and not withheld by the cooperative in order to finance the cooperatives' general operations. Provisions of some CCC price support and production adjustment programs allow for the pledging of eligible commodities as collateral for CCC price support loans and for immediate redemption of the collateral at a lesser amount (i.e. marketing loans). Other provisions of these programs provide that individuals and entities which have outstanding CCC price support loans may, in accordance with 7 CFR Part 770, obtain the commodities which have been pledged as collateral for such loans through the use of CCC commodity certificates. In order to provide producers who receive price support through cooperative marketing associations greater flexibility in marketing their commodities, this proposed rule would amend 7 CFR 1425.16 and 1425.17 to allow a cooperative to pledge eligible commodities as collateral for a CCC price support loan without being required to disburse the loan proceeds within 15 days of their receipt if the commodities are redeemed within 15 days of such date.

The regulations at 7 CFR 1425.19(c) duplicate the regulations found at 7 CFR 1425.13(c). Accordingly, this proposed rule would delete the provisions of 7 CFR 1425.19(c).

Proposed Rule

Accordingly, 7 CFR Part 1425 is proposed to be amended as follows:

PART 1425—COOPERATIVE MARKETING ASSOCIATIONS

1. The authority citation for 7 CFR Part 1425 continues to read as follows:

Authority: Secs. 4, 5, and 12 of the Commodity Credit Corporation Charter Act, as amended, 62 Stat. 1070, as amended, 1072, 1073 (15 U.S.C. 714b, 714c, and 714j); secs. 101, 201, 203, 301, and 401 of the Agricultural Act of 1949, as amended, 63 Stat. 1051, as amended, 1052, as amended, 70 Stat. 212, 63 Stat. 1053, as amended, 1054, as amended (7 U.S.C. 1444(a), 1441, 1446d, 1447, 1421(a)).

2. 7 CFR 1425.16(b)(1)(iii) is revised to read as follows:

§ 1425.16 Eligible commodity and pooling.

* * * * *

(b) *Eligible pool.* * * *

(iii) Except with respect to a quantity of a commodity pledged as collateral for a price support loan and which is redeemed within 15 days from the date the cooperative receives the proceeds from CCC, all of the commodity placed in such pool was delivered by members who have agreed to accept a payment of the initial advances made available to such producers by the cooperative with respect to such commodity in accordance with § 1425.17(a).

* * * * *

3. 7 CFR 1425.17(a)(1) is revised to read as follows:

§ 1425.17 Distribution of proceeds.

(a) *CCC loans and purchases.* (1) If CCC makes available price support loans or purchases with respect to any quantity of the eligible commodity in a pool, the proceeds from such loans or purchases shall be distributed to members participating in such pool on the basis of the quantity and quality of the commodity delivered by each member which is included in the pool less any authorized charges for services performed or paid by the cooperative which are necessary to condition the commodity or otherwise make the commodity eligible for price support. Except with respect to commodities which are pledged as collateral for a price support loan and which are redeemed within 15 days from the date the cooperative receives the loan proceeds from CCC, such proceeds shall be distributed within 15 days from such date.

* * * * *

§ 1425.19 [Amended]

4. 7 CFR 1425.19(c) is removed.

Signed at Washington, DC, on March 1, 1988.

Milton Hertz,

Executive Vice President, Commodity Credit Corporation.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87–NM–175–AD]

Airworthiness Directives; Avions Marcel Dassault-Brequet Aviation (AMD–BA) Model Fan Jet Falcon Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes an airworthiness directive (AD), applicable to certain AMD–BA Model Fan Jet Falcon series airplanes, that would require modification of the main landing gear (MLG) release mechanism. This proposal is prompted by a report of jamming of the rear lock when the emergency manual control is operated. This condition, if not corrected, could result in failure of the MLG to extend.

DATE: Comments must be received no later than May 2, 1988.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM–103), Attention: Airworthiness Rules Docket No. 87–NM–175–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from Falcon Jet Corporation, 77737 Terrace Avenue, Hasbrouck Heights, New Jersey 07604. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Huhn, Standardization Branch, ANM–113; telephone (206) 431–1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM–103), Attention: Airworthiness Rules Docket No. 87–NM–175–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

The Direction Général de L'Aviation Civile (DGAC) of France, has, in accordance with existing provisions of a bilateral airworthiness agreement, notified the FAA of an unsafe condition which may exist or develop on certain AMD–BA Model Fan Jet Falcon series airplanes. There have been reports of jamming of the main landing gear (MLG) lateral door rear lock when the emergency manual control is operated. The synchronization of the front and rear locks of the MLG lateral doors is ensured by a teleforce cable. If this cable breaks, the rear lock may jam when the emergency manual control is operated, due to the control lever having moved downwards. This condition, if not corrected, could prevent the MLG from being extended by means of the emergency manual system.

AMD–BA has issued Fan Jet Falcon Service Bulletin FJF–32–45(502), Revision 1, dated May 27, 1987, which describes installation of a stop on the control lever to limit possible downward movement, after failure of the teleforce synchronization cable, and to prevent jamming of the rear lock. The DGAC has issued French Airworthiness Directive 87–077–018(B), dated May 27, 1987, which requires compliance with the AMD–BA service bulletin.

This airplane model is manfactured in France and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on airplanes of this model

VOL
53
ISS
45
MR
8
988
MI

registered in the United States, an AD is proposed that would require modification of the MLG lateral doors release mechanism, in accordance with the previously mentioned AMD-BA service bulletin.

It is estimated that 117 airplanes of U.S. registry would be affected by this AD, that it would take approximately 3 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD on U.S. operators is estimated to be $14,040.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because of the minimal cost of compliance per airplane ($120). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Avions Marcel Dassault-Breguet Aviation (AMD-BA): Applies to Model Fan Jet Falcon series airplanes as listed in AMD-BA Service Bulletin FJF-32-45(502), Revision 1, dated May 27, 1987, certificated in any category. Compliance is required within 60 days after the effective date of this AD, unless previously accomplished.

To prevent the inability to extend the main landing gear (MLG) due to the lateral door rear lock jamming, accomplish the following:

A. Install a stop on each MLG lateral door rear lock in accordance with AMD-BA Fan Jet Falcon Service Bulletin FJF-32-45(502), Revision 1, dated May 27, 1987.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Falcon Jet Corporation, 77737 Terrace Avenue, Hasbrouck Heights, New Jersey 07604. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on February 26, 1988.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

[FR Doc. 88-4949 Filed 3-7-88; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 87-NM-96-AD]

Airworthiness Directives; Boeing Model 757 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: This document withdraws a Notice of Proposed Rulemaking (NPRM), applicable to certain Boeing Model 757 series airplanes, which would have required inspection of the indicator switches in the wing and engine anti-ice control panel, replacement of the panel if certain switches are installed, and repetitive functional testing of the panel. That action was necessary to prevent an inoperative wing or engine anti-ice system with no annunciation to the flight crew. Since issuance of the NPRM, the FAA has issued additonal rulemaking to eliminate the potential for the unsafe condition addressed in the NPRM. Therefore, the NPRM is no longer necessary and should be withdrawn.

FOR FURTHER INFORMATION CONTACT: Mr. Henry A. Jenkins, Systems & Equipment Branch, ANM-130S; telephone (206) 431-1946. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations by adding a new airworthiness directive (AD), was published as a Notice of Proposed Rulemaking (NPRM) in the Federal Register on September 9, 1987 (52 FR 33947). The proposal would have required inspection of the indicator switches in the wing and engine anti-ice control panel, replacement of the panel if certain switches are installed, and repetitive functional testing of the panel on certain Boeing Model 757 series airplanes.

Since issuance of that proposal, the FAA issued AD 88-01-08, Amendment 39-5827 (53 FR 493; January 8, 1988), applicable to all Boeing Model 757 series airplanes, which requires repetitive functional testing of the wing and engine anti-ice control system. That action was prompted by additional reports of problems associated with the switches used in anti-ice control panels, and of the inadequacy fo the anti-ice circuit logic that can result in the flight crew not being warned that the anti-ice ice system has not been activated. The FAA has determined that the requirements of AD 88-01-08 effectively eliminate the potential for the unsafe condition addressed in the NPRM. Therefore, the NPRM is no longer necessary and is hereby withdrawn.

Withdrawal of this NPRM constitutes only such action, and does not preclude the agency from issuing another Notice in the future, or commit the agency to any course of action in the future.

Since this action only withdraws an NPRM, it is neither a proposed nor final rule, and therefore, is not covered under Executive Order 12291, the Regulatory Flexibility Act, or DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

List of Subject in 14 CFR Part 39

Aviation safety, Aircraft.

The Withdrawal

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration withdraws a proposal to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By withdrawing the proposed airworthiness directive, Notice of Proposed Rulemaking (NPRM), Docket 87-NM-96-AD, published in the Federal Register on September 9, 1987 (52 FR 33947), FR Doc. 87-20602.

Issued in Seattle, Washington, on Feburary 29, 1988.

Wayne J. Barlow,

Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 87-NM-174-AD]

Airworthiness Directives; SAAB-Fairchild Model SF-340A Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes to supersede an existing airworthiness directive (AD), applicable to certain SAAB-Fairchild Model SF-340A series airplanes, which currently requires modification to the wiring and connectors associated with separation (explosive) bolts in the main landing gear (MLG) emergency extension system. This action, in addition to previously required modifications, would require the separation bolt wiring harness to be lengthened and the existing harness to be re-routed and secured. This action is necessary to prevent failure of the separation bolt wiring harness, which would prevent activation of the separation bolt. This, in turn, could prevent full extension of the MLG and subsequently cause main gear collapse upon landing in the event the main gear emergency extension system is utilized.

DATE: Comments must be received no later than May 2, 1988.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 87-NM-174-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from SAAB, Aircraft Product Support AB, S. 58188, Linkoping, Sweden. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Huhn, Standardization Branch, Seattle Aircraft Certification Office, ANM-113; telephone (206) 431-1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 87-NM-174-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

On June 19, 1987, FAA issued AD 87-13-07, Amendment 39-5662 (52 FR 23947; June 26, 1987), to require modification of the wiring and connectors of the MLG extension system on SAAB-Fairchild Model SF-340A series airplanes, in accordance with SAAB Service Bulletin SF340-32-028, Revision 1, dated November 25, 1986.

SAAB Service Bulletin SF-340-32-028, Revision 1, describes the addition of a protective shrink sleeve to the electrical connectors of the separation bolts and re-routing of the separation bolt grounding wires. These design changes were intended to strengthen the wire/connector interface and reduce the stresses in the ground connections. However, since issuance of AD-87-13-07, wire/connector interface failures have continued to occur. It has been determined that premature failure is caused by torsional flexure in the cable through normal operation of the main landing gear extension system.

SAAB issued Service Bulletin SF-340-32-041, Revision 1, dated October 9, 1987. This service bulletin provides instructions to lengthen the existing electrical harnesses for the separation bolts, (modified in accordance with previous Service Bulletin SF340-32-028, Mod. 1409), and to re-route and secure the existing harness. The purpose of this modification is to reduce the torsional flexure for a given length of wire. The Swedish Civil Aviation Authority issued Airworthiness Directive SAD No. 1-023, dated September 14, 1987, that requires compliance with SAAB Service Bulletin SF-340-32-041, Revision 1, dated October 9, 1987.

This airplane model is manufactured in Sweden and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed which would require modification of the harnesses in accordance with the service bulletins previously mentioned.

It is estimated that 61 airplanes of U.S. registry would be affected by this AD, that it would take approximately 4 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Estimated cost of parts per airplane is $1,475. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $99,735.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because of the minimal cost of compliance per airplane ($1,075). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By superseding AD 87–13–07, Amendment 39–5662 (52 FR 23947; June 26, 1987), with the following new airworthiness directive:

SAAB-Fairchild: Applies to Model SF-340A airplanes, manufacturer's serial numbers SF340A–003 through –078 inclusive, certificated in any category. Compliance required as indicated, unless previously accomplished.

To ensure the reliability of the emergency main landing gear extension system, accomplish the following:

A. Prior to November 3, 1987, modify the wiring and connectors of the main landing gear emergency extension system in accordance with SAAB Service Bulletin SF340–32–028, Revision 1, dated November 25, 1986.

B. Within 90 days after effective date of this AD, lengthen the electrical harnesses for the separation bolts, and re-route and secure the existing harnesses, in accordance with SAAB Service Bulletin SF340–32–041, Revision 1, dated October 9, 1987.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the modification required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to SAAB, Aircraft Product Support AB, S.58188, Linkoping, Sweden. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on February 26, 1988.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

[Airspace Docket No. 87–AWA–52]

Proposed Establishment of Airport Radar Service Areas; California

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM); extension of comment period and notice of informal airspace meetings.

SUMMARY: This notice announces extension of the comment period on an NPRM which proposes to establish an Airport Radar Service Area (ARSA) at Palm Springs, CA, and Santa Barbara, CA, and gives notification of informal airspace meeting.

DATES: Comments must be received on or before June 13, 1988. Informal airspace meeting dates are as follows: Santa Barbara, CA—May 12, 1988, and Palm Springs, CA—May 11, 1988.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket [AGC–204], Airspace Docket No. 87–AWA–52, 800 Independence Avenue SW., Washington, DC 20591.

The informal airspace meeting places are as follows:

Santa Barbara, CA, ARSA

Date: May 12, 1988
Time: 7:00 p.m.
Location: Santa Barbara County School's Office Auditorium, 4400 Cathedral Oaks, Santa Barbara, CA 93105

Palm Springs, CA, ARSA

Date: May 11, 1988
Time: 7:00 p.m.
Location: City Hall Council Chambers, 3200 Taquito-McCallum Way, Palm Springs, CA 92262

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

The informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Joe Gill, Airspace Branch (ATO–240), Airspace—Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–9252.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87–AWA–52." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–230, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267–3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

Background

Airspace Docket No. 87–AWA–52, published on January 11, 1988 (53 FR 674), proposed to establish an Airport Radar Service Area (ARSA) at five locations which included Palm Springs, CA, and Santa Barbara, CA. An informal airspace meeting was scheduled for each location to receive additional public comment on the proposal. Due to an administrative error not all of the individual mailings were made in a timely manner.This action extends the period for public comment on Airspace Docket No. 87–AWA–52, as it applies to Palm Springs, CA, and Santa Barbara, CA, only, and schedules additional informal airspace meetings.

Meeting Procedures

In addition to seeking written comments on this proposal, the FAA will hold informal airspace meetings in order to receive additional input with respect to the proposal. The dates, times, and places for these meetings are listed above. Persons who plan to attend the meetings should be aware of the following procedures to be followed:

(a) The meetings will be informal in nature and will be conducted by the designated representative of the Administrator. Each participant will be given an opportunity to make a presentation.

(b) There will be no admission fee or other charge to attend and participate. The meetings will be open to all persons on a space-available basis. The FAA representative may accelerate the agenda to enable early adjournment if the progress of the meetings is more expeditious than planned.

(c) The meetings will not be recorded. A summary of the comments made at these meetings will be filed in the docket.

(d) Position papers or other handout material relating to the substance of the meetings may be accepted. Participants submitting handout materials should present an original and two copies to the presiding officer. There should be an adequate number of copies provided for further distribution to all participants.

(e) Statements made by FAA participants at the meetings should not be taken as expressing a final FAA position.

[Airspace Docket No. 87–ASW–54]

Proposed Revision of Transition Area; Albuquerque, NM

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This summary proposes to revise the transition area located at Albuquerque, NM. The closure of the Alameda Airport, resulting in the cancellation of the standard instrument approach procedure (SIAP) serving the Alameda Airport, and the development of a new SIAP to the Double Eagle Airport have made this proposed revision necessary. The intended effect of this proposed revision is to return that controlled airpspace no longer required for aircraft executing the SIAP to the Alameda Airport. Additionally, this proposed revision will provide adequate controlled airspace for aircraft executing the new SIAP to the Double Eagle Airport. Coincident with this action, the instrument flight rules (IFR) status of the Alameda Airport is canceled and the status of the Double Eagle Airport is changed from visual flight rules (VFR) to IFR.

DATES: Comments must be received on or before April 11, 1988.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 87–ASW–54, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530; telephone: (817) 624–5561.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87–ASW–54."

The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) by revising the transition area located at Albuquerque, NM. The closure of the Alameda Airport, resulting in the cancellation of the SIAP serving the Alameda Airport, and the development of a new SIAP to Runway 22 at the Double Eagle Airport have necessitate this proposed revision. The intended effect of this proposed revision is to return that controlled airspace no longer required for aircraft executing the SIAP to the Alameda Airport and to provide adequate controlled airspace for aircraft executing the new SIAP to the Double Eagle Airport. Coincident with this action, the IFR status of the Alameda Airport is canceled and the status of the Double Eagle Airport is changed from VFR to IFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this regulations only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Albuquerque, NM

That airspace extending upward from 700 feet above the surface within a 14-mile radius of Albuquerque International Airport (latitude 35°02'30" N., longitude 106°36'23" W.), and within an 11.5-mile radius of the Double Eagle Airport (latitude 35°08'42" N., longtude 106°47'41" W.).

Issued in Fort Worth, TX on February 24, 1988.

Larry L. Craig,

Manager, Air Traffic Division Southwest Region.

[Airspace Docket No. 87–ASW–53]

Proposed Removal of Transition Area; Kirbyville, TX and Proposed Amendment of Transition Area; Jasper, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to remove the transition area located at Kirbyville, TX, and revise the transition area located at Jasper, TX. This multiple proposed action is necessary due to the removal of the Boggy Creek and Pine Nondirectional Radio Beacons (NDB) and the subsequent cancellation of the associated standard instrument approach procedures (SIAP) utilizing these two NDB's. The intended effect of this proposed action is to release that controlled airspace no longer required due to the cancellation of the SIAP's. Coincident with this action, the status of the Kirbyville Airport will change from instrument flight rules (IFR) to visual flight rules (VFR).

DATE: Comments must be received on or before April 11, 1988.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 87–ASW–53, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530; telephone: (817) 624–5561.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87–ASW–53."

The postcard will be date/time stamped and returned to the commenter All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) by removing the transition area located at Kirbyville, TX, and revising the transition area located at Jasper, TX. The removal of the Boggy Creek and Pine NDB's and the subsequent cancellation of the SIAP's to the Kirbyville and Jasper County Airports utilizing these NDB's have necessitated this proposed multiple action. The intended effect of this proposed multiple action is to return that controlled airspace no longer required due to the cancellation of the SIAP's. Coincident with this action, the status of the Kirbyville Airport will change from IFR to VFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C, dated January 2, 1987.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

The Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Kirbyville, TX [Removed]

Jasper, TX [Revised]

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Jasper County Airport (latitude 30°53'32"N., longitude 94°02'53"W.), within 3.5 miles each side of the 360° bearing from the Jasper NDB (latitude 30°57'16"N., longitude 94°02'08"W.), extending from the 5-mile radius area to 11.5 mile north of the Jasper NDB.

Issued in Fort Worth, TX, on February 24, 1988.

Larry L. Craig,

Manager, Air Traffic Division, Southwest Region.

[Airspace Docket No. 87–ASW–65]

Proposed Establishment of Restricted Area R–5115; Deming, NM

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish Restricted Area R–5115 located near Deming, NM. This action would provide for the deployment of a tethered aerostat-borne radar system at the request of the United States Customs Service. This action would provide the Customs Service with the capability to provide surveillance of a volume of airspace from ground level to an altitude of 15,000 feet mean sea level and detect low altitude suspect aircraft attempting to penetrate the airspace.

DATE: Comments must be received on or before April 18, 1988.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Southwest Region, Attention: Manager, Air Traffic Division, Docket No. 87–ASW–65, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Andrew B. Oltmanns, Airspace Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC. 20591; telephone: (202) 267–9254.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. Comments are specifically invited on the overall regulatory, aeronautical, economic and energy related aspects of the proposals. Send comments on environmental and land use aspects to: Department of Treasury, U.S. Customs Service, Mr. Robert O. Holliday, Director, Research and Development Division, 1301 Constitution Avenue NW., Washington, DC 20229 (202) 566–5371. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87–ASW–65." The postcard will be dated/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–230, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267–3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposals

The FAA is considering amendments to Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) to establish Restricted Area R–5115 located near Deming, NM. The U.S. Customs Service would deploy a tethered aerostat-borne radar system with the capability to detect low altitude suspect aircraft attempting to penetrate

BEST COPY AVAILABLE

VOL 53 ISS 45 MR 8 1988 UMI

the airspace. The system would increase the probability of intercept/interdiction of suspect aircraft and provide low altitude radar coverage for the Customs Service. In order to achieve their mission, it would be necessary to restrict airspace from the surface to 15,000 feet MSL, within a 2-statute-mile radius. R–5115 would also be added to the Continental Control Area. Sections 71.151 and 73.51 of Parts 71 and 73 of the Federal Aviation Regulations were republished in Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Continental control area, Restricted areas.

The Proposed Amendments

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§71.151 [Amended]

2. Section 71.151 is amended as follows:

R–5115 Deming, NM [New]

PART 73—SPECIAL USE AIRSPACE

3. The authority citation for Part 73 continues to read as follows:

Authority. 49 U.S.C. 1348(a), 1354(a), 1510, 1522; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§73.51 [Amended]

4. Section 73.51 is amended as follows:

R. 5115 Deming, NM [New]

Boundaries. A 2-mile radious centered at lat. 32°01'07"N., long. 107°51'52"W.

Designated altitudes. Surface to 15,000 feet MSL.

Time of designation. Continuous.

Controlling agency. FAA, Albuquerque ARTCC.

Using agency. United States Customs Service.

Issued in Washington, DC, on February 29, 1988.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

[FR Doc. 88–4947 Filed 3–7–88; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 73

[Airspace Docket No. 87–AGL–29]

Proposed Alteration of Restricted Areas R–5503A and R–5503B, OH

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to realign Restricted Areas R–5503A and R–5503B near Wilmington, OH, by moving the areas slightly to the south and east in order to better accommodate access to the national airspace system for local aviation activities.

DATES: Comments must be received on or before April 22, 1988.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Great Lakes Region, Attention: Manager, Air Traffic Division, Docket No. 87–AGL–29, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Paul Gallant, Airspace Branch (ATO–240), Airspace—Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–9253.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87–AGL–29." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–230, 800 Independence Avenue SW., Washington, DC. 20591, or by calling (202) 267–3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to Part 73 of the Federal Aviation Regulations (14 CFR Part 73) to relocate Restricted Areas R–5503A and R–5503B several miles to the south and east in order to better accommodate access to the national airspace system

by local aviation users. Section 73.55 of Part 73 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 73

Aviation safety, Restricted areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 73 of the Federal Aviation Regulations (14 CFR Part 73) as follows:

PART 73—SPECIAL USE AIRSPACE

1. The authority citation for Part 73 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510, 1522; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§73.55 [Amended]

2. Section 73.55 is amended as follows:

R–5503A Wilmington, OH [Amended]

By removing the present boundaries and substituting the following:

Boundaries. Beginning at lat. 38°54'40" N., long. 83°54'45" W.; to lat. 39°10'45" N., long. 83°53'00" W.; to lat. 39°27'45" N., long. 83°23'00" W.; to lat. 39°24'20" N., long. 82°49'30" W.; to lat. 39°18'00" N., long. 82°44'15" W.; to lat. 38°58'45" N., long. 82°50'00" W.; to lat. 38°47'00" N., long. 82°58'45" W.; to lat. 38°46'20" N., long. 83°14'20" W.; to lat. 38°52'15" N., long. 83°34'00" W.; thence to the point of beginning.

R–5503B Wilmington, OH [Amended]

By removing the present boundaries and substituting the following:

Boundaries. Beginning at lat. 38°54'40" N., long. 83°54'45" W.; to lat. 38°59'00" N., long. 84°05'00" W.; to lat. 39°16'00" N., long. 84°06'00" W.; to lat. 39°29'20" N., long. 83°41'00" W.; to lat. 39°27'45" N., long. 83°23'00" W.; to lat. 39°10'45" N., long. 83°53'00" W.; thence to point of beginning.

Issued in Washington, DC, on February 24, 1988.

Signed by: **Daniel J. Peterson,**

Manager, Airspace-Rules and Aeronautical Information Division.

BILLING CODE 4910-13-M

FEDERAL MARITIME COMMISSION

46 CFR Part 588

[Docket No. 87–25]

Actions To Adjust or Meet Conditions Unfavorable to Shipping in the United States/Taiwan Trade

AGENCY: Federal Maritime Commission.

ACTION: Notice of discontinuance.

SUMMARY: The Federal Maritime Commission discontinues this proceeding and withdraws the proposed rule because of recent developments in the United States/Taiwan trade. This action makes unnecessary the filing of any further comments on the Proposed Rule.

DATE: This action is effective March 8, 1988.

FOR FURTHER INFORMATION CONTACT: Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573 (202) 523–5740.

SUPPLEMENTARY INFORMATION: The Commission initiated this proceeding pursuant to section 19(1)(b) of the Merchant Marine Act, 1920, 46 U.S.C. app. 876 ("Section 19"), by a Notice of Proposed Rulemaking ("Proposed Rule") published in the Federal Register on December 8, 1987 (52 FR 46505) based on the apparent existence of conditions unfavorable to shipping in the United States/Taiwan trade ("Trade"). The Proposed Rule addressed practices which appeared to unreasonably restrict U.S.-flag carriers from competing in the Trade on the same basis as Taiwan-flag carriers with respect to the ownership and operation of dockside equipment and facilities, and the ability of U.S.-flag carriers to obtain container terminal licenses.[1] The remedies proposed as alternative sanctions were suspension of the tariffs of Taiwan-flag carriers serving U.S. ports, and suspension of transshipment and terminal agreements at U.S. ports to which Taiwan-flag carriers are parties. Comments on the Proposed Rule are to be submitted by March 7, 1988.[2]

On February 1, 1988, the Commission received a comment (dated January 21, 1988) to the Proposed Rule from the Taiwan Coordination Council for North American Affairs ("CCNAA") which incorporated a request (hereinafter referred to as "the Petition") that the Commission discontinue this proceeding.[3] Letters in support of CCNAA's request were received from Taiwan-flag carriers Evergreen Marine Corporation ("Evergreen") (letter dated February 17, 1988) and OOCL (letter dated February 16, 1988).[4]

U.S.-flag interests have also filed replies to CCNAA's Petition. APL's reply, received February 18, 1988, supports discontinuance of this proceeding but requests that the Commission gather additional information concerning the Trade under section 15 of the 1984 Act. Sea-Land's reply, received February 22, 1988, also supports termination of this proceeding and continuation of the Commission's section 15 inquiry. The U.S.-Flag Far East Discussion agreement ("Agreement 10050") likewise supports termination of this proceeding and continued monitoring of the Trade.[5]

---

[1] The information which formed the factual basis for the Proposed Rule had been obtained through an order pursuant to section 15 of the Shipping Act of 1984 ("1984 Act"), 46 U.S.C. app. 814. *See Inquiry Into Laws, Regulations and Policies of Taiwan Affecting Shipping in the United States/Taiwan Trade*, issued April 15, 1987 ("Section 15 Order"). The Section 15 Order sought information from non-Taiwan-flag ocean common carriers serving the Trade. Although a number of other areas were explored in the Section 15 Order, ownership of dockside equipment and container terminal licensing were the two issues of paramount concern identified in the responses to the Section 15 Order.

[2] The original deadline for submission of comments was January 7, 1988. Requests to extend the time for comments were received from Orient Overseas Container Line ("OOCL") and Yang Ming Marine Transport Corporation ("Yang Ming"). American President Lines ("APL") and Sea-Land Service, Inc. ("Sea-Land") informally advised that they did not oppose a reasonable extension of time. The Department of State ("DOS") and Department of Transportation ("DOT") informally indicated that they supported the requested extension. On January 8, 1988, the Commission extended the comment period to March 7, 1988.

[3] CCNAA filed its request pursuant to 46 CFR 585.13 which provides in relevant part that:

"The Commission may, on its own motion or upon petition postpone, discontinue, or suspend any and all actions taken by it under the provisions of this part."

CCNAA's request therefore is being treated as a petition to discontinue the proceeding and, in the interest of time and orderly procedure, is now being separately considered.

[4] Yang Ming, also a Taiwan-flag carrier, filed a letter on February 4, 1988 which, while not responding directly to the Petition, did request that this proceeding be "closed."

[5] The United Shipowners of America ("USA") submitted a letter on February 16, 1988 which supported the position of U.S.-flag carriers and noted "changes in factual circumstances in Taiwan" but did not address the question of whether this proceeding should be discontinued.

Summary of Comments Addressing the Petition for Discontinuance

Although the comment period has not yet expired, the Commission has received a number of comments from shippers, ports and other interested persons on the Proposed Rule, some of which also request that the Proposed Rule be withdrawn. These comments, some of which were filed prior to the CCNAA Petition, however, do not directly address the question raised by that Petition which is before the Commission at this time and will not be further discussed here. The following is a summary of the Petition, the replies to the Petition from Taiwan-flag and U.S.-flag carriers, and relevant communications from the U.S. Government agencies.

The Petition

CCNAA asserts that the two issues raised in this proceeding have been resolved and therefore requests that this proceeding be withdrawn. With regard to the question of ownership and operation of dockside equipment, CCNAA believes that new contracts between Kaohsiung Harbor Bureau ("KHB") and U.S.-flag carriers, expected to be signed by January 31, 1988, should resolve this matter. With regard to the question of container terminal licenses, CCNAA alleges that recent revisions of regulations by the Ministry of Communications greatly liberalize the requirements for obtaining a dockside container freight station license. CCNAA therefore urges that "the FMC withdraw any and all action in * * * [this] matter, on the basis that the issues targeted for this action have already been resolved * * *"

Replies to the Petition

1. *Evergreen.* Evergreen urges that this proceeding be terminated. Evergreen's Reply references its comment of January 5, 1988 to the Proposed Rule which notes the progress recently made citing the recent revision of the container terminal regulations and the then pending contract negotiations between KHB and U.S.-flag carriers.

2. *OOCL.* OOCL supports the Petition and urges the Commission to discontinue this proceeding based on the new contracts and the revised regulations.

3. *APL.* APL believes that the two issues raised in this rulemaking have been substantially resolved and that it would be appropriate to terminate this proceeding. With regard to the issue of ownership of dockside facilities and equipment, APL reports that it has entered into long-term agreements with KHB which provide that APL may import, own, operate and re-export certain container handling equipment subject to certain terms and conditions. APL believes that it is now able to operate on "commercially reasonable terms." With regard to the question of operation of container terminals, APL notes that it is satisfied that the revision of the container terminal licensing regulations has removed" * * * the primary regulatory obstacle to the establishment by APL of a container terminal in Taiwan * * *." Finally, although APL believes that this proceeding may be discontinued, it requests that the Commission permit interested persons to supplement their responses to the Section 15 Order to address other possible issues in the Trade.

4. *Sea-Land.* Sea-Land states that "[t]here has been significant progress made toward eliminating unfavorable conditions existing in the U.S./Taiwan trades, particularly with respect to the ownership and operation of dockside equipment and facilities, and with respect to the licensing of container terminal operations." Sea-Land cites a new agreement it has concluded with KHB. Sea-Land concludes that termination of this proceeding would be appropriate, but asks that "the Section 15 Inquiry be continued."

5. *U.S.-Flag Far East Discussion Agreement.* Agreement No. 10050, two of whose members are APL and Sea-Land, also supports discontinuance of this proceeding at this time. Agreement No. 10050 notes that "" * * significant progress * * * has been made toward alleviating the particular trade conditions addressed in this proceeding * * *." Agreement No. 10050 cites recent new contracts between U.S.-flag carriers and KHB and the revision of the terminal licensing regulations. Agreement No. 10050 also urges the Commission to continue to closely monitor conditions in the Trade.

U.S. Government Communications

By letter to the Commission, dated February 22, 1988, submitted on behalf of the Departments of Transportation and State, the Maritime Administrator forwarded to the Commission an exchange of correspondence between CCNAA (letter dated January 6, 1988) and the American Institute in Taiwan ("AIT") (letter dated January 13, 1988). The February 22 letter also refers to an earlier letter from the Maritime Administrator, dated January 15, 1988, which summarized recent developments in the Trade as they relate to the issues in this proceeding. The sum and substance of these various communications is to confirm the fact that significant progress has been made to alleviate the burdens on the operations of U.S.-flag carriers in Taiwan which are the subject of this proceeding.[6]

Discussion

Although the comment period in this proceeding has not expired, the Commission now has before it the CCNAA request, filed pursuant to 46 CFR 585.13, that the Commission discontinue this proceeding. The Petition is supported by Taiwan-flag carriers that would be affected by the sanctions in the Proposed Rule. In addition, the U.S.-flag carriers, whose operations in Taiwan were the subject of this rulemaking, also support discontinuance of this proceeding. Finally, the U.S. Government has submitted letters to the Commission which confirm the two most significant recent developments in this Trade. The Commission therefore believes that it is appropriate to consider and act on the Petition at this time.

The positions taken by the Taiwan and U.S.-flag interests disagree over the issuance of the Proposed Rule. With regard to those factual developments that have a bearing on the two issues in this proceeding, however, all affected parties appear to be in fundamental accord. The first issue addressed in this rulemaking concerned restrictions placed on U.S.-flag carriers with regard to the ownership and operation of dockside equipment and facilities. The comments filed indicate that both APL and Sea-Land have recently concluded contracts with KHB which resolve this problem. It appears that these restrictions have been substantially lifted and that U.S.-flag carriers can operate on terms which they believe are commercially reasonable.

The second issue concerned the Taiwan regulatory scheme which unreasonably hampered the ability of U.S.-flag carriers to obtain licenses to operate container terminals. The comments represent that the chief regulatory impediments have now been removed. The Commission is aware of the fact that, as of this date, the process of licensing U.S.-flag carriers to operate port container terminals is not yet complete. We note especially the concern expressed in AIT's letter to CCNAA, which was forwarded to the Commission by the Maritime Administrator, that the licensing process not be expensive, burdensome, or time-consuming for U.S. carriers. While this matter is not totally concluded, it does not appear that the current regulatory regime will pose any unreasonable impediments to the ability of U.S.-flag carriers to oeprate container terminal facilities. We presently expect that the remaining administrative matters will be completed satisfactorily.

Based on these developments, the Commission has concluded that the objectives of this rulemaking have been achieved and that no further regulatory purpose would be served by continuing this proceeding. The Commission therefore shall grant the Petition of CCNAA and shall discontinue this proceeding and withdraw the Proposed Rule.

This action is taken without prejudice to the Commission instituting a new proceeding under section 19 should conditions in the Trade warrant it. Such an action could occur if the expected progress with respect to container terminal licensing does not materialize. Moreover, we note that the U.S.-flag carriers in their comments urge that the Commission continue to closely monitor the Trade and the progress of governmental and commercial efforts to eliminate any conditions unfavorable to shipping in that Trade. To that end, the Commission is expressly requested to continue its section 15 inquiry to address other issues raised in that inquiry and to update information on the Trade situation generally.

It is not necessary at this time to take any action on the request of the U.S.-flag carriers that the Commission conduct a further inquiry into conditions in the Trade through the section 15 process. The Commission, however, will continue to closely monitor the Trade and will take further appropriate action under section 15 or under section 19 as Trade conditions may warrant. The Commission remains committed to take action (including imposition of sanctions on foreign carriers) where it considers that step necessary to ensure fair and reasonable treatment of U.S.-flag carriers or otherwise to correct unfavorable shipping conditions in U.S. foreign commerce.

Therefore, it is ordered, That the Petition of the Coordination Council for North American Affairs is granted; and

It is further ordered, That the Proposed Rule is withdrawn and this proceeding is discontinued.

By the Commission.

Joseph C. Polking,
Secretary.

[FR Doc. 88–4890 Filed 3–7–88; 8:45 am]

BILLING CODE 6730-01-M

---

[6] The February 22, 1988 letter from the Maritime Administrator does not address CCNAA's Petition or take a position as to whether this proceeding should be discontinued. The January 13, 1988 AIT letter to CCNAA does express the hope that the terminal licensing process will not be burdensome for U.S. carriers.

Notices

Federal Register
Vol. 53, No. 45
Tuesday, March 8, 1988

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Human Nutrition Board of Scientific Counselors; Renewal of Advisory Board

Notice is hereby given that the Secretary of Agriculture has renewed the Human Nutrition Board of Scientific Counselors. The purpose of the Board is to provide the Secretary of Agriculture with an independent assessment of and recommendation on program and policy matters relating to human nutrition research and education by qualified individuals. The Human Nutrition Board of Scientific Counselors was initially established by the Secretary of Agriculture on April 9, 1981, in conformance with provisions of the Conference Report No. 95–1579, which accompanied H.R. 13125, dated September 18, 1978, on the FY 1979 Appropriations Act for the Department of Agriculture.

The Board meets annually in Washington, DC, to receive reports from Department of Agriculture staff on research progress, educational activities, and long-range goals. The Board's findings are reported in writing to the Secretary of Agriculture.

It was determined that the renewal of this Board would be in the public interest in connection with the work of the U.S. Department of Agriculture.

Done at Washington, DC, this 3rd day of March 1988.

John J. Franke, Jr.,

Assistant Secretary for Administration.

[FR Doc. 88–4972 Filed 3–7–88; 8:45 am]

BILLING CODE 3410-03-M

Office of Advocacy and Enterprise, Citizens' Advisory Committee on Equal Opportunity; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following committee meeting:

Name: Citizens' Advisory Committee on Equal Opportunity.

Date: March 28 & 29, 1988.

Place: Sheraton Crystal City, 1800 Jefferson Davis Highway, Arlington, VA 22202.

Time: 8:30 a.m.–5:00 p.m.

Purpose:

—Review all aspects of the U.S. Department of Agriculture's policies, practices, and procedures on Equal Opportunity;
—Recommend changes in Department rules, regulations, and orders to ensure USDA activities are free of discrimination;
—Advise the Secretary on the effectiveness of compliance program directives;
Additionally, the Committee will focus on:
—Employment, constituent services, and operational programs in the Extension Service.
—Follow-up reports on implementation strategies to make Secretary Lyng's initiative on equal opportunity a reality, and;
—An in-depth discussion of compliance reviews completed thus far.

The meeting is open to the public. Persons may participate in the meeting as time and space permit. Persons who wish to address the Committee at the meeting or who wish to file written comments before or after the meeting should contact: Naomi Churchill, Esq., Associate Director, Equal Opportunity, Office of Advocacy and Enterprise, 14th & Independence avenue SW., Room 1228 South Building, Washington, DC 20250, (202) 447–5061.

Written statements may be submitted until March 21.

Naomi Churchill,

Associate Director, Equal Opportunity.

[FR Doc. 88–4971 Filed 3–7–88; 8:45 am]

BILLING CODE 3410-94-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 13–88]

Foreign-Trade Zone 23, Erie County, NY; Request for Manufacturing of Laser Printers at Subzone 23A, Zerox Plant, Monroe County

The County of Erie, New York, grantee of FTZ 23 and Subzone 23A at Zerox Corporation's manufacturing plant in Monroe County, New York, which has approval to use zone procedures in the production of photo copiers (Board Order 220, 48 FR 35479, 8/4/83), requests approval from the Foreign-Trade Zones Board to extend the use of zone procedures at the Zerox plant for the production of laser printers. The request was filed February 26, 1988.

Zerox sources less than one-third of the value of the parts for laser printers abroad, including motors, power supplies, display units incorporating cathode ray tubes, clutches, fans, connectors, conductors, and fasteners. About one-fourth of the products manufactured at the plant are exported.

Zone procedures would exempt Xerox from Customs duty payments on the foreign products used in its exports. On its domestic sales, the company would be able to pay duties at the rate applicable to complete laser printers. The rate on the printers is 3.7 percent, whereas the rates on the components range from 0 to 6.2 percent. The company indicates that zone procedures for this extended purposes will help improve its international competitiveness.

Comments on the proposed manufacturing operation are invited in writing from interested persons and organizations. They should be addressed to the Board's Executive Secretary at the address below and postmarked before April 12, 1988.

A copy of the application is available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1529, 14th and Pennsylvania Avenue, NW., Washington, DC 20230.

Dated: March 2, 1988.

Dennis Puccinelli,

Acting Executive Secretary.

[FR Doc. 88–5021 Filed 3–7–88; 8:45 am]

BILLING CODE 3510-DS-M

[Docket No. 12–88]

Foreign-Trade Zone 62, Brownsville, TX; Application for Expansion

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Brownsville Navigation District (BND), grantee of Foreign-Trade Zone 62, requesting authority to expand the zone to include two additional sites in Harlingen, Texas, within the Brownsville Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board

(15 CFR Part 400). It was formally filed on February 24, 1988.

The Brownsville zone was approved in October 1980 and expanded in September 1983. It presently covers the BND port complex, with authority to activate up to 2000 acres, as well as a site at the Brownsville International Airport. The current proposal calls for an extension of the zone to include sites in Harlingen, Texas consisting of two parcels (320 acres) of publicly owned property. Parcel 1, Harlingen Industrial Airpark (203 acres), is located at Valley International Airport on Rio Hondo Road in Harlingen. Parcel 2, Harlingen Industrial Park (117 acres), is located at FM 106 and FM 1595, also in Harlingen.

The application indicates there is a need for zone services in the Harlingen area and this expansion is designed to accommodate prospective users who cannot use the existing Brownsville zone.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Joseph Lowry (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; Don Gough, Deputy Assistant Regional Commissioner, U.S. Customs Service, Southwest Region, 5850 San Felipe Street, Houston, TX 77057-3012; and Colonel John A. Tudela, District Engineer, U.S. Army Engineer District Galveston, P.O. Box 1229, Galveston, TX 77553–1229.

Comments concerning the proposed expansion are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before April 18, 1988.

A copy of the application is available for public inspection at each of the following locations:

Office of the Port Director, U.S. Customs Service, International Border Station, Brownsville, TX 78520
Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, 14th & Pennsylvania Ave., NW., Room 1529, Washington, DC 20230.

BILLING CODE 3510-DS-M

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of opportunity to request administrative review of antidumping or countervailing duty order, finding, or suspended investigation.

Background

Each year during the anniversary month of the publication of an antidumping or countervailing duty order, finding, or suspension of investigation, an interested party as defined in section 771(9) of the Tariff Act of 1930 may request, in accordance with §§ 353.53a or 355.10 of the Commerce Regulations, that the Department of Commerce ("the Department") conduct an administrative review of that antidumping or countervailing duty order, finding, or suspended investigation.

Opportunity To Request a Review

Not later than March 31, 1988, interested parties may request administrative review of the following orders, findings, or suspended investigations, with anniversary dates in March for the following periods:

Antidumping duty proceeding	Period
Brass Sheet and Strip from France.	08/22/86–02/29/88
Brass Sheet and Strip from Italy.	08/22/86–02/29/88
Brass Sheet and Strip from Sweden.	08/22/86–02/29/88
Brass Sheet and Strip from West Germany.	08/22/86–02/29/88
Canned Bartlett Pears from Australia.	03/01/87–02/29/88
Certain Circular Welded Carbon Steel Pipes and Tubes from Thailand.	03/01/87–02/29/88
Certain Brass Fire Protection Products from Italy.	03/01/87–02/29/88
Certain Fresh Cut Flowers from Canada.	11/03/86–02/29/88
Certain Fresh Cut Flowers from Colombia.	11/03/86–02/29/88
Certain Fresh Cut Flowers from Ecuador.	11/03/86–02/29/88
Chloropicrin from the People's Republic of China.	03/01/87–02/29/88
Iron Construction Castings from Canada.	03/01/87–02/29/88
Ferrite Cores (of the type used in consumer electronic products) from Japan.	03/01/87–02/29/88
Oil Country Tubular Goods from Israel.	08/25/86–02/29/88
Sodium Nitrate from Chile	03/01/87–02/29/88
Standard Carnations from Chile.	11/03/86–02/29/88
Television Receivers, Monochrome and Color, from Japan.	03/01/87–02/29/88
Viscose Rayon Staple Fiber from Finland.	03/01/87–02/29/88
Viscose Rayon Staple Fiber from France.	03/01/87–02/29/88

Countervailing duty proceeding	Period
Brass Sheet and Strip from France.	06/09/86–12/31/87
Cargon Steel Wire Rod from New Zealand.	01/01/87–12/31/87
Certain Apparel from Thailand.	01/01/87–12/31/87
Certain Castor Oil Products from Brazil.	01/01/87–12/31/87
Certain Iron-Metal Construction Castings from Mexico.	01/01/87–12/31/87
Certain Textile Mill Products from Mexico.	01/01/87–12/31/87
Certain Textile Mill Products and Apparel from Peru.	01/01/87–12/31/87
Certain Textile Mill Products and Apparel from Sri Lanka.	01/01/87–12/31/87
Certain Welded Carbon Steel Pipe and Tube Products from Turkey.	01/01/87–12/31/87
Cotton Shop Towels from Pakistan.	01/01/87–12/31/87
Cotton Yarn from Brazil	01/01/87–12/31/87
Ferrochrome from South Africa.	01/01/87–12/31/87
In-Shell Pistachios from Iran	01/01/87–12/31/87
Leather Wearing Apparel from Argentina.	01/01/87–12/31/87
Oil Country Tubular Goods from Israel.	06/11/86–12/31/87
Standard Carnations from Canada.	10/27/86–12/31/87
Standard Carnations from Chile.	02/03/87–12/31/87
Standard Chrysanthemums from the Netherlands.	10/27/86–12/31/87
Textile Mill Products and Apparel from Argentina.	01/01/87–12/31/87

Suspended investigation	Period
Certain Textile Mill Products and Apparel from Colombia.	01/01/87–12/31/87
Certain Textile Mill Products from Thailand.	01/01/87–12/31/87
Frozen Concentrated Orange Juice from Brazil.	01/01/87–12/31/87

Seven copies of the request should be submitted to the Acting Assistant Secretary for Import Administration, International Trade Administration, Room B–099, U.S. Department of Commerce, Washington, DC 20230.

The Department will publish in the **Federal Register** a notice of "Initiation of Antidumping (Countervailing) Duty Administrative Review," for requests received by March 31, 1988.

If the Department does not receive by March 31, 1988 a request for review of entries covered by an order or finding listed in this notice and for the period identified above, the Department will instruct the Customs Service to assess antidumping or countervailing duties on those entries at a rate equal to the cash deposit of (or bond for) estimated antidumping or countervailing duties required on those entries at the time of entry, or withdrawal from warehouse, for consumption and to continue to collect the cash deposit previously ordered.

This notice is not required by statute, but is published as a service to the international trading community.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

Date: March 2, 1988.

BILLING CODE 3510-DS-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

New Import Limits and Restraint Period for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Indonesia; Correction

March 3, 1988.

In the letter to the Commissioner of Customs published in the **Federal Register** on December 31, 1987 (52 FR 49466), correct the heading in the second column to read "Six-Month Restraint Limit," instead of "Twelve-Month Restraint Limit."

In addition, the six-month limit for Categories 445/446 should correctly read 25,503 dozen, instead of 255,025 dozen.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88-5001 Filed 3-7-88; 8:45 am]

BILLING CODE 3510-DR-M

Adjusting Import Limits for Certain Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Mauritius

March 3, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 9, 1988. For further information contact Anne Novak, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the current limits for Categories 347/348 and 647/648/847 exported from Mauritius.

Background

A CITA directive dated September 25, 1987 (52 FR 36604) established limits for certain specified categories of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, including Categories 347/348 and 647/648/847, produced or manufactured in Mauritius and exported during the agreement year which began on October 1, 1987 and extends through September 30, 1988. Pursuant to the Bilateral Textile Agreement of June 3 and 4, 1985, as amended, and at the request of the Government of Mauritius, the limits for Categories 347/348 and 647/648/847 are being increased for carryover of shorfalls in the previous restraint periods.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, dated December 11, 1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

March 3, 1988.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of September 25, 1987 from the Chairman of the Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Mauritius and exported during the agreement year which began on October 1, 1987 and extends through September 30, 1988.

Effective on March 9, 1988, the directive of September 25, 1987 is hereby amended to include the following adjusted restraint limits for Categories 347/348 and 647/648/847, under the terms of the bilateral agreement of June 3 and 4, 1985, as amended [1]:

Category	Adjusted 12-mo restraint limit [1]
347/348	488,140 dozen.
647/648/847	408,100 dozen.

[1] The limits have not been adjusted to account for any imports exported after September 30, 1987.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88-5002 Filed 3-7-88; 8:45am]

BILLING CODE 3510-DR-M

---

[1] The agreement, provides in part, that: (1) Specific limits may be exceeded during the agreement year by designated percentages; (2) specific limits may be adjusted for carryover and carryforward; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

Adjustment of Import Limits for Certain Cotton Textile Products Produced or Manufactured in Turkey

March 3, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 9, 1988. For further information contact Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 343-6582. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements

directs the Commissioner of Customs to increase the current limit for cotton textile products in Category 369-S, produced or manufactured in Turkey and exported to the United States. As a result, the limit for Category 369-S, which is currently filled, will re-open.

Background

A CITA directive dated December 31, 1987 (53 FR 185) established import restraint limits for certain cotton and man-made fiber textile products, including Categories 300/301 and 369-S, produced or manufactured in Turkey and exported during the period which began on January 1, 1988 and extends through June 30, 1988.

Under the terms of the Bilateral Cotton and Man-Made Fiber Textile Agreement of October 15, 1985, as amended and extended, and at the request of the Government of Turkey, the current limit for Category 369-S is being increased by application of swing. The current limit for Category 300/301 is being reduced to account for the swing applied to Category 369-S.

A description of the textile categories in terms of T.S.U.S.A. number is available in the Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, dated December 11, 1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

March 3, 1988.

Commissioner of Customs,
Department of Treasury, Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 31, 1987, concerning imports into the United States of certain cotton and man-made fiber textile products, produced or manufactured in Turkey and exported during the six-month period which began on January 1, 1988 and extends through June 30, 1988.

Effective on March 9, 1988, the directive of December 31, 1987 is amended to include the following adjustments to the previously established restraint limits for cotton textile products in the following categories, as provided under the terms of the bilateral agreement of October 15, 1985, as amended as extended: [1]

Category	Six-month adjusted limit [1]
300/301	3,337,410 pounds.
369-S [2]	876,090 pounds.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1987.

[2] In Category 369-S, only TSUSA number 366.2840.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 88-1]

Philip A. Dye and Marilyn J. Dye, d/b/a P & M Enterprises; Complaint

AGENCY: Consumer Product Safety Commission.

ACTION: Publication of a complaint under the Consumer Product Safety Act.

SUMMARY: Under Provisions of its Rules of Practice for Adjudicative Proceedings (16 CFR Part 1025), the Consumer Product Safety Commission must publish in the **Federal Register** Complaints which it issues. Printed below is a complaint in the matter of Philip A. Dye and Marilyn J. Dye, d/b/a P & M Enterprises.

Date: February 29, 1988.

SUPPLEMENTARY INFORMATION:

Sheldon D. Butts,

Deputy Secretary.

In the matter of Philip A. Dye and Marilyn J. Dye d/b/a P & M Enterprises, CPSC Docket No. 88-1.

Complaint

Nature of Proceedings

1. This is an administrative adjudicative proceeding pursuant to section 15 of the Consumer Product

Safety Act (CPSA), 15 U.S.C. 2064, for public notification and remedial action to protect the public from substantial risks of injury presented by an electric worm probe. This proceeding is governed by the Rules of Practice for Adjudicative Proceedings before the Consumer Product Safety Commission, 16 CFR Part 1025.

Jurisdiction

2. This proceeding is instituted pursuant to the authority contained in sections 15 (b), (c), (d), and (f) of the CPSC, 15 U.S.C. 2064 (b), (c), (d), and (f).

Respondents

3. Respondents Philip A. Dye and Marilyn J. Dye own and operate a proprietorship and jointly control the acts, practices and policies of the proprietorship with a business office located at 1202 Arthur Street, Caldwell, Idaho, 83605.

4. Whenever this complaint refers to any act of the Respondents, the reference shall be deemed to mean that one or both of the co-owners, their employees or agents authorized such act while actively engaged in the management, direction or control of the affairs of the respondents and while acting within the scope of their employment. Whenever this complaint refers to any act of Respondents, the reference shall be deemed to mean the act of each Respondent jointly and severally.

The Consumer Product

5. The "WORM GETT'RS" are electric worm probes designed to deliver, by means of metal shafts (or probes), electric current into the earth to cause worms to come to the surface of the earth. The Respondents manufacture three models of the "WORM GETT'R" consisting of 2, 6, or 12 metal probes. The more probes used the larger the surface area that can be "wormed" at one time.

6. The "WORM GETT'RS" are manufactured by Respondents for sale to and used by consumers in or around a permanent or temporary household or residence, in recreation or otherwise and are consumer products within the meaning of section 3(a)(1) of the CPSA, 15 U.S.C. 2052(a)(1).

7. "WORM GETT'RS" are distributed by Respondents in commerce within the meaning of sections 3(a) (11) and (12) of the CPSA, 15 U.S.C. 2052(a) (11) and (12), and sections 15 (c) and (d) of the CPSA, 15 U.S.C. 2064 (c) and (d).

8. Respondents are a manufacturer of "WORM GETT'RS" within the meaning of sections 3(a) (4) and (e) of the CPSA, 15 U.S.C. 2052(a)(4) and (8).

Substantial Product Hazard

9. Paragraphs 1 through 8 are hereby realleged.

10. The "WORM GETT'RS" are designed to deliver, and do deliver, full line voltage, 120 volts of electricity through each ten (10) inch bare metal shaft of the worm probe.

11. The "WORM GETT'RS" are designed to be used outdoors in wet soil and users of the product are instructed by Respondents to water the soil before using the "WORM GETT'RS".

12. "WORM GETT'R" users, and/or persons in the vicinity of the "WORM GETT'R" while it is being used, can easily come in contact with the product's exposed bare metal shaft(s).

13. The "WORM GETT'R" constitutes a design defect under 15 U.S.C. 2064 because it deliver 120 volts of electricity through metal shafts accessible to consumers.

14. No use instructions or warning label, whatsoever, appear on the "WORM GETT'R" and this failure to warn also constitutes a defect under 15 U.S.C. 2064.

15. If a consumer is electrically grounded and touches a metal shaft of the "WORM GETT'R" that is properly plugged into an electrical outlet, an electrical current of up to 80 milliamperes can flow through his body.

16. Human exposure to electrical current levels over 5 milliamperes is regarded as harmful.

17. Human exposure to electrical current levels over 20 milliamperes can cause asphyxia, ventricular fibrillation (erractic movement of the heart muscle) leading to severe internal injuries and death by electrocution as well as secondary reaction injuries from shock.

18. This severe risk is not apparent from the product or from the nonexistent labeling and poses a latent risk to consumers.

19. The same risk of severe injury or death to consumers is present in each of the "WORM GETT'RS" during reasonably foreseeable use or misuse.

20. The defects in the "WORM GETT'RS" create a substantial risk of injury to consumers within the meaning of section 15(a)(2), of the CPSA, 15 U.S.C. due to the large number of products, the high risk of injury associated with each product and the severity of injuries that can be incurred.

21. The "WORM GETT'RS", which can electrocute a person contacting its metal shaft, is a substantial product hazard as described in sections 15(a)(2), (c) and (d) of the CPSA, 15 U.S.C. 2064 (a)(2), (c) and (d).

Relief Sought

Wherefore, in the public interest, the Administrative Litigation Division of the Directorate of Compliance and Administrative Litigation, (hereinafter, Complaint Counsel) requests that the commission:

A. Determine that Respondents' "WORM GETT'RS" present a "substantial product at hazard" within the meaning of section 15(a)(2) of the CPSA, 15 U.S.C. 2064(a)(2).

B. Determine that public notification under section 15(c) of the CPSA, 15 U.S.C. 2064(c) is required to protect adequately the public from the substantial product hazard presented by the "WORM GETT'RS" which have been distributed and order that the Respondents:

(1) Give public notice that the WORM GETT'RS present a substantial risk of injury to consumers and of the remedies available to remove the risk of injury; and

(2) Mail notice to each person who is or has been a distributor or retailer of the WORM GETT'R, and

(3) Mail notice to every person to whom Respondents know the WORM GETT'R was delivered or sold; and

(4) Include in the notice required by (1), (2) and (3) above a complete description of the hazard presented, a warning to stop using the "WORM GETT'R" immediately; and clear instructions for returning the WORM GETT'R to Respondents, and specify the form and content of any notice required to be given.

C. Determined that action under section 15(d) of the CPSA, 15 U.S.C. 2064(d) is in the public interest and order Respondents:

(1) To cease manufacturing for sale, offering for sale, and distributing in commerce "WORM GETT'RS" which present the substantial product hazard described above; and

(2) With respect to all "WORM GETT'RS" that have been distributed or sold, to elect to repair the "WORM GETT'RS" so they will not create an electrocution hazard to consumers, to replace the "WORM GETT'RS" with a like or equivalent product which will not create an electrocution hazard or to refund to consumers the purchase price of the "WORM GETT'RS".

(3) To make no charge to consumers and to reimburse them for any reasonable and foreseeable expenses incurred is availing themselves of any remedy provided under any order issued in this matter 15 U.S.C. 2064(e)(1); and

(4) To reimburse distributors and dealers for expenses in correction with carrying out any Commission Order issued in this matter 15 U.S.C. 2064(e)(2); and

(5) To submit a plan satisfactory to the Commission, within ten (10) days of service of the Final Order, directing that actions specified in paragraphs c (1) through c (4) above be taken in a timely manner

(6) Prohibit Respondents from manufacturing, selling and distributing the defective "WORM GETT'RS" in commerce. 15 U.S.C. 2064(d).

(7) To keep records of their actions taken to comply with paragraphs c (1) through c (5) above; and to supply these records to the Commission for a period of three (3) years after entry of a Final Order issued by the Commission requiring notice and remedial action, for the purpose of monitoring compliance with the Final Order.

(8) To notify the Commission at least 60 days prior to any change in their business (such as incorporation, dissolution, assignment, sale, or by petition for bankruptcy) that results in, or is intended to result in, the emergence of successor ownership, the creation or dissolution of subsidiaries, going out of business, or any other change that might affect compliance obligations under a final Order issued by the.Commission requiring public notice and corrective action for applied of three years after issuance of said final Order.

(9) To take such other and further actions as the Commission deems necessary to protect the public health and safety and to implement the CPSA.

Issued by Order of the Commission.

David Schmeltzer,

Associate Executive Director, Directorate for Compliance and Administrative Litigation.

Alan H. Schoem,

Director, Division of Administrative Litigation, Directorate for Compliance and Administrative Litigation.

William J. Moore, Jr.,

Government-Owned Inventions; Availability for Licensing

AGENCY: Department of the Navy.

ACTION: Notice of availability of inventions for licensing.

SUMMARY: The inventions listed below are assigned to the United States Government as represented by the Secretary of Navy and are made available for licensing by the Department of the Navy.

Copies of patent applications cited are available from the National Technical Information Service (NTIS), Springfield, Virginia 22161 for $6.00 each ($10.00 outside North American Continent). Request for copies of patent applications must include the patent application serial number. Claims are deleted from the patent application copies sold to avoid premature disclosure.

DATE: March 8, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. R.J. Erickson, Staff Patent Attorney, Office of the Chief of Naval Research (Code OOCCIP), Arlington, Virginia 22217–5000, telephone (202) 696–4001.

Patent Application 066,442: DIALLYL TELLURIDE AND SYNTHESIS OF DIOGANO TELLURIDES; 26 June 1987.

Patent Application 073,238: METHYL ALLYL TELLURIDE AND SYNTHESIS OF UNSYMMETRIC ALLKYL—(ALKYL) TELLURDIES; field 13 July 1987.

Patent Application 136,610: PREPARATION OF DITERTIARYBUTYLELLURIDE; field 21 December 1987.

BILLING CODE 3810-AE-M

Chief of Naval Operations Executive Panel Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Advisory Committee Lower Level Conflict Task Force will meet April 27–28, 1988 from 9 a.m. to 5 p.m. each day, at 4401 Ford Avenue, Alexandria, Virginia. All sessions will be closed to the public.

The purpose of this meeting is to the employment of Naval forces in armed conflict with third world adversaries and related intelligence. These matters constitute classified information that is specifically authorized by Executive order to be kept secret in the interest of national defense and is, in fact, properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of Title 5, United States Code.

For further information concerning this meeting, contact Ann Lynn Cline, Special Assistant to the CNO Executive Panel Advisory Committee, 4401 Ford Avenue, Room 601, Alexandria, Virginia 22302–0268. Phone (703) 756–1205.

Date: March 2, 1988.

W.R. Babington, Jr.,

Commander, JAGC, U.S., Navy, Federal Register Liaison Officer.

Board of Visitors to the United States Naval Academy; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. 2), notice is hereby given that the Board of Visitors to the United States Naval Academy will meet 11 April 1988, at the U.S. Naval Academy, Annapolis, Maryland. The session, which is open to the public, will commence at 8:30 a.m. and terminate at 4:00 p.m., 11 April 1988, in Room 301, Rickover Hall.

The purpose of the meeting is to make inquiry as the Board shall deem necessary into the state of morale and discipline, the curriculum, instruction, physical equipment, fiscal affairs, and academic method of the Naval Academy.

For further information concerning this meeting contact: Capt John W. Renard, U.S. Navy, Retired, Secretary to the Board of Visitors, Dean of Admissions, United States Naval Academy, Annapolis, Maryland 21402–5017, (301) 267–4361.

Date: March 2, 1988.

William R. Babington, Jr.,

Commander, JAGC, USN, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App.), notice is hereby given that the Naval Research Advisory Committee will meet on March 16, 1988. The meeting will be held at the Office of the Chief of Naval Research, 800 No. Quincy Street, Arlington, Virginia. The meeting will commence at 9:30 a.m. and terminate at 4:00 p.m. on March 16, 1988. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to meet in Executive Session to discuss 1988 study initiatives. The agenda will include technical briefings and discussions related to Superconductivity, Means to Detect Land Mines, Survivability of Tactical Communications in a Hostile Environment, Automation of Ship Systems, Importance of Environmental Knowledge, and the Role of Unmanned Vehicles in Support of Naval Warfare These briefing and discussions will contain classified information that is specifically authorized under criteria established by Executive Order to be kept secret in the interest of national defense and is in fact properly classified pursuant to such Executive Order. The classified and nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(1) of Title 5, United States Code.

For further information concerning this meeting contact: Commander L.W. Snyder, U.S. Navy, Office of Naval Research, 800 North Quincy Street, Arlington, VA 22217–5000, Telephone Number: (202) 696–4870.

Date: March 2, 1988.

Intent To Grant Partially Exclusive Patent License; SOFEC, Inc.

AGENCY: Department of the Navy, DOD.

ACTION: Intent to grant partially exclusive patent license; SOFEC, Inc.

SUMMARY: The Department of the Navy hereby gives notice of intent to grant to SOFEC, Inc. a revocable, nonassignable, partially exclusive license to practice the Government-owned invention described in U.S. Patent No. 3,910,218 entitled "Propellant-Actuated Deep Water Anchor," issued October 7, 1975; inventors: Robert J. Taylor and Richard M. Beard and U.S. Patent No. 4,328,736 entitled "Fuseless Explosive Propellant Cartridge," issued May 11, 1982; inventors: Daniel G. True and Robert J. Taylor.

This license will be granted unless within 60 days from the date of this notice written objections to this grant along with supporting evidence, if any, are received by the Office of the Chief of Naval Research (Code OOCCIP), Arlington, Virginia 22217–5000.

DATE: March 8, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. R. J. Erickson, Staff Patent Attorney, Office of the Chief of Naval Research (Code OOCCIP), 800 North Quincy Street, Arlington, Virginia 22217–500, telephone (202) 696–4001.

DEPARTMENT OF EDUCATION

Strengthening Institutions and Endowment Challenge Grant Programs; Application Preparation Workshops

AGENCY: Department of Education.

ACTION: Notice of dates and locations for application preparation workshops.

SUMMARY: The Office of Postsecondary Education will conduct Application Preparation Workshops to assist fiscal year 1988 designated eligible institutions to develop applications for grants under the Strengthening Institutions and Endowment Challenge Grant Programs, Title III, Parts A and C of the Higher Education of 1965, as amended.

DATES: Workshops are scheduled to be held on March 16, 18, and 21.

ADDRESSES: The locations for the workshops are as follows:

March 16

Washington, DC, Health and Human Services Building Auditorium, First Floor, 330 Independence Avenue SW.

March 18

Kansas City, Missouri, Federal Office Building Auditorium, 601 East Twelfth Street

March 21

San Francisco, California, Federal Office Building Conference Room, 450 Golden Gate Avenue

FOR FURTHER INFORMATION CONTACT: Division of Institutional Development, Room 3042, ROB–3, U.S. Department of Education, 400 Maryland Avenue SW., Washington, DC 20202. Telephone: (202) 732–3314.

SUPPLEMENTARY INFORMATION: Each application workshop will last one day. The presentation will include a review of the requirements for filing applications and a review of the statute and program regulations. (Sections 311–314, 331–332, and 351–360 of the Higher Education Act of 1965, as amended, and 34 CFR Parts 607 and 628). Each application workshop will begin with registration at 9:00 a.m. Presentations are scheduled until 5:00 p.m. Time will be provided in the afternoon for questions and answers. There is no registration fee for the workshops.

(Catalog of Federal Domestic Assistance Number: 84.031A Strengthening Institutions Program and 84.031C Endowment Challenge Grant Program)

Dated: March 1, 1988.

C. Ronald Kimberling,

Assistant Secretary for Postsecondary Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Floodplain/Wetlands Statement of Findings for the Selected Rubble Landfill at the Los Alamos National Laboratory, NM

AGENCY: Department of Energy.

ACTION: Floodplain/Wetlands statement of findings.

SUMMARY: Pursuant to the regulations of 10 CFR Part 1022, DOE's "Compliance with Floodplains/Wetlands Environmental Review Requirements", the following is submitted for public review and comment. Information contained in this Statement of Findings is presented in support of the decision to locate the landfill at Sandia Canyon. The related Floodplain/Wetland Involvement Notification was published in the **Federal Register**, Vol. 53, No. 14 Page 1820, dated Friday, January 22, 1988.

DATE: Comments must be filed on or before March 23, 1988.

ADDRESS: Address any comments or requests to the Albuquerque Operations Office, Department of Energy/EHD, P.O. Box 5400, Albuquerque, New Mexico, 87115. All correspondence should refer to the project by title.

FOR FURTHER INFORMATION CONTACT: Harold E. Valencia, Area Manager, U.S. Department of Energy, Los Alamos Area Office, Los Alamos, NM 87544, (505) 667–5105.

SUPPLEMENTARY INFORMATION:

I. Project Description

The Los Alamos National Laboratory proposed project entails the construction and operation of a selected rubble landfill within a floodplain/wetlands area at Los Alamos National Laboratory. The purpose of the landfill is to provide space to dispose of non-biodegradable construction rubble as the current landfill site is non-expandable, and the expected life of the landfill dictates the need for a new site. The proposed landfill location will be in the head of Sandia Canyon approximately 0.1 south of East Jemez Road. It will be an extension of the present Los Alamos County sanitary landfill. The landfill will occupy an area approximately 2.5 acres in size. Once the proposed site has been filed, it will be compacted and leveled to the existing grade to allow for future expansion of the Laboratory facilities. The characteristics of the local terrain and the need for future facility expansion were factors used in determing the size and the location of the proposed landfill. Once the proposed site has been filled, a new site would be selected using similar selection criteria. No building facilities will be needed to complete the proposed landfill projects. A road to the site will be constructed by extending the access road to the present sanitary landfill. Materials to be buried at the site are defined as solid waste or excavated materials from Laboratory construction operations that have been culled of organic, hazardous, or other degradable or deformable materials. No materials that would lead to subsidence of the fill over an extended period or impact the air or water quality at the landfill site will be allowed. Approximately 85% of the volume needed for the proposed landfill is readily available in the immediate area.

II. Alternatives

Placement of a selected rubble landfill at Los Alamos National Laboratory is limited by the availability of land, space requirements, archaeological resources, drainage, accessability, and aesthetics. Although several sites were considered, the proposed sited is adjacent to an operating sanitary landfill which allows for easy access and provides for cost-effective burial of rubble for up to five years. In addition, this location will provide valuable space for the location of new facilities. Streamflow within the proposed site and the integrity of a marsh below the site can be maintained by means of the placement of a 400 foot long, seven-foot diameter culvert. The culvert would serve the two-fold purpose of diverting floodwaters and maintaining streamflow under normal conditions to protect the marsh. The present location of the Laboratory rubble, landfill is not expandable because of the adjacent presence of buildings and an airport; thus making a no-action alternative inoperable.

III. Mitigation

Mitigation measures will include good engineering practices that will be approved prior to construction and shall be used to prevent excessive erosion and escape of debris from the site.

VOL
53
ISS
45
MR
8
988
MI

Areas disturbed by construction will be reseeded by native grasses, shrubs, and trees in consultation with the Los Alamos National Laboratory-U.S. Forest Service Liaison Officer. In addition to reseeding areas to minimize sheet erosion, structural measures such as rock rip-rap surfacing, gravel surfacing, and earthberm construction will be done. A hydrological analysis performed by the Los Alamos National Laboratory allowed the proper sizing of the seven-foot diameter culvert, which will have sufficient capacity to convey the runoff from 100-year storm through the reach of Sandia Canyon adjacent to the landfill operation.

IV. Determination

Benefits derived from the proposed selected rubble landfill have been determined to outweigh the potential for environmental impacts. As a result of its review of alternatives and evaluation of the environmental impacts, the DOE has determined that there is no practicable alternative to the proposed action and that the proposed action, as described, has been designed to minimize harm to and within the floodplain and wetlands. All actions will be in conformity with local ordinances.

Dated: February 29, 1988.

Troy E. Wade II,

Acting Assistant Secretary, Defense Programs Department of Energy.

BILLING CODE 6450-01-C

Voluntary Agreement and Plan of Action To Implement The International Energy Program; Meeting

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (42 U.S.C. 6272(c)(1)(A)(i)), the following meeting notice is provided:

A meeting of Subcommittee A of the Industry Advisory Board (IAB) to the International Energy Agency (IEA) will be held on March 15 and 16, 1988, and possibly continuing on March 17, at the offices of the IEA, 2, rue Andre Pascal, Paris, France, beginning at 2:30 p.m. on March 15. This meeting is being held in order to permit representatives of some of the members of Subcommittee A to participate in a meeting of a joint government/industry technical subgroup which has been established by the IEA for the preparation of the sixth IEA Allocation Systems Test (AST–6). The agenda for the meeting is under the control of the IEA Secretariat. It is expected that the following agenda will be followed:

1. Adoption of the agenda.
2. Review of the draft AST–6 Test Guide. The following elements will require special attention:
    a. Scope and possible scenarios.
    b. Test duration/number of cycles.
    c. Sequence of activities.
    d. Timetable: Work on weekends and holidays.
    e. Consideration of price elements in AST–6.
    f. The voluntary offer process.
    g. Random non-implementation of some voluntary offers.
3. ISAG staffing.
4. Preparations for briefing sessions.
5. Supply Data Book.
6. Other issues.
7. Date of next meeting.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, this meeting is open only to representatives of members of Subcommittee A of the IAB, their counsel, representatives of members of the IEA's Standing Group on Emergency Questions (SEQ), representatives of the Departments of Energy, Justice, State, the Federal Trade Commission, and the General Accounting Office, representatives of Committees of the Congress, representatives of the IEA, representatives of the Commission of the European Communities, and invitees of the IAB, the SEQ, or the IEA.

Issued in Washington, DC, March 2, 1988.

Eric J. Fygi,

Acting General Counsel.

[FR Doc. 88–5049 Filed 3–7–88; 8:45 am]

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket Nos. CP88–244–000 et al.]

Natural Gas Certificate Filings; El Paso Natural Gas Co. et al.

March 2, 1988.

Take notice that the following filings have been made with the Commission:

1. El Paso Natural Gas Company

[Docket No. CP88–244–000]

Take notice that on February 18, 1988, El Paso Natural Gas Company ("El Paso"), a Delaware corporation, whose mailing address is Post office Box 1492, El Paso, Texas, 79978, filed an application at Docket No CP88–244–000, under section 7(b) of the Natural Gas Act, for permission and approval to (i) abandon by conveyance to Meridian Oil Production Inc. (MOPI) certain existing pipeline and metering facilities, hereinafter referred to as the "Quinlan System," located in Woodward County, Oklahoma and (ii) abandon the delivery of gas to Northern Natural Gas Company, Division of Enron Corp. (Northern),[1] all as more fully set forth in the application on file with the Commission and open to public inspection.

The application states that by orders issued July 18, 1973, as amended, and January 2, 1975 at Docket Nos. CP73–220 and CP75–102, respectively, El Paso received Commission authorization for: ((i) The construction and operation of certain facilities comprising the Quinlan System; and (ii) the delivery, on an exchange basis, to Northern of certain quantities of natural gas produced in the Northwest Quinlan Field supply area of the Hugoton-Andarko Basin in Woodward County, Oklahoma. It is stated that the quantities of natural gas obtained by El Paso are delivered by El Paso to Northern in Woodward County, Oklahoma, by means of the Quinlan System as a part of the total exchange quantities which El Paso has heretofore been authorized to deliver to Northern in accordance with the "1963 Services Agreement" dated August 17, 1962, as amended, between El Paso and Northern.

The application states further that El Paso notes that the Quinlan System has a maximum design capacity of approximately 8,470 Mcf per day. El Paso indicates that the production tests and reserve and deliverability data developed in 1972 and 1973 indicated that the total proven recoverable gas reserves underlying a portion of El Paso's then present total dedicated leasehold acreage in the Northwest Quinlan Field were estimated at 26.4 Bcf. However, it is stated that by 1975 El Paso was required to install and operate a 350 horsepower field compressor unit for the purpose of offsetting the rapidly declining reservoir pressures in the Northwest Quinlan Field and thereby enable continued production from the above area. It is further stated that this trend of rapidly declining reservoir pressures, as well as significant reductions in supplies available from the Northwest Quinlan Field, has continued. Specifically, based on reserve and availability studies for the Northwest Quinlan Field as of July 1, 1986, El Paso has determined that the remaining recoverable reserves are now estimated at 8.3 Bcf. El Paso states that these reserves equate to an estimated average day availability of 2,400 Mcf, 2,300 Mcf and 2,200 Mcf for the years 1987, 1988, 1989 and 1990, respectively. With the lower volumes available from the Northwest Quinlan Field, El Paso's states that unit costs in the operation of the Quinlan System have continued to rise.[2] Based upon the Quinlan System's decreasing volumes and increasing unit cost, El Paso has determined the system to be uneconomical for El Paso to continue to own and operate. Moreover, El Paso states that low market requirements cannot justify the continued operation of the Quinlan System, which serves as a gathering facility for a small quantity of gas. Therefore, it is stated that continued operation of the Quinlan System would frustrate El Paso's goal of optimizing system operations.

El Paso concluded that the Quinlan System no longer was necessary as an integral system gas supply acquisition facility and therefore, was a candidate for abandonment. It is stated that MOPI indicated to El Paso an interest in acquiring the Quinlan System to

---

[1] Specifically, the Quinlan System includes: (i) One (1) 350 horsepower field compressor unit; (ii) approximately 28.72 miles of 6–5/8" O.D. pipeline; (iii) approximately 23.30 miles of 4–½" O.D. and 6–⅝" O.D. well-tie and gathering pipelines; (iv) one (1) 16 MMcf/d dehydration facility; and (v) one (1) dual 4–½" O.D. meter station. Only the facilities set forth under items (ii) and (v) above are subject to the instant abandonment application. The facility under item (i) will be abandoned under the provisions of El Paso's blanket authority at Docket No. CP82–435 and the facilities under items (iii) and (iv) are non–jurisdictional, affect no jurisdictional services, other than those described herein, and thus require no abandonment authorization.

[2] Based upon the operating costs for the twelve (12) months ended November 30 .1987, which includes depreciation and excludes return and taxes, and assuming an estimated average day availability of 2,400 Mcf, Applicant's unit rate is $0.3785.

---

facilitiate its existing and future gas acquisition and marketing efforts in the proximity of said system. It is stated that as a result of MOPI's interest in the Quinlan system, El Paso and MOPI have entered into an Agreement of Sale Concerning the Quinlan Field Plant and Gathering System dated January 29, 1988 ("Agreement"). El Paso states it agreed to sell the Quinlan System to MOPI at a sales price of $100,000.00. Accordingly, El Paso herein proposes to abandon by conveyance to MOPI: (1) Approximately 28.72 miles of 6–5/8" O.D. pipeline; and (2) one (1) dual 4–½" O.D. meter station. MOPI will continue to operate the Quinlan System as a gathering facility. However, it is stated that MOPI will not enter into any jurisdictional exchange agreements with any interstate pipelines. It is stated that abandonment of the Quinlan System will have a *de minimis* effect upon El Paso's system gas supply activities, as well as the existing exchange arrangement with Northern.[3] Further, it is stated that the proposed abandonment will have no significant effect upon EL Paso's ability to render natural gas service to its customers in the same manner as existed prior to the subject abandonment. Finally, it is further stated there will be no adverse environmental effects upon effectuation of the abandonment proposed herein. It is indicated that the proposed abandonment will not require any change in El Paso's FERC Gas Tariff, and no material change in El Paso's average cost-of-service will result therefrom.

Comment date: March 23, 1988, in accordance with Standard Paragraph F at the end of this notice.

2. Northern Natural Gas Company, Division of Enron Corporation

[Docket No. CP85–511–003]

Take notice that on February 12, 1988, Northern Natural Gas Company, Division of Enron Corporation (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP85–511–003 a petition to amend the Commission order issued February 24, 1987, in Docket Nos. CP85–511–000 and CP85–511–001 so as to change the effective date of Northern's General Service Rate Schedule (Rate Schedule GS–1) and to request rate approval in accordance with that originally proposed in Northern's Stipulation and Agreement of Settlement at Docket No. RP82–71–000 (Docket No. RP82–71–000 settlement), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is stated that by order issued February 24, 1987, in Docket Nos. CP85–511–000 and CP85–511–001, Northern was granted authorization to establish Rate Schedule GS–1. It is indicated that such order granted authority for Rate Schedule GS–1 to become effective October 27, 1985, instead of March 27, 1985, as requested.

Nothern is presently requesting authorization to permit an effective date of March 27, 1985, as agreed to in the Docket No. RP82–71–000 settlement. Northern states that the March 27, 1985, effective date was an integral part of the settlement negotiated by all parties to the Docket RP82–71–000 Settlement and that this proposed effective date would result in great benefit to Northern's firm entitlement customers by further providing an economical source of natural gas from March 27, 1985, to October 27, 1985.

Northern also requests rate approval in accordance with that originally proposed in the Docket No. RP82–71–000 settlement. It is stated that such rate derivation is included in Exhibit P to this petition to amend and that this rate would be effective for the limited term from March 27, 1985, to October 26, 1985. No other changes are proposed.

Comment date: April 18, 1988, in accordance with Standard Paragraph G at the end of this notice.

3. Columbia Gas Transmission Corporation

[Docket No. CP88–226–000]

Take notice that on February 5, 1988, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314, filed in Docket No. CP88–226–000 an application pursuant to section 7 of the Natural Gas Act for permission and approval to abandon sales service in excess of its wholesale customers' currently effective Seasonal Entitlements, for authorization to implement a new rate schedule for interruptible sales service, and for blanket authorization to increase and decrease seasonal levels of service to serve future increases and decreases in Seasonal Entitlements on a firm basis, all as more fully set forth in the application, which is on file with the Commission and open to public inspection.

Applicant proposes the following changes in its current levels of service and effective tariff:

1. To authorize the seasonal level of service for each wholesale customer at a level equivalent to the customer's currently effective Seasonal Entitlements, stated separately for the Winter Season and the Summer Season, thereby abandoning any obligation Applicant may have to provide sales service in excess of the Seasonal Entitlement level;
2. To include a new rate schedule in its tariff for seasonal sales overruns, pursuant to which Applicant would deliver on an interruptible basis quantities of gas in excess of Seasonal Entitlements; and
3. To adjust from time to time, on a self-implementing basis, its authorized seasonal levels of service for each wholesale customer within that customer's Contract Demand level as necessary to correspond to future increases and decreases in the customer's Seasonal Entitlements made in accordance with Applicant's FERC Gas Tariff.

Applicant submits that the requested abandonment and certificate authorizations are required by the public convenience and necessity since these proposals are consistent with the Commission's order in Docket No. RP87–93–000, which indicated that any sales made by Applicant in excess of its customers' Seasonal Entitlements would constitute interruptible service and that Applicant's firm sales obligation on a seasonal basis necessarily must be limited to its customers' Seasonal Entitlements. Applicant states it has never been in a position to serve its customers' daily contract demands every day of the year, and that while it recognizes that it must stand ready to supply the Total Daily Entitlements of its customers on any given day, it has never had either the gas supplies or the transmission capacity necessary to serve the aggregate of its customers' contract demands every day of the year.

Applicant claims that the ability of its customers to purchase substantial portions of their requirements from sources other than Applicant has resulted in the customers using Applicant as a backstop for their other sources of supply, and that as a result it is seeking to establish a sales obligation which bears some logical resemblance to customers' anticipated needs for gas supply from Applicant.

Applicant states that after its firm sales obligation has been defined a mechanism will be needed to enable Applicant to accommodate requests by its wholesale customers for service in excess of their Seasonal Entitlements. Applicant therefore proposes to establish Rate Schedule SO to provide seasonal overrun services in essentially the same way it uses its Rate Schedule SR to deliver quantities of gas on a daily basis in excess of its customers' certificated contract demands. It is claimed that Rate Schedule SO is similar in all respects to Applicant's Rate Schedule SR except that it would accommodate seasonal overruns instead of daily overruns. It is stated that deliveries by Applicant under Rate Schedule SO would be made on an interruptible basis, with the gas being priced at the then-effective 100 percent load-factor rate under Rate Schedules CDS and G and that the service would have the same priority as interruptible transportation service.

---

[3] The existing exchange point between El Paso and Northern will be retained under the "1963 Services Agreement" dated August 17, 1962, as amended, between El Paso and Northern until such time as El Paso no longer has gas available for exchange delivery at such point.

Applicant states that section 16 of the General Terms and Conditions its FERC Gas Tariff provides its wholesale customers with the right to increase or decrease their Seasonal Entitlements, subject to certain conditions and limitations, and that section 16 also provides that Applicant may accommodate a requested increase in Seasonal Entitlements whenever and to the extent the increase will not adversely impact its ability to render adequate service to other customers under its firm service rate schedules.

Applicant claims that if it is permitted to reduce its certificated levels of service, authorization would then be required to adjust its levels of service each time it grants an increase or decrease in Seasonal Entitlements and that Applicant would be precluded from serving any increase or decrease in firm Seasonal Entitlements until it receives authorization from the Commission. Applicant anticipates that this process could place a substantial burden upon the Commission and its staff, as well as upon Applicant and its customers, and to obviate the need for the preparation and the processing of numerous applications requesting specific authorization to effectuate minor changes in authorized services, Applicant requests blanket authority to increase, and pre-granted abandonment authority to decrease, its certificated seasonal levels of service. Applicant proposes in this regard to automatically adjust, on a self-implementing basis, its seasonal firm sales obligation to accommodate increases or decreases in Seasonal Entitlements and that no later than 30 days after the effective date of any such increase or decrease, Applicant would file the revised service agreement and the revised tariff sheets necessary to conform its Index of Entitlements with the Commission, which would serve as notice to the Commission, Applicant's customers, and the general public.

Comment Date: March 23, 1988, in accordance with Standard Paragraph F at the end of this notice.

4. Williams Natural Gas Company

[Docket No. CP88-233-000

Take notice that on February 12, 1988, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP88-233-000, a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (NGA) (18 CFR 157.205) for authorization to construct and operate an additional delivery point, consisting of measuring, regulating and appurtenant facilities, in Johnson County, Missouri, for the sale and delivery of gas to The Kansas Power and Light Company (KPL Gas Service), under the authorization issued in Docket No. CP82-479-000, pursuant to section 7 of the NGA, all as more fully set forth in the request on file with the Commission and open to public inspection.

WNG state KPL Gas Service has requested this additional delivery point in order to serve certain space heating requirements at Whiteman Air Force Base. It is stated that, the projected volume of delivery through these facilities is approximately 1,486 Mcf the first year and 21 Mcf on a peak day increasing to 31,812 Mcf annually and 141 Mcf on a peak day by the third year. It is estimated that the total cost of the facilities is $13,220, which will be paid from available cash.

WNG states that this change is not prohibited by an existing tariff and it has sufficient capacity to accomplish the deliveries specified without detriment or disadvantage to its other customers.

Comment date: April 18, 1988, in accordance with Standard Paragraph G at the end of this notice.

5. Northwest Pipeline Corporation

[Docket No. CP88-201-000]

Take notice that on January 19, 1988, as supplemented February 16, 1988, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP88-201-000, a request pursuant to §§ 157.205 and 157.212(a) of the Regulations under the Natural Gas Act (18 CFR 157.205(b) and 157.212(a)) for authorization to add a new transportation receipt point and a new delivery point for Mountain Fuel Resources, Inc. (MFR), an existing customer of Northwest's, under the blanket authorization issued September 1, 1982, to Northwest in Docket No. CP82-433-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

It is stated that by Commission order issued November 24, 1982, in Docket No. CP82-149-000 (21 FERC ¶62,310), Northwest was authorized to transport, on an interruptible basis, up to 35,000 MMBtu equivalent of natural gas per day for MFR pursuant to a March 27, 1981, transportation and exchange agreement (agreement). Specifically, the gas acquired by MFR in the designated Patterson Canyon and Bug Field areas of southeastern Utah and tendered to Northwest at the Dove Creek receipt point on Northwest's mainline would be transported by Northwest and delivered to MFR at the Piceance Creek delivery point in Rio Blanco County, Colorado.

It is also stated that Northwest and MFR entered into an amendment dated October 1, 1987, to the agreement to add the Papoose interconnect in Dolores County, Colorado, as a new receipt point and the Crossover 16 interconnect in Sweetwater County, Wyoming, as a new delivery point.

Northwest states that MFR is presently purchasing gas in the Bug Field and Patterson Canyon area which is processed at the Dove Creek processing plant and then delivered to Northwest at Dove Creek, the original transportation receipt point under the agreement. Inasmuch as a portion of this gas is pipeline qualify dry gas, the producers selling to MFR want it delivered directly to Northwest and to bypass the processing plant. The addition of Papoose as a second receipt point would allow the subject gas to bypass this plant. Northwest also states that MFR has informed Northwest that approximately 2,000 MMBtu equivalent of natural gas per day of the approximately 8,000 MMBtu equivalent of natural gas per day currently being transported under the agreement would be delivered to Northwest at the Papoose receipt point instead of at the existing Dove Creek receipt point.

Northwest states that MFR supplies natural gas through two components of its system, a northern component and a southern component. The original transportation delivery point under the agreement is located on MFR's southern system.

It is Northwest's understanding that MFR has an excess supply of natural gas on its southern system so that the addition of the Crossover 16 delivery point on MFR's northern system would allow MFR the flexibility of utilizing the subject natural gas on its system where it is needed the most. It is also stated that currently, when it is not needed on MFR's southern system, approximately 8,000 MMBtu equivalent of natural gas per day is being transported under the agreement for delivery to the Crossover 16 delivery point for use on MFR's northern system.

Northwest requests authority to utilize these new points under the agreement in order to provide MFR additional flexibility both in tendering its supplies in the Patterson Canyon and Bug Field areas of southeastern Utah to Northwest for transportation and in taking deliveries of transported volumes.

It is alleged that the total quantity of natural gas to be transported for MFR would not exceed the currently authorized maximum quantities of 35,000 MMBtu equivalent of natural gas per day for MFR pursuant to a March 27, 1981, transportation and exchange agreement. During 1987, Northwest transported an average of approximately 7,183 MMBtu equivalent of natural gas per day for MFR under the agreement. Northwest states that the proposed interruptible deliveries would have no significant impact on Northwest's peak day and annual deliveries.

Northwest asserts that it has sufficient existing mainline capacity to accomplish the deliveries at the proposed additional delivery point without detriment or disadvantage to any of its existing customers. Northwest also states that the proposed delivery point addition is not prohibited by Northwest's existing tariff.

Comment date: April 18, 1988, in accordance with Standard Paragraph G at the end of this notice.

6. Northern Natural Gas Company, a Division of Enron Corp.

[Docket No. CP88-240-000]

Take notice that on February 18, 1988, Northern Natural Gas Company, a Division of Enron Corp. (Northern) 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP88-240-000, pursuant to § 284.223 of the Regulations under the Natural Gas Act (NGA) for authorization to transport natural gas on behalf of Shell Gas Trading Company (Shell Gas), a marketer of natural gas, under the blanket certificated issued in Docket No. CP86-435-000, pursuant to section 7 of the NGA, all as more fully set forth in the request on file with the Commission and open to public inspection.

Pursuant to a Gas Transportation Agreement dated January 24, 1988, Northern will transport up to 50,000 MMBtu/d for Shell Gas from one point of receipt to Texas offshore to one point of delivery in Texas. Construction of facilities will not be required to provide the proposed service.

Comment date: April 18, 1988, in accordance with Standard Paragraph G at the end of this notice.

7. Northern Border Pipeline Company

[Docket No. CP88-250-000]

Take notice that on February 23, 1988, Northern Border Pipeline Company (Northern Border), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP88-250-000, a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (NGA) (18 CFR 157.205) and the Natural Gas Policy Act (NGPA) (18 CFR 284.223) for authorization to provide a transportation service for Petrorep (Canada) Ltd. (Petrorep) a marketer, under the certificate issued in Docket No. CP86-395-000 and 001 pursuant to section 7(c) of the NGA, all as more fully set forth in the request on file with the Commission and open to public inspection.

Northern Border states that pursuant to an IT-1 Transportation Agreement dated December 15, 1987, it proposes to transport natural gas for Petrorep from a point of receipt located near Port of Morgan, Montana, to delivery points interconnecting Northern Border and Northern Natural Gas Company, the immediate downstream transporter.

Northern Border further states that the maximum daily and annual quantities would be 25,000 MMBtu and 8,100,000 MMBtu, respectively. Northern Border asserted that service under § 284.223(a) commenced January 12, 1988, as reported in Docket No. ST88-2189-000.

Comment date: April 18, 1988, in accordance with Standard Paragraph G at the end of this notice.

8. Northern Border Pipeline Company

[Docket No. CP88-251-00

Take notice that on February 23, 1988, Northern Border Pipeline Company (Northern Border), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP88-251-000, a prior notice request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations for authorization to provide a transportation service for Dyco Gas Marketing (Dyco), a marketer, under the certificate issued in Docket Nos. CP86-395-000 and CP86-395-001, all as more fully set forth in the request on file with the Commission and open to public inspection.

Northern Border states that pursuant to an IT-1 Transprotation Agreement dated December 15, 1987, it proposes to transport natural gas for Dyco from a point of receipt located near Port of Morgan, Montana, to delivery points interconnecting Northern Border and Northern Natural Gas Company, the immediate downstream transporter.

Northern Border further states that the maximum daily and annual qualities would be 100,000 MMBtu and 36,500,000 MMBtu, respectively. Northern Border asserted that service under § 284.223(a) commenced January 1, 1988, as reported in Docket No. ST88-1920-000.

Comment date: April 18, 1988, in accordance with Standard Paragraph G at the end of this notice.

9. Northern Border Pipeline Company

[Docket No. CP88-252-000]

Take notice that on February 23, 1988 as supplemented February 25, 1988, Northern Border Pipeline Company (Northern Border), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP88-252-000, a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to provide a transportation service for Placer CEGO Petroleum, a Division of Placer Dome Inc. (Placer Dome), a producer, under the certificate issued in Docket No. CP86-395-000 and CP86-395-001 pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern Border states that pursuant to a transportation agreement dated November 27, 1987, it proposes to transport natural gas for Placer Dome from a point of receipt located near Port of Morgan, Montana, to four specified delivery points located in Iowa, Minnesota, North Dakota and South Dakota interconnecting Northern Border and northern Natural Gas Company, the immediate downstream transporter. Northern Border also indicates that the transportation agreement provides that it would charge the rates and abide by the terms and conditions set forth in its Rate Schedule IT-1.

Northern Border further states that the average day, maximum day, and annual quantities would be 25.0 billion Btu, 25.0 billion Btu, and 8,100 billion Btu, respectively. Northern border asserted that service under § 284.223(a) commence January 21, 1988, as reported in Docket No. ST88-2189-000.

10. Arkla Energy Resources, a Division of Arkla, Inc.

[Docket No. CP88–237–000]

Take notice that on February 16, 1988, Arkla Energy Resources, a Division of Arkla, Inc. (AER), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP88–237–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to establish and operate an additional delivery point for sales service to a refinery owned by Calumet Industries, Inc. (Calumet), in Bossier Parish, Louisiana, under the certificate issued in Docket Nos. CP82–384–000 and CP82–384–001 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application that is on file with the Commission and open to public inspection

AER states that Calumet has installed a hydro treating facility that will increase the peak requirements of the Calumet refinery to approximately 6,500 MMBtu per day. It is stated that AER and Calumet have entered into agreements providing for the delivery to Calumet of volumes up to that amount through a combination of sales from AER's system supply and volumes purchased from other suppliers and transported by AER to Calumet.

AER further states that, because of capacity constraints at AER's existing delivery point and increased pressure requirements for the volumes to be used in the hydro treating facility, it has installed at an estimated cost of $93,167 a new 4-inch tap and appurtenant facilites downstream of the existing delivery point to the Calumet refinery. AER asserts that it has constructed these facilities pursuant to section 311 of the Natural Gas Policy Act of 1978 and has transported volumes to the Calumet plant through the new tap for the purpose of testing the hydro treating facility. AER requests authorization to operate said tap and appurtenant facilities under section 7(c) of the Natural Gas Act and establish these facilities as a new sales delivery point so that it can also deliver to Calumet sales gas to be used in the hydro treating facility.

Comment date: April 18, 1988, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person on the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to interene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88–5055 Filed 3–7–88; 8:45 am]

BILLING CODE 6717–01–M

FEDERAL DEPOSIT INSURANCE CORPORATION

Privacy Act of 1974; Proposed Amended Systems of Records and Final Amendment to a System of Records

AGENCY: Federal Deposit Insurance Corporation ("FDIC").

ACTION: Notice of proposed amended systems of records—Financial Institutions Investigative and Enforcement Records System (formerly Bank and Proposed Bank Irregularity Records System), Changes in Bank Control Ownership Records, and Municipal Securities Dealers and Government Securities Brokers/Dealers Personnel Records (formerly Municipal Securities Principals and Representatives System); and final amendment to a system of records—Telephone Call Detail Records.

SUMMARY: The FDIC is issuing in proposed form amendments to three of its existing Privacy Act systems of records and in final form an amendment to another system. First, the FDIC proposes to broaden its system related to those individuals who have been involved in reported irregularities at FDIC-insured banks and individuals who have been the subject of background checks bearing on an individual's fitness to be involved with FDIC-insured banks so that the system will no longer be limited to FDIC-insured institutions.

Second, the FDIC is proposing to amend its system related to individuals who have been involved in the change of bank control or ownership in FDIC-insured banks to reflect that the scope of the information actually contained in the system is less than the notice of the existing system indicates and that all information contained in the system is public.

Third, the FDIC is proposing to amend its existing Privacy Act system of records related to persons who are or seek to be municipal securities principals and representatives associated with municipal securities dealers which are insured state nonmember banks so that it will encompass certain information about associated persons of government securities brokers and dealers which are insured state nonmember banks. The forms containing the information about government securities brokers and dealers are required by Department of the Treasury regulations issued under the Government Securities Act of 1986, effective July 25, 1987. Because of the similarities between the Forms G–FIN–4 and G–FIN–5 for government securities brokers and dealers and Forms MSD–4 and MSD–5 for municipal securities principals and representatives, the existing system is a logical location into which to integrate Forms G–FIN–4 and G–FIN–5.

Finally, the FDIC is amending in final form its recently established Telephone Call Details Records system to limit disclosures under routine use no. 6 of that system to federal agencies exclusively, when a request for information is made in connection with the hiring or retention of an employee.

DATES: Comments on the amendments to system FDIC 30–64–0002, FDIC 30–64–0004, and FDIC 30–64–0016 must be submitted by April 7, 1988. The amendments will become effective May 23, 1988, unless a superseding notice to the contrary is published before that date. The amendment to system FDIC 30–64–0020 is effective on March 8, 1988.

ADDRESSES: Comments should be addressed to Hoyle L. Robinson, Executive Secretary, FDIC, 550 17th Street, NW., Washington, DC 20429, or hand-delivered to Room 6108 of the same address between 9:00 a.m. and 5:00 p.m., Monday-Friday. Comments are available for public inspection.

FOR FURTHER INFORMATION CONTACT: Robert E. Feldman, Assistant Executive Secretary, FDIC, 550 17th Street, NW., Washington, DC 20429, telephone (202) 898–3811.

SUPPLEMENTARY INFORMATION: As part of its continuing review of its Privacy Act systems of records, the FDIC is proposing to amend three of its existing systems of records and is amending in final form another system. First, the FDIC is proposing to amend its Bank and Proposed Bank Irregularity Records System. Currently, the system covers records about individuals who have been involved in reported irregularities at FDIC-insured banks and individuals who have been subject of background checks bearing on an individual's fitness to be a director, officer, employee, or controlling shareholder of an FDIC-insured bank. The amended system will be entitled "Financial Institutions Investigative and Enforcement Records System" and will cover the same types of materials as the existing system except that the categories of covered individuals will be expanded from those who are or wish to be associated with FDIC-insured banks to those who are or wish to be associated with any type of financial institution.

Secondly, the existing Changes in Bank Control Ownership Records system will be amended to reflect the fact that much of the information listed in "Categories of records in the system" in the existing system notice has in practice not been filed in the system. The information contained in the system has been limited to the information contained on Form FDIC 6620/06, entitled "Notice of Acquisition of Control and Changes in Bank Ownership," the contents of which are described under "Categories of records in the system" in setting out the proposed amended sytem below. The amended system will reflect the actual FDIC recordkeeping practice and will also complement § 309.4(d)(2) of the FDIC's regulations (12 CFR 309.4(d)(2)). Section 309.4(d)(2) provides that certain information about notices filed with the FDIC pursuant to the Change in Bank Control Act of 1978 will be made available, upon request of any member of the public, at the appropriate FDIC regional office. The amended system will contain exactly that information available under § 309.4(d)(2) in a form indexed by name of the acquiring person(s).

Third, the FDIC is proposing to amend its system of records regarding persons who are or seek to be municipal securities principals and representatives associated with municipal securities dealers which are insured state nonmember banks. The Treasury Department has adopted a rule (17 CFR 400.4) that requires every associated person (as defined in 17 CFR 400.3(c)) of a financial institution that is a government securities broker or dealer to file with such financial institution a completed Form G–FIN–4, unless such person has on file with such financial institution a completed and current Form U–4 or Form MSD–4, which are forms required by associated persons of broker/dealers and bank municipal securities dealers. Further, every government securities broker or dealer that is a financial institution is required to file such forms, within 10 days after receipt, with its appropriate regulatory agency. In addition, when an associated person's employment or association with a financial institution is terminated, notification of termination (Form G–FIN–5) is required to be filed with the financial institution's appropriate regulatory agency within 30 days after termination unless the financial institution has filed a Form U–5 or MSD–5 with respect to such person. In accordance with section 3(a)(34)(G) of the Securities Exchange Act of 1934, as amended by the Government Securities Act of 1986, the FDIC is the appropriate regulatory agency for FDIC-insured banks other than a member of the Federal Reserve System or a federal savings bank. While the FDIC has generally been responsible for the supervision of insured, state-licensed branches of foreign banks, section 3(a)(34)(G) specifically names the Federal Reserve Board as the appropriate regulatory agency for such branches with respect to government securities brokers or dealers.

Similarly, under rules of the Municipal Securities Rulemaking Board ("MSRB"), financial institutions that are municipal securities dealers must obtain and verify information regarding associated persons' work history, background, and professional qualifications. The FDIC, OCC, and the Federal Reserve Board developed Forms MSD–4 and MSD–5 for reporting information on associated persons of municipal securities dealers that are banks and arranged for the National Association of Securities Dealers, Inc. ("NASD") to operate a central computerized records system, which would be separate from but comparable to that maintained for securities industry personnel. Each agency separately adopted a Privacy Act system of records with respect to the institutions it supervises at the time the arrangements with NASD were made. The system of records currently maintained by the FDIC for persons engaged in municipal securities dealer activities, as required by rules of the MSRB, is well suited for the maintenance of forms relating to persons associated with financial institutions are government securities brokers or dealers, as is required by Treasury Department regulations.

Finally, the FDIC is changing the scope of routine use no. 6 of its recently adopted Telephone Call Detail Records system. Routine use no. 6 currently permits information in the system to be disclosed in response to a federal, state, local, or private employer's request made in connection with the hiring or retention of an employee or, in the case of a government agency, the letting of a contract or issuance of a grant, license, or other benefit. In accordance with Office of Management and Budget requirements, the scope of the routine use is hereby limited to disclosures to federal agencies exclusively. Accordingly, the FDIC proposes to adopt the amended systems of records, FDIC 30–64–0002, FDIC 30–64–0004, and FDIC 30–64–0016, and adopts in final form the amendment to system or records, FDIC 30–64–0020, as set forth below

FDIC 30-64-0002

SYSTEM NAME:

Financial Institutions Investigative and Enforcement Records System.

SYSTEM LOCATION:

Supervision, Enforcement & Surveillance Branch, Division of Bank Supervision, FDIC, 550 17th Street, NW., Washington, DC 20429.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

(1) Individuals who participate or have participated in the conduct of or who are or were connected with financial institutions, such as directors, officers, employees, and customers, and who have been named in criminal referrals, investigatory records, or administrative enforcement orders or agreements. Financial institutions include banks, savings and loan associations, credit unions, and other similar institutions, whether or not federally insured and whether or not established or proposed.

(2) Individuals, such as directors, officers, employees, proponents, controlling shareholders, or person seeking control of financial institutions, who are the subject of background checks designed to uncover criminal activities bearing on the individual's fitness to be a director, officer, employee, or controlling shareholder.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains, as pertinent, interagency or intra-agency correspondence or memoranda; criminal referral reports; newspaper clippings; federal, state, or local criminal law enforcement agency investigatory reports, indictments and/or arrest an conviction information; and administrative enforcement orders or agreements. Certain records contained in this system (principally criminal investigation reports prepared by the Federal Bureau of Investigation, Secret Service, and other federal law enforcement agencies) are the property of those agencies. Upon receipt of a request for such records, the FDIC will immediately notify the proprietary agency of the request and seek guidance with respect to disposition. The FDIC may forward the request to that agency for processing in accordance with that agency's regulations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 5, 6, 7, 8, 9, 18, and 19 of the Federal Deposit Insurance Act (12 U.S.C. 1815, 1816, 1817, 1818, 1819, 1828, 1829).

ROUTINE USES OF RECORDS MAINTAINED (OTHER THAN PROPRIETARY RECORDS OF ANOTHER AGENCY) INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information in the system may be disclosed:

(1) To a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations or in connection with criminal proceedings.

(2) To the appropriate federal, state, or local agency or authority responsible for investigating or prosecuting a violation of or for enforcing or implementing a statute, rule, regulation, or order when the information indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule, or order issued pursuant thereto.

(3) To a congressional office in response to an inquiry made at the request of the individual to whom the record pertains.

(4) To a financial institution affected by enforcement activities or reported criminal activities.

(5) To other financial institution supervisory authorities.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained on file cards, in file folders, and on computer discs.

RETRIEVABILITY:

Indexed by name of the individual.

SAFEGUARDS:

Index cards and file folders are maintained in lockable metal file cabinets; computer discs are accessed only by authorized personnel.

RETENTION AND DISPOSAL:

Records are retained for ten years from the date of the creation of the record, then destroyed by shredder. Records contained on computer discs are retained until no longer needed.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Supervision, Enforcement & Surveillance Branch, Division of Bank Supervision, FDIC, 550 17th Street, NW., Washington, DC 20429.

NOTIFICATION PROCEDURE:

Requests must be in writing and addressed to the Office of the Executive Secretary, FDIC, 550 17th Street, NW, Washington, DC 20429. Individuals requesting their own records must provide their name and address and a notarized statement attesting to the individual's identity.

RECORD ACCESS PROCEDURE:

Same as "Notification" above.

CONTESTING RECORD PROCEDURES:

Same as "Notification" above.

RECORD SOURCE CATEGORIES:

Financial institutions; financial institution supervisory or regulatory authorities; newspapers; criminal law enforcement and prosecuting authorities.

SYSTEMS EXEMPTED FROM CERTAIN PROVISION OF THE ACT.

Pursuant to § 310.13(a) of the FDIC's rules and regulations, investigatory material compiled as part of this system for law enforcement purposes is exempted from the provisions of § 310.10(d)(2) of the FDIC's rules and regulations and may be withheld from disclosure to the extent that such withholding is permissible under any of the exemptive provisions of the Freedom of Information Act (5 U.S.C. 552). Federal criminal law enforcement investigatory reports maintained as part of this system may be the subject of exemptions imposed by the originating agency pursuant to 5 U.S.C. 552a(j)(2).

FDIC 30-64-0004

SYSTEM NAME:

Changes in Bank Control Ownership Records.

SYSTEM LOCATION:

Supervision, Enforcement & Surveillance Branch, Division of Bank Supervision, FDIC, 550 17th Street, NW, Washington, DC 20429.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM.

Individuals who have been involved in a change of bank control or ownership of FDIC-insured banks or who filed or were a member of a group that filed a Notice of Acquisition of Control of an FDIC-insured bank.

CATEGORIES OF RECORDS IN THE SYSTEM:

For proposed transactions, the names of proposed acquirers; name and location of the bank; number of shares to be acquired and outstanding; date Change in Control Notice was accepted by the FDIC regional office; name and location of the newspaper in which the notice was published and date of publication. For consummated transactions, names of sellers/transferors; names of purchasers/transferees and number of shares owned

after transaction; date of transaction on bank's books; number of shares acquired and outstanding. If stock of a holding company is involved, the name and location of the holding company and the bank it controls.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sec. 7(j) of the Federal Deposit Insurance Act (12 U.S.C. 1817(j)).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information in the system is available to the general public.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM.

STORAGE:

Maintained on file cards, in file folders, and on computer discs.

RETRIEVABILITY:

Indexed by name of the individual.

SAFEGUARDS:

Index cards and file folders are maintained in lockable metal file cabinets; computer discs are accessed only by authorized personnel.

RETENTION AND DISPOSAL:

Records are retained until no longer needed.

SYSTEM MANAGER(S) AND ADDRESS:

Associate Director, Supervision, Enforcement & Surveillance Branch, Division of Bank Supervision, FDIC, 550 17th Street, NW, Washington, DC 20429.

NOTIFICATION PROCEDURE:

Requests must be in writing and addressed to the Office of the Executive Secretary, FDIC, 550 17th Street, NW, Washington, DC 20429. Individuals requesting their own records must provide their name and address.

RECORD ACCESS PROCEDURES:

Same as "Notification" above.

CONTESTING RECORD PROCEDURES:

Same as "Notification" above.

RECORD SOURCE CATEGORIES:

Persons who are acquiring control of an FDIC-insured bank, the bank or holding company in which control is changing or has changed; state and federal financial institution supervisory authorities.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

FDIC 30-64-0016

SYSTEM NAME:

Municipal Securities Dealers and Government Securities Brokers/Dealers Personnel Records.

SYSTEM LOCATION:

Supervision, Enforcement & Surveillance Branch, Division of Bank Supervision, FDIC, 550 17th Street, NW, Washington, DC 20429. Records are also stored in computerized files maintained off-premises on a contract basis with the National Association of Securities Dealers, Inc., 9513 Key West Avenue, Rockville, Maryland 20850.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

(1) Persons who are or seek to be municipal securities principals or municipal securities representatives associated with muncipal securities dealers which are FDIC-insured, state-chartered banks (including insured state-licensed branches of foreign banks), not members of the Federal Reserve System, or are subsidiaries, departments, or divisions of such banks.

(2) Persons who are or seek to be persons associated with government securities dealers or government securities brokers which are FDIC-insured state-chartered banks, other than members of the Federal Reserve System, or are departments or divisions of such banks.

CATEGORIES OF RECORDS IN THE SYSTEM:

The records may contain identifying information as well as educational, employment, and disciplinary information, if any, and, where applicable, information regarding termination of employment of individuals covered by the system. Identifying information includes name, addresses, date and place of birth, and may include social security account number.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 15B, 15C, and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78o-4, 78o-5, and 78w).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USE: INFORMATION IN THE SYSTEM MAY BE DISCLOSED:

(1) To a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations or in connection with criminal proceedings.

(2) To the appropriate federal, state, local, or foreign agency or authority or to a self-regulatory organization, as defined in section 3(a)(26) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(26)), responsible for investigating or prosecuting a violation of or for enforcing or implementing a statute, rule, regulation, or order, when the information indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto.

(3) To a congressional office in response to an inquiry made at the request of the individual to whom the record pertains.

(4) To assist in any proceeding in which the federal securities or banking laws are in issue or a proceeding involving the propriety of a disclosure of information contained in this system, in which the FDIC or one of its past or present employees is a party.

(5) To a federal, state, local, or foreign governmental authority or a self-regulatory organization if necessary in order to obtain information relevant to an FDIC inquiry concerning a person who is or seeks to be associated with a municipal securities dealer as a municipal securities principal or representative or a government securities broker or a government securities dealer (as described in "Categories of individuals covered by the system" above).

(6) To a federal, state, local, or foreign governmental authority or a self-regulatory organization in connection with the issuance of a license or other benefit to the extent that the information is relevant and necessary.

(7) To a registered dealer, a registered broker, a registered municipal securities dealer, a government securities dealer, a government securities broker, or an insured bank that is a past or present employer of an individual that is the subject of a record, or to which such individual has applied for employment, for purposes of identity verification or for purposes of investigating the qualifications of the subject individual.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file folders and on computer discs.

RETRIEVABILITY:

Indexed by name, social security number, and/or sequence number

VOL 53 ISS 45 MR 8 988 UMI

assigned by the National Association of Securities Dealers, Inc.

SAFEGUARDS:

File folders are stored in lockable metal file cabinets; computers discs are accessed only by authorized personnel.

RETENTION AND DISPOSAL:

Permanent retention.

SYSTEM MANAGER(S) ADDRESS:

Associate Director, Supervision, Enforcement & Surveillance Branch, Division of Bank Supervision, FDIC, 550 17th Street, NW., Washington DC 20429.

NOTIFICATION PROCEDURE:

Requests must be in writing and addressed to the Office of the Executive Secretary, FDIC, 550 17th Street, NW., Washington, DC 20429. Individuals requesting their own records must provide their name and the date and place of their birth, and may be required to include a notarized statement attesting to identity.

RECORD ACCESS PROCEDURES:

Same as "Notification" above.

CONTESTING RECORD PROCEDURES:

Same as "Notification" above.

RECORD SOURCE CATEGORIES:

Individuals on whom the records are maintained, municipal securities dealers and government securities dealers and brokers (as such dealers are described in "Categories of individuals covered by the system" above), and federal, state, local, and foreign governmental authorities and self-regulatory agencies which regulate the securities industry.

BILLING CODE 6714–01–M

Privacy Act of 1974; Amendment to Existing System of Records

AGENCY: Federal Deposit Insurance Corporation ("FDIC").

ACTION: Notice of proposed changes to a system of records: "Employee Financial Disclosure Statements."

SUMMARY: The FDIC is issuing for public comment a revision to its system of records for Employee Financial Disclosure Statements. This change is being proposed to reflect the addition of the Confidential Report of Employment Upon Resignation to the system.

DATES: Comments must be submitted by April 7, 1988. The amendments will become effective April 22, 1988, unless a superseding notice to the contrary is published before that date.

ADDRESSES: Comments should be addressed to Hoyle L. Robinson, Executive Secretary, Federal Deposit Insurance Corporation, 550—17th Street, NW., Washington, DC 20429, or hand-delivered to Room 6108 at the same address, Monday through Friday, between the hours of 9 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT: Robert E. Feldman, Assistant Executive Secretary, Federal Deposit Insurance Corporation, 550—17th Street NW., Washington, DC 20429, telephone (202) 898–3811.

SUPPLEMENTARY INFORMATION: The FDIC's Privacy Act system of records entitled "Employee Financial Disclosure Statements" is being amended to include within the categories of records in the system the Confidential Report of Employment Upon Resignation, which is designed to identify potential post-employment conflicts of interest and is used as a counseling tool as well as for enforcement of compliance with statutes governing the activities of former government employees. Documents related to the report will also be included in the system. The report is required pursuant to 12 CFR 336.24 and is intended for an employee to disclose pertinent information regarding prospective employment at least two weeks prior to the effective date of resignation. A companion amendment to the categories of individuals covered by the system will be made to account for the addition of the report to the system.

Accordingly, the Board of Directors of the FDIC proposes to revise the Employee Financial Disclosure Statements system to read as follows.

FDIC 30–64–0006

SYSTEM NAME:

Employee Financial Disclosure Statements.

(Complete text appears at 47 FR 42162 (Sept. 24, 1982).)

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former FDIC officers and employees, including Special Corporation employees and employees occupying noncompetitive positions, required to file Public Financial Disclosure Reports pursuant to the Ethics in Government Act of 1978 (92 Stat. 1836); current and former employees required to file Confidential Statements of Employment and Financial Interests pursuant to Executive Order 11222 and 12 CFR Part 336; current and former bank examiners and assistant bank examiners required to file disclosures of their personal indebtedness to insured banks or affiliates thereof pursuant to Part 336; all current and former employees required to disclose their ownership of insured bank securities and other outside interests pursuant to Part 336; and all current and former employees required to file Confidential Reports of Employment Upon Resignation pursuant to 12 CFR Part 336.

* * * * *

CATEGORIES OF RECORDS IN THE SYSTEM:

Paragraph (4) is amended by removing the period at the end of the paragraph and inserting in its place "; and".

* * * * *

(5) Confidential Report of Employment Upon Resignation—Contains information as to the employee's prospective employer; the nature of the business or organizational activities of the prospective employer; the position that the employee will occupy, dates of negotiation for such employment, and the employee's official involvement, if any, with the prospective employer; may also contain other documents related to the Confidential Report of Employment Upon Resignation generated in the course of administering the provisions of Executive Order 11222, as amended, and Part 336.

* * * * *

By direction of the Board of Directors.

Dated at Washington, DC, this first day of March, 1988.

BILLING CODE 6730–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

Statement of Organization, Functions, and Delegations of Authority

Part F. of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services, Health Care Financing Administration (HCFA), **Federal Register**, Vol. 52, No. 108, pp. 21375–21377, dated Friday, June 5, 1987) is amended to reflect changes to certain organizational titles and a minor realignment of functions within the Office of Management and Budget (OMB).

The specific changes to Part F. are as follows:

- Section FH.20.A.1., Office of Personnel, Health and Resource Management (FHA6) is amended by changing the organizational title to Office of Human Resources (FHA6).
- Section FH.20.A.1.a., Division of Classification and Organizational Analysis (FHA61) is amended by deleting the functional statement in its entirety and replacing it with the following functional statement:

a. Division of Classification and Organizational Analysis (FHA61)

Plans, directs, and implements a comprehensive HCFA position classification and position management program. Classifies all central office wage grade and general schedule positions at or below the GS–15 level. Evaluates programs for adequacy and recommends corrective action when deficiencies are disclosed. Plans, implements, and monitors HCFA position classification surveys and issues reports and recommendations for improvements. Coordinates the survey results with the Office of the Secretary and/or the Office of Personnel Management. Interprets legislation, regulations, guides, directives and bulletins concerning position classification. Provides information on HCFA's classification structure for entry into the automated personnel information system and prepares statistical information related to HCFA's position classification program. Provides services, policy direction, and coordination with respect to organizational analysis functions and delegation of authority activities. Conducts studies of HCFA's organizational and functional arrangements and develops plans for assimilating new or modified functions into the HCFA organization. Designs, develops, implements, and maintains a system for initiating, analyzing, reviewing, and approving HCFA-Wide program and administrative delegations of authority.

- Section FH.20.A.1.b., Division of Staffing and Employee and Health Services (FHA62) is amended by changing the organizational title to the Division of Staffing and Employee Services (FHA62) and deleting the functional statement in its entirety and replacing it with the following functional statement:

b. Division of Staffing and Employee Services (FHA62)

Provides service to all central office HCFA components in the areas of recruitment, in-service staffing, and pre-employment investigations for all types of appointments and all occupational classes and levels of work. Provides advice, guidance, and consultation to HCFA supervisory and management officials on such issues as optional staffing mixes, recruitment sources, qualification factors, etc. Interprets regulations, guides, directives, and bulletins related to staffing and personnel services. Establishes and maintains the employment data base for routine and special reports and statistical studies related to the employee population. Plans and controls the central system for all personnel transaction processes, serves as the official custodian for all personnel folder clearances, confidential reports, employment agreements, and other related areas. Plans, administers, and evaluates HCFA-wide employee relations activities. Provides general employee counseling on such matters as employee/management communication, retirement, life insurance, health plans, worker's compensation claims, and related areas. Serves as the central HCFA reference point for inquiries, guidance, and interpretation on employee relations matters. Processes insurance claims for survivors of deceased employees. Assures due process in adverse personnel actions and provides procedural advice in the processing of grievances and appeals under Agency and negotiated agreements. Directs programs for health nationwide, employee health enhancement, physical fitness, and blood assurance programs. Plans and administers the entire ethics program for both central and regional offices. Reviews the financial disclosure reports prior to Departmental submittal and coordinates outside activities requests and approvals.

- Section FH.20.A.1.c., Division of Policy, Performance, and Development (FHA63) is amended by deleting the functional statement in its entirety and replacing it with the following functional statement:

c. Division of Policy, Performance, and Development (FHA63)

Provides leadership, direction, and control with respect to HCFA's personnel-related policies; employee training, career development, and counseling activities; and performance management and awards programs. Serves as the agency's representative in dealing with the Department of Health and Human Services, other Federal agencies, contractors, and employee/management/Union organizations. Plans, coordinates, and executes a wide range of major studies and projects involving personnel issues of Agency-wide magnitude.

- Section FH.20.A.1.d., Division of Labor/Management Relations (FHA64) is deleted in its entirety and replaced by the Labor/Management Relations Staff (FHA6–1). The new section reads as follows:

d. Labor/Management Relations Staff (FHA6–1)

Plans, directs, and administers HCFA-wide labor relations activities including the application and interpretation of the Federal Labor-Management Relations Program, collective bargaining agreements, and regulations. Serves as Agency representative in dealing with the Department of Health and Human Services, other Federal agencies, employee and supervisory organizations, and third-party representatives, including negotiations in the resolution of grievances and appeals under the negotiated grievance procedure. Formulates HCFA-wide policy regarding the development, implementation, and evaluation of labor relations activities. Provides management advisory service on all labor/management relations issues. Directs the development and implementation of a labor relations training program in conjunction with other Office of Human Resources components. Plans and coordinates the integration of the HCFA Labor Relations Program with other personnel management functions and related management assistance activities.

- Section FH.20.A.4., Management Planning and Analysis Staff (FHA–1) is amended by deleting the functional statement in its entirety and replacing it with the following functional statement:

4. Management Planning and Analysis Staff (FHA–1)

Provides management support to the Director of the Office of Management and Budget. Provides Agency-wide services, policy direction, and coordination with respect to HCFA's management planning and control programs; including workplanning, management analysis, management/productivity improvement functions, Privacy Act responsibilities, internal control program, advisory and assistance services, commercial and industrial activities, administrative issuances system, and memoranda of understanding and interagency agreements. Develops HCFA policy in these areas and assures the implementation of these policies throughout HCFA. Conducts special studies and analyses in these functional areas.

Date: February 11, 1988.

William L. Roper,

Administrator, Health Care Financing Administration.

[FR Doc. 88–4973 Filed 3–7–88; 8:45 am]

BILLING CODE 4120-01-M

Public Health Service

Centers for Disease Control; Statement of Organization, Functions, and Delegations of Authority

Part H, Chapter HC (Centers for Disease Control) of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health and Human Services (45 FR 67772–67776, dated October 14, 1980, and corrected at 45 FR 69296, October 20, 1980, as amended most recently at 52 FR 41780–41781, October 30, 1987), is amended to reflect the following changes:

1. Establish the Office on Smoking and Health at the division level within the Center for Health Promotion and Education;
2. Revise the functional statements for the Procurement and Grants Office, Office of Program Support, to reflect current operations and terminology;
3. Revise the functional statements for the AIDS Program, Center for Infectious Diseases, by substituting the term "human immunodeficiency virus (HIV)" for "HTLV–III/LAV;" and
4. Update the list of officials in the Order of Succession.

Section HC–B, Organization and Functions, is hereby amended as follows:

After the heading and statements for the *Center for Health Promotion and Education (HCK), Office of the Director (HCK1)*, insert the following title and statements: *Office on Smoking and Health (HCK4)*. (1) Administers a national program to inform Americans about the dangers of tobacco use in order to reduce death and disability due to smoking and smokeless tobacco use; (2) promotes and stimulates research on the determinants and health effects of smoking and smokeless tobacco use; (3) coordinates all PHS research and educational programs and other HHS activities related to tobacco and health; (4) establishes and maintains liaison with other Federal agencies, private organizations, State and local governments, and international agencies on tobacco-and-health matters; (5) serves as a clearinghouse for the collection, organization, and dissemination of information on all aspects of tobacco and health; (6) develops materials on tobacco use in relation to health; (7) provides assistance for educational programs on smoking and health; (8) produces Congressionally-mandated Reports to Congress; (9) conducts surveys, and coordinates and conducts epidemiologic studies related to tobacco behavior and tobacco control; (10) provides staff support for a Congressionally-mandated Federal advisory committee on smoking and health; (11) pursuant to Public Laws 98–474 and 99–252, collects, maintains, and analyzes information provided by the tobacco industry on cigarette additives and smokeless tobacco additives and nicotine content; (12) serves as a World Health Organization (WHO) Collaborating Center on smoking and health; (13) serves as the lead for the Smoking and Health 1990 objectives for the Nation; (14) provides staff support to the Surgeon General on activities related to smoking and health.

After the heading for the *Procurement and Grants Office (HCA58)*, change the statement to read: (1) Advises the Director, CDC, and the Director's staff, and provides leadership and direction for CDC acquisition, assistance, and materiel management activities; (2) plans and develops CDC-wide policies, procedures, and practices in acquisition, assistance, and materiel management areas; (3) obtains research and development, services, equipment, supplies, and construction through acquisition processes; (4) maintains personal property, transportation, and warehousing operations; (5) awards, administers, and terminates contracts, purchase orders, grants, and cooperative agreements; (6) maintains a continuing review of CDC-wide acqusition, assistance, and materiel mangement operations to ensure adherence to laws, policies, procedures, and regulations; (7) maintains liaison with HHS, PHS, GSA, and other Federal agencies on acquisition, assistance, and materiel management policy, procedure, and operating matters.

Under the heading *AIDS Program (HCRK)*, in item (1) change "HTLV–III/LAV" to "human immunodeficiency virus (HIV)," and in item (9) change "HTLV–III/LAV" to "HIV."

Section HC–C Order of Succession. After the first sentence, delete the listing of officials and substitute the following: (1) Deputy Director, (2) Assistant Director/Washington, (3) Assistant Director for Public Health Practice, (4) Assistant Director for International Health, (5) Assistant Director for Science, (6) Assistant Director for Minority Health, (7) Director, Office of Program Support, (8) Director, Office of Program Planning and Evaluation, (9) Deputy Director (AIDS).

Date: March 1, 1988.

Wilford J. Forbush,

Director, Office of Management/PHS

Section 32, All;
Section 34, All.

Containing 16,209.65 acres.

Upon completion of the final appraisal, the actual acreage exchanged will be adjusted to reflect equal values as much as possible.

The purpose of the exchange is to consolidate Federal mineral ownership for the Federal government within the recently enacted El Malpais National Conservation Area (NCA) and National Monument (NM). This action is consistent with land ownership adjustments as set forth in the Record of Decision for the Rio Puerco Resource Management Plan approved January 16, 1986.

The purpose of this Notice of Realty Action is twofold. First, this notice will provide a response period of forty-five (45) days during which public comments will be accepted regarding this exchange proposal. Secondly, this action as provided in 43 CFR 2201.1(b) shall segregate the Federal minerals as described in this notice, to the extent that they will not be subject to appropriation under mineral leasing and mining laws, subject to any prior valid rights. The segregative effect shall terminate either upon publication in the Federal Register of a termination of the segregation or two years from the date of this publication, whichever occurs first.

SUPPLEMENTARY INFORMATION: Detailed information concerning the exchange is available at the Albuquerque District Office, 435 Montano NE, Albuquerque, New Mexico 87107.

For a period of forty-five (45) days after publication of this Notice interested parties may submit comments to the District Manager at the above address.

Dated: March 1, 1988.

Robert T. Dale,

District Manager.

BILLING CODE [illegible]

Bureau of Reclamation

Draft Supplement to the Final Environmental Statement, Dolores Project, CO

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability and public hearings on the Draft Supplement to the Final Environmental Statement.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Department of the Interior has prepared a Draft Supplement to the Final Environmental Statement on the Dolores Project, Colorado, originally filed with the Environmental Protection Agency on May 9, 1977 (INT FES 77–12). Comments on the draft supplement must be received by the date indicated on the cover sheet of the document.

A meet has been scheduled to solicit public views concerning the proposed modifications and refinements to the Dolores Project.

The meeting will be held on April 21, 1988, from 3:00 p.m. to 5:00 p.m. and from 6:30 p.m. to 8:30 p.m. at the Anasazi Heritage Center, Bureau of Land Management, 27501 Colorado Highway 184, Dolores, Colorado 81323, telephone (303) 882–4811.

FOR FURTHER INFORMATION CONTACT: Organizations or individuals desiring to present statements at the hearings should write or call Ken Beck, Team Leader, Dolores Project, Bureau of Reclamation, Durango Projects Office, P.O. Box 640, Durango, Colorado 81302–0640, telephone (303) 385–6529. Speakers will be scheduled according to their time preference, if any, as requested by letter or telephone. Speakers not present when called will lose their privilege in the scheduled order and their names will be recalled at the end of presentations by the other scheduled speakers. Requests for scheduled presentations will be accepted until 4 p.m. on April 20, 1988. Any subsequent requests will be handled on a first-come, first-served basis following the scheduled presentations at the meeting.

The facility and room where the meeting is to be held are accessible to handicapped persons. Hearing impaired, visually impaired, or mobility impaired persons planning on attending the meeting may arrange for needed special services by calling (303) 385–6529 by March 21, 1988.

Written comments from those unable to attend and from those wishing to supplement their oral presentations at the hearings should be sent to the Regional Director, Attention UC–730, in Salt Lake City, Utah, by May 6, 1988, to be included in the hearing record.

Copies of the draft supplement to the final environmental statement are available for inspection at the following locations.

Director, Office of Environmental Affairs, Bureau of Reclamation, Room 7423, Washington, DC 20240, Telephone: (202) 343–4991
Division of Management Support, General Service, Library Section, Code 950, Engineering and Research Center, Denver Federal Center, Denver, Colorado 80225, Telephone: (303) 234–3019
Regional Director, Bureau of Reclamation, Upper Colorado Regional Office, UC–730, P.O. Box 11568, Salt Lake City, Utah 84147, Telephone: (801) 524–5580
Projects Manager, Durango Projects Office, Bureau of Reclamation, 835 Second Avenue, P.O. Box 640, Durango, Colorado 81302–0640, Telephone: (303) 385–6500
Project Construction Engineer, Cortez Projects Office, Bureau of Reclamation, 60 South Cactus, P.O. Drawer Q, Cortez, Colorado 81321, Telephone: (303) 565–4473

Single copies of the document may be obtained by request to the addresses listed above. Copies also will be available for inspection at libraries in the project area.

SUPPLEMENTARY INFORMATION: The Dolores Project will provide water from the Dolores River for irrigation, municipal and industrial use, power production, recreation, salinity control, and fish and wildlife enhancement. It also will provide flood control and cultural resources mitigation and will aid in area economic redevelopment.

The supplement assesses the environmental impacts of proposed modifications and refinements to the Dolores Project. The salinity control modification would include lining sections of the Lone Pine and Upper Hermana irrigation laterals to prevent seepage; abandoning the Rocky Ford Ditch, a major contributor of salt, and incorporating its flows into the new alignment of the Towaoc Canal east of Cortez; abandoning the Lower Hermana Lateral and Highline Ditch and also including their flows, along with the Ute Mountain Ute Tribe's full service irrigation project water supply, in the Towaoc Canal; and constructing eight buried pipe laterals from the Towaoc Canal to the Rocky Ford Ditch service area.

Since the 1977 FES, some refinements to the project plan have been made as a result of economic and design criteria considerations. Such refinements are a normal function of the design and construction process. Those refinements include deleting Monument Creek Reservoir and the Cortez-Towaoc Municipal and Industrial Pipeline from McPhee Reservoir to the Ute Mountain Ute Reservation. The Dolores Water Conservancy District has agreed to construct those two features without Federal financing, subject to financing from the State of Colorado. Other refinements would include combining capacities of two pumping plants for sprinkler irrigation into one pumping plant, constructing a booster pumping plant, modifying the capacities of the McPhee and Towaoc Powerplants, and using a computerized control system to operate the project.

Dated: March 1, 1988.

C. Dale Duvall,

Commissioner of Reclamation.

BILLING CODE 4310-09-M

Fish and Wildlife Service

Receipt of Applications for Permits

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

PRT–725116

Applicant: National Museum of Natural History, Washington, DC

The applicant requests a permit to import salvaged specimens of ungulates in families Bovidae and Cervidae from Academia Sinica, Ministry of Forestry, Xining, Qinghai, China and from Zoological Survey of Pakistan, Karachi, Pakistan for scientific purposes Specimens will be accessioned into the museum's collection and made available for scientific research.

PRT–724664

Applicant: WE-DU Nurseries, Marion, NC

The applicant requests a permit to sell in interstate and foreign commerce, divisions of Harper's Beauty (*Harperocallis flava*) from a plant collected in the wild in Florida for the purpose of enhancement of propagation of the species.

PRT–725285

Applicant: Gladys Porter Zoo, Brownsville, TX

The applicant requests a permit to import two captive born female Philippine crocodiles (*Crocodylus novaeguineae mindorensis*) from Silliman University, Dumagete City, Philippines, for the purpose of captive breeding. The applicant currently maintains two males of this species.

PRT–724754

Applicant: International Animal Exchange, Ferndale, MI

The applicant requests a permit to purchase and import one male and two female captive born Parma wallabies (*Macropus parma*) from the Wellington Zoological Gardens, Wellington, New Zealand, and sell the wallabies to the Phoenix Zoo, Phoenix, AZ, for the purpose of captive propagation.

Documents and other information submitted with these applications are available to the public during normal business hours (7:45 am to 4:15 pm) Room 403, 1375 K Street NW., Washington, DC, or by writing to the Director, Office of Management Authority, P.O. Box 27329, Washington, DC 20038–7329.

Interested persons may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate PRT number and applicant when submitting comments.

Dated: February 29, 1988.

Larry LaRochelle,

Acting Chief, Branch of Permits, Office of Management Authority.

BILLING CODE 4310-AN-M

National Park Service

Notice of Intent To Negotiate Concession Contract; Belle Haven Marina, Inc.

Pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that sixty (60) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Park Service, proposes to negotiate a concession contract with Belle Haven Marina, Incorporated authorizing it to continue to provide services for the public at George Washington Memorial Parkway, Alexandria, Virginia, for a period of five

(5) years from January 1, 1988, through December 31, 1992.

This contract renewal has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act and no environmental document will be prepared.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing permit which expired by limitation of time on December 31, 1987, and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the authorization and in the negotiation of a new contract as defined in 36 CFR 51.5.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand delivered on or before the sixtieth (60th) day following publication of this notice to be considered and evaluated.

Interested parties should contact the Superintendent, George Washington, Memorial Parkway, Turkey Run Park, McLean, Virginia, 22101, for information as to the requirements of the proposed contract.

Dated: January 20, 1988.

Lowell V. Sturgill,

Acting Regional Director, National Capital Region.

[FR Doc. 88-4996 Filed 3-7-88; 8:45 am]

BILLING CODE 4310-70-M

[DES 88-13]

Availability of Draft Environmental Impact Statement; Wilderness Recommendation Kenai Fjords National Park, AK; Public Hearings and Public Meetings

ACTION: Notice of the availability of the Draft Environmental Impact Statement (DEIS) regarding Wilderness Recommendation Kenai Fjords National Park, Alaska and the holding of public hearings and a public meeting.

Four alternatives were examined for Kenai Fjords National Park. They range from no action, which means no wilderness designation, to the designation of all lands in the study area as wilderness. Alternative 2, the proposed action, excludes 12 percent of the study area from wilderness designation. The 12 percent would remain available for recreational development.

DATES AND ADDRESSES: The public is invited to comment on the DEIS. The public comment period will end May 27, 1988. Written comments should be mailed to Mr. Q. Boyd Evison, Regional Director, Alaska Region, National Park Service, 2525 Gambell Street, Anchorage, Alaska 99503. Comments must be received by May 27, 1988, to be considered in the development of the final EIS.

Two formal public hearings have been scheduled to receive oral and written comments on this wilderness DEIS. The public hearings will also provide the opportunity to receive oral and written comments on Wilderness Recommendations for Yukon-Charley Rivers National Preserve and Bering Land Bridge National Preserve draft EISs, which are also on public review. One hearing will be held in Anchorage, Alaska, on Monday, April 18, 1988, 7:00 p.m., Third Floor Conference Room, Alaska Regional Office, National Park Service, 2525 Gambell Street. Another hearing will be held in Arlington, Virginia, at the Professional Center, Third Floor, Metropolitan Campus of George Mason University, 3401 North Fairfax Drive at a time to be announced later in local newspapers.

A public meeting on Kenai Fjords National Park Wilderness DEIS will be held in Seward, Alaska, on Wednesday, April 20, 1988, 7:00 p.m., at Park Headquarters.

FOR FURTHER INFORMATION CONTACT: Division of Planning, Alaska Region, National Park Service, 2525 Gambell Street, Anchorage, Alaska 99503; (907) 257-2654. The headquarters in Seward, Alaska will have reading copies available to the public as will the NPS Alaska Regional Office (address above); the Alaska Resources Library in Anchorage, Alaska, 701 C Street; the Alaska Public Lands Information Office in Fairbanks, Alaska, Third and Cushman Streets; and the Office of Public Affairs, National Park Service, Department of the Interior in Washington, DC., 18th and C Streets NW.

Dated: March 3, 1988.

Gerald D. Patten,

Associate Director, Planning and Development.

Approved:

Bruce Blanchard,

Director, Office of Environmental Project Review, United States Department of the Interior.

[DES 88-12]

Availability of Draft Environmental Impact Statement; Wilderness Recommendation Yukon-Charley Rivers National Preserve, AK

ACTION: Notice of the availability of the Draft Environmental Impact Statement (DEIS) regarding Wilderness Recommendation Yukon-Charley Rivers National Preserve, Alaska and the holding of public hearings and public meetings.

For Yukon-Charley Rivers National Preserve, alternatives were examined ranging from no action, which means no wilderness designation, to the designation of all suitable lands as wilderness. Alternative 2, the proposed action, excludes 51 percent of the lands suitable from wilderness status.

DATES AND ADDRESSES: The public is invited to comment on the DEIS. The public comment period will end May 27, 1988. Written comments should be mailed to Mr. Q. Boyd Evison, Regional Director, Alaska Region, National Park Service, 2525 Gambell Street, Anchorage, Alaska 99503. Comments must be received by May 27, 1988, to be considered in the development of the final EIS.

Two formal public hearings have been scheduled to receive oral and written comments on this wilderness DEIS. The public hearings will also provide the opportunity to receive oral and written comments on Wilderness Recommendations for Bering Land Bridge National Preserve and Kenai Fjords National Park draft EISs, which are also on public review. One hearing will be held in Anchorage, Alaska, on Monday, April 18, 1988, 7:00 p.m., Third Floor Conference Room, Alaska Regional Office, National Park Service, 2525 Gambell Street. Another hearing will be held in Arlington, Virginia, at the Professional Center, Third Floor, Metropolitan Campus of George Mason University, 3401 North Fairfax Drive at a time to be announced later in local newspapers.

In addition, two public meetings will be held on Yukon-Charley Rivers National Preserve Wilderness DEIS, one on Tuesday, April 19, 1988, 7:00 p.m., in Fairbanks, Alaska, at the Alaska Public Lands Information Office, Third and Cushman Streets; the other in Eagle, Alaska, on Wednesday, April 20, 1988, 7:00 p.m., at Preserve Headquarters.

BILLING CODE 4310-70-M

Office of Surface Mining Reclamation and Enforcement

Intent To Transfer Unexpended State Abandoned Mine Land Reclamation Funds; Tennessee

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Notice of intent to transfer unexpended monies previously allocated to the State of Tennessee.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement is proposing to transfer to the Secretary's share of the abandoned mine land reclamation (AMLR) all State AMLR monies allocated to Tennessee but not expended and to no longer allocate AMLR funds to the State, under the authority of section 402(g)(2) and 405(c) of the Surface Mining Control and

Reclamation Act of 1977, Pub. L. 95–87 (SMCRA).

DATES: *Written Comments:* OSMRE will accept written comments on the notice until 5:00 p.m., Eastern time on April 7, 1988. Comments received after that time may not necessarily be considered nor included in the administrative record.

ADDRESSES: *Written comments:*

Hand deliver to: Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5131, 1100 L Street, NW., Washington, DC

Or mailed to: Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5131–L, 1951 Constitution Avenue NW., Washington, DC 20240.

All comments, notices of public meetings and summaries of the meetings will be available for inspection in Room 5131, 1100 L Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Jim Fary, Division of Abandoned Mine Land Reclamation, 1951 Constitution Avenue NW., Room 120, Washington, DC 20240, Telephone (202) 343–5384.

Public Meetings: Representatives of OSMRE will be available to meet between March 8, 1988, and April 7, 1988, at the request of members of the public, State/Federal representatives, industry officials, labor representatives, environmental organizations, and any other interested group, to receive advice and recommendations concerning the proposed action. OSMRE representatives will be available for such meetings from 9:00 a.m. to noon and 1:00 p.m. to 4:00 local time, Monday through Friday, excluding holidays. Summaries of each meeting will be prepared and made available for public review in Room 5131, 1100 L Street, NW., Washington, DC. Persons wishing to meet with representatives of OSMRE during that time period may request a meeting. The person to contact to schedule a meeting is: Jim Fary Division of Abandoned Mine Land Reclamation, 1951 Constitution Ave., NW., Room 120, Washington, DC 20240 Telephone (202) 343–5384.

SUPPLEMENTARY INFORMATION: The Abandoned Mine Land Fund (Fund) was established by the Surface Mining Control and Reclamation Act of 1977 in response to concerns over the extensive environmental damage caused by past coal mining activities. Monies from the fund are appropriated by Congress for grants to the States and Tribes to plan and implement reclamation programs and projects; for Federal reclamation projects administered by the Secretary of the Interior through OSMRE; and for the Rural Abandoned Mine Program (RAMP) administered by the Secretary of Agriculture through the Soil Conservation Service.

Title IV of SMCRA provides that fifty percent of the AMLR funds collected within a State or on Tribal lands are to be allocated to that State or Tribe to accomplish the purposes of Title IV. "Allocated" means the administrative identification in the records of OSMRE of monies in the Fund for use by a State or Tribe for accomplishing the purposes of Title IV. States are eligible to receive such allocated funds only after they have an approved regulatory program pursuant to section 503 of SMCRA and an approved reclamation plan under section 405 of SMCRA. If allocated funds have not been expended by the State, section 402(g) (2) of SMCRA provides the Secretary authority to withdraw such funds from the State accounts and utilize them for other purposes of Title IV. If a State does not have an approved regulatory program, section 405(c) provides the Secretary authority to no longer allocate AMLR funds to the State.

The State of Tennessee repealed most of the Tennessee Coal Surface Mining Law of 1980 and the implementing regulations for the active coal mining regulatory program effective October 1, 1984. On this date, OSMRE instituted a Federal regulatory program for active mining and effective November 5, 1984 suspended the State's AMLR plan. Since that date Tennessee's share of the AMLR funds collected within the State have been administratively allocated to the State share, but because of the implementation of a Federal regulatory program, the State has been ineligible to receive annual grants utilizing those allocated funds.

Therefore, effective in FY 1988, pursuant to the authority in sections 402(g)(2) and 405(c) of SMCRA, all funds allocated to the State but not granted to the State will be transferred to the Secretary's discretionary share and OSMRE will no longer allocate funds to the State of Tennessee and all fees collected in the State will be credited to the Secretary's discretionary share.

Dated: March 2, 1988.

Jed D. Christensen,

Director, Office of Surface Mining Reclamation and Enforcement.

Ellen Goldstein (202) 275–7976

ADDRESSES: Unless otherwise indicated, an original and 20 copies of all documents must be sent to:

Office of the Secretary, Case Control Branch, Attn: Finance Docket No. 32000, Interstate Commerce Commission, Washington, DC 20432.

Five copies of all pleadings in this proceeding must be sent to:

Room 2118, Office of Proceedings, Interstate Commerce Commission, Washington, DC 20423.

In addition, one copy of all documents in this proceeding must be sent to each of applicants' representatives:

Samuel R. Freeman, Vice President and General Counsel, The Denver and Rio Grande Western Railrod Company, P.O. Box 5482, Denver, CO 80217

E. Barrett Prettyman, Jr., Hogan & Hartson, Columbia Square, 555 Thirteenth Street, NW., Washington, DC 20004–1109.

SUPPLEMENTARY INFORMATION: We are accepting for consideration the control application and related motor carrier petition filed in these proceedings. On February 22, 1988, Rio Grande Industries, Inc. (Rio Grande), SPTC Holding, Inc. (SPTC Holding), and The Denver and Rio Grande Western Railroad Company (DRGW) (collectively, applicants) filed an application under 49 U.S.C. 11343 and 11344 for approval of the acquisition of control of the Southern Pacific Transportation Company (SPT) and its transportation subsidiaries by Rio Grande and SPTC Holding, non-carrier holding companies, and DRGW, a wholly-owned carrier subsidiary of Rio Grande. SPT controls three motor carriers: Pacific Motor Transport Company, Pacific Motor Trucking Company, and PMT of the Southwest, Inc. Applicants have filed a petition for exemption under 49 U.S.C. 10505 from the requirements of 49 U.S.C. 11343, 11344, and 11345 to permit applicants to acquire indirect control of the three motor carriers.

If the application in Finance Docket No. 32000 is approved, applicants intend that Rio Grande will acquire, through its wholly-owned subsidiary, SPTC Holding, all of the issued and outstanding shares of SPT common stock beneficially owned by Southern Pacific Company (SPC), a wholly-owned subsidiary of SFSP. The SPT stock is currently held in a voting trust created in connection with Finance Docket No. 30400, under which the LaSalle National Bank of Chicago, IL, serves as trustee. The acquisition by applicants would permit the voting trust to be terminated and will satisfy SFSP's obligation to divest itself of its interest in SPT.

Following acquisition of SPT, applicants plan to continue SPT's separate corporate existence but expect that the rail operations or SPT and DRGW will be consolidated. The two carriers may eventually be merged, but applicants have no current plans to do so.

DRGW operates 2,211 miles of railroad in Utah, Colorado, Kansas, and Missouri. This consists of 1,528 miles of mainline and 683 miles of branch line. DRGW serves the Central Corridor from principal western terminals of Ogden, Salt Lake City, and Provo, UT, to the eastern intermountain terminals of Denver, Colorado Springs, and Pueblo, CO, the important midwestern terminal of Kansas City, MO/KS, and the interchange gateway of Herington, KS. DRGW operates principal yards at all major terminals and at Grand Junction, CO.

SPT, including its subsidiaries the St. Louis Southwestern Railway Company and the Northwestern Pacific Railroad Company, operates 11,699 miles of railroad throughout the western and southwestern United States. This system serves 14 States, over 7,767 miles of mainline and 3,932 miles of branch line.

Principal routes of SPT include: The Overland Route, serving the Central Corridor between points in Northern California and Oregon and the intermountain gateway of Ogden; the West Coast Route, covering the territory from the Los Angeles Basin to Portland, OR, via San Francisco/Oakland and Sacramento, CA; the Sunset Route, serving the Southern Corridor between West Coast ports and the principal Gulf ports and terminals of New Orleans and Lake Charles, LA, and Houston, Galveston, Beaumont, and Corpus Christi, TX; the Golden State Route, connecting the major midwestern gateways of St. Louis, MO/IL and Kansas City, through grain shipping communities at Hutchison and Liberal, KS, to El Paso, TX, and then to southern California via the Sunset Route; and the Cotton Belt Route, extending from the Missouri River gateways of St. Louis and Memphis, TN, to Shreveport, LA, and Texas cities including Dallas, Ft. Worth, and San Antonio.

Other principal yards and interchange points of SPT include Eugene, OR, Roseville, ICTF/Long Beach, and West Colton, CA; Herington, KS; Pine Bluff, AR; Eagle Pass, TX; and Deming and Nogales, AZ.

Rio Grande's proposed purchase of SPT's common stock for a price of One Billion Twenty Million Dollars, together with transaction-related fees and costs, will be financed by a combination of: (1) $700 million in bank financing; (2) $200 million in subordinated debt to be issued by SPTC Holding and to be underwritten or privately placed by Morgan Stanley & Co. Incorporated (Morgan Stanley); (3) $111 million in common equity capital to be contributed by Morgan Stanley Leveraged Equity Fund II, L. P. (the Morgan Stanley Fund) in exchange for Rio Grande common stock, and (4) $75 million to be obtained through private placement by Morgan Stanley of Rio Grande preferred stock. Applicants have sought approval under 49 U.S.C. 11301 for the issuance of securities in the event the Commission asserts jurisdiction over the relevant securities under 49 U.S.C. 11348. Pursuant to 49 U.S.C. 10505, applicants also have requested that the Commission exempt the issuance of securities from the requirement of approval under section 11301.

The application was filed under 49 U.S.C. 11343 *et seq.* and 49 CFR Part 1180, and the petition was filed under 49 U.S.C. 10505. We are accepting them for consideration because they substantially comply with the applicable regulations, waivers, and requirements. We request corrections, clarification, and additional information as follows.

(1) Applicants shall make available to the Commission the underlying work papers and supporting documentation used to construct Exhibits 16, 17 and 18 of the application.

(2) Contrary to our clarification in Decision No. 3, served January 22, 1988, page 2, applicants have failed to provide SPT's Form S–14, as required at 49 CFR 1180.6(b)(2). They must do so.

(3) It appears that Exhibit 12—Impact Analysis—(49 CFR 1180.7) is missing or not labelled as such. A correction or clarification is required.

(4) Applicants shall clarify the sources of revenues upon which their projected public benefits are based, and clearly distinguish between revenues attributable to traffic diversion (rail and motor) and those attributable to efficiencies and other service improvements. For example, applicants estimate $200–$275 million in additional revenues from the combined system (VS-A.L. Thiessen). Marketing estimates are that nine programs should produce between 48,000 and 77,000 additional carloads and between $81 million and $127 million in additional revenues (VS-H.C. Brown). However, there is no clear distinction made as to whether this new revenue includes the approximately $124 million estimated to be diverted from other carriers.

Applicant also suggested that several new and changed marketing strategies, referred to as "wholesale/retail" transportation philosophies, would contribute about $88,139,150 in additional revenues (VS-T.R. Harvey). This seems to rely heavily on traffic diversions from motor carriers. However, there was no effort to align these revenues with other revenues as either additional or diverted revenues.

(5) Applicants shall provide more detailed information concerning the proposed changes in use of the Roseville and Fresno yards. The plan would eliminate SP's practice of combining many southbound trains from the Roseville Yard and the Bay area at the Fresno Yard. Under the proposed plan, Roseville will classify all southbound traffic into trains which will enable the Fresno Yard to handle only cars originating or terminating at Fresno. This change will allow STP/DRGW to

eliminate two switch engine shifts at Fresno, saving $520,000 annually.

This raises some questions: (1) Does DRGW plan to move southbound traffic from the Bay Area to Roseville for proper classification and further movement south from Roseville; or (2) does DRGW plan to run southbound traffic from the Bay Area through Fresno to other locations in separate trains which require the use of more road crews, that would offset the costs of switch crews at Fresno? The Operating Plan does not provide answers to these questions.

(6) Under the operating plan, a new classification will be made at Eugene, OR, for certain stations in the Los Angeles Basin. Applicants shall submit information showing: (a) the volume of traffic in this classification; (b) the trains that will carry the traffic; and (c) how trains will move to the City of Industry without moving through the West Colton yard.

(7) Although savings from reduced car detention and reduced switching requirements at West Colton are projected, neither Mr. Kenyon's verified statement nor the operating plan shows reduced switching crew starts at West Colton. A clarification is required.

(8) Page 3 of Appendix 3 of the Operating Plan contains an error in reporting the changes in traffic density from the base year to post-consolidation; the information in the "Tons" column post-consolidation appears to be understated. A correction is required.

(9) Applicants have not complied with the requirement at 49 CFR 1180.8(a)(1) that yards expected to have an increase in activity greater than 20 percent be identified. This information shall be provided.

(10) Applicants shall also provide copies of their current freight train classification listing, blocking guides, and schedules for major terminals.

Twenty copies (plus 5 for the Office of Proceedings) of all of the above information must be filed within 5 days of the service date of this decision.

We reserve the right to require the filing of supplemental information from applicants, SPT, The Santa Fe Southern Pacific Corporation (SFSP), or any other party or individual, as necessary to complete the record in this matter.

In our Decision No. 4, served February 12, 1988, we adopted an expedited procedural schedule, a copy of which is included here. All of the filing deadlines ordered here are in accordance with the governing regulations as modified by the expedited schedule. We advise applicants and all other parties to this proceeding that, particularly because of the expedited schedule we have adopted, they must strictly comply with all requirements. If questions arise concerning an interpretation of a requirement, they may contact the Commission's Rail Section, 202-275-7245, for assistance. *See* 49 CFR 1180.4(c)(6)(iii).

The Commission's Section of Energy and Environment (SEE) has reviewed applicants' energy and environmental reports and found them generally to comport with our reporting requirements. The applicants have identified areas where minor effects of limited extent may occur. SEE intends to prepare an Environment Assessment in accordance with 49 CFR 1105.6(b)(2). Applicants shall cooperate with SEE and provide information it requests.

The applications and exhibits are available for inspection in the Public Docket Room, Room 1221, at the offices of the Interstate Commerce Commission in Washington, DC.

Any interested persons, including government parties, may participate in this proceeding by submitting written comments regarding the applications. Comments must be filed no later than May 6, 1988. An original and 20 copies must be filed with the Secretary, Interstate Commerce Commission, Washington, DC 20423. Pursuant to Decision No. 4, five additional copies of all pleadings in this proceeding must be filed directly with the Office of Proceedings, Room 2118, Interstate Commerce Commission, Washington, DC 20423.

Written comments must be concurrently served by first class mail on the United States Secretary of Transportation, the Attorney General of the United States, and the applicants' representatives. Written comments must also be served upon all parties of record within 10 days of service of the service list by the Commission. We plan to issue the service list shortly after comments have been received. Any person who files timely written comments shall be considered a party of record if they so indicate in their comments. In this event, no petition for leave to intervene need be filed. Written comments shall include:

1. The docket number and title of the proceeding;

2. The name, address, and telephone number of the commenting party and its representative upon whom service shall be made;

3. The commenting party's position, *i.e.*, whether it supports or opposes the proposed transaction;

4. A statement on whether the commenting party intends to participate formally in the proceeding or merely comment upon the proposal;

5. An analysis of the issues the Commission must consider in this proceeding. Particular attention should be given to our General Policy Statement for the merger or control of at least two Class I railroads, 49 CFR 1180.1, the statutory criteria, and antitrust policy.

Because we have adopted an expedited procedural schedule and determined that this proceeding constitutes a major transaction within the meaning of our General Acquisition Procedures, 49 CFR Part 1180, as we noted in Decision No. 5 any railroad that intends to file an inconsistent application or a petition for inclusion, trackage rights, or any other affirmative relief requiring an application to be filed with the Commission must submit a general statement of what that application is expected to include by April 12, 1988. This will be considered a prefiling notice without which the Commission will not entertain applications for this type of relief.

Parties shall not be permitted to seek any protective conditions other than those requested in their final list of protective conditions.

Parties seeking to file responsive applications must do so no later than May 6, 1988. Responsive applications include inconsistent applications and petitions for inclusion or any other affirmative relief that requires an application to be filed with the Commission (such as trackage rights, purchase, purchase of a portion, acquisition, extension, construction, operation, pooling, terminal operations, abandonment, etc.). Parties should contact Ellen Goldstein, (202) 275-7969, to obtain docket number for their responsive applications.

Petitions for waiver or clarification by responsive applicants shall be filed no later than April 12, 1988. Each responsive application filed and accepted will be consolidated with the primary application in this proceeding.

In our Decision No. 4, *supra*, we directed all parties to begin discovery immediately. The Commission will not tolerate dilatory tactics in response to discovery requests designed to elicit relevant evidence. A refusal voluntarily to supply information will be treated as an objection to the request for discovery. Responses must be served upon all parties of record, and five copies of those responses must be concurrently filed with the Commission.

The Chief Administrative Law Judge (CALJ) shall conduct a discovery conference on this matter on March 14, 1988, and another on May 12, 1988. He is authorized to resolve any discovery disputes that may arise, and to conduct further discovery conferences as necessary to resolve matters in this proceeding expeditiously. Appeals from the rulings of the CALJ will be strictly construed according to the provisions of 49 CFR 1113.15, *Interlocutory appeals*. We do not anticipate that the CALJ will certify interlocutory appeals to the entire Commission except for good cause clearly shown as provided in the regulations.

We will conclude the evidentiary phase of this proceeding by July 21, 1988. The initial decision will be waived, and the determination of the merits of the applications will be made in the first instance by the entire Commission under 49 U.S.C. 11345.

Any traffic studies and data submitted in opposition to the primary application must use calendar year 1986 data and, where relevant, use depreciation accounting, in order to be comparable with the evidence submitted by applicants. Evidence supporting protestants' responsive applications must use 1986 as the base year, and the depreciation accounting system, and applicants' evidence in opposition to the responsive applications must use 1986 and depreciation accounting.

In calculating the cost savings protestants expect as a result of traffic diverted to applicants' system, protestants must use an avoidable cost approach rather than a Rail Form A approach. *See Burlington Northern, Inc.-Control & Merger-St. L.*, 360 I.C.C. 784, 1106 (1980).

We advise protestants that, if they seek to have the primary application denied or seek conditions if approved, because they contend their ability to provide essential service and/or competition will be harmed, they must present substantial evidence in support of their positions. *See Lamoille Valley R.R. Co.* v. *ICC*, 711 F.2d 295 (D.C. Cir. 1983).

This action will not significantly affect either the quality of the human environment or energy conservation.

It is ordered:

1. The application in Finance Docket No. 32000 and petition in Docket No. MC-F-19057 are accepted for consideration.

2. The parties shall comply with all provisions as stated above.

3. This decision is effective on the date served.

Decided: March 2, 1988.

By the Commission, Chairman Gradison, Vice Chairman Andre, Commissioners Sterret, Simmons, and Lamboley. Commissioner Sterrett did not participate.

Noreta R. McGee,
Secretary.

Schedule For The DRGW-SPT Consolidation

Discovery begins immediately.

Day 1 Application filed.
D+15 Notice of the application published in the **Federal Register**.
D+20 Discovery conference on application held.
D+50 Initial list of protective conditions and description of anticipated inconsistent applications due.
D+75 Comments and protests due on the application; requested conditions and inconsistent applications due.
D+80 Discovery conference on comments, protests, conditions and inconsistent applications held.
D+100 Response to comments, protests, conditions and rebuttal in support of primary application due.
D+125 Rebuttal in support of comments, protests, conditions, and inconsistent applications due.
D+140 Briefs due, all parties.
D+150 Oral Argument.
D+160 Commission Voting Conference.
D+180 Target date for service of decision.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Antitrust Division

The National Cooperative Research Act of 1984—Corporation for Open Systems International

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 et seq. ("the Act"), the Corporation for Open Systems International ("COS") has filed an additional written notification simultaneously with the Attorney General and the Federal Trade Commission on February 9, 1988, disclosing a change in the membership of COS. The additional written notification was filed for the purpose of extending the protections of section 4 of the Act, limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

On May 14, 1986, COS filed its original notification pursuant to section 6(a) of the Act. The Department of Justice (the "Department") published a notice in the **Federal Register** pursuant to section 6(b) of the Act on June 11, 1986, 51 FR 21260. On August 6, 1986, September 30, 1986, January 2, 1987, March 24, 1987, June 12, 1987, July 23, 1987, July 31, 1987, October 5, 1987, October 23, 1987, November 16, 1987, and January 12, 1988, COS filed additional written notifications.

The Department published notices in the **Federal Register** in response to these additional notifications on September 4, 1986 (51 FR 31735), October 28, 1986 (51 FR 39434), February 13, 1987 (52 FR 4671), April 24, 1987 (52 FR 13769), July 21, 1987 (52 FR 27473), October 7, 1987 (52 FR 37539), November 9, 1987 (52 FR 43138), December 4, 1987 (52 FR 46129), December 15, 1987 (52 FR 47642), December 18, 1987 (52 FR 48164), and February 19, 1988 (53 FR 5060), respectively.

On November 29, 1987, the National Bureau of Standards became a member of COS, and on December 29, 1987, Combustion Engineering became a member of COS. On January 1, 1988, E.I. du Pont de Nemours & Company, Inc., The Equitable, GTE Service Corp/Telephone Operations, and the Procter & Gamble Company ceased membership in COS.

Joseph H. Widmar,
Director of Operations Antitrust Division.

[FR Doc. 88-4954 Filed 3-7-88; 8:45 am]

BILLING CODE 4410-01-M

Bureau of Justice Assistance

Narcotics Control Discretionary Grant Program

AGENCY: Bureau of Justice Assistance, Office of Justice Programs, Department of Justice.

ACTION: Final notice.

SUMMARY: The Bureau of Justice Assistance (BJA) is publishing the program announcement for the Narcotics Control Discretionary Grant Program of the "Anti-Drug Abuse Act of 1986" [SUBTITLE K—STATE AND LOCAL LAW ENFORCEMENT ASSISTANCE] and is requesting proposals for announced programs.

EFFECTIVE DATE: March 8, 1988.

FOR FURTHER INFORMATION CONTACT: For general information about the priorities and range of discretionary programs contact James C. Swain, Director, Discretionary Grant Programs Division, 633 Indiana Avenue NW., Washington, DC 20531. For specific information on program requirements, contact the person indicated in the text for each program.

VOL 53
ISS 45
MR 8 1988
MI

ADDRESS: All final applications and concept papers (original plus two copies) should be addressed to the Bureau of Justice Assistance, 633 Indiana Avenue NW., Washington, DC 20531. A copy of the concept paper and/or the application should also be sent to the State Office which administers the Narcotics Control Program in the state(s) affected by the proposed program.

SUPPLEMENTARY INFORMATION: The "Anti-Drug Abuse Act of 1986" that established the State and Local Assistance for Narcotics Control Program was signed into law on October 27, 1986. Section 1311 of the Act sets aside 20 percent of the total amount appropriated for the Program in a special discretionary fund for use by the Director of BJA in carrying out the purposes established in section 1302 of the Act. Those purposes can be summarized as follows:

- —Providing more widespread apprehension of persons who violate state and local laws relating to the production, possession, and transfer of controlled substances;
- —Providing more widespread prosecution of persons accused of violating such states and local laws;
- —Providing more widespread adjudication of cases involving persons accused of violating such state and local laws;
- —Providing additional public correctional resources for the detention of persons convicted of violating state and local laws relating to the production, possession, or transfer of controlled subtances; and, establishing and improving treatment and rehabilitative counseling provided to drug dependent persons convicted of violating state and local laws;
- —Conducting programs of eradication aimed at destroying wild or illicit growth of plant species from which controlled substances may be extracted;
- —Providing programs that identify and meet the needs of drug-dependent offenders;
- —Conducting demonstration programs, in conjunction with local law enforcement officials, in areas in which there is a high incidence of drug abuse and drug trafficking to expedite the prosecution of major drug offenders by identifying major drug offenders and moving these offenders expeditiously through the judicial system.

The Bureau of Justice Assistance solicited recommendations from more than a thousand Federal, state, and local law enforcement, prosecution, judicial, corrections, and treatment practitioners to assist with the development of the priorities for the discretionary grant program. The Bureau of Justice Assistance will respond under separate cover to each respondent. Working groups of practitioners and national experts were established to review the recommendations received, to identify effective programs that are responsive to those recommendations and to recommend funding priorities in each of the program areas.

- —Developing drug data sources, disseminating drug data, and developing techniques for analyzing drug data for the purpose of defining the problem and assessing the impact and effectiveness of drug control efforts;
- —Extending and disseminating programs of proven effectiveness to areas of need;
- —Developing and testing the effectiveness of new programs and practices;
- —Developing programs that focus on key areas of criminal justice dilemme and discretion; and
- —Providing training and technical assistance to assist with the implementation of effective programs and practices.

The strategy for the discretionary programs is to provide direct, and progressively more complete, information and guidance for the states in their development and implementation of statewide strategies for the conduct of the block grant program. The discretionary program is designed to enhance the capacity of each state to define the drug problem and to focus program development on areas of greatest need.

The program strategy also reflects cognizance of: (1) The specific mandate of the Bureau of Justice Assistance and its relationship to the mandates of the Departments of Education and Health and Human Services, thus the programs are limited to criminal justice and to certain key areas of linkage with other social service systems; (2) the anticipated short-term nature of Federal funding, thus programs selected are those which will provide the most direct and lasting impact; and (3) the need to put the money to work in the most immediate, responsible manner, thus program selection has been influenced by the availability of strong interest and expertise in the field. The timetables set out below in each Program Description are established to permit our obligation of these funds by the end of this Fiscal Year.

Application and Award Process:

This program announcement contains proposal requests for the major portion of the approximately $13.7 million available. The Bureau of Justice Assistance has made every effort to establish an open and competitive application process. Applications or concept papers are being requested from government agencies as well as public and private nonprofit organizations. A panel of experts will be established in each of the program areas to review those applications submitted on a competitive basis. Some awards will be negotiated directly with organizations that are uniquely qualified to provide specific services. Such awards are described in this announcement.

All applications will be reviewed to insure that they are cost effective, in addition to meeting the requirements outlined in the program description. Geographic distribution of projects will be considered for all programs that result in grants for implementation in several sites.

It should be noted that the State and Local Assistance Program received only approximately 33 percent of its FY1987 appropriation. Accordingly, many of the programs reflected herein are continuations of previously funded efforts.

Description of Discretionary Programs:

The following is a description of the programs included in this announcement and the due dates for concept papers and applications.

Authority: 1302(1).

Program Title: Crack/Focused Substance Enforcement Program.

Background: This program is a hybrid enforcement approach incorporating elements successfully utilizes in Drug Enforcement Administration (DEA), State, and Local Task Forces, Organized Crime/Narcotics Program (OCN) Task Forces and the old Law Enforcement Assistance Administration Organized Crime Discretionary Grant Program to focus on the enforcement of laws dealing with "Crack" in major urban areas. The Task Force approach to drug enforcement is recognized by enforcement and prosecutorial officials as a viable method for dealing with drug activities and can be readily adopted to the enforcement of a specific drug problem.

Goal/Objective: The goal of the Crack Task Force (CTF) Program is to improve the capabilities of State and Local law enforcement agencies to investigate and immobilize crack cocaine trafficking organizations, and to:

- —Enhance the ability of law enforcement agencies to attack higher-level crack cocaine trafficking organizations significant to their areas;
- —Increase the rates of arrests, prosecution, conviction, drug removals, and asset forfeitures related to crack traffickers and/or organizations;
- —Reduce the incidence of armed robberies and property related crimes committed to support crack cocaine habits;
- —Reduce the incidence of violent crime (i.e., homicides) related to crack cocaine distribution;
- —Improve the ability of state and local officers to develop strong Federal prosecution against crack traffickers by utilizing the current Federal statutes;
- —Increase the utilization of Continuing Criminal Enterprise (CCE) and Racketeer Influenced Corrupt Organisations (RICO) statutes to target and immobilize crack trafficking organizations; and,
- —Facilitate the development, implementation, and dissemination of intelligence information on crack trafficking organizations by all members involved in the CTFs.

Program Description: This particular effort will significantly enhance state, local, and Federal efforts to combat the rapidly growing availability of crack and the threat it poses to our nation's youth. This enhancement reflects the basis of our overall enforcement strategy of integrated operations and makes available the resources to establish viable crack task forces in metropolitan areas where they presently do not exist. The program includes the participation of the U.S. Attorneys and the Drug Enforcement Administration. Federal Agency participation in each project is a program requirement. Grant funds will be used primarily for confidential expenditures, purchase of evidence/purchase of informants (PE/PI), overtime, specialized equipment, if necessary, and some administrative costs. DEA will pledge personnel and technical assistance support to each of these efforts.

Grant Period: Sites will generally be selected from the FY1987 competitive list by BJA based on the developed criteria used by peer panels. The projects duration will be 15 months to include 3 months start-up and 12 months of operation.

Award Amounts: The three individual projects will be funded at approximately $350,000 each for a program total of $1,050,000.

Eligibility Criteria: N/A.

References: **Federal Register** / Vol. 52, No. 53 / Thursday, March 19, 1987.

Due Dates: Since applicants will be selected from the FY 1987 competitive list, no due dates are being announced.

Contact person: The BJA contact for additional information on this program is Richard H. Ward, Chief, Law Enforcement Branch, 202/272–4601.

Authority: 1302 (1).

Program Title: Expert Systems for Residential Burglaries—A Demonstration Program.

Background: This program was first announced in the May 6, 1987, **Federal Register**; however, the Bureau made the decision not to fund the entire program at that time. Rather, under the Justice Assistance Act, we supported Phase One of a two-phase program, which is the design and preparation work for the demonstration program. Phase One included the search and preliminary screening for up to four demonstration sites. This announcement concerns Phase Two. Funding for Phase Two will be made available in two distinct awards, one under the Justice Assistance Act, and another under the Anti-Drug Abuse Act, as research results clearly indicate a direct link between drug crime and burglary. The January 21, 1988, report from the new Drug Use Forecasting (DUF) System shows from 59 percent to 79 percent of arrestees for serious crimes, including burglary, in 12 major cities tested positive for illicit drugs.

The focus of the demonstration program is an artificial intelligence system, based on research originally conducted in the United Kingdom, designed to assist police agencies in the successful investigation of residential burglaries. An advanced system is now being implemented simultaneously in Devon-Cornwall, England, and in Baltimore County, Maryland, utilizing more powerful hardware and more sophisticated software. The Baltimore County system will be operational this month. Operations and results will be evaluated by the Bureau, and if successful, we will proceed with the demonstration phase.

This effort will provide a specific drug crimes focus to this system and analyze trends in drug use and trafficking, to target suppliers, and fences, particularly those who trade drugs for stolen goods.

Goal/Objective: 1. To introduce expert systems to the law enforcement community and demonstrate their effectiveness in narcotics trafficking control.

2. To reduce the developmental costs of these systems by transferring existing operational systems to other sites under an orderly schedule.

Program Description: The Bureau will supplement the existing Cooperative Agreement with the Jefferson Institute for Justice Studies. The Jefferson Institute has been a major contributor to the earlier British research, and is currently responsible for the implementation of the Baltimore County system. Potential sites to install up to four artificial intelligence systems following the Baltimore prototype have been selected by BJA under Phase One. Personnel from demonstration sites will be trained by the Jefferson Institute and Baltimore County, based on the Baltimore system and experience. Technical assistance will be provided to each site in the development of site-specific "rules" for the artificial intelligence system.

Grant Period: The Bureau will enter a Cooperative Agreement with the Jefferson Institute for Justice Studies for a period of 18 months.

Award Amounts: Approximately $275,000 will be awarded under this program.

Eligibility Criteria: N/A.

References: N/A.

Due Dates: The Cooperative Agreement will be negotiated by May 14, 1988.

Contact Person: The BJA contact person for additional information is Fred W. Becker, Law Enforcement Branch, 202/272–4605.

Authority: 1302 (1).

Project Title: Clandestine Laboratory Enforcement Training and Technical Assistance Program.

Background: Safety, legal, administrative, and regulatory issues surrounding the seizure of clandestine laboratories and the prosecution of criminals responsible for the laboratories are very complex. Law enforcement officials are beginning to have a better knowledge of the special kinds of information needed by our uniformed and non-uniformed officers and investigators. This information has been accumulated through the detection and seizure of several hundred clandestine laboratories. These hard won experiences have helped to identify the hazards associated with these operations. Clandestine laboratories contain poisonous, flammable, and explosive chemicals. These chemicals are used, by criminals, with inadequate training and equipment to perform dangerous syntheses of controlled substances. There is a clear danger to the immediate community adjacent to the clandestine laboratory, to our law enforcement officers, and to the officers families.

Goal/Objective: To provide law enforcement officials, prosecutors, state and local government elected officials, and government regulatory agency personnel with the information necessary and the opportunity to learn the protocols and methodologies necessary to safely investigate clandestine laboratories.

Program Description: BJA will negotiate and award a cooperative agreement with the National Sheriffs' Association (NSA) to provide law enforcement officials, state and local government elected officials, and government regulatory agency personnel with the information necessary to act in defense of the health of law enforcement officers assigned to investigate and seize clandestine laboratories, collect dangerous chemicals as evidence for prosecution, and transport and store dangerous chemicals. The NSA has been operating the HAZARDOUS MATERIAL INFORMATION SYSTEM working with State and local law enforcement officials through the National Law Enforcement Telecommunication System. This on-going experience coupled with the ready made organizational structure of the state sheriffs' associations, will enhance BJA's ability to begin the flow of information as soon as possible. All of the state and/or regional training and awareness efforts will include the input of the officials of the Drug Enforcement Administration (DEA).

Grant Period: The National Sheriffs' Association Cooperative Agreement will be funded for an 18 month period.

Award Amount: Approximately $450,000 will be awarded to the National Sheriffs' Association.

Eligibility Criteria: N/A/.

References: N/A.

Due Dates: The Cooperative Agreement will be negotiated by April 15, 1988.

Contact Person: The Bureau of Justice Assistance contact for additional information is Richard H. Ward, Chief, Law Enforcement Branch, 202/272-4601.

Authority: 1302 (1).

Project Title: Clandestine Laboratory Model Enforcement Program.

Background: This program is designed to develop and implement law enforcement, prosecution, and forensic chemist teams in different geographic areas of the country, for the purpose of responding to requests to investigate clandestine laboratories. The program is complementary to the Clandestine Laboratory Enforcement Training and Technical Assistance Program, in that it is envisioned that these teams could also act as technical assistance resource teams for law enforcement agencies and prosecutors, in addition to their actual investigations.

Goal/Objective: To develop law enforcement resources that have a comprehensive understanding of the techniques and methodology to plan, organize, and manage the investigation of clandestine laboratories and the prosecution of the offenders.

Program Description: A number of statewide enforcement projects will be funded to develop and implement centrally coordinated multi-jurisdictional activities to investigate clandestine laboratories and prosecute the perpetrators responsible for these crimes. Emphasis will be on establishment of an interdisciplinary response to clandestine laboratories throughout a state area and a formal mechanism whereby investigative (including forensic chemists) and prosecutorial resources can be allocated, trained, equipped, focused, and managed to achieve maximum criminal and civil remedies with maximum safety. Critical to the success of this program is a shared management system of integovernmental law enforcement and prosecutorial resources. An appropriate representative of the Drug Enforcement Administration must be among the intergovernmental law enforcement members of each project.

BJA will also provide funds for a limited number of clandestine laboratory safety kits, that will be modeled after those kits developed by DEA. The kits will be purchased and maintained by each of the BJA's Regional Information Sharing System (RISS) sites to effect a coordianted delivery of the kits to law enforcement officials who have been certified by DEA to use the kits for entry into clandestine laboratories.

Grant Period: The Regional Clandestine Laboratory Enforcement Projects will be funded for 18 months with an expected three months start up phase that will allow for a fifteen month implementation phase.

Each of the RISS projects will be funded for a period of six months to purchase the safety kits and coordinate subsequent delivery and maintenance activities with DEA for BJA approval.

Award Amounts: Each of the Regional Clandestine Laboratory Enforcement Projects will be funded in the range of $250,000 to $275,000 not to exceed a total amount of $1,400,000. Each of the six RISS projects will be awarded supplemental grants in the amount of approximately $25,000. The total Program amount will be approximately $1,511,600.

Eligibility Criteria: BJA, with input from the DEA, will select applicant law enforcement agencies based on observed capacity to conduct a complete and fully coordinated investigation program in areas in which there is evidence of significant clandestine laboratory operations. Applicant agencies will be limited to agencies with statewide law enforcement jurisdiction. BJA will also consider the following criteria:

—Joint agency management and direction of investigations and prosecutions including the presentation of signed formal agreements;

—A coordinated approach to the clandestine laboratory problem that results in a major impact on illicit drug trafficking not achievable through a single agency;

—Standardized procedures for central collection and dissemination of information for joint case administration and for investigative techniques and approaches;

—organizational and staffing plan;

—anticipated safety protocols to be worked out with local, state, and Federal regulatory agencies and appropriate state and local elected officials;

—standardized procedures for the seizing of the clandestine laboratories and evidence handling, storage, and destruction.

References: N/A.

Due Dates: All applications are due at BJA by April 15, 1988.

Contact Person: The BJA contact for additional information on this program is Richard H. Ward, Chief, Law Enforcement Branch, 202/272-4601.

Authority: 1302 (1).

Project Title: Street Sales Enforcement Program.

Background: In theory, street-level drug enforcement is one of the most effective uses of local police resources to combat drugs and the problem they create. For every innovative program that has succeeded, an almost identical program has been much less successful. This suggests that jurisdictions should design and implement their own program tailored to their own local conditions, and relying on the full range of local law enforcement, municipal, and community resources available. Collection and analysis of drug market and abuse data is important. Without them, the police run the risk of concentrating on less important markets or individuals, or of displacing the

problem to different times, places, and distribution networks. The lack of good information also makes it difficult to redirect efforts once they have begun.

Goal/Objective: To demonstrate effective police efforts to target street level narcotic dealers and buyers through effective planning, investigation, and prosecution.

Program Description: This demonstration program will be offered for the purpose of strengthening urban enforcement and prosecution efforts targeted on street narcotics dealers and buyers.

One project, to be selected from the FY1987 competitive list by BJA, will be funded to plan for and implement or strengthen existing large city narcotic investigation and prosecution efforts targeted at street level narcotic dealers and buyers.

Grant Period: The site will be selected from the FY1987 competitive list by BJA based on the developed criteria used by peer panels. The project will be funded for 18 months with the expectation that it will go through a 3 month organization and planning phase, and a 15 month implementation phase.

Award Amounts: One project will be awarded for approximately $350,000.

Eligibility Criteria: N/A.

References: Federal Register Vol. 52, No. 53/Thursday, March 19, 1987.

Due Dates: Since the applicant will be selected from the FY1987 competitive list, no due dates are being announced.

Contact Person: The BJA contact for additional information on this program is Richard H. Ward, Chief, Law Enforcement Branch, 202/272-4601.

Authority: 1302 (1).

Program Title: National Forensic Crime Laboratory Information System.

Background: DEA's purchases and seizures now largely constitute the System to Retrieve Information from Drug Evidence (STRIDE). The BJA and the DEA have long been interested in developing a comprehensive, nationwide information system that includes the forensic analysis data generated from the buys and seizures of local and state law enforcement agencies, as well as DEA. The local and state system could be used to better describe the drug problem, provide intelligence information, and guide operational and policy issues connected with illegal drug distribution.

The feasibility of such a new system is based on a survey of forensic laboratories conducted in the spring of 1986 by DEA. The survey collected information about organization, staffing, workload, procedures, kind of drug testing information kept by laboratories, and whether labs would report drug testing results to a system that would accumulate such data from many laboratories. In addition, representatives of BJA, DEA, the National Criminal Justice Association, the Criminal Justice Statistics Association, and the American Society of Crime Laboratory Directors met several times during the summer and fall of 1987 to discuss the feasibility of this system. Support for the system appears to be unanimous. It also appears that building a single information system from data provided by a heterogeneous group of forensic crime laboratories is realistic. In the end, however, feasibility depends on the scope, volume, and type of data; data uniformity; data accessibility; and willingness of agencies to cooperate.

Goal/Objective: To develop and implement a comprehensive, nationwide information system that includes the forensic analysis data generated from the buys and seizures of illegal narcotics and drugs by local and state law enforcement agencies, as well as DEA.

Program Description: BJA will negotiate a cooperative agreement with a private nonprofit corporation for the purpose of, (1) providing guidance for decision making and policy in this area; (2) developing a software program to operate a data reporting system; (3) provide for regional training of forensic laboratory personnel to generate uniform data from laboratory to laboratory; and (4) provide technical assistance to a minimum of four forensic crime laboratories for the purpose of creating host sites to demonstrate the system. Program development and implementation must be overseen by a Project Advisory Board made up of Federal, state and local officials.

Grant Period: This Cooperative Agreement will have a duration of fifteen months.

Award Amounts: The award will be in the amount of $300,000.

Eligibility Criteria: Private non-profit organizations are requested to submit proposals. Award recommendations will be made based on the quality of task performance plans, the expertise of applicant staff, and the proposed use of funds.

References: N/A.

Due Dates: The application will be due to the Bureau of Justice Assistance by April 15, 1988.

Contact Person: The BJA contact for additional information on this program is Richard H. Ward, Chief, Law Enforcement Branch, 202/272-4601.

Authority: 1302 (1).

Program Title: Drug Corruption Program.

Background: The Bureau of Justice Assistance is currently spending a great deal of Federal funds to implement drug control strategies in various local and state law enforcement agencies. These programs are intended to impact nearly every level of narcotics and dangerous drug interdiction and control, from street level to organized crime. Regardless of the monies provided by the Federal Government, unless the programs implemented by local and state law enforcement are managed and operated by police officers that maintain high standards of integrity, the programs will be seriously hampered by corruption, abuse, and neglect.

Goal/Objective: To aid local and state law enforcement officials in planning, implementing, managing, and evaluating programs, projects, and processes designed to ensure police integrity against the threat of corruption from illicit drug activity.

Program Description: The Bureau of Justice Assistance will negotiate a Cooperative Agreement with a national law enforcement professional association to study corruption and integrity problems caused by the unusual amounts of money involved with illicit drug and narcotic trafficking. BJA proposes that a front end study into the causes of corruption and the positive things law enforcement agencies are doing to prevent the problems be implemented in four to five sites. The final product will be a monograph to be provided to law enforcement officials upon request.

Grant Period: This program will be funded for a period of 15 months.

Award Amount: This cooperative agreement will be funded up to $375,000.

Eligibility Criteria: National law enforcement professional associations are requested to submit applications for the study. Award recommendations will be made based on the quality of task performance plans, the expertise of applicant staff, and the proposed use of funds.

References: N/A.

Due Dates: Applications are due at BJA by April 15, 1988.

Program Contact: The BJA contact for additional information on this program is Richard H. Ward, Chief, Law Enforcement Branch, 202/272-4601.

Authority: 1302 (1).

Program Title: Problem—Oriented Approach to Drug Enforcement.

Background: Problem—oriented policy is the outgrowth of 20 years of research into police operations that converge on three main themes: Increased effectiveness by attacking underlying

VOL
53
ISS
45
MR
8
1988
MI

problems that give rise to incidents that consume patrol and detective time; reliance on the expertise and creativity of line officers, as well as other agency support systems, to study problems carefully and develop innovative solutions; and closer involvement with the various communities within a jurisdiction to make sure the police are addressing the needs of citizens.

Goal/Objective: To create a controlled substance abuse assessment mechanism that incorporates the views of line officers, department support groups, and citizens for guiding policy and resource allocation to effect a coordinated response to the illicit drug problem by law enforcement officials, medical facilities, local schools, drug treatment facilities, and other community organizations.

Program Description: The purpose of this program is to help police and their communities deal more effectively with illicit drug trafficking and use. Although progress has been made in some areas, the search for solutions remains foremost on the agendas of criminal justice administrators, educators, parents, and the community at large. Success in addressing this problem has been limited due to five complex factors that are present to some degree in every community:

—The diversity of the controlled substances (both legal and illegal) abused and the changing patterns of abuse;
—The dynamic nature of communities in general, their changing population patterns, social interactions, and changing values;
—The inadequacy of information and data measuring techniques to evaluate the extent and scope of the overall problem and underlying causes of the problem;
—The lact of comprehensive strategies to combat the problem; and,
—The lack of full coordination of the resources employed to control the problem.

One to two additional law enforcement sites will be funded to develop reliance on the expertise and creativity of line officers and support personnel to study the drug enforcement problem carefully and develop innovative responses for arrest of drug traffickers and users, to seize illicit drugs and offender assets, and to complete successful prosecutions.

Grant Period: A supplement to the existing Cooperative Agreement will be awarded to the Police Executive Research Forum (PERF) to assist BJA with site selection and to provide assistance to the sites for a period of 18 months.

Award Amount: The supplement to the existing Cooperative Agreement will be awarded in the amount of $200,000.

Eligibility Criteria: One to two sites will be recommended by PERF and selected by BJA according to their ability to:

—Develop a community/police organizational structure for implementing the program;
—Generate a community-based data collections system for selected controlled substance abuse indicators;
—Implement a method for correlation and analysis of controlled substance abused data with census track demographic data;
—Utilize a method which will yield information from line officers and department support services together with data from the community that will allow for problem assessment and a coordinated response to the problem; and,
—Develop a weighting system to establish and demonstrate the relationship between controlled substance and serious criminal activity.

References: N/A

Due Dates: Since these funds will be contracted by PERF to BJA selected sites, no due dates are being announced.

Contact Person: The BJA contact for additional information on this program is Richard H. Ward, Chief, Law Enforcement Branch, (202) 272–4601.

Authority: 1302 (1).

Program Title: Drug Use Forecasting (DUF)

Background: This program provides continued support to efforts by the National Institute of Justice (NIJ) to report on the prevalence and type of drug use among arrestees in American cities. The program was initially based on extensive research conducted by NIJ in two major cities. This research was designed to determine the relative risk to the public resulting from pretrial release of drug using arrestees. One by-product of this effort was the determination that drug use was much more prevalent than anticipated; over half of the arrestees at these two sites having used drugs just prior to the arrest. Testing conducted, under the initial DUF effort, in ten additional cities indicates that these two major cities are representative of the country as a whole.

Goal/Objective: This program will provide, to local, state, and Federal governments, specific information on the prevalence and type of drug use among arrestees, in up to 25 sites and by inference in the country as a whole.

Program Description: An Interagency Agreement will be negotiated with the National Institute of Justice to support periodic urinalysis of arrestees, in up to 25 sites, for the purpose of determining the prevalence of drug use and the kinds of drugs being used. This continuation will provide a broader base of information, by which to determine the rates and kinds of drug use in the nation as a whole, and by which to identify regional variations. The NIJ will identify sites in addition to the twelve now participating, will test a representative sample of arrestees quarterly, and will report on the findings. This effort is directly supportive of BJA efforts underway to document and transfer the testing approach employed in Washington, DC, and will contribute directly to the development of other testing efforts which are a part of this discretionary program and which are envisioned in state block programs.

Grant Period: This award will be for eighteen months.

Award Amount: One award, through an Interagency Agreement, will be negotiated in the amount of $500,000.

Eligibility Criteria: The Interagency Agreement will transfer the funds to the National Institute of Justice; criteria for site selection will be the responsibility of the National Institute of Justice.

References: N/A.

Due Date: Application for the Interagency Agreement will be due to the Bureau of Justice Assistance by April 15, 1988.

Program Contact: The Bureau of Justice Assistance contact for additional information is John Gregrich, Chief, Information Systems Branch, 202/272–4601.

Authority: 1302 (1).

Program Title: State Strategies Assessment.

Background: The Sections of the Anti-Drug Abuse Act, which are administered by the Bureau of Justice Assistance, require each participating state to develop a statewide drug strategy. A data based strategy process is essential to maximize the impact of the program funds on the drug problem; but it is also a substantial burden, given the dynamic state of information related to drugs and crime. Given the nature of the challenge facing state and local criminal justice systems, BJA is intent on providing assistance regarding strategy development and implementation.

Goal/Objective: This program will assist the states and the Bureau with the identification of existing data sources, the use of various data collection and analysis techniques, and the evaluation

of the impact of the statewide drug strategies.

Program Description: The BJA has negotiated a grant with the Criminal Justice Statistics Association to: Provide technical assistance to the states in data collection and analysis techniques; design a scheme for the evaluation of the impact of statewide strategies on the drug problem and the criminal justice system; evaluate the strategy implementation in selected states to determine the factors that are critical to an effective approach to drug control; and develop criteria, based on these evaluations, that BJA should use in reviewing the state strategies. This process was in place for the FY 1987 Formula Grant Strategies. BJA will supplement the project with $200,000 to continue the effort through the FY1988 funding cycle.

Grant Period: This award will be for eighteen months.

Award Amount: One supplemental award will be made in the amount of $200,000 to the Criminal Justice Statistics Association.

Eligibility Criteria: The award will be made to the Criminal Justice Statistics Association, on a non-competitive basis, due to the Association's unique qualifications and relationship with the Statistical Analysis Centers in the states.

References: N/A.

Due Date: The application will be due to the Bureau of Justice Assistance by April 15, 1988.

Program Contact: The Bureau of Justice Assistance contact for additional information is Patricia Malak, Program Policy and Management Division, 202/272–6838.

Authority: 1301 (1).

Program Title: Criminal Justice Management of High-Risk Populations.

Background: The link between drug use, particularly intravenous drug use, and virulent communicable diseases like hepatitis, is well established. Intravenous drug users, injecting a variety of drugs, are now a particularly important conduit for the spread of the acquired immune deficiency syndrome (AIDS). These drug users represent the second largest group of persons to have developed AIDS in the United States. A 1986 study by the Center for Disease Control documented persistent fear of AIDS among law enforcement and corrections personnel. One CDC survey of criminal justice personnel indicates that 93 percent are concerned about the possibility of contracting the disease via methods not associated with its transmission.

To ensure that law enforcement officers and other criminal justice professionals engaged in the control of drug abuse perform their duties effectively and without unnecessary fear, training programs that address the management of individuals arrested and incarcerated for drug trafficking and abuse, and are suspected or diagnosed with AIDS, need to be developed and implemented in a timely and systematic manner.

Goal/Objective: To provide local and state law enforcement and other criminal justice officials engaged in the control of drug abuse with the necessary knowledge and management skills to develop and implement appropriate policies and procedures for offenders suspected of or diagnosed with AIDS.

Program Description: The Bureau of Justice Assistance will negotiate a Cooperative Agreement with the National Sheriffs' Association to provide criminal justice officials with training materials, to serve as a broker and/or provider of technical assistance, and to provide regional training sessions throughout the nation concerned with drug abuse and aids. The National Sheriffs' Association (NAS) has taken the lead among criminal justice organization in developing and delivering comprehensive AIDS training for corrections officers through a 1986 effort with the National Institute of Correction. NSA will use this experience as basis for this program.

Grant period: This Cooperative Agreement will be negotiated for a period of 18 months.

Award Amount: The award will be in the amount of $425,000.

Eligibility Criteria: A Cooperative Agreement will be negotiated with the National Sheriffs' Association (NSA), a national, field based association, expert in AIDS training and technical assistance, and in AIDS related issues facing criminal justice personnel.

References: The National Institute of Corrections/National Sheriffs' Association publications, *AIDS, Improving the Response of the Correctional System,* and *AIDS: 100 Questions and Answers.*

Due Dates: The National Sheriffs' Association's application is due at the Bureau of Justice Assistance April 15, 1988.

Contact Person: The Bureau of Justice Assistance contact person for additional information is Jody Forman, Information Systems Branch, 202/272–4001.

Authority: 1302 (1)

Program Title: Drug Evaluation and Classification Demonstration and Documentation Program.

Background: State and local law enforcement have dealt with a growing number of cases in which impaired drivers have registered below the legal level for impairment on tests generally used for the presence of alcohol. It has been the view of many officials that many of these drivers are impaired by other or additional drugs, for which tests have not been routinely administered. In response to this problem, the Los Angeles Police Department and the Department of Transportation, over the past ten years, have refined a specific procedure and training curriculum for drug impairment recognition and classification. It is a standardized, systematic method of examining a person suspected of a drug related offense to determine: Whether the person is impaired; whether the impairment is drug related; and which of the seven categories of drugs is the likely cause of the impairment.

Goal/Objective: To provide local and state law enforcement agencies with documented procedures for the detection of categories of drugs used by drug offenders.

Program Description: Under an Interagency Agreement, negotiated with the Department of Transportation, the Bureau of Justice Assistance will provide support for additional resources to transfer the Drug Evaluation and Classification Process to pilot sites. Information gathered through this demonstration will be made available to the states to guide state and local Formula Grant allocations for continued technology transfer.

Grant Period: This award will be for a period of 12 months.

Award Amounts: One Award, through a negotiated Interagency Agreement, will be made in the amount of $80,000.

Eligibility Criteria: An Interagency agreement will be negotiated with the Department of Transportation.

References: N/A.

Due Date: The Interagency Agreement will be negotiated by April 15, 1988.

Program Contact: The Bureau of Justice Assistance contact for additional information is John Gregrich, Chief, Information Systems Branch, 202/272–4601.

Authority: 1302 2.

Project Title: Statewide Drug Prosecution Program.

Background: BJA has undertaken a Demonstration Program that is designed to enhance the ability of state and local

BEST COPY AVAILABLE

criminal justice agencies to investigate and prosecute multi-jurisdictional narcotics trafficking crimes through the establishment of statewide prosecution capabilities. In many states, drug trafficking conspiracies and offenders do not contain themselves within one city, county, or judicial district. The diffusion of responsibility among state and local jurisdictions usually works to the advantage of the criminal groups. The enforcement and prosecution communities' response to the conspiracy/offense may be fragmented, duplicative, or limited, resulting in the lack of prosecution or, at least, a reduction in the level or seriousness of the crimes prosecuted.

Goal/Objective: To develop statewide enforcement and prosecution projects to assist state and local law enforcement agencies bring the full impact of state law to bear on specifically targeted narcotics trafficking conspiracies and offenders in states that have statutory authority to undertake statewide prosecutions but lack the necessary resources to initiate activities under these statutes.

Program Description: Two additional statewide enforcement/prosecution projects will be funded to develop and implement centrally coordinated multijurisdictional activities within a state to investigate drug trafficking conspiracies that cross jurisdictional lines and to undertake statewide prosecutions. Emphasis will be placed on the enforcement of both civil and criminal statutes that are similar to the Federal Racketeer Influenced and Corrupt Organizations (RICO) statute, the Federal Continuing Criminal Enterprise (CCE) statute, and Title I of the Federal Anti-Drug Abuse Act. Emphasis will also be placed on a formal mechanism whereby investigative and prosecutorial resources can be allocated, focused, and managed against targeted drug traffickers. Critical to the success of this program is a shared management system of intergovernmental law enforcement/prosecutorial resources.

Grant Period: Projects will be funded for 18 months with the expectation that they go through a 3-month organization and planning phase, and a 15-month implementation phase.

Award Amounts: Two additional sites will be awarded funds in the range of $375,000 to $400,000 each and a potential technical assistance component funded for a total amount of up to $1,200,000.

Eligibility Criteria: Final selection will be based on the following eligibility criteria·

—The capacity of the participating agencies to conduct a complete and fully coordinated approach;

—The presence of requisite legal authority coupled with willingness of executive officials to utilize available authority, as evidenced by:

(1) The presence of an attorney general, statewide prosecutor, or other prosecutorial official with statewide or multi-jurisdictional prosecutive authority, coupled with adequate available investigative authority;

(2) The presence of a special prosecution unit at the state level with appropriate operational experience in prosecuting multi-jurisdictional or complex criminal conspiracy cases in areas such as narcotics trafficking, organized crime, financial or white collar crime, corruption, racketeering forfeiture, and related areas; and

(3) The presence of an office at the state level with criminal law jurisdiction either primary or concurrent with local prosecutors (district attorneys) in the investigation and trial prosecution of all criminal cases, or primary or concurrent selected trial level prosecution in multi-jurisdictional or complex cases (as specified above);

—the existence of a coordinated approach to the narcotic crime problem, as evidenced by:

(1) Statutory authority or formal agreements coordinating local law enforcement/prosecutive agencies and efforts with state agencies; and

(2) Statutory authority or formal agreements coordinating investigative agencies and efforts with prosecutive agencies;

—The availability of investigative resources and capabilities necessary to support prosecutive operations, as accomplished by either an appropriate statewide investigative authority or a formalized agreement of coordinated local agency support to the statewide prosecutive effort;

—Proposed criteria to be used in the selection and prosecution of cases, including jurisdictional definition of categories of criminal cases acceptable and criteria for level of significance and impact, whether by statute, mandate, or official policy; and

—The anticipated impact on illicit drug conspiracies and the criminal justice system as measured by the level of drug related crime, criminal offenders, and criminal activity in such areas as seriousness, type, amount, and nature, along with outcomes, results, cases, arrests, prosecutions, convictions, recoveries, and asset seizures.

References: N/A.

Due Dates: Applications must be postmarked no later than April 15, 1988.

Contact Person: The BJA contact for additional information on this program is Richard H. Ward, Chief, Law Enforcement Branch, 202/272-4601.

Authority: 1302(2).

Program Title: Utilization of State Racketeer Influenced and Corrupt Organization (RICO) Statutes to Interrupt Criminal Enterprises Trafficking in Illicit Drugs and Narcotics.

Background: Following the Federal Government's example, at least 20 states have enacted RICO statutes; however, these statutes vary significantly in the effectiveness of their specific provisions and their utilization as law enforcement and prosecutorial tools to attack criminal enterprise. Four states have been identified as currently utilizing a RICO statute as an effective means of curtailing or eliminating such illegal enterprises. Individual reviews are being completed for each of these States' statutory provisions and the Attorney General's Office successful use of RICO in proceeding against organizations or individuals engaged in drug trafficking.

Goal/Objective: To provide technical assistance and limited financial assistance to selected state Attorneys General offices to enhance their state's RICO statute's provisions and to conduct statewide investigation and approrpiate criminal and civil proceedings to attack and interrupt enterprises trafficking in drugs.

Program Description: This effort will enhance the capabilities of a State's Attorney General, as the highest law enforcement official, to become more effective in coordinating and directing state-wide efforts to disrupt major organizations involved in illegal drug activities. Through technology transfer and direct assistance to selected Attorneys General, improvements to a state's RICO statute will be recommended. The Attorney General's Office will also adopt the procedures and techniques proven most effective in the state successfully utilizing a RICO statute to attack and cripple criminal enterprises. An emphasis will be on Attorneys General assuming the primary role for coordination and assisting in state-wide (multi-jurisdictional) investigations, including the development of a capability for complex finanical investigations associated with the seizure and forfeiture of ill-gotten assets. The Attorney General's Office will follow the investigation with aggressive application of all the

appropriate legal procedures available under the state's RICO statute to remove the organizations or individuals from illegal drug trafficking.

Grant Period: This program will be funded for an eighteen month period.

Award Amounts: Approximately $500,000 will be awarded to provide technical assistance to state Attorneys General; two state Attorneys General offices are to be selected as model demonstration sites and each will be awarded funds up to $100,000, for a program total of $700,000.

Eligibility Criteria: The National Association of Attorneys General is expected to be the grantee. The National Association of Attorneys General is uniquely qualified to serve as the grantee for this effort due to their ongoing work in this area and their organizational network of contracts necessary to successfully achieve this program's objectives.

References: N/A.

Due Dates: Application to be submitted by 15 April 1988.

Program Contact: The Bureau of Justice Assistance contract for further information is Charles M. Hollis, Chief, Prosecution Branch, 202/272-4601.

Authority: 1302(7).

Program Title: Organized Crime/Narcotics Trafficking Enforcement Technical Assistance and Training Program.

Background: A clear picture of the changing nature of organized crime emerged from the records of the President's Commission on Organized Crime. Its methods are brutal, and its scope is pervasive. The principal income-generating activity for organized crime is the production and distribution of illegal drugs, at $80 billion a year.

Development of successful cases against organized crime narcotics trafficking conspiracies requires utilization of unique investigative techniques. Civil and criminal forfeiture of assets are now recognized by law enforcement as an effective means of depriving illicit drug traffickers of economic support and incentive. A formal mechanism whereby shared interdisciplinary resources are centrally coordinated can work to immobilize targeted offenders who manage these networks and organizations.

Goal/Objective: To provide specialized technical assistance and training in support of the Anti-Drug Abuse Act Formula and Discretionary Grant programs in the area of multi-jurisdictional law enforcement and prosecution approaches to narcotics trafficking. This program is designed to assist state and local criminal justice agencies develop and implement shared management programs involving multiple jurisdictions, and directed toward disrupting illegal narcotics trafficking at the highest conspiratorial levels.

Program Description: The Institute for Intergovernmental Research (IIR) will provide and manage the delivery of technical assistance and training services for multi-jurisdictional law enforcement and prosecution efforts. These services will be provided in conjunction with the continuing coordination role of IIR with regard to the Organized Crime Narcotics Trafficking (OCN) Program. Expertise and examples derived from the OCN program will be applied to other jurisdictions experiencing similar problems on an as needed basis after approval by BJA.

The inter-jurisdictional nature of drug trafficking today requires cooperation and coordination not only among multiple law enforcement agencies, but also between law enforcement and prosecution. These coordinated efforts face unique impediments that must be overcome in order to assure effective operations. Technical assistance and training will be provided in areas that include: Geographical differences; varying authorities and disciplines; interagency agreements; case control; case managment and tracking (including the use of micro-computer capabilities); investigative target selection; matters of liability; and, conflicts in agency policy and procedures.

In order to provide service delivery as efficiently as possible, consideration will be given to cost savings, cost sharing by the recipient agencies, regional scheduling, and use of current OJP and OCN resources wherever relevant and practical. Technical assistance needs will be handled by screening and verifying assistance requested, developing a pool of practitioner experts, facilitating and providing assistance, arranging followup, and evaluating service provision. Training needs will be met by developing course curricula, selecting training sites, developing a pool of expert instructors, delivering and supervising services, and evaluation of training.

Grant Period: The duration of the grant will be 18 months.

Award Amounts: One grant will be awarded for $100,000.

Eligibility Criteria: This award will be made to the Institute for Intergovernmental Research to expand BJA efforts under the OCN Program awarded in FY1987.

References. N/A.

Due Date: N/A.

Program Contact: The BJA contact for additional information on this program is Richard H. Ward, Chief, Law Enforcement Branch, 202/272-4601.

Authority: 1302 (7).

Program Title: Organized Crime/Narcotics Trafficking Enforcement Combined Operations Program.

Background: Development of successful cases against organized crime narcotics trafficking conspiracies requires utilization of unique investigative techniques. Civil and criminal forfeitures of assets are now recognized by law enforcement as an effective means of depriving illicit drug traffickers of economic support and incentive. A formal mechanism whereby shared interdisciplinary resources are centrally coordinated can work to immobilize targeted offenders who manage these networks and organizations.

During the implementation of the twenty-one Organized Crime Narcotics (OCN) Trafficking Enforcement projects, funded during FY1987, an awareness developed of the commonality and mobility among the project regions of certain criminal elements and organizations. These criminal cartels, primarily interstate in nature, were observed to operate in two or more OCN project locations as well as in non-project locations.

Global/Objective: To develop regional enforcement projects to assist state and local law enforcement agencies through joint operations with Federal personnel and to remove specifically targeted major organized crime narcotic trafficking conspiracies and offenders through investigation, arrest, prosecution, asset forfeitures and conviction.

Program Description: Funds awarded under this program will be used to augment and expand current activities being administered by the Institute for Intergovernmental Research under the OCN project. Law enforcement officials from participating jurisdictions will identify common targets operating in two or more OCN project sites.

OCN project network cases will move beyond information sharing to shared management of resources in joint, multi-state enforcement operations aimed at the arrest and prosecution of the individual criminals, wherever they may be located within the program area. OCN project network cases will be developed on an ad hoc basis, pooling together a control group of affected agencies for the limited time necessary to secure successful investigative conclusions.

Appropriate participants would include Federal and prosecutive agencies, as well as state and local law enforcement agencies. DEA concurrence would be mandatory in these operations. The control group will develop an investigative plan and an investigative budget, consistent with existing OCN guidelines. For the purpose of each such investigation, one participating state or local agency will agree to be administratively responsible for the network investigative funds.

Grant Period: The project will be funded for 18 months.

Award Amount: $100,000 is allocated for the program.

Eligibility Criteria: The Institute for Intergovernmental Research will be the designated grantee for this program, and will recommend sites to BJA from among existing OC/N projects.

Due Date: N/A.

Program Contact: The BJA contact for additional information about this program is Richard H. Ward, Chief, Enforcement Branch, 202/272–4001.

Authority: 1302 (2)(3)(4).

Program Title: Adjudication Technical Assistance Program.

Background: Since FY1986, The Bureau of Justice Assistance (BJA) has been providing technical assistance in prosecution and court related matters to state and local jurisdictions through the Adjudication Technical Assistance Program (ATAP). During this time, the volume and complexity of drug-related problems confronting courts and other parts of the justice system have become apparent. This supplement will allow the EMT Group, Inc., to augment the current operations of this program to meet the increased need for technical assistance in this area.

Goal/Objective: BJA's Adjudication Technical Assistance program will be given additional resources to assure that it can respond adequately and effectively to state and local jurisdictions needing help in court management, case processing, and new programming related to drug offenses, offenders, and users.

Program Description: The impact of large increases in the number of drug offenders arrested on prosecutor and public offender agencies, pretrial services agencies, courts, and jails; the desire of local justice systems and, frequently, states to implement new technologies such as drug testing as a tool to aid the court in decisions about drug users and drug offenders; and, the growing evidence that a substantial number of all persons arrested, at least in larger jurisdictions, are drug users with problems attendant to that status as well as involved in the underlying crime, have all lead to an increase in the requests for technical assistance made by courts and related justice agencies. These problems are frequently more complex and require greater investment of time and funds than many of the other court management, case processing and new programming issues that ATAP has traditionally addressed. This supplement will allow ATAP to better respond to these types of drug-related problems within the context of the total program now on-going.

Grant Period: The current grant period to end March 31, 1989, will be extended through negotiations.

Award Amount: One award, through the cooperative agreement, will be made for $200,000.

Eligibility Criteria: A supplemental award to the cooperative agreement will be made to EMT Group, Inc.

References: N/A.

Due Date: Supplemental application will be due at BJA by March 31, 1988.

Program Contact: The BJA contact for additional information on this program is Linda McKay, Courts Branch, 202/272–4601.

Authority: 1302 (3).

Program Title: Comprehensive Drug Adjudication Program.

Background: During FY1985, the Bureau of Justice Assistance (BJA) initiated the Drug Monitoring of Drug Arrestees Program (DMDA). Three pilot jurisdictions participate in this program. In FY1987, the Comprehensive Drug Adjudication Program (CDAP) was developed to mount drug testing/monitoring operations in three additional sites. These new sites will be selected by April 1988 and will begin implementing the program in mid-summer. The initial sites under the DMDA Program will have only nine months of operation, which is too short a period of time to fully document and evaluate their success. Additionally, there are numerous advantages to consolidating administration of these two ongoing programs. Therefore, a supplemental award will be made to the Pretrial Services Resource Center to allow continued project operations in the DMDA sites under the Comprehensive Drug Adjudication Program.

Goal/Objective: To allow continued testing and demonstration of the effectiveness, for courts and other criminal justice agencies, of utilizing drug testing as one means of case screening and as a monitoring device during the pretrial stage.

Program Description: Three jurisdictions, Tucson, Arizona; Portland, Oregon; and the State of Delaware, have been participating in the DMDA Program since July 1987. The Program is based on the success of an ongoing Washington, DC project, and involves urine testing of all or a significant number of arrestees to determine drug usage. Test results are utilized both as a means of giving the court relevant information about the arrestees at the time of the initial detention/release hearing and, if the initial test is positive, intermittently, thereafter, during the pretrial process. Such information has increasingly been found to be relevant to the chances of rearrest while on release prior to trial and to the arrestees amenability to treatment, if the arrestee is referred to treatment pending case disposition. Both the complexity and expense involved in initiating such a project suggests that substantial time is necessary for full program development. Therefore, to allow continued review and documentation of the potential of this approach, with the aim of eventually transferring viable program technology to other jurisdictions, BJA will supplement the DMDA Program sites.

Grant Period: A twelve month continuation period, per site, is anticipated.

Award Amount: Three site awards are anticipated with a total program cost of $800,000.

Eligibility Criteria: Only those jurisdictions already participating in the DMDA Program will be considered.

References: N/A.

Due Dates: Applications are due at BJA by July 1, 1988.

Program Contact: The BJA contact for additional information on this program is Jay Marshall, Chief, Courts Branch, 202/272–4601.

Authority: 1302 (3).

Program Title: Enhanced Pretrial Services Delivery Program.

Background: Sampling conducted through research and operational programs confirm that between 50 and 70 percent of arrestees are drug users. However, only 40 percent of these individuals are so identified through existing pretrial screening. Many large and medium sized urban areas lack the technical and financial resources to implement a pretrial service program that can more accurately identify the drug abusing population entering the criminal justice system prepare arrestee profiles to include risk assessments, assist the court in identifying an appropriate pretrail status (detention,

ROR, Conditional Release) for the arrestee, and monitor the arrestee to ensure appearance at trial. Over the past decade, pretrial services agencies have demonstrated their value by providing technical, coordinating, and advisory services that result in a more effective and comprehensive adjudication process. The incidence of drug abuse and resulting arrests, along with the special responses to the drug abuser, underscore the importance of such services being available.

Goal/Objective: The goal of the Enhanced Pretrial Service Delivery Program is to promote the concept and use of pretrial service agencies as a critical tool for the appropriate and expeditious adjudication of drug arrestees.

Program Description: The program will (1) recognize selected pretrial service agencies as demonstration sites, (2) use those sites to promote pretrial services in other jurisdictions through technical and financial assistance, (3) augment traditional drug screening techniques to enhance detection of drug users, (4) develop a more reliable risk assessment/profile of the arrestee, and (5) help jurisdictions build a comprehensive inventory of appropriate conditional release options. The results of this work will enable the courts to ensure drug abusing arrestees/offenders receive appropriate pretrial disposition (i.e., detention, treatment, monitoring). The National Association of Pretrial Service Agencies (NAPSA) and the Pretrial Services Resource Center will coordinate implementation of the program.

Grant Period: A Cooperative Agreement will be awarded for a 12 month effort.

Award Amount: An award will be made for $500,000.

Eligibility Criteria: The award will be made to the Pretrial Services Resource Center in consultation and coordination with the National Association of Pretrial Service Agencies.

References: N/A.

Due Date: The application is due at BJA June 30, 1988.

Program Contact: The BJA contact for additional information is Linda McKay, Courts Branch, 202/272–4601.

Authority: 1302 (3).

Program Title: Large Court Capacity Program.

Background: Last year, the Bureau of Justice Assistance (BJA) and the National Center for State Courts began a major initiative to enhance performance of large jurisdiction courts in light of significant case backlogs created by narcotics trafficking and drug abuse cases. Three major components of the program were: (1) Development and integration of trial court performance standards and recognition of those trial courts that demonstrate achievement of these standards, (2) analysis of case flow activity in trial courts as a means to focus technical assistance resources on courts that exhibit significant delays in case processing, and (3) review of case characteristics to support a different case management approach to further expedite the adjudication of cases.

Goal/Objective: The goal of this program is to promote systematic and permanent improvements in court operations, expecially in large jurisdiction trial courts, so that these courts can provide fair and efficient adjudication of drug arrestees/offenders.

Program Description: Additional funding will accelerate and conclude the development of trial court performance standards and begin a marketing strategy to integrate them into trial courts in large urban areas where drug cases are inundating the system. The Commission on Trial Court Performance Standards will continue to guide the completion of those standards and the marketing strategy. In addition to the standards, attention will be given to the Differentiated Case Management Analysis component. The initial effort will be expanded to include a greater sample of cases from which characteristics can be analyzed and structured to permit better use of court management resources in achieving expeditious adjudication of drug cases.

Grant Period: A supplemental award will be given for an additional 18 months of operation.

Grant Amount: The grant award will be made for $800,000.

Eligibility Criteria: A supplemental award will be made to the National Center For State Courts.

References: N/A.

Due Date: Application will be due at BJA July 1, 1988.

Program Contact: The BJA contact for additional information on this program is Jay Marshall, Chief, Courts Branch, (202) 272–4601.

Authority: 1302 (3)(6).

Program Title: Assessing the Impact of Drug-Related Cases on Community Safety, Court Delay, and Jail Crowding: Significant Problems; Possible Strategies.

Background: The Bureau of Justice Assistance (BJA) has funded the development and demonstration of a number of approaches that have proven themselves in a number of sites. As these approaches are documented and made available to states and local government, it is particularly important that they be shaped in a manner that is directly responsive to the most critical problems being experienced by local criminal justice systems. More specifically, it is essential that recommended programs take full cognizance of the interrelated nature of community safety, court delay, jail crowding, and the manner in which drug-related crime exacerbates the burden already experienced by local criminal justice systems. This program will enable BJA to provide extensive information quickly on the relative burden presented by drug-related cases in three jurisdictions, to assess the relative success of these jurisdictions in addressing this burden, and to determine the relative applicability of approaches now being demonstrated to the problems found.

Goal/Objective: This program will provide, to local, state, and Federal governments, specific information on the particular burden placed on the local criminal justice system by drug-related cases, on the relative success of strategies employed, and on the likely success of strategies under development.

Program Description: A Cooperative Agreement will be awarded to the Department of Criminal Justice, Temple University, to support a modest data collection effort and specific analysis of that data and of data and information already collected. Extensive arrestee information has been gathered in Boston, Miami, and Phoenix in 1984, 1985, and 1987, in support of a National Institute of Justice project on bail guidelines; and access to additional data is still immediately available. Although gathered for another purpose, this information lends itself directly to the detailed analysis of the burden of drug-related cases compared to other cases. It will be analyzed to determine: The economic and resource burden of drug-related cases (e.g., detention days, trial days); the risks to community safety (e.g., pretrial rearrests); the relative success of approaches taken to address these problems; and the likely applicability of approaches and strategies now being demonstrated by BJA. At least two reports will be prepared addressing these four areas and will be made available to state and local criminal justice agencies to inform strategy development. The first, graphically addressing burdens and risks, will be available within six months of project start-up. Information from these reports will contribute directly to BJA efforts to transfer models under development for detection and monitoring of drug using arrestees, focused offender disposition, comprehensive drug adjudication, and problem-oriented policing.

Grant Period: This award will be for twelve months.

Award Amount: One award, through Cooperative Agreement, will be negotiated in the amount of $175,000.

Eligibility Criteria: The Department of Criminal Justice, Temple University, has been selected as uniquely qualified to conduct this program. This Department has demonstrated substantial expertise in each of the areas to be addressed and, more specifically, has collected and possesses the data to be analyzed and has maintained direct access to additional data required at the sites involved.

References: N/A.

Due Date: Application for the Cooperative Agreement will be due at Bureau of Justice Assistance by April 15, 1988.

Program Contact: The Bureau of Justice Assistance contact for additional information is John Gregrich, Chief, Information System Branch, 202/272–4601.

Authority: 1302 (4).

Program Title: Intensive Supervision Probation/Parole Demonstration Program.

Background: BJA has initiated a highly structured Intensive Supervision program to include nine pilot jurisdictions, as well as the provision for national technical assistance, training, and independent evaluation. FY1988 will primarily be a year of consolidation and continuation funding.

Goal/Objective: This program will provide continuation funding for up to three current pilot projects and, possibly, one additional project to be selected from the FY1987 competitive list. The project is aimed at serious offenders who would normally show a high rate of recidivism on probation or parole.

Program Description: This program has two components: (1) The refunding of current Intensive Supervision sites and, possibly, one additional site; and (2) the funding of a national technical assistance project that will include training, consultations, and evaluation.

Each project will involve state-of-the-art risk/ needs assessment, appropriate counseling/treatment services, and the elements of team supervision. Projects may allow for direct sentencing to intensive supervision, or transfer from regular probation or parole caseloads based on fixed criteria. Each project will emphasize surveillance, urinalysis, and treatment standards. Projects may emphasize early intervention in prison or jail settings where probationers are serving a split sentence.

National Technical Assistance Grant: This component will provide continuation funding to the National Council on Crime and Delinquency to provide training, technical assistance, and evaluation for this program.

Grant Period: Continuation awards will be made for up to 12 month project periods. The additional site award will be for 18 months.

Award Amount: $450,000 has been earmarked for this program: $200,000 is set aside for continuation grants; $150,000 may be awarded to one new project site. $100,000 will be awarded to the National Council on Crime and Delinquency to provide national program coordination.

Eligibility Criteria: Demonstration Sites—Eligibility criteria will include: Probation/parole organizational plan; proposed sanction and control mechanisms; client screening system; local resources input; and replication potential.

The additional project will be selected from the original peer panel selections made in FY1987. No new applications are being accepted. Protects must budget travel and per diem for one training session. Training sites will be determined based on the locations of the selected sites. Some weight will be given to geographical distribution of the projects.

National Technical Assistance Grant: The National Council on Crime and Delinquency should submit a SF 424 and a completed application showing their commitment to continue providing the following:

Training workshops to provide operational and management training;

Provision of on-site consultation and information dissemination to assist development and implementation of intensive supervision sites, which may include some ad hoc provision of technical assistance to non-demonstration sites;

Provide administrative oversight of sites selected for program demonstration to include assessment and coordination of services;

Independent evaluation that provides some important assessment of demonstration sites.

Due Dates: Completed applications for demonstration sites and the National Technical Assistance Grant are due on April 15, 1988.

Program Contact: The BJA contact for information on this program is Kim Rendelson, Corrections Branch, 202/272–4605.

Authority: 1301 (4).

Program Title: Comprehensive State Department of Corrections Treatment Strategy for Drug Abuse.

Background: This program was initiated in FY1987 to assist state departments of corrections to expand and upgrade drug treatment and rehabilitation activites in all state institutions. The Bureau of Justice Assistance (BJA) selected Narcotic and Drug Research, Inc. (NDRI) as the national program coordinator to assist with national technical assistance and training.

Six states were selected for Phase 1 Planning contracts for the first year: Connecticut, New York, Delaware, Florida, Alabama, and New Mexico. Three of those states: Florida, Delaware, and New Mexico have received implementation grants of $400,000 each. Technical assistance and training are provided by Narcotic and Drug Research, Inc.

Goal/Objective: The goal of this program is to reduce recidivism rates of major drug using offenders by a range of drug treatment programs and community supervision and treatment.

Program Description: Three new states will be added to the current six states for a total of nine.

The major objective is to develop a range of model state drug treatment activities including: Therapeutic communities, drug resource centers, drug education, and self-help groups that can be integrated into existing and proposed institutions.

An ancillary objective is to train corrections and treatment staffs in the latest techniques of drug treatment.

Lastly, the program has an evaluation objective, whereby both the treatment process and the impact will be assessed.

Grant Period: This project will be extended for twelve months through June 1989.

Award Amount: $1,700,000 is earmarked for this program as follows: $1,200,000 for three implementation grants to the Phase 1 planning states as they complete their implementation plans, and the plans are approved by BJA and NDRI. $500,000 is allocated for three new state Departments of Corrections Phase 1 Planning contracts (average $80,000 per state) and continuation of the technical assistance and training with NDRI.

Eligibility Criteria: Planning Phase (three states): Interested jurisdictions should submit a concept paper of approximately 10–12 pages plus a one page summary budget to Narcotic and Drug Research, Inc., 11 Beach Street, 3rd Floor, Research, New York, New York 10013, Attention: Dr. Harry Wexler, Projector Director.

Eligibility criteria will include:

Analysis of range and scope of current drug addiction in the inmate population; proposed department organizational plan; proposed screening system; state resources available for implementation (including Federal Block Grant funds); and replication potential for other states:

An independent selection panel will screen planning phase papers and make recommendations on a competitive basis. Some weight will be given to geographical distribution of projects.

Reference: A program information packet may be secured by calling Lenny Posner, Narcotic and Drug Research, Inc., at 212/941–2320.

Due Dates: Planning and Phase 1 Concept papers are due at NDRI by April 30, 1988. Sites will be selected by the end of May, and start-up activities are projected for July 1, 1988.

Implementation projects: Applicants must submit completed SF 424 applications and submit them to BJA upon completion of the comprehensive plan. The current planning states should be ready for implementation projects in the Spring of 1988.

Program Contact: The BJA contact for further information is Nicholas Demos, Chief, Corrections Branch, 202/272–4605.

Authority: 1302 (4).

Program Title: Evaluation of Drug Treatment for Individual State Corrections Institutions.

Background: The Bureau of Justice Assistance (BJA) funded six projects in individual state correctional institutions in FY1987. These projects were designed to test a variety of drug treatment and rehabilitation modules.

Goal/Objective: This project will provide for a small scale evaluation of the six projects funded under the FY1987 Program entitled "Drug Treatment for Individual State Corrections Institutions."

Program Description: This project, under a grant to Narcotics and Drug Research, Inc., will gather and analyze data from each of the six state correctional institutions. It will document some of the options available to state correctional institutions for drug treatment and rehabilitation. Three on-site data collection and technical assistance visits are projected for each demonstration site.

Grant Period: This award will be for 12 months.

Award Amount: $100,000 is earmarked for this evaluation project.

Eligbility Criteria: A supplement to the current Cooperative Agreement will be negotiated with Narcotics Drug Research, Inc., New York.

References: N/A.

Due Dates: Completed Application with SF 424 is due at BJA on April 30, 1988.

Program Contact: The BJA contact for this program is Kim Rendelson, Corrections Branch, 202/272–4506.

Authority: 1302(4).

Program Title: Youthful Offender Alternative—Boot Camp/Close Supervision Assessment.

Background: In the past four years, a number of states and counties have initiated youthful offender alterative programs, sometimes called "Regimented Inmate Discipline" programs, or more commonly referred to as "Boot Camp Prison." These projects appear to be experiencing a high degree of administrative support for youthful offenders, showing a potential of lowering recidivism rates. States presently operating Boot Camp Prison projects include Oklahoma, Mississippi, Georgia, Louisiana, Michigan, Florida, and Colorado.

Goal/Objective: The goal of this program is to provide an assessment of six to ten already operating Boot Camp Prison projects. This effort will target those projects involving a high proportion of drug offenders and will determine which are successful for use as possible model projects for dealing with drug offenders. BJA and NIJ are discussing the potential of a cooperative effort in this venture.

Program Description: N/A.

Grant Period: An evaluation effort may be awarded for a period of 12 months.

Award Amount: The award amount is contemplated at approximately $100,000.

Eligibility Criteria: To be announced in a later notice.

References: "Doing a tour in a 'Boot Camp' Prison," Corrections Compendium, Vol. IX, No. 5, dated November 1986.

"Boot Camp, Shock Incarceration: Discipline for Young Offenders," Criminal Justice Newsletter, March 3, 1988.

"Impact of Intensive Incarceration, Project Proposal." National Institute of Justice, 1987, Project #87–IJ–CX–0020.

Due Dates: To be announced in a later notice.

Contact Person: The BJA contact for further information on this program is Kim Rendelson, Corrections Branch, 202/272–4605.

Authority: 1302(6).

Program Title: Drug Treatment in the Jail Setting—National Demonstration Program

Background: This is an expansion of a program first begun in FY1987. The American Jail Association proposed a national research and demonstration program to assist jails and community corrections agencies in improving screening and treatment for drug offenders. This program is an outgrowth of that proposal.

Goal/Objective: This program will assist local jails and community corrections agencies to improve drug screening and treatment services. This program will provide funding for the development of one additional national model for possible replication. While the emphasis will be on drug treatment in large metropolitan jails, training and clearinghouse service will be provided for smaller jails as well.

Program Description: This program is divided into two components:

Funding of one additional pilot project. The project will receive $300,000. The model site will cooperate in the transfer of project components from the model jail to other jails through documentation and host visits.

$100,000 is set aside for the National Program Coordinator for the administration, training, and technical assistance.

Grant Period: The duration of the program will be for 18 months. The suggested start-up date for the new pilot project is July 1, 1988.

Award Amount: $400,000 is earmarked for this program.

Eligibility Criteria: Eligibility criteria for the demonstration sites will include: Level of integration of jail and community treatment components; comprehensiveness of the drug treatment component; support for local correctional and drug treatment officials; and local funding sources committed to the project.

The American Jail Association will be the National Program Coordinator for this program.

References: N/A.

Due Dates: These funds will be used to expand this program, begun in FY1987, to include one additional demonstration site. The additional project will be selected from the original peer panel selections made in FY1987. No new applications are being accepted. The American Jail Association should submit a completed application, SF 424, by April 30, 1988.

Program Contact: The BJA contact for this program is Kim Rendelson, Corrections Branch, 202/272-4605.

Authority: 1302(6).

Program Title: Probation and Parole Drug Testing Standards Project.

Background: The correlation between drug use and crime has been well established through a variety of studies. Drug testing (urinalysis) has been utilized within the criminal justice system as an acceptable method to identify and monitor drug abusing offenders. Within the past year, with the advent of the Anti-Drug Abuse Act of 1986, drug testing has been encouraged. With the increase in drug testing, there has also been an increase in the amount of questions, procedures, and case law regarding drug testing. Each jurisdiction or program within a jurisdiction has virtually had to develop its own procedures for drug testing. This has resulted in confusion, unnecessary duplication of efforts, and in many cases unnecessary law suits that could have been avoided. It is safe to assume that this will continue unless some steps are taken to consolidate current information, review and apply case law, and develop consistent procedures and guidelines for testing of drug abusing offenders.

Goal/Objective: It is the intent of this program to develop standards and guidelines in the probation and parole areas for the testing of drug abusing offenders.

Program Description: A Cooperative Agreement will be awarded to the American Probation and Parole Association (APPA) to develop standards and guidelines for offender drug testing (urinalysis) in the probation and parole systems. The APPA has been chosen because they are the national association that represents the probation and parole professionals and, therefore, the best suited group to develop these standards. The standards will address (but not be limited to) issues, such as who should be tested, when should testing be done, and how the results of the tests should be used. Suggested case law on this subject will be given. Rationale for each standard will be stated. These standards will be written, published, and distributed throughout the probation and parole systems of the country.

Grant Period: This award will be for a period of 12 months.

Award Amount: One award, through a Cooperative Agreement, will be made in the amount of $100,000.

Eligibility Criteria: The Cooperative Agreement will fund the American Probation and Parole Association.

References: N/A

Due Date: The Cooperative Agreement will be due at the Bureau of Justice Assistance by April 15, 1988.

Program Contact: The Bureau of Justice Assistance contact for additional information is Karen McFadden, National Policy Research and Coordination Branch, 202/724-5972.

Authority: 1302(6).

Program Title: Case Management Applications of Drug Use Forecasting (DUF) and TACS Informaiton in Selected Cities

Background: The Drug Use Forecasting (DUF) research on prevalence and types of drug use among offender populations, co-funded by BJA, was conducted by the National Institute of Justice in 12 cities during the FY1987, with an expected expansion to 25 cities in FY1988. The Treatment Alternatives to Street Crime (TASC) program, recognized as effective by criminal justice and drug treatment professionals, is being used increasingly by the criminal justice system as a method for monitoring and managing offenders while on pre-trial release, probation, or parole. There are now over 100 TASC sites in 18 states, several of which are in DUF cities. Basic operational information from all TASC programs is being collected by the National Consortium of TASC Programs (NCTP) under a current BJA cooperative agreement. Data from both the DUF and from the NCTP efforts must be used to inform strategies for national, regional, state, and local case management planning. Therefore, it is wise to gauge the applications and anticipate the implications of information from the DUF and from the TASC baseline data on future treatment and case management resources.

Goal/Objective: This project will provide state and local criminal justice agencies and block grantees with specific quarterly assessments of the national and regional applications and implications of drug use trends among offender populations on case management resources.

Program Description: A Cooperative Agreement will be awarded to the National Consortium of TASC Programs to provide quarterly assessments and analyses of drug use trends, identified in the DUF reports and from other sources, to criminal justice managers and planners. The quarterly assessments will include, but not be limited to, describing the effects of the information on enforcement, probation, parole, and case management resources.

Grant Period: This award will be for 12 months.

Award Amount: One award, through a negotiated Cooperative Agreement, will be made in the amount of $100,000.

Eligibility Criteria: A Cooperative Agreement will be negotiated with the National Consortium of TASC Programs, a national, field based organization of case management programs and current collector of one of the subject data sources.

References: N/A.

Due Date: Application for the Cooperative Agreement will be due at the Bureau of Justice Assistance by April 15, 1988.

Program Contact: The Bureau of Justice Assistance contact for additional information is Jody Forman, Information Systems Branch, 202/272-4601.

General Requirements

Match: Grants may be awarded for up to 100 percent of program or project costs.

Eligibility: Public agencies and private non-profit organizations are eligible to apply in accordance with the specific eligibility requirements set forth in the individual announcements.

Period of Support: Grants may support projects for up to three years.

Financial Requirements: Discretionary grants are governed by the provisions of the Office of Management and Budget (OMB) Circulars applicable to financial assistance. The Circulars along with additional information and guidance are contained in the "Financial and Administrative Guide for Grants," OJP Guideline Manual, OJP M71001C, available from the Office of Justice Programs.

Non-Discrimination: The Anti-Drug Abuse Act provides that no person shall be excluded from participation in, denied the benefits of, subjected to discrimination under, or denied employment in connection with any activity funded in whole or in part with funds made available under the Act. Applicants for discretionary grants are also subject to the provisions of the Title VI of the Civil Rights Act of 1964;

section 504 of the Rehabilitation Act of 1973, as amended; Title XI of the Education Amendments of 1972; the Age Discrimination Act of 1975; and the Department of Justice Non-Discrimination Regulation 28 CFR Part 42, Subparts C, D, E, and G.

Intergovernmental Review of Federal Programs: On July 14, 1982, the President signed Executive Order 12372, "Intergovernmental Review of Federal Programs," to provide state and local governments increased and more effective opportunities to influence federal actions affecting their jurisdictions. Final regulations (28 CFR Part 30) implementing the Order for the Department of Justice were published in the **Federal Register** on June 24, 1983 (48 FR 29238). The Order and the regulations permit states to establish a state process for the review of Federal programs and activities, to select which programs and activities (from a previously published list) they wish to review, to review proposed Federal programs and activities, and to make their views known to the Department through a State "Single Point of Contact" (SPOC). The Order and the implementing regulations revoke the former A-95 clearance process.

Applicants for this program, except those programs national in scope, must submit a copy of their application to the applicant agency State "Single Point of Contact," if one has been established and if the State has selected this program to be covered in its review process. Applications must be submitted to the SPOC for review and comment at the same time they are submitted to BJA. Under the regulations, the State process has at least thirty (30) days to comment on non-competing continuation applications and at least sixty (60) days to comment on all other applications.

George A. Luciano,

Director.

Drug Enforcement Administration

[Docket No. 86-50]

Raymond A. Carlson, M.D.; Revocation of Registration

On May 26, 1986, the Deputy Assistant Administrator of the Drug Enforcement Administration (DEA), Office of Diversion Control, issued an Order to Show Cause to Raymond A. Carlson, M.D., Respondent, of 1417 Stevenson Street, Vinton, Louisiana, proposing to revoke DEA Certificate of Registration AC3408374, and to deny any pending applications for renewal of that registration. The statutory predicates for seeking the revocation of Respondent's registration were that: (1) Respondent was convicted of a felony offense relating to controlled substances; (2) Respondent falsified the application for renewal of his registration; and (3) Respondent's continued registration was inconsistent with the public interest.

Respondent, through counsel, filed a timely request for an administrative hearing on the issues raised in the Order to Show Cause. Following prehearing procedures, an administrative hearing was held before Administrative Law Judge Mary Ellen Bittner in New Orleans, Louisiana on August 25 and 26, 1987.

On December 4, 1987, Judge Bittner issued her findings and conclusions of law, recommending that the Administrator revoke Respondent's DEA Certificate of Registration and deny any pending applications for renewal of his registration. Neither counsel for Respondent nor the Government filed exceptions to the findings and recommended ruling of the Administrative Law Judge.

After careful review of the entire record in this proceeding, the Administrator adopts all of the findings of fact, conclusions of law, and recommended ruling of the Administrative Law Judge.

The Administrator finds that on September 19, 1985, in the Fourteenth Judicial District Court for Calcasieu Parish, Louisiana, Respondent was convicted, after entering a plea of guilty, of one count of unlawful distribution of diazepam, in violation of L.S.A.-R.S. Section 40:969.A, a felony conviction relating to controlled substances.

Respondent's conviction resulted from a criminal investigation into his controlled substances handling activities initiated by the Louisiana State Police. The investigation was initiated after a reliable cooperating individual approached the police to inform them that Respondent had provided her with controlled substances or prescriptions for controlled substances in exchange for sexual favors on numerous occasions over a three year period. She also told the police that on some occasions, Respondent used controlled substances, including Marijuana, with her, and that on one occasion, he gave her money to purchase a small quantity of marijuana for him. In addition, she informed the police that Respondent had requested that the young woman find other individuals to "party" with them. Based upon this information, the Louisiana State Police began an undercover investigation into Respondent's controlled substances handling practices.

In April 1985, a meeting between the Respondent, the young woman, and a female undercover police officer was arranged to take place at a local motel. Prior to the meeting, the young woman called Respondent and asked if he would prescribe some Valium tablets in the name of "Jill Anderson," the alias of the undercover officer, so that she could take them prior to meeting with Respondent later that evening. Respondent agreed and issued a telephone prescription for 50 dosage units of Valium in the name of "Jill Anderson," although he had not examined or even met the officer before issuing the prescription. Later that evening, Respondent met the young woman and the undercover officer at a local motel. After some small talk, Respondent gave each woman two Halcion tablets and one Valium tablet. Shortly thereafter, Respondent removed a syringe and tourniquet from his medical bag. At that point, the undercover officer explained that she did not like receiving injections. Respondent attempted to persuade her to accept the injection, explaining that the young woman never had any problems receiving similar injections in the past. The undercover officer dissuaded Respondent from injecting her, and requested that he give her a pill instead. Respondent acquiesced and gave the officer two broken pieces of a Dilaudid tablet, and was subsequently arrested. Following his arrest, a search of Respondent's medical bag revealed three syringes containing Dilaudid, and a marijuana cigarette. There is no indication that Respondent gave the women controlled substances during that meeting for any legitimate medical purposes. To the contrary, Respondent's actions supported the cooperating individual's earlier information that he would provide her with controlled substances in exchange for sexual favors.

Based upon Respondent's conviction relating to controlled substances, in February 1986, the Louisiana State Board of Medical Examiners suspended his medical license in that state for a period of four months, placed him on probation for a period of five years following his suspension, and ordered that his state Schedule II controlled substance privileges be forfeited during the period of his suspension and probation. In Louisiana, Schedule II controlled substances also include substances listed under Federal Schedules II and IIN. The four-month suspension was to remain in effect from March 19, 1986, to July 18, 1986. During this four-month suspension period, Respondent allowed his state controlled substance license to expire for the period from May 1, 1986, to December 1986.

Since September 1, 1985, Respondent has only been registered with the Drug Enforcement Administration to handle Schedule II and IIN controlled substances. Since Louisiana suspended his state Schedule II privileges as of March 19, 1986, Respondent has not been authorized to handle *any* controlled substances since that date. Despite Respondent's lack of authority to handle controlled substances as of March 19, 1986, he continued to issue controlled substance prescriptions after that date.

The Administrator also finds that between January 1, 1984, and August 31, 1984, Respondent was registered with the Drug Enforcement Administration only to handle Schedule II controlled substances; yet, during that time, he issued several prescriptions for Schedule IIN, III, IIIN, IV and V controlled substances. Between September 1, 1984, and August 31, 1985, Respondent was registered with the Drug Enforcement Administration only to handle Schedule II and IIN controlled substances; yet, during that time, he issued several prescriptions for Schedule III, IIIN, IV and V controlled substances.

The Administrator also finds that on July 10, 1986, Respondent executed an application for renewal of his DEA Certificate of Registration. On the application, Respondent indicated that as of the date of execution he was authorized to handle controlled substances in that State of Louisiana, when, in fact, his license remained suspended in that state until July 18, 1986. In addition, he indicated he was authorized by the State of Louisiana to handle Schedule II and IIN controlled substances, even though his state Schedule II controlled substance handling privileges were suspended until 1991.

Respondent elected not to testify during the administrative hearing. Instead, Respondent presented several character witnesses who testified that he enjoyed an excellent reputation in his community; a psychiatrist who testified that Respondent's unlawful actions were not the result of some psychological disturbance; and his probation officer who testified that he met with Respondent only five or six times, for no longer than ten minutes during each visit, during his one-year probation period.

Under the Controlled Substances Act, at 21 U.S.C. 824(a)(2), a felony conviction relating to controlled substances constitutes a sufficient basis for the revocation of a practitioner's DEA Certificate of Registration. See *Amante L. Medina, M.D.*, 51 FR 45068 (1986). There is no dispute in this instance that Respondent was convicted of a felony offense relating to controlled substances. Therefore, the conviction alone provides sufficient statutory authority to support the revocation of Respondent's DEA Certificate of Registration.

The only issue which remains is whether, notwithstanding the conviction, the Administrator should allow Respondent to remain registered to handle controlled substances. The Administrator finds that Respondent indeed prescribed, dispensed and administered controlled substances for other than legitimate medical purposes on a number of occasions to the young woman who assisted in the undercover investigation which resulted in his arrest and conviction. In addition, he prescribed and dispensed, and attempted to administer controlled substances to an undercover police officer for other than legitimate medical purposes. Furthermore, for a period of several years, Respondent issued several hundred prescriptions for controlled substances he was not properly authorized to handle. Also, Respondent falsified the application for renewal of his DEA Certificate of Registration. Each of these offenses, standing alone, is sufficient to warrant the revocation of Respondent's DEA Certificate of Registration and the denial of his pending application for renewal. When considered together, the offenses clearly demonstrate Respondent's disregard for the laws and regulations which govern the handling of controlled substances.

The Administrator may draw a negative inference from Respondent's failure to testify during the administrative hearing. See *Antonio C. Camacho, M.D.*, 51 FR 11654 (1986); *Book v. United States Postal Service*, 675 F.2d 158 (8th Cir. 1982); and *N.L.R.B. v. Local Union No. 46, Metallic Lathers*, 727 F.2d 234 (2d Cir. 1984). The negative inference which is drawn from Respondent's failure to testify is that he was unwilling to be forthright and completely honest with the Administrative Law Judge and the Drug Enforcement Administration. See *Antonio C. Camacho, M.D.*, supra.

Respondent's character witnesses provided no support to the position that he should be permitted to maintain his DEA Certificate of Registration. Based upon the testimony presented at the administrative hearing, none of the character witnesses knew the full extent of the wrongful acts committed by Respondent. In addition, none of these witnesses was in a position to make an adequate assessment of Respondent's ability to properly handle controlled substances.

The Administrator concludes that, based upon Respondent's conviction, the conduct which led to his arrest and conviction, the evidence that before and after his arrest he issued prescriptions for controlled substances he was not authorized to handle, and the falsification of his application for renewal of his registration, Respondent has demonstrated an absolute disregard for state and Federal restrictions on his handling of controlled substances. Nothing presented during respondent's case persuades the Administrator that Respondent is willing to carefully abide by the laws and regulations governing the handling of controlled substances. Thus, in order to protect the public interest, the Administrator cannot permit Respondent to maintain his DEA Certificate of Registration.

Having concluded that Respondent's registration must be revoked, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), orders DEA Certificate of Registration AC3408374, previously issued to Raymond A. Carlson, M.D., be, and it hereby is, revoked. The Administrator further orders that Respondent's application for renewal of said registration, executed on June 10, 1986, and any other pending applications for renewal, be, and they hereby are, denied.

This order is effective March 8, 1988.

John C. Lawn,

Administrator.

Dated: March 2, 1988.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background: The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments

on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping Reporting Requirements Under Review: As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions: Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, telephone (202) 523–6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW, Room N–1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, Room 3038, Washington, DC 20503 (Telephone (202) 395–6880).

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Revision

Occupational Safety and Health Administration
Access to Employee Exposure and Medical Records 1218–0065; OSHA 243
On occasion; annually
Businesses or other for-profit
1,170,979 Respondents, 1,502,275 burden hours, 0 forms

Requires employers to preserve and provide access to records associated with employees' exposure to toxic chemicals and harmful physical agents. Employee records and access to them are critically important to the detection, treatment and prevention of occupational illness and disease.

Extension

Mine Safety and Health Administration
Quarterly Mine Employment and Coal Production Report (MSHA Form 7000–2)
1291–0006
Quarterly
Businesses and other for profit; small businesses or organizations
80,346 responses; 20,087 hours

Requires mine operators to report to MSHA quarterly employment levels and coal production. The employment and production data when correlated with the accident data provides information for making decisions on improving safety and health enforcement programs, improving education and training efforts, and establishing priorities in technical assistance activities in safety and health.

Extension

Mine Safety and Health Administration
Mine Accident, Injury, and Illness Report (MSHA Form 7000–1)
1219–0007
On occasion
Businesses and other for profit; small businesses or organizations
37,117 responses; 18,558 hours

Mine operators are required to submit Form 7000–1 to MSHA to report on accidents, injuries, and illnesses at their mines shortly after an accident or injury has occurred or a work-related illness has been identified. The use of the form provides for uniform information gathering.

Occupational Safety and Health Administration
Hazard Communication, 1218–0072
Recordkeeping, On occasion
Businesses and other for-profit; Federal agencies or employees; Small businesses or organizations
Number of responses varies; 54,780,000 burden hours, 1 form

The Hazard communication standard requires all employers to establish hazard communication programs to transmit information on the hazards associated with chemicals to their employees by means of container, labels, material safety data sheets and training programs.

Signed at Washington, DC, this 3rd day of March, 1988.

Marizetta L. Scott,

Acting Departmental Clearance Officer.

BILLING CODE 4510-26-M

Assistant Secretary for Veterans' Employment and Training

Secretary of Labor's Committee on Veterans' Employment; Meeting

The Secretary's Committee on Veterans' Employment was established under section 308, Title III, Pub. L. 97–306 "Veterans Compensation, Education and Employment Amendments of 1982," to bring to the attention of the Secretary, problems and issues relating to veterans' employment.

Notice is hereby given that the Secretary of Labor's Committee on Veterans' Employment will meet on April 19, 20 and 21, 1988, as described below:

SUMMARY: The Secretary of Labor's Committee on Veterans' Employment is announcing a National forum on "Workforce 2000 and America's Veterans". The Forum will provide interested parties with the opportunity to present oral and/or written statements of their views, as well as participate in a colloquy concerning the employment and training needs of veterans, the institutions and systems designed to serve those needs, and the Nation's ability to ensure that current and future veterans are able to participate successfully in a rapidly changing labor market. The findings from this Forum will also be used to develop training for those individuals that will be directly involved in providing employment assistance to veterans.

DATE: The Forum will be held on April 19–21, 1988 in Washington, DC.

ADDRESSES: The Forum is open to the public. The first segment of the Forum will be conducted from 9:30 a.m. to 11:30 a.m. on April 19, 1988 in the Great Hall of the U.S. Department of Labor at 200 Constitution Avenue, NW., Washington, DC 20210. The remainder of the Forum, from 1:30 p.m. to 5:30 p.m. on April 19, 8:30 a.m. to 5:00 p.m. on April 20, and 9:00 a.m. to 12:30 p.m. on April 21, will be conducted at the Holiday Inn-Capitol, 500 C Street, SW., Washington, DC. Persons wishing to attend the Forum to present oral or written statements or to observe the proceedings must provide the Secretary's Committee with a completed pre-registration form or other notice of their intent to attend. Such notice must be postmarked on or before April 5, 1988. Pre-registration materials (including a tentative agenda) may be obtained from the National Veterans' Training Institute (NVTI), University of Colorado at Denver, 1250 14th Street, Suite 650, Denver, CO 80202; Tel. (800) 331–0562. Persons not attending the Forum may submit written statements (three copies) by mail, postmarked no later than April 20, 1988 and mailed to NVTI at the above address. Participants are responsible for making their own arrangements with respect to travel, lodging, meals and other costs associated with the Forum. Information regarding area hotels, hotel rates, restaurants, transportation within the Washington, DC area, and handicapped accessibility of Forum facilities will be included in pre-registration materials referenced above.

FOR FURTHER INFORMATION CONTACT: Lesley A. Elliott, Executive Assistant to the Assistant Secretary for Veterans' Employment and Training, 200 Constitution Avenue, NW., Room S–1313, Washington, DC 20210; Tel. (202) 523–9116.

SUPPLEMENTARY INFORMATION: Secretary of Labor Ann McLaughlin has strongly endorsed the recommendation of the Secretary's Committee on Veteran's Employment that the Committee sponsor a National forum to assess the needs of America's veterans as part of the Workforce 2000 initiative launched by her immediate predecessor, Secretary William E. Brock.

The Secretary's Committee on Veterans' Employment is authorized at 38 U.S.C. 2010 and consists of representatives of the Department of Defense, Department of Health and Human Services, Veterans Administration, Office of Personnel Management, Small Business Administration, Equal Employment Opportunity Commission and the federally chartered veterans' service organizations. The Committee is charged with the responsibility for advising the Secretary of Labor on problems and issues relative to veterans' employment and training.

In June of 1987, the Hudson Institute, under contract with the Department, published the seminal study, "Workforce 2000: Work and Workers for the 21st Century", which profiled labor force and labor market trends through the year 2000. The study concluded that the United States' economy will continue the rapid transition from manufacturing, agricultural, and other goods-producing industries, to service industries. Moreover, the nature of the labor force itself will change, with the Nation's population growing older, and its rate of growth slower than at centered on Workforce 2000, the Secretary's Committee, in October 1987, concluded that future development of veterans' employment and training policies and programs should be examined in light of the conclusions of the study.

To this end, Secretary McLaughlin has approved the recommendation that the Committee conduct a National forum which would solicit the views of Members of Congress, Federal, state and local agencies, private sector employers, and interested organizations pertaining to three basic concerns:

1. The employment and training problems and needs of the veteran population and targeted subgroups, particularly severely disabled veterans.

2. The effectiveness, efficiency, and appropriateness of institutions, programs and policies currently in place to address those needs.

3. Legislative or administrative actions aimed at refining or redesigning the Federal Government's veterans' employment and training efforts to serve the current and future veteran workforce.

This Federal Register notice briefly discusses conclusions of the Workforce 2000 study, demographic data on veterans and key issues related to each of the three basic concerns above. It also poses questions to elucidate the issues and elicit facts and views from Forum participants.

The Committee intends the scope of the Forum to be broad, encompassing issues from entrepreneurship to veterans' preference in the public employment, in addition to job placement and job training programs. Participants are encouraged to examine the issue of work and veterans holistically with a view toward developing recommendations for a coordinated and effective National veterans' employment policy

Workforce 2000

The Hudson Institute study identified a number of distinct trends which will define the relationship of workers to the job market in the Year 2000.

The Workplace

- The rapid pace of job creation in the United States will continue through the end of the century. As a result of slower labor force growth, there may be tighter labor markets and—potentially—skill shortages.
- Employment expansion will be accompanied by rapid changes in the nature and composition of jobs, as existing industries and firms adapt and new enterprises emerge in response to new technologies and the pressure of foreign competition.
- As a result of this accelerated rate of change, the culture of the American work place will be profoundly affected: workers will change jobs five or six times during a normal worklife.
- Also, as a result of these technological and competitive pressures, many new and existing jobs will require higher levels of analytic, quantitative and verbal skills.
- These trends will have a significant geographic dimension. While most additional jobs through the Year 2000 will be in large, established metropolitan areas, the highest rates of job growth will be in smaller, developing urban areas, largely in the sun-belt. Labor supply and demand are likely to be in imbalance in many areas.

The Workforce

- There will be a slowdown in the growth of the work force over the next 15 years; the rates of increase will be slower than at any time since the 1930's.
- The pool of young workers entering the labor market will shrink—declining both relatively and absolutely.
- However, the proportion of the youth labor force that is minority will increase substantially.
- Women will account for two-thirds of labor force growth.
- Immigrants will represent the largest share of the increase in population and work force since the first World War
- Thus, most labor force growth through the Year 2000 will come from sectors in the population—women, minorities, immigrants—which have traditionally been underutilized and suffer from labor market problems

Veteran Demographics

The VA estimates the number of war veterans in the United States in the year 2000 at 23,951,000, down approximately 3.5 million from current levels. Barring another armed conflict, which would generate large numbers of new veterans, this population will age relatively more rapidly, than the U.S. population as a whole. The median age of the veteran in the Year 2000 will be 58.11. Separated by era, the population profile is presented below

Era	Population (in 000's)	Median age
Vietnam-Era	7,942	52.95
Korea	3,770	68.76
World War II	5,317	77.34
World War I	8	90.51
Peacetime	7,911	42.62

The Department of Defense estimates that approximately 300,000 new veterans are being released from active duty each year. Thus, the number of post-Vietnam-era veterans will double by the Year 2000 and will be nearly a generation younger—with a median age of 36.8—than their Vietnam-era counterparts.

In 1986, female veterans constitute approximately 4% of the total veterans population, with a median age of 51; by the Year 2000, the VA estimates that that proportion will increase to 5.24%. Significantly, the incidence of women among post-Vietnam-era veterans will be 11 percent by the Year 2000.

Veterans Administration projections for the veteran population in the Year 2000 do not include data on minority veterans. Current information, however, would indicate an increasing proportion of minorities in the veterans population as the end of the century approaches. Currently, minority veterans constitute approximately 14% of the veteran population; 28.8% of all personnel currently in the service, however, are minorities, according to the Defense Data Manpower Center. Of these, 34.5% are women compared with a total of 10.1% representation of women in active service.

The overall decline in the number of living veterans in the coming years will not be distributed evenly among the states. According to the VA, in general, the Northeast and industrial Midwest will lose the most veterans while the sun-belt will lose the fewest veterans. In all 50 states and the District of Columbia, veteran deaths outnumbered new veterans being released from active duty in 1986. Therefore, veteran population gains will only occur in those states experiencing noticeable immigration. Only four states are projected to show veteran population increases between 1986 and 2000—Alaska, Arizona, Florida, and New Mexico.

During the next 14 years, there will be an explosion in the number of veterans aged 65 and older from the current 4.8 million to about 9 million. All states will experience a marked increase in their veteran population aged 65 years and older. There will be some variation in the magnitude of the anticipated growth, however. States in the Southwest and those along the southeast coast (excluding Florida) are expected to show the largest increase (90 percent or more).

Specific projections of unemployment in the veteran population for the Year 2000, of course, are not possible to develop. Some distinctive historical trends may be worthy of focus by the Forum:

1. Unemployment problems among Vietnam-era veterans because significant in the late 1960s and lasted nearly fifteen years. Their unemployment rate peaked at 12.3% or about 880,000 persons in February 1983.

2. There has been seemingly intractable unemployment among disabled and minority veterans, which have remained largely unchanged since the mid-1970's. This incudes the high incidence of disabled veterans who are no longer in the labor force.

3. According to the Bureau of Labor Statistics, while veterans constitute approximately 13–14% of the labor force in the United States, 26 percent of all dislocated workers are veterans.

Key Issues

The United States has historically acknowledged as a national responsibility, the task of ensuring that former members of the Armed Forces are provided the opportunity to enjoy successful and productive lives. A vital element in obtaining that goal is employment. How is that responsibility best discharged in the next twelve years?

In order to frame the discussion, the Secretary's Committee has identified four comprehensive subject areas through which the Forum's deliberations will be structured. Each such area will focus upon needs, policies and programs, and recommendations to optimise job opportunities for the veteran workforce in the Year 2000. In considering these subject areas, participants additionally are urged to be mindful of certain institutional factors currently evident. First, the Administration has endorsed, and Congress is considering enactment of legislation which would elevate the Veterans Administration to Cabinet level. Second, the job and job training programs under the purview of the Department of Labor have become increasingly decentralized over the past decade and a half, and that trend is expected to continue.

The four key subject areas are: labor exchange, training for employment, model programs and new approaches, and veterans' employment and training in the Year 2000. The questions provided under each subject area are not inclusive and the Committee welcomes examination of additional topics.

1. Labor Exchange

The most basic of all employment tasks is matching the potential worker with an employer seeking to fill a position. The public vehicle for this essential labor exchange function has been the 55-year old Federal/State Employment Service system. As old as the Employment Service itself is its role as the keystone of the Federal Government's efforts to assist unemployed and underemployed veterans. Under Federal law, veterans are entitled to preferential services in the system's 2,000 employment offices. Over the past few decades, however, the Employment Service has been burdened with an increasing number of special programs, special emphases, and other administrative and enforcement responsibilities.

a. In absolute terms, how good are the labor exchange services provided to veterans through the Employment Service? Are veterans really the first priority in the system? To what extent are other Employment Service responsibilities diluting this priority?

b. Should the States assume greater or total responsibility for the operation of the Employment Service? What effect might this have on Federal mandates for veterans preference within the agencies?

c. Have veterans, as a class, benefited from the integration of the Employment Service and Job Training Partnership Act (JTPA) programs where such a configuration has been tested?

d. What services should the Employment Service provide to veterans? Which services should other agencies provide?

e. How well coordinated are the service efforts of the Employment Service and the VA? Where is improvement needed, and how should it be accomplished?

f. Should the Employment Service continue to be the central focus of Federally mandated veterans' employment programs? What are the alternatives?

g. How effective are the Federal Contractor Job Listing and Affirmative Action Programs for special disabled and Vietnam-era veterans?

2. Employment Training

For veterans who are job-ready and possess skills in demand in the labor market, a labor exchange may be the only service such veterans need. For those veterans who are unskilled or otherwise not job-ready, however, employment training is essential. The

Workforce 2000 study concludes that without adequate planning, structural unemployment and underemployment will pose difficult problems for large segments of the labor force. With workers changing jobs five or six times during their working lives, the need for training will extend beyond the pool of new labor market entrants, and will be an economic necessity for older workers as well.

Federal policy on skill training for veterans has historically been ambiguous. Programs such as HIRE and the Veterans Job Training Act have periodically been created administratively or legislatively, but have nearly always been short term in nature, responding to cyclical elevations in unemployment, chiefly among Vietnam-era veterans. During the 1970's, disabled and Vietnam-era veterans were identified as target groups in national employment and training programs for the general public, such as the Comprehensive Employment and Training Act (CETA). Yet, such national programs have become increasingly decentralized, with their priorities and operations determined by State and local governments. The passage of the Job Training Partnership Act in 1982 marked the end of most nationally mandated veterans' target group provisions in the Federal Government's major job training programs. Except in Title IV–C at present, veterans are not statutorily given preference over non-veteran JTPA applicants in the program which has averaged around $3.5 billion per year. Amendments to JTPA in 1986 introduced the term "veterans" in a number of places to ensure that JTPA program operators include veterans' representatives in their decision-making processes, and give special attention to veteran participants.

Some policymakers at both the State and local levels have concluded that the VA provides for the job training needs of veterans, and that JTPA and other training programs are supplemental to VA programs. The VA does, in fact, provide for such training, but its resources are limited, and eligibility for programs is restricted. Disabled veterans determined by the VA to have an employment handicap may receive employment training through the VA's Vocational Rehabilitation and Counseling program. Post-Vietnam-era veterans may train on the job and receive an assistance allowance similar to that granted for the veteran in an educational institution. Since 1983, the VA has administered the Veterans' Job Training Act in cooperation with the Department of Labor, a temporary program on-the-job training for Korean conflict and Vietnam-era veterans, with liberalized provisions for disabled veterans of those armed conflicts. The program has been extended three times by Congressional action.

a. Are current job training programs which are designed for the general public (e.g., JTPA) suitable to the needs of unemployed and underemployed veterans? How accessible are JTPA programs to veterans?

b. Should the same priority mandated by Federal law for veterans in the Employment Service be extended to apply to Federally funded job training programs?

c. Separate from JTPA Title IV–C, should there be a permanent, separate job training program for veterans? If so, should VJTA serve as a model for such a program? What types of training, other than on-the-job, would be useful to veterans?

d. How well does the VA's Vocational Rehabilitation program succeed in placing veterans into jobs for which they have been trained? Should eligibility for the program be broadened or restricted?

e. Should Congress create a separate program for dislocated workers who are veterans? Should veterans be targeted in a general dislocated workers program, and how?

3. Model Programs and New Approaches:

Beyond, and in concert with, the labor exchange and job training programs which serve veterans are new policies and experimental programs which the Secretary's Committee asks be examined for their potential for better serving veterans during the next twelve years. Some of these programs involve other Federal agencies, such as the Department of Defense, Small Business Administration and Office of Personnel Management. Others are funded under the veterans programs portion of Title IV of JTPA.

a. What specially targeted programs have had the most success in effectively serving:

- Disabled veterans.
- Female veterans.
- Minority veterans.
- Dislocated veterans.
- Veterans recently-separated from military service.
- Other target groups.

b. Have veterans' unemployment, underemployment, and other employment and training-related data (including data on the targeted groups specified above) been adequate to determine needs and assess service outcomes?

c. Assess the value of current pilot projects funded under Title IV–C of JTPA, including:

- Entrepreneurship programs.
- Military transition programs.
- Jobs for homeless veterans.

d. What are the limitations and other difficulties of JTPA Title IV–C generally? What changes should be made, either through administrative or legislative initiatives?

e. How effective is veterans preferences in the federal sector? How effective are the Disabled Veterans Affirmative Action, Veterans Readjustment Appointment and 30 percent Disabled Veterans Excepted Appointment programs in assessing eligible veterans in obtaining Federal employment?

f. What new technologies should be tapped to improve the quality and raise the level of employment and training services to veterans?

g. How can national veterans' service organizations best apply their vast human resources and ready access to millions of veterans to assist veterans in obtaining the skills and opportunities for personal and economic growth?

4. Veterans Employment and Training in the Year 2000

In examining the veterans' employment and training system, it is a relatively easier task to identify present needs and deficiencies, and the Secretary's Committee is hopeful that the Forum will elicit ideas to strengthen the ability of today's veterans to participate successfully in the workforce. But Workforce 2000 makes clear that, with the slow demise of regional industries, spreading worker dislocation and changes in the nature of work and available workers, that the labor market will be profoundly different by the Year 2000. While recognizing that the process of change is a continuum, the Committee wishes to examine the veterans' employment and training system and how that system might best be configured during the next twelve years to prepare for change.

a. What balance of Federal, State, local and private resources will optimize the delivery of job and job training services to veterans twelve years hence?

b. What relevance will existing services have to the emerging needs of the veterans' labor force at the end of the century? These services include:

- Labor exchange.
- VJTA and Targeted Jobs Tax Credit.
- Vocational Rehabilitation.
- JTPA and dislocated workers programs.

c. What other employment and training initiatives should or could be developed as an alternative or in addition to the above programs?

d. Should all veterans employment and training programs be gathered under a single agency or Department at the Federal level? If so, which department should it be?

- Veterans Administration.
- Department of Labor.
- Other.

e. If employment and employment training responsibilities remain divided among several State and local agencies, what effective means of coordination can be developed to avoid duplication of effort and to provide a smoothly functioning partnership for serving unemployed veterans?

f. What role should the Employment Service and JTPA service providers play in referring qualified individuals to employment and training opportunities in the U.S. Armed Forces or in assisting them to prepare for entry into military service?

g. What new programs and/or policies not now in existance should be developed to meet new needs which will emerge as we approach the Year 2000?

h. As part of the Total Force model in national defense, should National Guard and reserve members receive special services from employment and job training programs? If so, what services should they receive? Would their delivery impinge upon priorities for veterans?

i. Do veterans benefit more from separate employment and training programs, or from integration of veterans services in programs designed for the general public?

j. What will be the cost of reconfigured systems considered at the Forum? What cost-saving elements can be included in a reconfigured system?

k. What role would the U.S. Armed Forces play in assisting soon-to-be-separated military personnel in preparing for the civilian workforce, and considering continued military active duty service or entering Guard or Reserve components?

Forum Report

A draft report of Forum findings and recommendations will be prepared by the National Veterans' Training Institute which will record the Forum proceedings audio-visually for approval by the Secretary's Committee on Veterans' Employment. This information will be used by NVTI to build training courses for employment and training staff who will be directly involved in the delivery and provision of services of veterans through the year 2000. The written Forum Report will be widely distributed. All Forum participants will receive copies.

Signed at Washington, DC, this 3rd day of March, 1988.

Donald E. Shasteen,

Assistant Secretary for Veterans' Employment and Training.

BILLING CODE 4510–79–M

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance; Bethlehem Rebar Industries, Inc.

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than March 18, 1988.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than March 18, 1988.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213.

Signed at Washington, DC, this 29th day of February 1988.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

APPENDIX

Petitioner: Union/workers, firm—	Location	Date received	Date of petition	Petition No.	Articles produced

BILLING CODE 4510–30–M

[TA-W-20,213]

Dismissal of Application for Reconsideration; National Aluminum Corp., Murrysville, PA

Pursuant to 29 CFR 90.18 an application for administrative reconsideration was filed with the Director of the Office of Trade Adjustment Assistance for workers at National Aluminum Corporation, Murrysville, Pennsylvania. The review indicated that the application contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued.

TA-W-20,213; National Aluminum Corporation, Murrysville, Pennsylvania (February 24, 1988)

Signed at Washington, DC, this 26th day of February 1988.

Marvin M. Fooks,

Acting Director, Office of Trade Adjustment Assistance.

[FR Doc. 88-5027 Filed 3-7-88; 8:45 am]

BILLING CODE 4510-30-M

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance; Westran Corp.

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period February 22, 1988–February 26, 1988.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have deceased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-20,362; Westran Corp., Alloy Steel Div., Duncan, OK

TA-W-20,310; GBR Fabrics, Inc., Teaneck, NJ

TA-W-20,311; Jeremy Industries, Inc., Teaneck, NJ

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA-W-20,366; Control Data Corp., Arden Hills, MN

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,372; M & G Convoy, Inc., New Stanton, PA

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-20,358; Peabody Coal Co., Montcoal, WV

U.S. imports of coal are negligible.

TA-W-20,359; Peabody Coal Co., Twilight, WV

U.S. imports of coal are negligible.

Affirmative Determinations

TA-W-20,453; Melinda Frocks, Inc., Newark, NJ

A certification was issued covering all workers of the firm separated on or after January 25, 1987–January 31, 1988.

TA-W-20,341; Crosetti Frozen Foods, Watsonville, CA

A certification was issued covering all workers of the firm separated on or after August 1, 1987.

TA-W-20,376; Samax Dress Co., Inc., New York, NY

A certification was issued covering all workers of the firm separated on or after December 8, 1986.

TA-W-20,379; Volkswagen of America, Inc., Valley Forge, PA

A certification was issued covering all workers of the firm separated on or after December 18, 1986.

TA-W-20,380; Westinghouse Electric Corp., Heavy Industry Motor Div. Round Rock, TX

A certification was issued covering all workers of the firm separated on or after December 17, 1986.

TA-W-20,381; Action International Ltd, Mt. Clemens, MI

A certification was issued covering all workers of the firm separated on or after August 1, 1987.

TA-W-20,377; Texaco, Inc., New Orleans Operational Div. & Southern Exploration Div., Headquartered in New Orleans, LA and Operating at Various Locations in the Following States:

TA-W-20,377A	Alabama
TA-W-20,377B	Arkansas
TA-W-20,377C	Connecticut
TA-W-20,377D	Delaware
TA-W-20,377E	Florida
TA-W-20,377F	Georgia
TA-W-20,377G	Louisiana
TA-W-20,377H	Maine
TA-W-20,377I	Maryland
TA-W-20,377J	Massachusetts
TA-W-20,377K	New Jersey
TA-W-20,377L	New York
TA-W-20,377M	North Carolina
TA-W-20,377N	Pennsylvania
TA-W-20,377O	Rhode Island
TA-W-20,377P	South Carolina
TA-W-20,377Q	New Orleans Operational Division, All Locations in the State of Texas

A certification was issued covering all workers of the firm in various locations in the States Listed above separated on or after December 17, 1986.

I hereby certify that the aforementioned determinations were issued during the period February 22, 1988–February 26, 1988. Copies of these determinations are available for inspection in Room 6434, U.S. Department of Labor, 601 D Street, NW. Washington, DC 20213 during normal business hours or will be mailed to persons who write to the above address.

Dated: March 1, 1988.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M-88-2-C]

Arch on The North Fork, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Arch on The North Fork, Inc., P.O. Box 928, Jackson, Kentucky 41339 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations for hazardous conditions) to its Nix Branch Mine (I.D. No. 15-14352) located in Breathitt County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that return aircourses be examined in their entirety on a weekly basis.

2. The mine elevation is 1437 feet which is 350 feet plus above river drainage and there is no history of methane in the coal seam.

3. Due to very poor conditions, roof falls, mud and water, certain areas of the mine are too hazardous to travel and efforts to rehabilitate would be hazardous and neither practical nor feasible.

4. As an alternate method, petitioner proposes that two monitoring stations will be maintained in order to evaluate bleeder return aircourses. In support of this request, petitioner states that—

(a) Methane and air readings will be made by a certified person on a weekly basis. A record of the examinations, including the date, time, and initials of the person making the readings, will be kept in the mine office and on a chalkboard at each measuring station;

(b) Methane will not be allowed to accumulate in the return aircourses beyond legal limits;

(c) The measuring stations will be maintained in a safe condition at all times;

(d) A map showing the area around the measuring station along with the direction of airflow will be posted at each station; and

(e) Persons working in the area will be instructed in emergency evacuation procedures and will be equipped with self-contained self-rescuers.

5. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 7, 1988. Copies of the petition are available for inspection at that address.

Dated: February 29, 1988.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 88-5029 Filed 3-7-88; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-87-44-M]

Cripple Creek & Victor Gold Mining Co.; Petition for Modification of Application of Mandatory Safety Standard

Cripple Creek & Victor Gold Mining Company, P.O. Box 191 Victor, Colorado 80860 has filed a petition to modify the application of 30 CFR 56.14001 (moving machine parts) to its Heap Leach Project (I.D. No. 05-04050) located in Teller County, Colorado. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that gears; sprockets; chains; drive, head, tail, and takeup pulleys; flywheels; couplings; shafts; swablades; fan inlets; and similar exposed moving machine parts which may be contracted by persons, and which may cause injury to persons be guarded.

2. As an alternate method, petitioner proposes to enclose the line shaft area in a fence with a locked gate in lieu of guarding each piece of equipment individually. In support of this request, petitioner states that —

(a) The feeders are controlled by a clutch handle that extend to a guarded walkway on the opposite side of the belt;

(b) The locked gate contains an electrical contract that is connected to the interlocking system on the entire crushing area. As soon as the gate is opened, the power to the conveyors, pan feeder, and crushers is disengaged. Upon closing the gate, each piece of equipment must be manually restarted;

(c) Warning signs will be posted indicating the interlocking system;

(d) With the control, lever on the opposite side of the feeders, the operator will never need access to the line shaft. Maintenance personnel will be the only ones requiring access to the area;

(e) The lock-out procedure for entering the area will require the entire line shaft, conveyor belt and jaw crusher to be locked out both locally and at the motor control center; and

(f) The door to the area will be kept by Mill Management and Shift Supervisors.

3. Fot these reasons, petitioner requests a modification of the standard.

Request for Comments

Person interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 7, 1988. Copies of the petition are available for inspection at that address.

Dated: February 29, 1988.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 88-5030 Filed 3-7-88; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-88-1-C]

Cross Mountain Coal, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Cross Mountain Coal, Inc., P.O. Box 547, Lake City, Tennessee 37769 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations for hazardous conditions) to its Katie No. 1 Mine (I.D. No. 40-02648) located in Campbell County, Tennessee. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that return aircourses be examined in their entirety on a weekly basis.

2. Due to roof falls certain areas of the mine are unsafe to travel. Miners walking in these areas are constrantly exposed to changing roof conditions which have become hazardous, and attempts to restore these areas have been unsafactory.

3. As an alternate method, petitioner proposes to establish an air measure station. In support of the request, petitioner staters that—

(a) Access to and from the measuring station will be kept in a travelable and safe condition;

(b) A record book containing current air flow and methane readings will be located on the surface;

(c) Checks for methane and the velocity and direction of air flow will be made by a qualified person as needed, but at least weekly;

(d) All access areas to the roof falls will be timbered and dangered off;

(e) The roof falls have not materially affected the efficiency of the mine's ventilation system; and

(f) No escapeways travel through the affected areas.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 7, 1988. Copies of the petition are available for inspection at that address.

Dated: February 29, 1988.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 88-5031 Filed 3-7-88; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-88-7-C]

Davidson Mining, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Davidson Mining, Inc., 41 Eagles Road, Beckley, West Virginia 25801 has filed a petition to modify the application of 30 CFR 75.1105 (housing of underground transformer stations, battery-charging stations, substations, compressor stations, shops, and permanent pumps) to its No. 1 Mine (I.D. No. 46-08898) located in Boone County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that air currents used to ventilate structures or areas enclosing electrical installations be coursed directly into the return.

2. As an alternate method, petitioner proposes to house the belt transformer in a fireproof structure, and not return the air currents that will be ventilating this structure directly into the return. In support of this request, petitioner states that—

(a) The doors of the fireproof structure will be held open on each end by heat links that would melt and cause the door to close automatically with a rise in temperature;

(b) A chemical fire suppression system will be installed over the transformer; and

(c) A fire sensor that will give an alarm at an attended surface location will be installed over the transformer.

3. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 7, 1988. Copies of the petition are available for inspection at that address.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

Date: February 29, 1988.

[FR Doc. 88-5032 Filed 3-7-88; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-88-12-C]

Emco Coal Company Inc.; Petition for Modification of Application of Mandatory Safety Standard

Emco Coal Company, Inc., HC 66, Box 1012, Barbourville, Kentucky 40906 has filed a petition to modify the application of 30 CFR 75.313 (methane monitor) to its Mine No. 1 (I.D. No. 15-16250) located in Knox County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that a methane monitor be installed on any electric face cutting equipment, continuous monitor, longwall face equipment and loading machine and is required to be kept operative and properly maintained and frequently tested.

2. Petitioner states that no methane has been detected in the mine. The three wheel tractors are permissible DC powered machines, with no hydraulics. The bucket is a drag type, where approximately 30-40% of the coal is hand loaded. Approximately 20% of the time that the tractor is in use, it is used as a man trip and supply vehicle.

3. As an alternate method, petitioner proposes to use hand held continuous oxygen and methane monitors in lieu of methane monitors on three wheel tractors. In further support of this request, petitioner states that:

(a) Each three wheel tractor will be equipped with a hand held continuous monitoring methane and oxygen detector and all persons will be trained in the use of the detector;

(b) A gas test will be performed, prior to allowing the coal loading tractor in the face area, to determine the methane concentration in the atmosphere. The air quality will be monitored continuously after each trip; provided the elapse time between trips does not exceed 20 minutes. This will provide continuous monitoring of the mine atmosphere for methane to assure any undetected methane buildup between trips;

(c) If one percent of methane is detected, the operator will manually deenergize his/her battery tractor immediately. Production will cease and will not resume until the methane level is lower than one percent;

(d) A spare continuous monitor will be available to assure that all coal hauling tractors will be equipped with a continuous monitor;

(e) Each monitor will be removed from the mine at the end of the shift, and will be inspected and charged by a qualified person. The monitor will also be calibrated monthly; and

(f) No alterations or modifications will be made in addition to the manufacturer's specifications.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. [FR Doc. 88-5033 Filed 3-7-88; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-88-25-C]

Helvetia Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Helvetia Coal Company, Box 729, Indiana, Pennsylvania 15701 has filed a petition to modify the application of 30 CFR 75.1100-2(b) (quantity and location of firefighting equipment—belt conveyors) to its Lucerne No. 9 Mine (I.D. No. 36-05374) located in Indiana County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that waterlines be installed parallel to the entire length of belt conveyors and be equipped with firehose outlets with valves at 300-foot intervals along each belt conveyor and at tailpieces. At least 500 feet of firehose with fittings suitable for connection with each belt conveyor waterline system is required to be stored at strategic locations along the belt conveyor.

2. Petitioner states that during cold weather periods, the waterlines used for fire protection along the slope belt freezes and becomes inoperative.

3. As an alternate method, petitioner proposes to utilize a dry waterline system, which will be pressurized with water by manually activating a water valve either at the top of the slope (surface) or at the bottom of the slope (underground), from October 1 through May 1. In support of this request, petitioner states that—

(a) The dry waterline will be equipped with firehose outlets with valves at 300-foot intervals;

(b) At least 500 feet of firehose with fittings suitable for connection to the valves will be stored at the top of the slope and at strategic locations along the belt conveyor;

(c) All persons in the vicinity of the slopes will be instructed as to the operation of the system;

(d) Sufficient water will be available for the system at all times;

(e) A pressure gauge will be installed on the surface to indicate that a supply of water under pressure is available to the system; and

(f) The water supply system on the surface will be protected from freezing and will be easily accessible for manual operation.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 7, 1988. Copies of the petition are available for inspection at that address.

Patricia W. Silvey,

Director Office of Standards, Regulations and Variances.

Date: February 29, 1988.

[FR Doc. 88-5034 Filed 3-7-88 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-88-21-C]

Jim Walter Resources, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Jim Walter Resources, Inc., P.O. Box C-79, Birmingham, Alabama 35283 has filed a petition to modify the application of 30 CFR 75.326 (aircourses and belt haulage entries) to its No. 7 Mine (I.D. No. 01-01401) located in Tuscaloosa County, Alabama. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirements that entries used as intake and return aircources be separated from belt haulage entries, and the belt haulage entries not be used to ventilate active working places.

2. As an alternate method, petitioner proposes to develop a three entry system using split ventilation, in which the No. 1 entry will be a future tailgate entry and a return aircourse; the No. 2 entry will be the track entry an intake aircourse; and the No. 3 entry will be the longwall belt entry and a return aircourse.

3. In support of this request, petitioner states that in order to maintain the quantity of air required by mining conditions, the belt needs to be located in the return aircourse. The three entry system using a 24 foot wide intake aircourse and split system of ventilation will provide minimum pressure loss and maximum air quantities for full panel drivage. A split system of face ventilation will prevent mining support operation for being down wind of the continuous miner.

4. In further support of this request, petitioner states that—

(a) Bulkheads will be provided between the belt drive and the point where air in the belt entry flows into the return aircourse. This will maintain the conveyor belt electric motor and starter in an intake split of air coursed directly to the return:

(b) The alternate escapeway will be in the return aircourse other than the belt return aircourse;

(c) An atmospheric monitoring station capable of monitoring for methane and carbon monoxide (CO) will be located immediately inby the point where leakage through the bulkhead and air in the belt return mix. Due to leakage anticipated across the line curtain at the feeder, an additional methane and CO monitoring station will be located 500 feet downwind of the tailpiece and also at the normal 2,000 foot intervals;

(d) An audible and visual alarm will be activated when the methane level exceeds .9 percent or when the CO level exceeds 10 parts per million (ppm) above ambient air. An investigation will be made to determiene the cause for the alert, and when the source is discovered, The CO level will be reduced to acceptable levels. When the methane level exceeds 1.0 percent or the CO level exceeds 15 ppm above ambient air, the belt conveyor center will deenergize automatically. All miners in the affected area will be evacuated to the monitor location outby the location of the monitor detecting alarm level concentrations. In the event that a fire is encountered, the evacuation plan will be implemented. When the methane alarm signal sounds minor changes and adjustments in airflow will be made during the time that the conveyor belt is deenergized. The belt conveyor power center will be arranged for manual reset only;

(e) The system will be capable of giving warning of a fire for a minimum of four hours should the power fail;

(f) The system will be capable of monitoring electrical continuity and detecting electrical malfunctions;

(g) The system will be visually examined at least once every day that coal is produced and tested for functional operation weekly to insure the system is functioning properly. The system will be calibrated with known concentrations of CO and methane air mixtures at least monthly;

(h) If the system or any portion of the system is deenergized for routine maintenance of for failure of a sensor unit, the belt conveyor will contianue to operate and qualified persons will continuously patrol and monitor for CO and methane;

(i) The belt return aircourse will be examined as required; and

(j) All electric components in the return downwind of the feeder will be maintained permissible or intrinsically safe. The feeder will be outby the last open crosscut and will be maintained on intake air along with the sequence switch located at the tailpiece. The alarm located at the feeder will also be on intake air.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

[Docket No. M-88-20-C]

Kerr-McGee Coal Corp.; Petition for Modification of Application of Mandatory Safety Standard

Kerr-McGee Coal Corporation, P.O. Box 727, Harrisburg, Illinois 62946 has filed a petition to modify the application of 30 CFR 75.902 (low- and medium-voltage ground check monitor circuits) to its Galatia Mine 56-1, No. 6 Seam Fluids Borehold, (I.D. No. 11-02752) located in Saline County, Illinois. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirements that low- and medium-voltage resistance grounded systems include a fail-safe ground check circuits to monitor continuously. The ground check circuit is required to cause the circuit breaker to open when either the ground or pilot check wire is broken.

2. As an alternate method, petitioner proposes to use 480 volt, three phase, power distribution without the use of the ground check circuit in the No. 6 seam fluids borehole. In support of this request, petitioner states that—

(a) The fluids borehole is constructed with concrete floors with the roof and rib wire meshed and sealed with a nonhazardous pressure applied fibrous sealant;

(b) Galvanized rigid conduit will be used throughout the fluids borehole area. The conduit will be supported by strut fastened to the roof.

(c) All electrical panels, starters, boxes, etc., will be of type NEMA 12;

(d) All 480 volt, three phase equipment will be stationary and connected by galvanized rigid conduit;

(e) All equipment will be bonded to the grounding system through the conduit system and through a ground wire pulled in the conduit system;

(f) Power will be fed to NEMA 12 electrical panels from a mine duty distribution box by MSHA approved cables and protected at the distribution box by MSHA approved ground monitor, ground fault, under voltage release, thermal and magnetic overload protection; and

(g) The design and installation of this electrical system will conform to the 1987 National Electrical Code.

3. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standard, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. BILLING CODE 4510-43-M

[Docket No. M-88-8-C]

Marie Enterprises Inc., Petition for Modification of Application of Mandatory Safety Standard

Marie Enterprises Inc., 222 Nutwood Road, Middlesboro, Kentucky 40965, has filed a petition to modify the application of 30 CFR 75.313 (methane monitor) to its Mine No. 1 (I.D. No. 15-15872) and its Mine No. (I.D. No. 2 15-13819) both located in Whitley County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statement follows:

1. The petition concerns the requirement that a methane monitor be installed on any electric face cutting equipment, continuous monitor, longwall face equipment and loading machine and is required to be kept operative and properly maintained and frequently tested.

2. Petitioner states that no methane has been detected in the mine. The three wheel tractors are permissible DC powered machines, with no hydraulics. The bucket is a drag type, where approximately 30-40% of the coal is hand loaded. Approximately 20% of the time that the tractor is in use, it is used as a man trip and supply vehicle.

3. As an alternate method, petitioner proposes to use hand held continuous oxygen and methane monitors in lieu of methane monitors on three wheel tractors. In further support of this request, petitioner states that:

(a) Each three wheel tractor will be equipped with a hand held continuous monitoring methane and oxygen detector and all persons will be trained in the use of the detector;

(b) A gas test will be performed, prior to allowing the coal loading tractor in the face area, to determine the methane concentration in the atmosphere. The air quality will be monitored continuously after each trip, provided the elapsed time between trips does not exceed 20 minutes. This will provide continuous monitoring of the mine atmosphere for methane to assure any undetected methane build up between trips;

(c) If one percent of methane is detected, the operator will manually deenergize his/her battery tractor immediately. Production will cease and will not resume until methane level is lower than one percent;

(d) A spare continuous monitor will be available to assure that all coal hauling tractors will be equipped with a continuous monitor;

(e) Each monitor will be removed from the mine at the end of the shift, and will be inspected and charged by a qualified person. The monitor will also be calibrated monthly; and

(f) No alterations or modifications will be made in addition to the manufacturer's specifications.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 7, 1988. Copies of the petition are available for inspection at that address.

Patricia W. Silvey,

BILLING CODE 4510-43-M

[Docket No. M-87-288-C]

Mid-Continent Resources, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Mid-Continent Resources, Inc., P.O. Box 158, Carbondale, Colorado 81623 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations for hazardous conditions) to its Dutch Creek No. 1 Mine (I.D. No. 05-00301) and its Dutch Creek No. 2 Mine (I.D. No. 05-00469) both located in Pitkin County, Colorado. The petition is filed under section 101(c) of the the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statement follows:

1. The petition concerns the requirement that seals and return aircourses be examined in their entirety on a weekly basis.

2. Petitioner states that due to the depth of the coal seams, which range from 2,500 to 3,500 feet of direct overburden, destressing of the surrounding and upper geologic formations manifested by floor heave bounces and outbursts, and roof deterioration certain areas of the mine are unsafe to travel.

3. As an alternate method, petitioner proposes to establish evaluation points at specific locations to adequately monitor seal or seal-set or airways' ventilation performance, check ventilation air quality returning from a designated seal or seal-set and check for and ensure airway continuity. In support of this request, petitioner states that—

(a) A certified examiner will make tests of air volume and quality at evaluation points on a weekly basis;

(b) A book or date board will be established at each evaluation site for the purpose of recording the results of examinations at each evaluation point. The results of each weekly examination will be recorded;

(c) If a deterioration of air volume, velocity or quality is detected by the examiner, an immediate investigation of the affected area will be conducted;

(d) A diagram showing the normal direction of the air current flow will be posted at each evaluation point, and will be maintained in a legible condition. Any change in the flow of air will be reported to the foreman immediately. If at any time the air quantity at any evaluation point indicates a change of air quantity of 20 percent from the last previous reading, an immediate investigation of the affected area will be conducted;

(e) Methane gas or other harmful, noxious, or poisonous gases will not be permitted to accumulate in these airways in excess of the legal limits. An increase of 0.5 per centum methane above the last previous reading will be immediately reported to the mine foreman and cause an immediate investigation of the affected area;

(f) All air measurement stations and approaches to such stations will be maintained in a safe condition at all times. The roof will be supported in accordance with the approved roof control plan; and

(g) All ventilation evaluation points will be shown on the mine ventilation system and methane and dust control map and will be a part of the approved ventilation plan for the mine.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. [FR Doc. 88-5038 Filed 3-7-88; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-88-26-C]

Poverty Coal Company, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Poverty Coal Company, Inc., 109 Broad Bottom Road, Pikeville, Kentucky 41501 has filed a petition to modify the application of 30 CFR 75.1710 (cabs and canopies) to its No. 1 Mine (I.D. No. 15-08431) located in Pike County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1988.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that cabs or canopies be installed on the mine's electric face equipment.

2. The No. 1 mine is 47 inches in height and is located in the No. 1 Elkhorn seam. The seam ascends and descends on sharply pitching grades, and has several inconsistencies affecting normal haulage procedures.

3. Petitioner states that the use of cabs or canopies on the mine's electric face equipment would result in a diminution of safety because the cabs or canopies could strike and dislodge roof bolts, and cause the machine to become wedged in place. The cabs or canopies would restrict the equipment operator's vision, causing the operator to lean from under the cab or canopy to attempt to see around the machine, creating the potential for an accident. the cabs or canopies would also limit the equipment operator's seating position, resulting in fatigue and reduced alertness.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. [Docket No. M-88-27-C]

Scotts Branch Mine; Petition for Modification of Application of Mandatory Safety Standard

Scotts Branch Mine, Route 1, Box 816, Pikeville, Kentucky 41501 has filed a petition to modify the application of 30 CFR 75.1103-4(a) (automatic fire sensor and warning device systems; installation; minimum requirements) to its Scotts Branch Mine (I.D. No. 15-08079) located in Pike County, Kentucky The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that automatice fire sensor and warning device systems provide identification of fire within each belt flight.

2. In a separate petition (M-88-28-C), petitioner proposes to use air in the belt haulage entry to ventilate active working places.

BEST COPY AVAILABLE

3. In lieu of a point-type sensor system, petitioner proposes to use an automatic fire detection system based on carbon monoxide monitoring of the underground belt conveyors. The system will be installed and operated with specific conditions in all belt entries utilized as intake aircourses.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. BILLING CODE 4510-43-M

[Docket No. M-88-28-C]

Scotts Branch Mine; Petition for Modification of Application of Mandatory Safety Standard

Scotts Branch Mine, Route 1, Box 816, Pikeville, Kentucky 41501 has filed a petition to modify the application of 30 CFR 75.326 (aircourses and belt haulage entries) to its Scotts Branch Mine (I.D. No. 15-08079) located in Pike County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that entries used as intake and return aircourses be separated from belt haulage entries, and that belt haulage entries not be used to ventilate active working places.

2. As an alternate method, petitioner proposes to use air in the belt haulage entry to ventilate active working places. This will give the active working sections optimum access when such access is desired and believed to be safely advantageous to intake air for use in ventilating working places that are presently required under the approved methane and dust control plan.

3. In support of this request, petitioner proposes to install an early warning fire detection system. A low-level carbon monoxide detection system will be installed in all belt entries utilized as intake air courses. The low-level CO system will be capable of giving warning of a fire for four hours should the power fail; a visual alert signal will be activated when the CO level is 10 parts per million (ppm) above the ambient level and an audible signal will sound at 15 ppm above the established ambient level. All persons will be withdrawn to a safe area at 10 ppm and evacuated at 15 ppm. The fire alarm signal will be activated at an attended surface location where there is two-way communication. The CO system will be capable of identifying any activated sensor and for monitoring electrical continuity and deleting electrical malfunctions.

4. The CO monitoring system will be visually examined at least once each day during production periods. To ensure proper functioning, more extensive examinations will be made on a schedule recommended by the manufacturer. The monitoring system will be calibrated with known concentrations of CO and air mixtures at least monthly.

5. If at any time the CO monitoring system or any portion of the system has been deenergized for reasons such as routine maintenance of failure of a sensor unit, the belt conveyor may continue to operate provided the affected portion of the belt conveyor entry will be continuously patrolled and monitored for CO by a qualified person using hand-held CO detecting devices.

6. The details for the fire detection system including, but not limited to, type of monitor and specific sensor location on the mine map will be included as a part of the Ventilation System and Methane Dust Control Plan.

7. The permanent stoppings separating the conveyor belt entries from the intake escapeway will be approved in the Ventilation System and Methane and Dust Control Plan for the mine.

8. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. BILLING CODE 4510-43-M

[Docket No. M-88-15-C]

Summar Coal Inc.; Petition for Modification of Application of Mandatory Safety Standard

Summar Coal Inc., P.O. Box 150, Woodbine, Kentucky 40771 has filed a petition to modify the application of 39 CFR 75.313 (methanemonitor) to its Mine No. 7 (I.D. No. 15-16227) and its Mine No. 8 (I.D. No. 15-16108) both located in Whitley County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that a methane monitor be installed on any electric face cutting equipment, continuous monitor, longwall face equipment and loading machine and is required to be kept operative and properly maintained and frequently tested.

2. Petitioner states that no methane has been detected in the mine. The three wheel tractors are permissible DC powered machines, with no hydraulics. The bucket is a drag type, where approximately 30-40% of the coal is hand loaded. Approximately 20% of the time the tractor is in use, it is used as a man trip and supply vehicle.

3. As an alternate method, petitioner proposes to use hand held continuous oxygen and methane monitors in lieu of methane monitors on three wheel tractors. In further support of this request, petitioner states that:

(a) Each three wheel tractor will be equipped with a hand held continuous monitoring methane and oxygen detector and all persons will be trained in the use of the detector;

(b) A gas test will be performed, prior to allowing the coal loading tractor in the face area, to determine the methane concentration in the atmosphere. The air quality will be monitored continuously after each trip, provided the elapse time between trips does not exceed 20 minutes. This will provide continuous monitoring of the mine atmosphere for methane to assure any undetected methane buildup between trips;

(c) If one percent of methane is detected, the operator will manually deenergize his/her battery tractor immediately. Production will cease and

will not resume until the methane level is lower than one percent;

(d) A spare continuous monitor will be available to assure that all coal hauling tractors will be equipped with a continuous monitor;

(e) Each monitor will be removed from the mine at the end of the shift, and will be inspected and charged by a qualified person. The monitor will also be calibrated monthly; and

(f) No alterations or modifications will be made in addition to the manufacturer's specifications.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Director, Office of Standards, Regulations and Variances.

[FR Doc. 88-5042 Filed 3-7-88; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-87-41-M]

Tenneco Minerals Co.; Petition for Modification of Application of Mandatory Safety Standard

Tenneco Minerals Company, P.O. Box 1167, Green River, Wyoming 82935 has filed a petition to modify the application of 30 CFR 57.22218 (seals and stoppings) to its Tenneco Soda Ash Project (I.D. No. 48-01295) located in Sweetwater County, Wyoming. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that all seals, and those stoppings that separate main intake from main return airways be of a substantial construction, except that stoppings constructed of brattice materials be used in the face areas.

2. As an alternate method, petitioner proposes to construct stoppings in any crosscut with styrofoam blocks approximately 24 inches high and 20 inches thick with joints and perimeter sealed with rigid urethane foam. Petitioner states that this construction would provide safer conditions for miners while providing excellent ventilation control throughout the mine.

3. Petitioner further states that the light weight styrofoam blocks will reduce the potential for injury associated with stoppings construction. In the event of ground movement, styrofoam block stoppings behave like large squeeze blocks, easily crushing and conforming to the new opening shape while maintaining and possibly improving tight joints and perimeter contact. Little or no short-circuiting of ventilation air would occur. The material is not likely to propagate flame, but does shrink in size immediately and melt when exposed to flame temperature heat. If a fire occurs near a stopping, the shrinkage would result in a rapid and desirable short-circuit of air directly into the return entries, carrying away any harmful fumes and gases from the fire with it and preventing them from circulating to the face areas and the miners.

4. The storage of any flammable or combustible material or the parking of any diesel powered equipment will not be permitted in any crosscut in which a foam stopping has been constructed.

5. In the event it becomes necessary to run a power cable through a foam stopping, the cable will be run through a steel pipe where it passes through the stopping.

6. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. BILLING CODE 4510-43-M

[Docket No. M-87-306-C]

West Fork Energy, Inc.; Petition for Modification of Application of Mandatory Safety Standard

West Fork Energy, Inc., 106 Suffolk Avenue, Richlands, Virginia 24641 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations for hazardous conditions) to its West Fork Mine No. 1 (I.D. No. 44-01488) located in Tazewell County, Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that return aircourses be examined in their entirety on a weekly basis.

2. Due to an unintentional roof fall certain areas of the mine cannot be safely traveled. Petitioner states that both sides of the fall have had considerable supplemental support, cribs and timbers, installed, and it would be unsafe to remove these for cleanup. The volume of air over the fall is 78,000 CFM, and it is possible to inspect the air courses up to both sides of the fall.

3. As an alternate method, petititioner proposes to establish check points on each side of the fall. The area will be supported and made safe to examine the bleeder from the pillar works, and a man door will be installed.

4. For these reasons petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 7, 1988. Copies of the petition are available for inspection at that address.

Patricia W. Silvey,

[FR Doc. 88-5044 Filed 3-7-88; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-88-17-C]

Wolf-Creek Collieries Co.; Petition for Modification of Application of Mandatory Safety Standard

Wolf-Creek Collieries Company, P.O. Box 179, Lovely, Kentucky 41231 has filed a petition to modify the application of 30 CFR 75.1103-4(a) (automatic fire sensor and warning device systems; installation;) to its No. 4 Mine (I.D. No. 15-04020) located in Martin County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that automatic fire sensor and warning device systems provide identification of fire within each belt flight.

2. Petitioner states that with the use of point-type sensors, a temperature of 135 degrees Fahrenheit must be attained directly under the sensor, before it will activate and sound an alarm. With these point-type sensors spaced 125 feet apart the potential for a small fire to become a raging inferno is greatly increased.

3. In lieu of point-type sensors, petitioner proposes to use an early-warning fire detection system using a low-level carbon monoxide detection system. The system will be installed and operated with specific conditions in all belt entries used as intake aircourses.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 7, 1988. Copies of the petition are available for inspection at that address.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

Date: February 29, 1988.

[FR Doc. 88–5045 Filed 3–7–88; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-88-18-C]

Wolf-Creek Collieries Co.; Petition for Modification of Application of Mandatory Safety Standard

Wolf-Creek Collieries, Company, P.O. Box 179, Lovely, Kentucky 41231 has filed a petition to modify the application of 30 CFR 75.326 (aircourses and belt haulage entries) to its No. 4 Mine (I.D. No. 15–04020) located in Martin County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that entries used as intake and return aircourses be separated from belt haulage entries, and that belt haulage entries not be used to ventilate active working places.

2. Petitioner states that with continuing development of the mine, ventilation requirements have become greater as the mine develops. Increased resistance is created by longer lengths and higher velocities which are needed in order to insure sufficient ventilation. With the gain of an additional intake, resistance should decrease and result in an increase in the quantity of air delivered to the working sections.

3. As an alternate, method petitioner states that an early warning fire detection system will be installed. A low-level carbon monoxide detection system will be installed in all belt entries utilized as intake air courses. The low-level CO system will be capable of giving warning of a fire for fours hours should the power fail; a visual alert signal will be activated when the CO level is 10 ppm above the ambient level and an audible signal will sound at 15 ppm above the established ambient level. All persons will be withdrawn to a safe area at 10 ppm and evacuated at 15 ppm. The CO monitoring system will initiate the fire alarm signals at an attended surface location. This responsible person will notify the working sections and other personnel who may be endangered, when the established alert and alarm levels are reached. The CO system will be capable of identifying any activated sensor and for monitoring electrical continuity and deleting electrical malfunctions.

4. The CO monitoring system will be visually examined at least once each coal producing shift and tested for functional operation weekly to insure the monitoring system is functioning properly. The monitoring system will be calibrated with known concentrations of CO and air mixtures at least monthly.

5. If at any time the CO monitoring system or any portion of the system has been deenergized for reasons such as routine maintenance or failure of a sensor unit, the belt conveyor may continue to operate provided the affected portion of the belt conveyor entry will be continuously patrolled and monitored for CO by a qualified person using hand-held CO detecting devices.

6. The details for the fire detection system including, but not limited to, type of monitor and specific sensor location on the mine map will be included as a part of the Ventilation System and Methane Dust Control Plan.

7. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations, and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 7, 1988. Copies of the petition are available for inspection at that address.

Patricia W. Silvey,

Director, Office of Standards, Regulations, and Variances.

Date: February 29, 1988.

[FR Doc. 88–5046 Filed 3–7–88; 8:45 am]

BILLING CODE 4510-43-M

Pension and Welfare Benefits Administration

[Application No. D-7188 et al.]

Proposed Exemptions; Edgewater Associates Profit Sharing Plan and Trust et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this **Federal Register** notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Regulations and Interpretations, Room N-5669, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of pendency of the exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Edgewater Associates Profit Sharing Plan and Trust (the Plan) Located in Chicago, IL

[Application No. D-7188]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted: (1) The restrictions of section 406(b)(2) of the Act shall not apply to the proposed loan (the Refinanced Loan) by the Plan to the Edgewater Physical Therapy Associates, Inc. Employees' Benefit Association Trust (the VEBA); provided that the terms and conditions of the Refinanced Loan are no less favorable to the Plan than similar terms negotiated at arm's-length with an unrelated third party; and (2) the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the guaranty of the Refinanced Loan by the current sponsor of the Plan.

Temporary Nature of Exemption

The proposed exemption is temporary and if granted will expire ten (10) years after the date of grant with respect to the making of the Refinanced Loan.

Summary of Facts and Representations

1. The Plan is a defined contribution profit sharing plan established under section 401 of the Code on December 28, 1970. The Plan had, as of December 31, 1986, approximately 35 participants and net assets on the same date of $846,884. Charles Kaplan (Mr. Kaplan) is a participant in and one of the trustees of the Plan. Terry Garbaciak is the co-trustee of the Plan with Mr. Kaplan.

2. In 1970, when the Plan was established, the name of the original sponsor was Cotovsky-Kaplan Physical Therapy Associates, Ltd. On March 10, 1983, that name was changed to Edgewater Physical Therapy Associates, Inc. (EPTA). EPTA limited its practice primarily to Medicare patients. On January 5, 1983, another entity, Edgewater Rehabilitation Associates, Inc. (ERA), was incorporated for the purpose of providing physical therapy to non-Medicare clients. ERA adopted the Plan for its employees and became a participating employer of the Plan along with EPTA. On December 31, 1985, in order to reduce the cost of maintaining two corporations, ERA merged into EPTA, leaving EPTA as the surviving corporation. Simultaneously, with the merger, EPTA changed its name to Edgewater Rehabilitation Associates, Inc. (the Employer), the current sponsor of the Plan.

The Employer is located at 1801 North Lincoln Avenue, Chicago, Illinois, and hires licensed physical therapists to provide services to various private and public schools, hospitals, nursing homes, and other health care providers in the Chicago area. Mr. Kaplan is a shareholder of 98% of the stock of the Employer and serves as the president, treasurer, and a director of the Employer. Terry Garbaciak and Donald Kravets own a one percent (1%) interest in the Employer each and serve as officers of the Employer. It is represented that the Employer's current gross assets are approximately $526,612.

3. The VEBA is a voluntary employee benefit association established December 28, 1962, for the sole purpose of supplying fringe benefits to all qualifying employees of the VEBA's sponsor, the Employer. On June 3, 1983, the VEBA was qualified as a plan under section 501(c)(9) of the Code for payment of benefits to members of the VEBA. Mr. Kaplan is a participant in and the trustee for the VEBA. The VEBA's assets as of December 31, 1986, total $57,206. On May 1, 1983, the VEBA added as a benefit to its members the use of the Condo for the purpose of enhancing the Employer's ability to attract and retain highly qualified physical therapists in a competitive employment market. It is represented that the VEBA and the Plan do not supply any services with respect to one another and are not parties in interest with respect to one another, pursuant to section 3(14) of the Act.

4. The Condo is described as Unit 2G, Baileys Harbor Yacht Club Condominiums, Baileys Harbor, Door, Wisconsin. The Condo was constructed eight years ago, is fully furnished, has a fieldstone fireplace, a deck, and is located on the waterfront. Condo users have access to common pool and tennis court areas.

The Condo was acquired by the VEBA from an unrelated seller at a price of $130,000. To provide for a down payment on the Condo, and to provide funds for the purchase of furnishings, the Employer made a contribution to the VEBA. The balance of the money needed for the VEBA to purchase the Condo was obtained from a loan to the VEBA in the amount of $80,000 from a local third party bank (the Bank) at an annual interest rate of 12.75%. As part of the financing terms, the Bank took a promissory note and a first mortgage on the Condo from the VEBA and a guaranty for payment of the loan from the Employer. It is represented that the payments on the loan are made from the Employer's contributions to the VEBA and that the current unpaid balance on the loan is approximately $74,483.

5. The Plan proposes to refinance for the VEBA the existing loan with the Bank from proceeds of money market funds yielding a return of approximately 5.5%, as of August 20, 1987. It is represented that long term investment yields for the Plan, as of August 20, 1987, average 6% before payment of commissions. The trustees anticipate a higher rate will be paid by the VEBA to the Plan on the Refinanced Loan.

It is represented that the proposed Refinanced Loan will be evidenced by a written promissory note from the VEBA, and will have the following terms: (a) An adjustable rate mortgage with an interest rate of two (2) points over the prime rate published by the Exchange National Bank of Chicago (the Exchange Bank), to be determined initially by the independent fiduciary for the Plan and thereafter annually on the anniversary date of the Refinanced Loan; (b) equal monthly payments of principal and interest amortized over the ten (10) year term for the Refinanced Loan; (c) a fee in the amount of one percentage point of the amount of the Refinanced Loan to be paid to the Plan at closing; (d) collateral in the form of a first mortgage on the Condo with a prohibition in such first mortgage against secondary financing; and (e) standard provisions involving acceleration of the note upon default or upon sale of the Condo. The applicant represents that commercial real property financing procedures will be followed with respect to the Refinanced Loan, including the acquisition of title insurance for the benefit of the Plan, closing, disbursement, and release of the existing mortgage to be handled by the title company, and a recorded first mortgage as a perfected lien on the Condo running to the benefit of the Plan.

The Employer represents that it will guaranty in writing the full repayment of the Refinanced Loan. In the event the VEBA defaults on its obligation to the Plan, pursuant to the guaranty, the Employer will timely pay the amount necessary to cure the default. It is also represented that hazard and liability insurance covering the replacement value of the Condo will be purchased and will name the Plan as first loss payee. Further, paid receipts for such insurance premiums and certificates of insurance, receipts for paid real estate tax and Condo membership fees will be supplied to the Plan at least annually.

6. John E. Gilson (Mr. Gilson) of Vacation Properties Network-Gilster Co., located at 4086 Main Street, Fish Creek, Wisconsin, appraised the Condo on August 12, 1987, at $119,500. In addition, Mr. Gilson estimated that were the Condo to be sold with its furnishings the appraised value would increase to $127,000 which would account for a market value on the furnishings of approximately $7,500. It is represented that the appraisal will be updated before the Plan invests in the Refinanced Loan.

7. Richard Golden (Mr. Golden) has agreed to serve as the independent fiduciary for the purpose of determining the suitability of the proposed transactions for the Plan. With respect to acting as independent fiduciary for the Plan, Mr. Golden represents that he has obtained advice as to his fiduciary responsibilities and duties under the Act from a legal counsel who does not represent Mr. Kaplan, the Plan, or the Employer, and that he has accepted these fiduciary duties and responsibilities. Mr. Golden asserts that he has negotiated and consummated real estate loans secured by residential and commercial real estate and that his experience includes negotiating the terms of currently outstanding substantial lines of credit secured by vehicles used in a business in which he is a principal shareholder. In addition, Mr. Golden was a principal for several years in a corporation which lent money to various businesses on a secured basis.

It is represented that Mr. Golden is independent in that he is not an officer, debtor, or creditor of, and has no corporate affiliation with the Employer or the VEBA. Mr. Golden also stated that he has not received any compensation for services to the Plan, the Employer, or the VEBA, nor does he have any other pecuniary interest in the proposed transactions which would affect his best judgment as a fiduciary for the Plan.

8. After reviewing the application for exemption dated September 17, 1986, as well as all exhibits thereto, Mr. Golden has determined that: (i) The Refinanced Loan is appropriate and suitable for the Plan, (ii) the terms of the Refinanced Loan are fair market terms for similar transactions, and (iii) the Refinanced Loan is in the best interest and protective of the Plan and its participants and beneficiaries. Mr. Golden represents that he will make the same determinations immediately prior to the refinancing and will take into account all relevant facts and circumstances at the time of such refinancing.

In arriving at this conclusion, Mr. Golden has reviewed the proposed Refinanced Loan with respect to (a) the Plan's overall investment portfolio, (b) the cash flow needs of the Plan, (c) the necessity for the sale of any assets of the Plan, (d) the diversification of the Plan's assets, both before and after the refinancing, and (e) the terms of the Refinanced Loan, as such terms conform with the Plan's investment policy. Mr. Golden states that the propsoed interest rate of two points over the prime rate charged by Exchange Bank is appropriate given the type of loan, the amount of the loan, the terms of the loan, and the collateral used to secure the loan. Mr. Golden made such a determination after Patricia A. Beilat (Ms. Beilat), an officer of Affiliated Bank, an unrelated third party bank, located in Morton Grove, Illinois, reviewed the terms and provisions of the Loan on November 17, 1987. After considering current market conditions for mortgage loans on residential property, Ms. Beilat confirms that the terms and conditions of the loan represent fair market value.

9. It is represented that the refinancing is protective of the Plan and its participants and beneficiaries, as the Plan will receive adequate collateral by holding a first mortgage on the Condo and the face amount of the Refinanced Loan will not exceed the amounts described in the paragraph below.

In advance of the Plan's investment in the Refinanced Loan, Mr. Golden represents that he will ascertian that:

a. The interest rate stated on the Refinanced Loan will initially equal two percent (2%) over the prime rate charged by the Exchange Bank and will be adjusted at the end of each twelve month period on the anniversary date of the Refinanced Loan to equal two percent (2%) over the then prime rate published by the Exchange Bank;

b. The outstanding balance of the Refinanced Loan plus the sum of the then outstanding balances of all loans made pursuant to section 408(b)(1) of the Act from the Plan to any "party in interest," as such term is defined in ERISA section 3(14),[1] does not exceed 25% of the then fair market value of all Plan assets;

c. The fair market value of all collateral for the Refinanced Loan is and at all times will remain at least 150% of the unpaid balance of the Refinanced Loan;

d. Either additional collateral for the Refinanced Loan from the VEBA and/or the Employer will be made available or immediate payment of the Refinanced Loan will be due in full, if the fair market value of all collateral drops below 150% of the unpaid balance of the Refinanced Loan;

e. The Plan retains counsel independent of the Employer and the VEBA to review all loan documents before closing, including the title insurance commitment, note, mortgage, closing statement, insurance certificates, and all other loan documents; and

f. The first mortgage on the Refinanced Loan is duly recorded as a perfected first lien on the Condo.

---

[1] As of December 31, 1986, the financial documents of the Plan indicate a loan in the amount of $42,878.18 is outstanding to Mr. Kaplan. It is represented that such loan meets the requirements for participant loans, pursuant to section 408(b)(1) of the Act and section 4975(d)(1) of the Code. The Department expresses no opinion as to whether the outstanding loan to Mr. Kaplan satisfy the conditions set forth in section 408(b)(1) of the Act and section 4975(d)(1).

10. Mr. Golden will monitor and enforce the Plan's rights with respect to the terms of the Refinanced Loan, institute collection proceedings on the Refinanced Loan, and/or enforce the Plan's rights against the guarantor. Further, he will monitor the value of the Plan's assets to insure the unpaid amount of the Refinanced Loan, plus the outstanding balances of loans to other parties in interest, never exceeds 25% of the assets of the Plan and the collateral pledged is equal to or greater than 150% of the unpaid balance of the Refinanced Loan. Finally, Mr. Golden, accepts the responsibility to enforce the terms of the Refinanced Loan between the VEBA and the Plan. He will make demands for timely payment, bring suit, or take any other appropriate process against the VEBA, any guarantor, or the Employer, and will direct that accurate records are kept regarding the Refinanced Loan.

11. In summary, the applicant represents that the proposed Refinanced Loan satisfies the statutory criteria of section 408(a) of the Act because: (a) Mr. Golden, as independent fiduciary, has determined that the terms of the Refinanced Loan are commensurate with current fair market terms for similar loans negotiated at arm's-length with unrelated parties; (b) the Refinanced Loan will be secured by collateral with a value determined by an independent appraisal of at least 150% of the outstanding principal balance of the Refinanced Loan; (c) the payments on the Refinanced Loan will be monitored by the independent fiduciary who will take necessary and appropriate steps to protect the Plan's interests during the duration of the Refinanced Loan; and (d) the outstanding balance of the Refinanced Loan, plus the sum of the outstanding balances of all other loans by the Plan to parties in interest, will not exceed 25% of the fair market value of the assets of the Plan.

For Further Information Contact: Angelena C. Le Blanc of the Department, telephone (202) 523–8883. (This is not a toll-free number.)

The Boldt Holding Corporation Master Trust (Master Trust) The Boldt Holding Corporation Plan #1 Located in Appleton, WI

[Application Nos. D–7208 and D–7211]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed loan (the Loan) from the Master Trust to Valley Medical Building Association Limited Partnership (Valley Medical), a party in interest with respect to one of several employee benefit plans whose assets are invested in the Master Trust; provided that the terms of such Loan are at least as faverable to the Master Trust as are those negotiated at arm's length with unrelated parties for similar transactions.

Temporary Nature of Exemption

The proposed exemption is temporary and, if granted will expire within three (3) years after the inception of the Loan, unless the independent fiduciary extends the term of the Loan for one renewal period of three (3) years. Should the applicants wish to extend the term of the Loan beyond that described in this exemption, the applicants must submit another application for exemption relief.

Summary of Facts and Representations

1. The Boldt Group Inc. (Group Inc.), a Wisconsin corporation, is the parent entity of four (4) wholly owned subsidiaries (the Subsidiaries). The Subsidiaries are the W.S. Patterson Company (Patterson Co.), the Boldt Development Company (Development Co.), the Oscar J. Boldt Construction Company (Construction Co.), and the Paper Valley Corporation, Inc. (Paper Corp). The shares of Group Inc. are owned equally by Charles Boldt, Thomas Boldt, and Margaret Boldt Anderson.

2. Group Inc. sponsors two plans, the Boldt Holding Corporation Pension Plan (Boldt Pension) for one participant and the Boldt Holding Corporation Salaried Profit Sharing Plan (Boldt P/S) for two participants. As of February 1987, Boldt Pension and Boldt P/S have assets of approximately $356,256 and $63,703, respectively. Patterson Co., Development Co., and Construction Co. sponor, respectively, the W.S. Patterson Company Salaried Profit-Sharing Plan (Patterson P/S) for 48 participants, the Boldt Development Company Salaried Profit-Sharing Plan (Development P/S) for two (2) participants, and the Oscar J. Boldt Construction Company Salaried Profit Sharing Plan (Construction P/S) for 108 participants. Patterson P/S, Development P/S, and Construction P/S, respectively, as of February 1987, had assets of approximately $976,157, $13,131, and $8,218,094.

The trustees (the Trustees) with respect to all of the plans (the Plans), with the exception of the Boldt Pension, are Carol Westphal and James Zeller, who also are employees of Construction Co. and Patterson Co., respectively. The trustee of the Boldt Pension is Louis A. Mayer, III of Emjay Corporation, Milwaukee, Wisconsin. A separate committee handles the administration for each of the Plans.

3. As of February 28, 1987, Boldt Pension, Boldt P/S, Patterson P/S, Development P/S, and Construction P/S had invested in the Master Trust the following approximate amounts, $202,645, $30,013, $853,145, $5,267, and $7,724,779, respectively, which constituted approximately 2.3%, .3%, 9.8%, .06%, and 88.7%, respectively, of the net assets of the Master Trust.[2] As of the same date, the Master Trust had net assets of approximately $8,702,000. The Master Trust invested primarily in money market accounts, mortgage loans, common stocks, corporate obligations, government and agency obligations, cash, and real estate. The Master Trust employs four investment managers to manage its assets.

4. The proposed transaction is the Loan in the amount of $1.8 million from the Master Trust to Valley Medical, a Wisconsin limited partnership. The general partners of Valley Medical with an .8% interest each are Valley Health Facility Inc. and Paper Corp, one of the Subsidiaries of Group Inc. The limited partner, Construction Co., owns a 98.4% limited partnership interest in Valley Medical. Some of the proceeds of the Loan from the Master Trust will be used by Valley Medical to repay Construction Co. for two existing unsecured demand notes made July 24, 1985, and December 30, 1986, in the amounts of $1,404,725 and $20,000, respectively, at an interest rate of prime plus ½%.

The Loan will bear interest at a fixed rate of 10½% per annum and will be payable in 36 equal monthly installments of principal and interest based on a fifteen (15) year amortization schedule. The provisions of the Loan include a balloon payment at the end of the initial three (3) year term of the Loan or at the conclusion of any renewal period of the Loan. The Loan, when made, will constitute 20.6% of the assets of the Master Trust.[3] The Trustees maintain that the Loan would be in the best interest of the Plans participating in the Master Trust.

---

[2] The applicants represent that, effective March 1, 1986, Construction P/S transferred the majority of its assets to the Master Trust. Included in the transfer was a lease (the Lease) by Construction Co. of land and an office building located on Badger Avenue in Appleton, Wisconsin. The Lease was the subject of a previously granted exemption. See Prohibited Transaction Exemption 79–51 (44 FR 54795, September 21, 1979; proposed at 44 FR 44266, July 27, 1979) for a complete description of the facts and circumstances surrounding the Lease. The applicants represent that Construction Co. no longer occupies the land and the office building and that unrelated third parties currently rent the land and office building.

The Loan will be secured by three types of collateral: (a) A first mortgage in favor of the Master Trust on a building (the Building) owned by Valley Medical; (b) the assignment of rents from the Building to the Master Trust; and (c) a letter of commitment (the Commitment Letter) in which Valley Bank, Appleton, Wisconsin (Valley Bank) agrees to lend Valley Medical up to $1.8 million for the purpose of repaying the Loan from the Master Trust. Valley Bank is a subsidiary of Valley Bancorporation (Bancorp), a bank holding company registered in Wisconsin since 1963. Bancorp also wholly owns Valley Trust Company, one of four investment managers for the Master Trust. It is represented that Valley Bank is unrelated to Valley Medical.

5. The Building which will serve as part of the collateral for the Loan is a three story office building constructed in 1984, by Construction Co. for Valley Medical at a cost of approximately $2,337,702. Located at 820 Grant Street, Appleton, Wisconsin, the Building is situated on a parcel (the Parcel) of real property adjacent to the Appleton Medical Center (Med Center), a non-profit charitable hospital, and is connected to the Med Center by an overhead walkway.

Med Center owns the Parcel underlying the Building and rents it to Valley Medical, pursuant to a ground lease entered on June 12, 1984. The provisions of the ground lease include a thirty (30) year term and three options for renewal of ten (10) years each. Aid Association for Lutherans (Aid) holds a blanket mortgage from Med Center, in the amount of $3,456,000 on the Parcel which underlies the Building and on all other real estate and improvements which make up the Med Center hospital complex. As a provision in the subordination of a mortgage agreement, Aid has agreed that the existing blanket mortgage to Aid on the Parcel underlying the Building shall be subordinate to the first mortgage interest in the Building which will secure the Loan by the Master Trust to Valley Medical.

At the time the application was filed, the third floor of the Building was unfinished, and Construction Co. was under contract with Valley Medical to complete the construction. It is represented that Construction Co. will waive all lien rights for both real and personal property related to the Building to the extent the exemption for the Loan is granted.

6. As additional security for the Loan, the applicants propose to assign to the Master Trust the right, upon default of the Loan, to receive directly from the tenants the rentals on the Building. The tenants who together rent 100% of the Building are Appleton Cardiology Associates, Appleton Heart Surgeons, the Med Center, Jeffrey R. Whiteside, M.D., S.C., Kevin C. Garrett, M.D., S.C., and Maria T. Aristigueta, M.D., S.C., all of which are unrelated third parties with respect to the Plans participating in the Master Trust.

7. The applicants propose as the third form of collateral for the Loan, a Commitment Letter to the Master Trust. The Commitment Letter has an initial term of three (3) years. The Commitment Letter states that upon notification in writing from the Master Trust in the event of default on the Loan or at least thirty (30) days prior to the end of the initial three (3) year term of the Loan, Valley Bank will, within thirty (30) days after receipt of such notice, lend to Valley Medical up to but not more than $1.8 million. It is represented that the proceeds from the $1.8 million will be used for the purpose of repaying the unpaid principal and interest on the Loan from the Master Trust to Valley Medical.

Under the terms of the Commitment Letter, Valley Medical authorizes Valley Bank to make payment of the amount due on the Loan directly to the Master Trust on behalf of Valley Medical. Upon repayment in full of the Loan amount, the Master Trust has agreed to release its first mortgage on the Building, security agreements, and assignments of leases and rents.

Valley Bank, as of June 30, 1987, had total assets of $256 million and capital of $185 million. Of those assets, Valley Bank currently has outstanding loans or lines of credit to Construction Co., Patterson Co., Development Co., and Paper Corp. in the amounts of $8 million, $2 million, $800,000, and $227,893, respectively. The amount extended on the line of credit with Construction Co. as of August 1987, was $1,030,967, while the line of credit with Patterson Co. was not in use, as of August 31, 1987. It is represented that loan amounts or liens of credit in excess of Valley Bank's limits will be shared among affiliate banks of Bancorp which, as of March 31, 1987, had $1.23 billion in outstanding loans and assets in excess of $2 billion.

8. John Pfefferle (Mr. Pfefferle), president of Appraisal Associates, Inc., which is located at 500 W. Franklin Street, Appleton, Wisconsin, appraised the Parcel and the Building, as of January 29, 1987, at $2,500,000. Because auxiliary offsite parking is available to the Parcel, Mr. Pfefferle concluded that the appropriate unit value of $4.00 per square foot multiplied by the total land area (26,153 square feet) for the Parcel indicates a fair market value of $105,000 for the Parcel alone. Mr. Pfefferle also noted that while Valley Medical leases, but does not own the Parcel, the appraisal takes into account the value of the long term lease on the site and the subordination of the blanket mortgage to Aid. Because the third floor of the Building was unfinished at the time of the appraisal, Mr. Pfefferle stated that his appraisal is conditioned on the completion of construction on the third floor at the estimated cost of $200,000.

Mr. Pfefferle represents that the fair market rental for the space in the Building is $12.50 per square foot, as of January 29, 1987. According to Mr. Pfefferle, all of the space in the Building was, as of Janaury 29, 1987, leased at that rate. In addition, the existing leases provide that any operating expense in excess of $3.50 per square foot is the responsibility of the tenant.

9. The Marine Trust Company, N.A. (Marine Trust) located at 200 College Avenue, Appleton, Wisconsin, has agreed to act as independent fiduciary with complete and sole authority and responsibility with respect to the custody, supervision, enforcement, and monitoring of compliance with the terms of the Loan.

The Marine Trust represents that it is qualified to serve as independent fiduciary for the Master Trust. Since 1930, Marine Trust has provided trust services to its customers, and as of August 24, 1987, its Appleton office administers $350 million in accounts of which approximately $120 million consist of assets attributable to employee benefit plans.

---

[3] The applicants represent that included in the assets of the Master Trust is a loan with Mr. and Mrs. Popp (the Popps) originally in the amount of $380,000. The loan to the Popps was the subject of a previously granted exemption. See Prohibited Transaction Exemption 83–77 (48 FR 18962, April 28, 1983; proposed at 48 FR 9392, March 4, 1983) for a complete description of the facts and circumstances surrounding the loan. It is represented that the outstanding amount on the loan to the Popps as of December 28, 1987, is $280,000 which constitutes 3.3% of the assets of the Master Trust. Therefore, the applicants represent that the total of the subject Loan and the amount outstanding on the loan to the Popps together constitute approximately 23.9% of the assets of the Master Trust.

It is represented that Marine Trust has no relationship with any of the parties to the transaction, including Group, Inc. or its Subsidiaries, and Valley Medical or its partners. Further, less than one percent (1%) of the assets of its affiliate, Marine Bank Appleton, N.A., is involved in outstanding loan obligations with the indirect owners of Valley Medical.

The duties of Marine Trust, as independent fiduciary with respect to the Loan, will include but are not limited to:

(1) Investing payments collected from the Loan in a short term money market fund while such payments are awaiting transfer to the Master Trust;

(2) Verifying that insurance is in force on the Building;

(3) Verifying payment of real estate taxes;

(4) Performing an annual drive-by inspection of the Building;

(5) Arranging for an appraisal of the Building every three years;

(6) Providing periodic statements of account on the Loan to the Master Trust, as often as monthly, but not less frequently than annually;

(7) Retaining legal counsel or an abstract company to record all relevant documents; and

(8) Enforcing the terms of the Commitment Letter at maturity or upon default on the Loan. In this regard, Marine Trust will have authority upon default on the Loan, at the expiration of the initial three (3) year term of the Loan, or at the expiration of one three (3) year renewal period, to call the Loan and receive payment of the outstanding principal and interest on the Loan from the Valley Bank.

Marine Trust represents that the terms of the Loan are similar to those negotiated in arm's length transactions between unrelated parties. Pursuant to an examination of the terms of the Loan and related documents and after a review of the financial statement of the Master Trust, Marine Trust has determined that the proposed Loan to Valley Medical is consistent with the cash flow and liquidity requirements of the Master Trust and as such would be in the overall best interest of the Plans participating in the Master Trust. In the opinion of Marine Trust, the portfolio of the Master Trust is weighted too heavily toward equity securities and the addition of the Loan to the portfolios holdings will increase the representation in fixed income securities.

Marine Trust states that the investment in the Loan is well protected. The real estate that secures the Loan is valued at $2.5 million and additional protection is provided in the form of the assignment of the rents on the Building. The projected analysis supplied by Marine Trust estimates a total present value of rents for the first three years of the Loan at $869,945. Marine Trust represents that while the Loan is adequately secured by the Building and assignment of rents, the most important protection for the Master Trust is the additional security of the Commitment Letter. According to Marine Trust, the Commitment Letter provides an unconditional commitment by Valley Bank to lend up to $1.8 million to Valley Medical and provides a means to transform the Loan to cash for the Master Trust upon any event of default or upon maturity of the Loan.

It is represented that Marine Trust has authority to renew the Loan for an additional three (3) year period provided that:

(a) The extension of the Loan does not exceed one additional period of three (3) years and that no further extensions will be authorized;

(b) No default has occurred during the initial three (3) year term either with respect to the required payments on the Loan or with respect to any of the other obligations of Valley Medical associated with the terms of the Loan, pursuant to the mortgage note, mortgage, mortgage loan agreement, or assignment of rents;

(c) The payments of principal and interest will continue in accordance with the Loan which was based upon an amortization over a period of fifteen (15) years with a balloon payment of the outstanding amount of the Loan at the conclusion of the renewal period;

(d) All security agreements and loan agreements remain in force for the extended term of the Loan;

(e) A new appraisal by an independent qualified appraiser of the Building is obtained;

(f) The fair market value of the rents on the Building is redetermined;

(g) The total annual rental income from the Building is at least as high as the 1987 calendar year rentals in the amount of $292,000;

(h) The appraised value of the Building and the fair market value of the rents for this Building represent at least 150% of the outstanding amount of the Loan as of the commencement of the extended term;

(i) The subordination of the Aid blanket mortgage to the Loan is continued for the extended term;

(j) Valley Medical maintains a cash reserve in the amount of at least $50,000 at all times during the extended term, and the general and limited partners of Valley Medical agree to be jointly and severally liable to supply Valley Medical with sufficient cash to insure a $50,000 minimum cash reserve is maintained;

(k) The outstanding amount of the Loan does not exceed twenty-five percent (25%) of the assets of the Master Trust;

(l) A review of the potential distribution to participants is completed and a determination is made that the liquidity of the assets of the Master Trust is sufficient to meet such potential distributions during the extended term of the Loan;

(m) The interest rate on the Loan for the extended term equals at least two percentage points above the average interest rate for a three year U.S. Treasury Note, as determined during the six (6) months previous to the commencement of the extended term of the Loan; provided that the interest rate determined by such formula must be at least equal to the fair market value interest rate based upon the circumstances at the time of any renewal of the Loan;

(n) Valley Bank issues an unconditional letter of commitment or extends the existing Commitment Letter to cover the renewal period; and

(o) After an overall review of the terms for the extension and all other relevant factors, Marine Trust is able to make the same representations with respect to the extension as it made with respect to the initial Loan. Marine Trust reserves the right not to approve the extension of the Loan, even though all of the foregoing requirements may be satisfied.

10. In summary, the applicants represent that the proposed transaction will satisfy the statutory criteria of section 408(a) of the Act because:

(a) The Loan will account for less than twenty-five percent (25%) of the assets of the Master Trust;

(b) Marine Trust, the independent fiduciary, has reviewed the terms of the Loan and has determined that the transaction is in the best interest and protective of the Plans participating in the Master Trust;

(c) Marine Trust will monitor and enforce the terms of the Loan, the assignments of rents, and the Commitment Letter;

(d) Marine Trust has determined that the Loan is in keeping with the cash flow and liquidity requirements of the Master Trust;

(e) Marine Trust has determined that the value of the Building which serves as collateral for the Loan and the fair market value of the rents for the Building together exceed 150% of the Loan amount; and

(f) Marine Trust has determined that the Commitment Letter provides an unconditional means to transform the Loan into cash for the Master Trust upon an event of default or upon maturity of the Loan.

Concho Construction Company, Inc. Profit Sharing Plan (the Plan) Located in Garland, Texas

[Application No. D–7308]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975 of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed cash sale by the Plan to certain improved real property to the Concho Construction Company, Inc. (the Employer), the sponsor of the Plan; provided that such sale is on terms no less favorable to the Plan than those which the Plan could obtain in arm's-length transaction with an unrelated party.

Summary of Facts and Representations

1. The Plan is a defined contribution pension plan which was terminated effective November 1, 1985, at which time there were twenty eight Plan participants. The Employer is a closely-held Texas corporation engaged in general construction services and located in Garland, Texas. The Plan participants include employees of an affiliate of the Employer, the Concho Equipment Company. The Plan assets, which are in the process of liquidation and distribution, had a total fair market value of $2,771,800 as of Decembver 31, 1986. The Dallas, Texas office of the Internal Reserve Service (the Service) issued a favorable determination letter on December 4, 1986, with respect to the Plan termination. The Plan's trustee is the First City Bank of Dallas (the Trustee), which exercises full control over the investment and disposition of Plan assets.

2. Among the remaining assets of the Plan is a 2.51 acre parcel of commercially-zoned real property (the Property) located at 196 International in Garland, Texas. The Property is improved with a small office building, a metal storage building and a small repair-shop building. The Plan acquired the Property in 1981 for approximately $47,000 and commenced leasing it to the Employer in November, 1981 under a net lease (the Lease) under which the Employer bears all expenses of maintenance, taxes and improvements. The Employer represents that the Lease was exempt until June 30, 1984 from the prohibitions of section 406 of the Act by virtue of section 414(c)(2) of the Act.[4] The Employer represents that it has paid the applicable excise taxes imposed by section 4975(a) of the Code since June 10, 1984. The Trustee represents that the rentals paid by the Employer under the Lease have been and remain no less than the Property's fair market value.

3. In order to complete the liquidation and distribution of the Plan's assets and to terminate the ongoing prohibited transaction which the Lease constitutes, the Trustee seeks to divest the Plan of the Proeprty. The Trustee and the Employer are proposing that the Employer purchase the Property from the Plan and are requesting an exemption to permit such transaction. The Employer will pay the Plan cash for the Property in the amount of the Property's fair market value as of the date of the sale. The Property was appraised as of July 13, 1987 by Ronald R. Payne, SRPA (Payne), an independent professional real estate appraiser in Garland, Texas who represents that as of that date the Property, including improvements, had a fair market value of $380,000. Payne's appraisal will be updated as of the date of the proposed sale to reflect any increase in the Property's value since July 13, 1987 and the purchase price paid for the Property by the Employer will be in accordance with such update but in no event less than $380,000. The Plan will pay no commissions or other costs or expenses related to the proposed sale. The Employer represents that it will continue to pay to the Plan rentals of no less than the Property's fair market rental value as determined by the Trustee through the sale date and that it will continue to pay applicable excise taxes for the continuation of the Lease until its termination on the sale date.

4. The Trustee, which represents itself to be independent of the Employer, maintains that it has closely and thoroughly reviewed the proposed transaction and all its terms and that it has determined that the proposed sale transaction will be in the best interests and protective of the participants and beneficiaries of the Plan. The Trustee represents that a sale of the Property to an unrelated party could not be accomplished expeditiously, due to the depressed condition of the real estate market in which the Property is situated. The Trustee further represents that the Employer constitutes the only likely cash buyer of the Property for its full appraised fair market value, as the Proeprty's improvements are useful to the Employer and not really adaptable to other uses.

5. In summary, the applicants represent that the proposed transaction satisfies the criteria of section 408(a) of the Act for the following reasons: (1) The proposed transaction will enable the Trustee to proceed with distribution of the assets of the Plan, which is terminated; (2) The Plan will receive cash for the Property in an amount no less than its appraised fair market value as of the sale date; (3) The Plan will incur no costs or expenses related to the proposed transaction; and (4) The Trustee represents that the proposed transaction will be in the best interests and protective of the Plan's participants and beneficiaries and that the proposed terms are more favorable to the Plan than the Plan could obtain in an arm's-length transaction with an unrelated party.

FOR FURTHER INFORMATION CONTACT: Ronald Willett of the Department, telephone (202) 523–8883. (This is not a toll-free number.)

Nabors Chevrolet-Toyota, Inc. Employees Retirement Plan (the Plan) Located in Clarksdale, MI

[Application No. D–7322]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale for cash of a certain parcel of improved real property (the Property) by the Plan to Nabors Chevrolet-Toyota, Inc. (the Employer), a party in interest with respect to the Plan; provided that the sales price is the greater of $249,250 or the fair market value of the Property on the date of the sale.

Summary of Facts and Representations

1. On January 1, 1963, the Plan was established by Owen Chevrolet Company (the Owen Co.), an automobile dealership located at 621 De Soto Avenue, Clarksdale, Mississippi. On January 2, 1965, the Owen Co. sold the Property to the Plan. It is represented that the fair market value on the land underlying the Property was used to determine the sales price of the land on that date and that the improvements on the Property were sold to the Plan at the actual cost of construction. After the Plan acquired the Property in 1965, the Owen Co. entered into a lease (the Lease) of the Property with the Plan, for a term of five (5) years at a net rental rate of $24,000 per year. Subsequently, on October 6, 1982, the Owen Co. sold its interest in the automobile dealership to the Employer who then became the sponsor of the Plan. At that time, the Lease of the Property was continued between the Plan and the Employer.[5]

2. The Plan, a money purchase pension plan, currently has approximately 43 participants. As of December 31, 1986, the net assets of the Plan totaled $931,837. The trustee for the Plan is Grady Nabors who is the president and 100% shareholder of the Employer and is also a participant in the Plan.

3. The Property, located on the northwest corner of De Soto Avenue and Seventh Street and on the northeast corner of LeFlore Avenue and Seventh Street, is level, has access to public utilities, and is divided by a small alley. The frontage for hte Property facing De Soto Avenue is 310 feet wide and 205 feet deep and consists of six (6) lots. The frontage for the Property facing LeFlore Avenue is 160 feet wide and 205 feet deep and consists of three lots.

The improvements of the Property located on De Soto Avenue include a twenty year old brick and metal building of 25,437 square feet which is occupied as the showroom, offices, parts department, and shop. A large metal building of 7,000 square feet used as an automobile body shop (the Body Shop) is located on LeFlore Avenue.

The Property is located in two different zoning districts. The part of the Property facing De Soto Avenue is zoned for general commercial use; while the part of the Property facing LeFlore Avenue is zoned for multi-family residences. It is represented that since the Body Shop lcoated on LeFlore Avenue was erected twelve (12) years ago before the effective date of the residential zoning restriction, the Body Shop is in compliance with such regulation.

The value of the Property currently constitutes 26.75% of the assets of the Plan.

4. The Employer proposes to purchase the Property from the Plan for the greater of cash in the amount of $249,250 or the fair market value of the Property on the date of the sale. The Employer wishes to purchase the Property in order to terminate the prohibited Lease between the Employer and the Plan. The Plan will incur no fees, commissions, or other costs as a result of the sale of the Property to the Employer. It is represented that economic conditions in the vicinity of the Property are depressed, such that there is no unrelated third party willing to purchase the Property from the Plan. By selling the Property to the Employer, it is represented that the Plan will benefit by the receipt of cash for an illiquid real estate investment. The trustee for the Plan states that the proceeds from the sale of the Property will be used to diversify the investments of the Plan.

5. Mr. R.D. Peay, III (Mr. Peay), real estate appraiser with R.D. Peay & Son in Clarksdale, Mississippi, valued the Property on June 25, 1984. Mr. Peay revised his appraisal of the Property on May 19, 1987, to reflect more current values of property in the area. Mr. Peay states that there has been a loss in the value of the Property during the period 1984 to 1987 due to the "soft" real estate market in the Clarksdale community and to general economic conditions in that area. As of May 19, 1987, Mr. Peay has determined that the fair market value of the Property was $249,250.[6]

Mr. Peay states that he is qualified to appraise the Property, as he has twenty-four (24) years experience in selling, financing, managing, developing, and appraising urban, rural, commercial, and residential real estate. Mr. Peay represents his independence from the subject transaction in that he has no present or contemplated future interest in the Property and has no personal interest or bias with respect to the subject matter or the parties involved in this transaction. Further, Mr. Peay certifies that neither his employment nor his fee is contingent on the value of the Property appraised.

6. In summary, the applicants represent that the proposed transaction satisfies the criteria for exemption under section 408(a) of the Act and section 4975(c)(2) of the Code because:

(a) The sale of the Property will be a one time transaction for cash;

(b) The Plan will sell the Property at the fair market value as determined by a qualified independent appraiser;

(c) The sale will terminate a prohibited Lease between the Plan and the Employer;

(d) No fees, commissions, or other costs will be incurred by the Plan as a result of the sale; and

(e) Plan will use the proceeds from the sale to diversify the Plan's investment portfolio.

For Further Information Contact: Angelena C. Le Blanc of the Department, telephone (202) 523–8883. (This is not a toll-free number.)

Harry R. Shaw, D.D.S. Profit Sharing Plan (the Plan) Located in Owings Mills, Maryland

[Application No. D–7420]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed cash sale by the Plan of a computer system to Dr. Harry R. Shaw (Dr. Shaw), a party in interest with respect to the Plan, provided that the terms of the transaction are no less favorable to the Plan than those available in an arm's-length transaction with an unrelated party at the time the transaction is consummated.

---

[4] The Department expresses no opinion as to whether the Lease was exempt from the prohibitations of section 406 of the Act by virtue of section 414(c)(2) of the Act.

[5] The applicants represent that the Lease between the Plan and the Employer was exempt from the prohibited transaction provisions of the Act because the Lease was entered into before July 1, 1974, the date specified in the Act. Therefore, the applicants maintain that the Lease was covered by the statutory exemption provided by section 414(c)(2) of the Act until June 30, 1984. The Department, herein, expresses no opinion as to whether the Lease met the requirements of section 414(c)(2) of the Act. The applicants represent that within 60 days of the date of the grant of this proposed exemption, they will file Form 5330 with the Internal Revenue Service, and will pay any applicable excise tax due on the Lease of the Property by the Employer after June 30, 1984. In addition, the applicants will pay to the Plan an amount equal to any difference between the fair market rental value on the Property for the period June 30, 1984 to the date of the sale proposed herein and the sum actually paid to the Plan by the Employer, plus interest thereon.

[6] The Department is expressing no opinion herein as to whether the continued holding of the Property by the Plan constituted a violation of any of the fiduciary responsibility provisions of Part 4 Subtitle B. of Title I of the Act.

Summary of Facts and Representations

1. The Plan is a profit sharing plan with 2 participants. Dr. Shaw is the trustee of the Plan.

2. On October 21, 1987, the Plan invested $10,000 in a 10 year certificate of deposit paying interest of 8% per annum with the John Hanson Saving Bank (the Bank).

As an incentive to open the account the Bank offered as a gift a Macintosh Plus computer with Imagewriter II (Computer System). Dr. Shaw represents that no other gift options were available to the Plan based on the amount invested. The fair market value of the Computer System as determined by the Bank is $2,204.90 (amount to be reflected on Form 1099 to the Plan).

3. Dr. Shaw represents that the Plan has no use for the Computer System and he has offered to purchase it from the Plan for $2,204.90 in cash.

4. In summary, the applicant represents that the proposed transaction meets the statutory criteria for an exemption under section 408(a) of the Act because:

(a) The proposed sale will be a one-time transaction for cash; and

(b) The Plan will receive the fair market value for the Computer System.

For Further Information Contact: Alan H. Levitas of the Department, telephone (202 523–8194. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of partipants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 2nd day of March 1988.

Robery J. Doyle,

Acting Associate Director, Regulations and Interpretations, Pension and Welfare Benefits Administration U.S. Department of Labor.

[FR Doc. 88–4974 Filed 3–7–88 8:45 am]

BILLING CODE 4510-29-M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration, Office of Records Administration.

ACTION: Notice of availability of proposed records schedules; request for comment.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Records schedules identify records of sufficient value of warrant preservation in the National Archives of the United States. Schedules also authorize agencies after a specified period to dispose of records lacking administrative, legal, research, or other value. Notice is published for records schedules that (1) propose the destruction of records not previously authorized for disposal, or (2) reduce the retention period for records already authorized for disposal. NARA invites public comments on such schedules, as required by 44 U.S.C. 3303a(a).

DATE: Requests for copies must be received in writing on or before April 22, 1988. Once the appraisal of the records is completed, NARA will send a copy of the schedule. The requester will be given 30 days to submit comments.

ADDRESS: Address requests for single copies of schedules identified in this notice to the Records Appraisal and Disposition Division (NIR), National Archives and Records Administration, Washington, DC 20408. Requesters must cite the control number assigned to each schedule when requesting a copy. The control number appears in parentheses immediately after the name of the requesting agency.

SUPPLEMENTARY INFORMATION: Each year U.S. Government agencies create billions of records on paper, film, magnetic tape, and other media. In order to control this accumulation, agency records managers prepare records schedules specifying when the agency no longer needs the records and what happens to the records after this period. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. These comprehensive schedules provide for the eventual transfer to the National Archives of historically valuable records and authorize the disposal of all other records. Most schedules, however, cover records of only one office or program or a few series of records, and many are updates of previously approved schedules. Such schedules also may include records that are designated for permanent retention.

Destruction of records requires the approval of the Archivist of the United States. This approval is granted after a thorough study of the records that takes into account their administrative use by the agency of origin, the rights and interests of the Government and of private persons directly affected by the Government's activities, and historical or other value.

This public notice identifies the Federal agencies and their subdivisions requesting disposition authority, includes the control number assigned to each schedule, and briefly describes the records proposed for disposal. The records schedule contains additional information about the records and their disposition. Further information about the disposition process will be furnished to each requester.

Schedules Pending

1. *Department of the Army (N1–338–87–1).* Records of the U.S. Army Refugee Reception Center, Camp Kilmer, relating to routine administrative and/or housekeeping matters (schedule provides for permanent retention of

records relating to significant policies and programs).

2. *Department of the Army (N1–338–87–2).* Records of Army Bases relating to routine administrative and/or housekeeping matters (schedule provides for permanent retention of records relating to significant policies and programs).

3. *Department of the Army (N1–338–87–3).* Records of Army Agencies relating to routine administrative and/or housekeeping matters (schedule provides for permanent retention of records relating to significant policies and programs).

4. *Department of the Army (N1–338–87–6).* Records of the U.S. Army Inter-American Geodetic Survey relating to routine administrative and/or housekeeping matters (schedule provides for permanent retention of records relating to significant policies and programs).

5. *Department of the Army (N1–338–87–8).* Records of the U.S. Army Armed Forces Institute relating to administrative and/or housekeeping matters (schedule provides for permanent retention of records relating to significant policies and programs).

6. *Department of the Army (N1–338–87–3).* Records of Army cemeterial organizations relating to routine administrative and/or housekeeping matters (schedule provides for permanent retention of records relating to significant policies and programs).

7. *Department of Agriculture, Forest Service, Forest Pest Management Staff (N1–95–87–20).* Standard replies to routine inquiries and forms reporting the number of employees trained or certified in pesticide use.

8. *Federal Deposit Insurance Corporation, Legal Division (N1–34–88–1).* Records created in the course of providing assistance to ailing open banks and conducting litigation.

9. *Federal Deposit Insurance Corporation, Division of Accounting and Corporate Services (N1–34–88–2).* Call delinquent files, bank structure source documents.

10. *International Boundary and Water Commission, United States and Mexico, United States Section (N1–76–88–2).* Aerial mosaic files.

11. *Department of Justice, Federal Bureau of Investigation (N1–65–88–2).* Visa Applicant Correspondence Files.

12. *Department of Justice, Civil Division, Foreign Litigation Section (N1–131–88–1).* Office of Alien Property accounting records and card indices to case files and correspondence files previously appraised as disposable.

13. *National Archives and Records Administration, Office of Records Administration, Records Appraisal and Disposition Division (N1–GRS–88–4).* Reduction in retention period for position descriptions in General Records Schedule 1, Civilian Personnel Records.

Dated: March 2, 1988.

Don W. Wilson,

Archivist of the United States.

[FR Doc. 88–4983 Filed 3–7–88; 8:45 am]

BILLING CODE 7515-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 40–3453]

Atlas Minerals, Division of Atlas Corp.; Final Finding of No Significant Impact Regarding the Renewal of Source and Byproduct Material License SUA–917 for Operation of Atlas Minerals' Moab Uranium Mill Located in Grand County, UT

February 25, 1988.

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of final finding of no significant impact.

(1) Proposed Action

The proposed administrative action is to renew Source and Byproduct Material License SUA–917 authorizing Atlas Minerals Corporation to continue operation of their Moab Mill located in Grand County, Utah.

(2) Reasons for Final Finding of No Significant Impact

An Environmental Assessment was prepared by the staff at the U.S. Nuclear Regulatory Commission (NRC) and issued by the Commission's Uranium Recovery Field Office, Region IV. The Environmental Assessment performed by the Commission's staff evaluated potential impacts on-site and off-site due to radiological releases which may occur during the course of the operation. Documents used in preparing the assessment included operational data from the licensee's prior milling activities, the licensee's renewal application dated May 31, 1984, additional submittals dated December 17, 1984, January 18, 1985, June 5, and December 4, 1986, January 26, 1988, and the Final Environmental Statement prepared by the Commission staff dated January 1979. Based on this assessment, the Commission has determined that no significant impact will result from the proposed action, and therefore, an Environmental Impact Statement is not warranted.

The following statements support the final Finding of No Significant Impact and summarize the conclusions resulting from the environmental assessment.

(a) The ground water monitoring program in effect at the Moab Mill is sufficient to detect releases and thereby minimize any impact on ground water.

(b) Radiological effluents from the proposed operation of the mill will be minimal and well within the regulatory limits and will be continuously monitored.

(c) Environmental monitoring is comprehensive enough to detect any significant impacts due to radiological releases from the milling operation.

(d) Radioactive wastes will be minimal and will be disposed of in the tailings impoundment which will be reclaimed in accordance with applicable Federal and state regulations.

In accordance with 10 CFR 51.33(a), the Director, Uranium Recovery Field Office, made the determination to issue a draft Finding of No Significant Impact. A draft Finding of No Significant Impact was published (FR 49802) on December 4, 1985, and no comments were received.

In accordance with 10 CFR 51.33(e), the Director, Uranium Recovery Field Office, made the determination to issue a final Finding of No Significant Impact. This finding, together with the Environmental Assessment setting forth the basis for the finding, and other related environmental documents are available for public inspection and copying at the Commission's Uranium Recovery Field Office at 730 Simms Street, Golden, Colorado, and at the Commission's Public Document Room at 1717 H Street NW., Washington, DC.

Dated at Denver, Colorado, this 19th day of February, 1988.

For the Nuclear Regulatory Commission.

Harry J. Pettengill,

Chief, Licensing Branch 2, Uranium Recovery Field Office, Region IV.

BILLING CODE 7590-01-M

[Docket No. 50–498, LICENSE NO. NPF–71]

South Texas Project, Unit 1; Receipt of Petition for Director's Decision

Notice is hereby given that by Petition dated January 26, 1988, the Government Accountability Project requested that the Commission delay voting on a full-power operating license for the South Texas Project (STP), Unit 1 until there has been a complete investigation of all allegations regarding the STP and public release of a report disposing of each allegation. The Petition asserts as grounds for this request that: (1) The results of the NRC's limited investigation into allegations were predetermined, in that the NRC inspection team had prepared a draft of its findings before leaving the site after its site inspection; (2) in an on-site inspection with one of the allegers, the alleger was not permitted to show the NRC team any of his allegations relating to Unit 1; (3) the NRC review was subjected to overwhelming scheduling pressures, resulting in disposition of most of the allegations without interviewing the allegers and in a failure to thoroughly address the 60 selected allegations that were the focus of the team's review; and (4) none of the allegations of wrongdoing have been investigated by the NRC. The request is being treated pursuant to 10 CFR 2.206 of the Commission's regulations. As provided by 10 CFR 2.206, appropriate action will be taken on this request within a reasonable time.

A copy of the Petition is available for inspection in the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555.

Dated at Rockville, Maryland, this 29th day of February, 1988.

For the Nuclear Regulatory Commission.

Thomas E. Murley,

Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 30-19960, License No. 37-10059-03, EA 87-175]

BP Oil, Inc., Marcus Hook, PA; Order Imposing Civil Monetary Penalties

I

BP Oil, Inc., Marcus Hook, Pennsylvania 19061 (the "licensee") is the holder of License No. 37-10059-03 (the "license") issued by the Nuclear Regulatory Commission (the "Commission" or "NRC") which authorizes the licensee to possess and use various fixed nuclear gauges. The license was issued on May 2, 1983, replacing License No. 37-10059-02, and is due to expire on April 30, 1988.

II

An NRC safety inspection of the licensee's activities under the license was conducted on July 20–22, 1987. During the inspection, the NRC staff determined that the licensee had not conducted its activities in full compliance with NRC requirements. A written Notice of Violation and Proposed Imposition of Civil Penalties was served upon the licensee by letter dated October 22, 1987. The Notice states the nature of the violations, the provisions of the Nuclear Regulatory Commission's requirements that the licensee had violated, and the civil penalty amount for each of the violations. Two responses, both dated December 17, 1987, to the Notice of Violation and Proposed Imposition of Civil Penalties, were received from the licensee.

In its responses, the licensee admits that the violations occurred but request mitigation of the proposed civil penalty. Upon consideration of the answers received, the statements of facts, explanations, and arguments for remission or mitigation of the proposed civil penalties contained therein, and as set forth in the Appendix to this Order, the Deputy Executive Director for Regional Operations has determined that the penalties proposed for the violations designated in the Notice of Violation and Proposed Imposition of Civil Penalties should be imposed.

IV

In view of the foregoing and pursuant to section 234 of the Atomic Energy Act of 1954, as amended 42 U.S.C. 2282 and 10 CFR 2.205, it is hereby ordered that:

The licensee pay cumulative civil penalties in the amount of Two Thousand Dollars ($2,000) within thirty days of the date of this Order, by check, draft, or money order, payable to the Treasurer of the United States and mailed to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555.

V

The licensee may, within thirty days of the date of this Order, request a hearing. A request for a hearing shall be clearly marked as a request for hearing and shall be addressed to the U.S. Nuclear Regulatory Commission, Document Control Desk, Washington, DC, with a copy to the Regional Administrator, U.S. Nuclear Regulatory Commission, Region I, 475 Allendale Road, King of Prussia, Pennsylvania.

If a hearing is requested, the Commission will issue an Order designating the time and place of the hearing. If the licensee fails to request a hearing within thirty days of this Order, the provisions of this Order shall be effective without further proceedings. If payment has not been made by that time, the matter may be referred to the Attorney General for collection.

In the event the licensee requests a hearing as provided above, the issue to be considered at such hearing shall be whether, the proposed civil penalty should be imposed, in whole or in part.

For The Nuclear Regulatory Commission.

James M. Taylor,

Deputy Executive Director for Regional Operations.

Dated at Bethesda, Maryland, this 1st day of March 1988.

Appendix

Evaluation and Conclusion

On October 22, 1987, a Notice of Violation and Proposed Imposition of Civil Penalties was issued for violations of a license issued to BP Oil, Inc. The licensee responded to the Notice by two letters, dated December 17, 1987, and admits the violations, but requests mitigation of the cumulative amount of the civil penalties. The NRC's evaluation and conclusion regarding the licensee's responses are as follows:

I. Restatement of Violations

A. Condition 15 of License No. 37-10059-03 requires, in part, that removal from service and relocation of non-portable devices containing sealed sources be performed only by persons specifically licensed by the NRC or and Agreement State to perform such service. Conditon 16 of License No. 37-10059-03 requires that the licensee conduct its program in accordance with the licensee's application for license dated March 28, 1983, which states, in Item IV, that the licensee will contact the nuclear gauge manufacturer to assist in removing the gauge from service and relocation.

Contrary to the above, on July 16, 1987, four Ohmart model SHLM sealed-source non-portable gauges, each containing approximately 20 millicuries of cesium-137, were removed from Acid Storage Drum No. PV-2504:

1. By persons not specifically licensed to perform this service, and

2. Without the gauge manufacturer being contacted prior to removal of the gauges from service.

This is a Severity Level III violation (Supplement IV).

Civil Penalty—$500.

B. 1. 10 CFR 20.105(b)(1) requires that radiation levels in unrestricted areas be limited so that an individual continuously present in the area could not receive a radiation dose in excess of 2 millirems in any hour. 10 CFR 20.3(a)(17) defines an unrestricted area to include any area to which access is not controlled by the licensee for the purpose of protection of individuals from exposure to radiation and radiocative materials.

Contrary to the above, on July 14–16, 1987, radiation levels existed in an unrestricted area, namely, the inside of

Acid Storage Drum No. PV-2504, such that an individual present in the area for one hour could receive a radiation dose of greater than 2 millirems.

2. 10 CFR 20.203(b) requires that each radiation area be conspicuously posted with a sign bearing the radiation caution symbol and the words, "Caution (or Danger)—Radiation Area."

Contrary to the above, on July 14–16 1987, a radiation area existed on the inside of Acid Storage Drum No. PV-2504, and the access points to the radiation area were not posted with the required caution sign.

3. 10 CFR 20.203(f) requires that each container of licensed radiocative material bear a clearly visible lable identifying the radioactive contents.

Contrary to the above, on July 20, 1987, four Ohmart nuclear gauges, each containing 20 millicuries of cesium-137, a licensed radioactive material, did not have a clearly visible lable identifying the radioactive contents. The labels has been partially obliterated by paint and/or covered with tape.

Collectively, these violations have categorized as a Severity Level III problem (Supplement IV).

Civil Penalty—$500 assessed equally among the violations.

C. Condition 16 of License No. 37-10059-03 requires that licensed material be used in accordance with the statements, representations and procedures contained in an application dated March 28, 1983 and letters dated April 15, 1983, August 14, 1986 and September 26, 1986.

1. Item 1 of the "Nuclear Radiation Gauging Device" procedure, included with the April 15, 1983 letter, requires that the nuclear gauge be locked-out prior to work being conducted in inside a vessel.

Contrary to the above, on July 14–16, 1987, approximately 27 individuals worked inside and on a vessel, Acid Storage Drum No. PV-2504, and four nuclear gauges, each containing approximately 20 millicuries of cesium-137, had not been locked-out prior to the work being conducted.

2. Item 3 of the "Nuclear Radiation Gauging Device" procedure, included with the April 15, 1983 letter, requires that a radiation survey be conducted prior to entering a vessel bearing a nuclear gauge.

Contrary to the above, on July 14–16, 1987, approximately 27 individuals worked inside and on a vessel, Acid Storage Drum No. PV-2504, without a radiation survey first being conducted.

3. Item 5 of the "Nuclear Radiation Gauging Device" procedure, included with the April 15, 1983 letter, requires that whenever nuclear gauges are removed from a vessel where they have been installed, the gauges should be transferred immediately to lead shielded containers.

Contrary to the above, on July 16, 1987, four nuclear gagues, each containing approximately 20 millicuries of cesium-137, were removed from a vessel Acid Storage Drum No. PV-2504, and as of July 20, 1987, these gauges, had not been placed in lead shielded storage containers.

Collectively these violations have been categorized as a Severity Level III problem (Supplements IV and VI).

Civil Penalty—$500 assessed equally among the violations.

D. 10 CFR 20.405(a)(1)(v) requires that each licensee make a report within 30 days of its occurrence, of levels of radiation (whether or not involving excessive exposure of an individual) in an unrestricted area in excess of ten times of any applicable limit set forth in 10 CFR Part 20.

10 CFR 20.105(b) requires that radiation levels in unrestricted areas be limited so that an individual continuously present in the area could not receive a radiation dose in excess of 2 millirems in any hour. 10 CFR 20.3(a)(17) defines an unrestricted area to include any area to which access is not controlled by the licensee for the purpose of protection of individuals from exposure to radiation and radioactive materials.

Contrary to the above, on January 19, 1983, an incident occurred in which an individual, who was not a radiation worker, entered an unrestricted area (the Surge Hopper on the Platformer Unit) for approximately 30 minutes, and the individual received a radiation exposure which was estimated by the licensee to be approximately 84 millirem. The level of radiation that existed in the area was approximately 160 millirem per hour, which is greater than ten times the limit of two millirem in an hour for an unrestricted area, as specified in 10 CFR 20.105(b)(1), and as of July 22, 1987, the licensee had not filed a written report of the occurrence with the NRC.

This is a Severity Level III violation (Supplement IV).

Civil Penalty—$500.

II. Summary of Licensee Response

The licensee, in its two responses, admits the occurrence of the violations, one of which involved an incident similar to an incident which occurred in 1983. Further, the licensee does not contest classification of the Severity Level of the violations. However, the licensee takes issue with the NRC statement, in its October 22, 1987 letter, that "mitigation [of the civil penalties] was considered inappropriate in view of the significance of this event, and the previous event in 1983" since its corrective actions were unusually prompt and extensive. Further, the licensee indicated that the 1983 event occurred, in part, because they relied on the advice of an employee of the Ohmart Corporation (the gauge manufacturer and distributor) and that incident should not be used to deny mitigation in the present case. In addition, the licensee indicated that a written report of the 1983 incident was not filed with the NRC because of advice given by an Ohmart employee.

III. NRC Evaluation of Licensee Response

It is not clear, from the licensee responses, whether the advice provided by Ohmart Corporation actually contributed to the 1983 incident (involving excessive radiation levels in an unrestricted area), or contributed to the licensee's failure to report the incident to the NRC. In any case, the advice provided by Ohmart Corporation is not relevant to whether mitigation is appropriate since it is the responsibility of the licensee to ensure that all NRC requirements, including the conditions of the license, are met.

Furthermore, even if the responsibility for the 1983 incident, and/or the failure to report it to the NRC, rested solely with Ohmart, it would not form the basis for mitigation in this case since that incident provided the licensee prior notice of a problem, yet effective corrective actions were not taken to prevent recurrence, as evidenced by the 1987 incident. Accordingly, the NRC actually considered escalating the cumulative amount of the civil penalties in accordance with Sections V.B.3 and V.B.4 of the Enforcement Policy. However, in light of the prompt and comprehensive actions taken by licensee management in response to this recent incident in July 1987, the NRC determined that, on balance, neither escalation nor mitigation of the amount of the civil penalties was considered appropriate.

IV. NRC Conclusion

The licensee did not provide a sufficient basis for mitigation of the cumulative amount of the civil penalties. Therefore, the NRC concludes that cumulative civil penalties of $2,000 should be imposed.

BILLING CODE 7590-01-M

[Docket No. 999904, License No. General License EA 87-223]

Wrangler Laboratories, Larsen Laboratories, Orion Chemical Co., and John P. Larsen; Order Suspending Licenses (Effective Immediately)

I

Wrangler Laboratories, Larsen Laboratories, and Orion Chemical Company (the licensees), 3853 North Sherwood Road, Provo, Utah 84604, are firms using source material under general licenses granted by the Nuclear Regulatory Commission (the Commission/NRC) pursuant to 10 CFR 40.22. The general license granted by 10 CFR 40.22 authorizes the use or transfer of not more than 15 pounds of source material at one time and the receipt of not more than 150 pounds of source material in any one calendar year.

Larsen Laboratories is also a holder of a specific Radioactive Material License UT 2500183 issued by the State of Utah. The specific license, which authorizes possession of up to 150 kilograms of depleted uranium (DU) at one time, is currently suspended by the State of Utah.

Mr. Larsen has been doing business as (dba) Wrangler Laboratories, Larsen Laboratories, and Orion Chemical Company and is the owner and sole proprietor of these firms. Mr. Larsen's companies are all involved in the chemical processing of DU. The licensees receive slugs of DU, dissolve the material in boiling nitric acid, precipitate uranyl acetyl acetate (UAA) using 2,4 pentanedione, dissolve the UAA precipitate in benzene to produce recrystallized UAA, and subsequently dry, grind, filter, package and ship the pure UAA product. The UAA product is ultimately used as a catalyst in the production of Department of Defense munitions.

II

On August 23, 1982, an inspection was conducted at Orion Chemical Company. During the inspection NRC determined that the licensee was in violation of several regulatory requirements. These violations included possession of source material at one time in excess of the 15 pound limitation on such material, refusal to make records available to NRC, unauthorized disposal of DU, and failure to maintain complete records. Subsequently, on September 3, 1982, the NRC issued an Order To Show Cause and Order Temporarily Suspending License (Effective Immediately). On October 25, 1982, the NRC issued an Order Rescinding Order to Show Cause and Order Temporarily Suspending License. This action was taken following the licensee's corrective measures, to bring the operations into compliance. On December 15, 1982, the NRC issued a Notice of Violation (NOV) and Proposed Imposition of Civil Penalty for the above violations. The amount of the Civil Penalty was $500. On March 16, 1983, the licensee responded to the NOV and paid the Civil Penalty.

A specific license (SUB-1436) was issued by the NRC in December 1983 to Larsen Laboratories of Provo, Utah. The responsibility for overseeing this specific license was transferred to the State of Utah upon its becoming an Agreement State. On May 13, 1985, Utah reissued the specific license to Larsen Laboratories.

On April 15, 1986, NRC received an allegation of improper activities being conducted by Larsen Laboratories. The allegation was transferred to the State of Utah which performed inspections and found numerous violations. In all, the State of Utah found 5 contaminated facilities that Mr. Larsen had abandoned.

At one of these facilities, contaminated liquids were leaking from drums that had been stored on a truck for approximately 2 years. On November 5, 1986, the State of Utah issued an Order Suspending License (Effective Immediately) and Order Imposing Civil Monetary Penalties in the amount of $13,000. The Order, which is still in effect, required, among other specified actions, that the licensee (1) not receive or use source material except to secure or transfer such source material in its possession, (2) dispose of radioactive wastes, (3) decontaminate 2 facilities in the Oren area, (4) move to production facilities that have been approved through license amendment procedures, and (5) obtain a qualified Radiation Protection Officer. On January 15, 1987, a Settlement Agreement between the State of Utah and Larsen Laboratories was signed. The Agreement required that the specified activities in the Order be completed by April 15, 1987, and that $8,000 of the civil penalties would be suspended. The licensee paid the remaining $5,000 civil penalties but has not complied with items (4) and (5) of the Order.

On October 28, 1987, the State of Wyoming informed the NRC of an allegation that it had received concerning improper activities at Wrangler Laboratories in Evanston, Wyoming. On November 4–5, 1987, NRC inspected Wrangler Laboratories and found that Mr. Larsen, doing business as Wrangler Laboratories, was conducting chemical operations in a temporary facility and appeared to have exceeded uranium possession limits. As a result of NRC concerns, NRC Region IV staff discussed with Mr. Larsen, the potentially hazardous conditions at his Evanston facility and obtained an agreement for certain corrective measures. Those actions were specified in Confirmation of Action Letters (CAL) issued on November 12, 1987, December 8, 1987, and December 31, 1987.

An enforcement conference was held with Mr. Larsen on December 2, 1987, in Salt Lake City. During the course of the enforcement conference a number of matters of regulatory concern arose:

1. Mr. Larsen stated that he had previously conducted chemical processing of DU operations in the State of California (Foundain Valley, Huntington Beach area) about 10 to 11 years ago and in the State of Nevada (in the back of a pickup truck in the Henderson area) between November 1986 and March 1987. These statements were contradictory to those he gave to the NRC inspector during the November 4–5, 1987 inspection. During the NRC inspection, Mr. Larsen was specifically asked whether he conducted operations with source material at any place outside of the States of Utah and Wyoming. Mr. Larsen responded that he hadn't.

2. In the November 12, 1987 CAL, the licensee committed to having employees submit urine samples for uranium analyses before resuming and following the completion of the processing of the licensed material on hand at the Evanston, Wyoming, facility. During the enforcement conference, Mr. Larsen provided a November 25, 1987, letter that gave the results of such sampling. The licensee deviated from the commitment described in the November CAL in that baseline analyses were not conducted and, instead, only post-cleanup analyses were obtained on one of two individuals in these activities. The indicated post-cleanup analyses were slightly in excess of NRC action levels for uranium bioassays. Mr. Larsen stated the reason for the elevated uranium concentrations was the use of laboratory glassware that might have been contaminated with uranium. On about November 19, 1987, four samples were taken with pharmaceutically clean glassware. Two of these four samples showed higher than baseline concentrations and none of the specimens were controlled or independently verified. Another deviation from the November 12, 1987 CAL was a failure by the licensee to require individuals who were to perform

the processing of licensed material on hand to wear lapel air samplers.

3. Mr. Larsen stated that his companies were the only ones supplying UAA for Department of Defense (DOD). The NRC has determined that, contrary to this assertion, DOD purchases UAA from others.

4. Prior to and during the enforcement conference, Mr. Larsen told the NRC that UAA shipments from Wrangler Laboratories were made from Provo, Utah. Mr. Larsen provided NRC with records to support his statements. These statements, however, were contrary to statements given previously to the State of Utah authorities, who were told that all Wrangler Laboratory shipments were from Evanston, Wyoming. In addition, the records provided by Mr. Larsen also show that, notwithstanding the 15 pound possession limit, a shipment sent to the UAA buyer on August 7, 1987 from Provo, Utah, contained 16.768 pounds of source material.

5. Mr. Larsen was asked whether he or any of his companies had purchased DU from any supplier other than Nuclear Metals, Inc. Mr. Larsen responded that they hadn't. Contrary to that statement, the NRC obtained records from Aerojet Heavy Metals Company that show that they had made DU shipments to Larsen Laboratories on more than one occasion.

In late December 1987, the NRC learned from Mr. Larsen that urine samples analyzed pursuant to the commitments in the December 8, 1987 CAL had indicated some uranium intake by persons involved in cleanup of the Evanston facility. On December 31, 1987, another CAL was issued confirming termination of activities at the Evanston facility involving uranium until further notice from the NRC and the performance of further bioassays. In deviation from a commitment specified in the December 31st CAL, the licensee failed to have two individuals submit urine samples for uranium analyses until January 10, 1988, nine days after the agreed upon date. As a result, the uranium intakes for these individuals could not be estimated.

III

The NRC is currently conducting an investigation of Mr. Larsen's NRC-licensed activities. Based on the information to date, Mr. Larsen has failed to fulfill commitments made on behalf of his firms to the NRC, has made contradictory statements to NRC and the State of Utah authorities, and his firms have processed uranium in an unsafe manner with inadequate controls and resulting contamination. These actions demonstate an unwillingness to comply with NRC regulatory requirements and safe work practices which cannot be tolerated. Therefore, I lack the requisite reasonable assurance that Mr. Larsen, individually, and the companies, which he is the owner of and/or principal of, will comply with Commission requirements in the future. Therefore, I have determined, pursuant to 10 CFR 2.201(c) and 2.202(f), that the public health, safety, and interest require that pending the results of the investigation and further order of the NRC, the general license authorization for Mr. Larsen, as well as the named licensees, to receive and use NRC licensed material under their respective general licenses should be suspended to conditions, as described below, effective immediately, and that no prior notice is required.

IV

Accordingly, in view of the foregoing and pursuant to sections 62, 63, 81, 161b, 161c, 161i, 161o, 182 and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 40, *It Is Hereby Ordered, Effective Immediately, That:*

A. The general license authority of 10 CFR 40.22 with respect to Wrangler Laboratories, Larsen Laboratories, Orion Chemical Company, and Mr. Larsen is suspended and the foregoing licensees and Mr. Larsen shall not receive or use source material, except as permitted in Condition B below.

B. 1. Mr. Larsen, dba Wrangler Laboratories, shall decontaminate all surfaces and equipment within the Evanston, Wyoming, facility to or below the following levels:

Average[1] fixed—5,000 dpm alpha per 100 cm^2

Maximum fixed—15,000 dpm alpha per 100 cm^2

Removable—1,000 dpm alpha per 100 cm^2

2. Mr. Larsen, dba Wrangler Laboratories, shall dispose of licensed material (DU) remaining in the Evanston, Wyoming, facility. Material in process, but not recovered as UAA to date, must be disposed of as radioactive waste in accordance with NRC requirements.

3. Mr. Larsen, dba Wrangler Laboratories, shall complete the disposal and decontamination work required by Items B.1 and B.2 within 30 days of the date of this Order.

4. Mr. Larsen shall notify the Region IV office that the decontamination and disposal has been in accordance with this Order before vacating the Evanston Wyoming facility. Upon vacating the facility, Mr. Larsen, dba Wrangler Laboratories, shall remove all items belonging to the licensee.

C. Within 30 days of the date of this Order, Mr. Larsen, dba the licensees, any other company, or himself shall provide, in writing, to the Region IV office the address, if available, or a description of all locations at which DU in any form or quantity has at any time been received, processed, or shipped by Mr. John P. Larsen or by any other person or firm on Mr. Larsen's behalf.

D. Mr. Larsen, dba the licensees, shall submit a report of the results of all urine sample uranium analyses which were committed to NRC on and since December 4, 1987, to NRC Region IV within 30 days of the date of this Order.

The Regional Administrator, Region IV may, in writing, relax or rescind any of the above provisions in Section IV for good cause.

V

Pursuant to 10 CFR 2.202(b), the licensees and Mr. Larsen, may show cause why this Order should not have been issued by filing a written answer under oath or affirmation within 20 days of the date of issuance of this Order, setting forth the matters of fact and law on which the licensees and Mr. Larsen rely. The licensees and Mr. Larsen, may answer this Order, as provided in 10 CFR 2.202(d), by consenting to the provisions specified in Section IV above. Upon consent of Mr. Larsen or the licensees, to the provisions set forth in Section IV of this Order, or upon their failure to file an answer within the specified time, the provisions specified in Section IV above shall be final without further Order.

VI

Pursuant to 10 CFR 2.202(b), Mr. Larsen and the licensees, or any other person adversely affected by this Order may request a hearing within 20 days of this Order. Any answer to this Order or request for hearing shall be submitted to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies also shall be sent to the Assistant General Counsel for Enforcement, Office of General Counsel at the same address and to the Regional Administrator, NRC Region IV, 611 Ryan Plaza Drive, Suite 1000, Arlington, Texas 76011. If a person other than Mr. Larsen, dba the licensees requests a hearing, that person shall set forth with particularity the manner in which the petitioner's interest is adversely affected by this Order and should address the criteria set forth in 10 CFR 2.714(d). An answer to this order or a request for hearing shall not stay the immediate effectiveness of this Order.

---

[1] Average over an area not greater than 1 square meter.

If a hearing is requested, the Commission will issue an Order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such a hearing shall be whether this Order should be sustained.

For the Nuclear Regulatory Commission.

James M. Taylor,

Deputy Executive Director for Regional Operations.

Dated at Bethesda, Maryland, this 25th day of February 1988.

OFFICE OF PERSONNEL MANAGEMENT

Information Collection Submitted to OMB for Clearance

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (title 44, U.S. Code, chapter 35), this notice announces a new information collection from the public. RI 92-2, Alternative Annuity Election, will enable non-disability FERS retirees to elect to receive either the annuity ordinarily payable, or an alternative annuity (reduced) and lump sum payment of the retirement deductions and interest to their credit. OPM estimates that 3,000 will be completed annually, for a respondent burden of approximately 1,000 hours. For copies of this proposal call William C. Duffy, Agency Clearance Officer, on (202) 632-7714.

DATE: Comments on this proposal should be received on or before March 22, 1988.

ADDRESSES: Send or deliver comments to—

William C. Duffy, Agency Clearance Officer, U.S. Office of Personnel Management, 1900 E Street NW., Room 6410, Washington, DC 20415.

and

Joseph Lackey, Information Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, NW., Room 3235, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: James L. Bryson, (202) 632-5472.

U.S. Office of Personnel Management.

Constance Horner,

Director.

BILLING CODE 6325-01-M

POSTAL SERVICE

Intent To Prepare a Supplemental Draft of Environmental Impact Statement, General Mail Facility, New York, NY

Notice is hereby given that the United States Postal Service (USPS) intends to prepare a Supplemental Draft Environmental Impact Statement (SDEIS) further documenting the assessment of effects related to development of a new General Mail Facility (GMF) in New York City on a site bounded by Ninth Avenue, 29th Street, Tenth Avenue and 28th Street. This facility will supplement or replace certain existing mail processing facilities in Manhattan. The project includes development of approximately 268 units of New York City-sponsored housing that would be erected over the GMF. The SDEIS will evaluate the following alternatives to the proposed project: rehabilitation of the existing James A. Farley Station (JAF) bounded by Eighth Avenue, 31st Street, Ninth Avenue, and 33rd Street, and its retention for mail processing; and a "No Action" alternative in which JAF will be retained for mail processing.

The SDEIS will consider construction of public housing as part of the project on this site in accordance with Pub. L. 92-313. Because a public scoping hearing has already been held on this project on June 26, 1985, the public's comments have already been incorporated into the SDEIS.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-25410; File No. SR-MBS-87-11]

Self-Regulatory Organizations; Proposed Rule Change by MBS Clearing Corp. Relating to MBS Clearing Corporation's Division Rules; Filing of Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on January 4, 1988, the MBS Clearing Corporation filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Attached as Exhibit A are proposed changes, together with a summary of changes, to the Depository Division ("Depository Division") rules of MBS Clearing Corporation (the "Corporation"). The changes revise and amend the Depository Division rules to, among other things, provide for assessments of Participants in certain cases and clarify the Corporation's rights in connection with the financing of principal and interest payments.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed rule changes clarify and revise certain Depository Division rules applicable to Depository Transactions, Depository Services and Depository Participants. Capitalized terms used herein have the same meanings ascribed to them in the Depository Division Rules.

Proposed rule changes to Article II, Rule 5, sections 5(a) and 5(b) permit the Corporation, in the event that any Participant fails to pay any Debit Balance for its Depository Account arising from the purchase of Securities or the assessment, to assess those Participants which received credits to their Cash Balances and/or credits of Securities to their Depository Accounts (valued at market value) as a result of transactions with the Depository Account of the defaulting Participant.

When a Participant defaults in payment of a Debit Balance arising from the purchase of Securities, there will always be Participant(s) with corresponding credits to their Cash Balances. When a Participant defaults in paying a Debit Balance arising from an assessment, however, there may not always be a Participant with a corresponding credit to its Cash Balance although there may be Participants who assumed the risk of dealing with the defaulting Participant by purchasing Securities from such Participant. The changes to section 5(a) and 5(b) permit the Corporation to assess those Participants as well.

Article III, Rule 2, Section 1 is amended to make clear that principal and interest payments on deposited Securities may be received from either the issuer or a paying agent. In addition, the new term "principal and interest advance" has been added to mean an advance by the Corporation of principal and interest not yet collected from an issuer or paying agent in immediately available funds, and the new term "subject principal and interest payment" has been added to mean principal and interest which is the subject of such advance.

Article III, Rule 2, Section 2 has been divided into three parts—Section 2(a) addresses principal and interest advances made with the Corporation's own funds, Section 2(b) addresses principal and interest advances made with funds borrowed from "third-party lenders", and Section 2(c) addresses principal and interest advances made with a combination of the Corporation's own funds and borrowed funds. In order to address concerns raised by certain third-party lenders regarding their ability to perfect a security interest in assigned principal and interest payments, the proposed rule change provides that each Participant receiving a principal and interest advance made with borrowed funds assign its right to the subject principal and interest payments directly to the Corporation's third-party lenders and guarantee the repayment of the advance directly to the lenders. The Corporation is also granted a power of attorney from each Participant to execute any necessary documents, including financing statements.

The foregoing proposed rule change to Article III, Rule 2, Section 2 results in no substantive change to the rights and obligations of Participants since the rules previously provided that in the event that either the Corporation or a third-party lender did not receive or was not entitled to retain (e.g., because of an unperfected security interest) a principal and interest payment, the Participant receiving the related principal and interest advance would be required to repay it to the Corporation or such third party lender, as the case may be.

Article III, Rule 2, Section 4 has been amended to extend the Corporation's ability to reverse erroneous credits of principal and interest arising from circumstances other than issuer or paying agent error (e.g., data processing error). Section 6 (Enforcement of Guarantee) now contemplates principal and interest advances made with a combination of the Corporation's own funds and borrowed funds.

Finally, a new sentence has been added to the last paragraph of Article IV, Rule 1, Section 11 to make it clear that if a Participant fails to pay any debit balance resulting from assessment of an indemnification payment, the provisions of Article II, Rule 5, Section 5 (permitting assessment of other Participants) generally will apply.

The proposed rule changes are consistent with the Securities Exchange Act of 1934 in that they facilitate the prompt and accurate clearance and settlement of securities transactions.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Corporation does not believe that any burden will be placed on competition as a result of the proposed rule changes.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Comments on the proposed rule changes have not yet been solicited nor received. However, copies of the text of the proposed rule change will be distributed to Depository Division Participants for comments. The Corporation will promptly notify the Commission of any written comments received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will: (A) By order approve the proposed rule change, or (B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-referenced self-regulatory organization. All submissions should refer to File No. SR-MBS-87-11 and should be submitted by March 29, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 1, 1988.

Jonathan G. Katz,

Secretary.

MBS DEPOSITORY DIVISION—PROPOSED RULE CHANGES

Article II—Depository Transactions

Rule 5. Failure of Participants To Meet Cash Settlement Obligations

* * * * *

Sec. 5. Assessments to Cover Losses. If, by reason of a Participant's default in payment of its Debit Balance, the

OL

Corporation suffers a loss or incurs an obligation which remains uncovered after exercise of the remedies available under section 4 of this Rule 5 (including without limitation any obligations to third party lenders which cannot be discharged with proceeds from the sale of any collateral assigned to secure such obligations, whether on account of adverse claims with respect to any such collateral or declines in the market value of collateral or otherwise):

(a) The Corporation shall assess the Participants which received credits to their Cash Balances *and/or credits of Securities to their Depository Accounts (valued at Market Value)* as a result of transactions involving the Depository Account with respect to which the defaulting Participant has failed to pay the Debit Balance in proportion to the relative dollar amount of such credits. All assessments shall be made by debiting the Cash Balances of the non-defaulting Participants which previously were credited *with cash or which relate to Depository Accounts previously credited with Securities.*

(b) In the event any Participant defaults in payment of an assessment debited to the Cash Balance for its Depository Account pursuant to paragraph (a) above, the Corporation shall assess in like manner those Participants which received credits to their Cash Balances *and/or credits of Securities to their Depository Accounts (valued at Market Value)* as a result of transactions involving [such] *the* Depository Account *of the defaulting Participant.* In the event any such Participant defaults in payment of such assessment, the Corporation shall repeat the assessment process in like manner until the Corporation has fully recovered its loss or repaid its obligation or until their remain no Participants subject to assessment subject to this paragraph (b).

* * * * *

Article III—Depository Services

Rule 2. Principal and Interests Payments

Sec. 1. Credit of Payments. The Proprietary Cash Balance or Agency Cash Balance of each Participant shall be credited with principal and interest, as calculated by the Corporation in accordance with accepted industry standards, on all Securities held in such Participant's Proprietary Account and associated Seg Accounts and in its Agency Account and associated Seg Accounts, as of the close of business on the applicable Record Date (after giving effect to any transfers from the associated MBSCC Transfer Accounts pursuant to section 3 of Rule 3 of Article II), as adjusted in such manner as the Corporation from time to time may prescribe to reflect the settlement of transactions which were scheduled to settle on or before the Record Date but in fact settled after that date. For this purpose, except as otherwise provided in Rule 3 or section 4 of Rule 4 of Article IV, the Participant's Proprietary Account and Agency Account shall be increased by Securities in the Participants' Proprietary Repo Out Position and Agency Repo Out Position, respectively, or previously transferred from the Proprietary Account, Agency Account or associated *MBSCC* Transfer Account to a Pledgee Account and reduced by Securities in the Participants' Proprietary Repo in Position and Agency Repo in Position, respectively. Participants' Cash Balances shall be credited with principal and interest: (a) When the Corporation has received such principal and interest from the *issuer(s) or* paying agent(*s*), *as the case may be,* in immediately available funds; or (b) subject to the availability to the Corporation of sufficient funds (which may be the Corporation's own funds and/or funds borrowed *by the Corporation* from third party lenders), on the Principal and Interest Payment Date or such Business Day thereafter as the Corporation shall determine, irrespective of whether such payments have been collected by the Corporation from the *issuer(s) or* paying agent(*s*). [The availability of funds from third-party lenders to permit advances of principal and interest, to any Participant may be conditioned upon the Participant's compliance with such conditions as the lender may impose.] *Any advance by the Corporation to a Participant pursuant to clause (b) above of principal and interest not yet collected from the issuer(s) or paying agent(s) in immediately available funds is hereinafter referred to a "principal and interest advance," and the principal and interest which is the subject of such advance is hereinafter referred to as the "subject principal and interest payment."*

Sec. 2. Financing of Payments.

(a) If the Corporation, *using only its own funds,* has [credited Participants' Cash Balances with] *made a* principal and interest *advance* [which have not been received from the Paying Agents in immediately available funds,] the Corporation shall be entitled to retain *the subject* principal and interest *payment* when received from the *issuer(s) or* paying agents(s) to the extent of *the principal and interest advance.* [any amounts advanced and to assign to third party lenders its rights to such payments.]

(b) If the Corporation, using only the proceeds of a loan or loans made by one or more third-party lenders to the Corporation to fund one or more principal and interest advances (the loan made by each such third-party lender being hereinafter referred to as a "third-party loan"), has made a principal and interest advance, the Corporation shall be entitled to retain, as agent for the sole benefit of such third-party lender(s), the subject principal and interest payment when received from the issuers(s) of paying agent(s) to the extent of the principal and interest advance made with the proceeds of such third-party loan(s).

(c) If the Corporation, using a combination of its own funds and the proceeds of one or more third-party loans, has made a principal and interest advance, the Corporation shall (i) until each third party loan has been repaid in full, be entitled to retain, as agent for the sole benefit of the third-party lender(s) making such third-party loan(s), the subject principal and interest payment when received from the issuer(s) or paying agent(s) to the extent of the principal and interest advance made with the proceeds of such third-party loan(s) and (ii) after each such third-party loan has been repaid in full, be entitled to retain, for the Corporation's own benefit, the subject principal and interest payment when received from the issuer(s) or paying agent(s) to the extent of the remainder of the principal and interest advance. If the Corporation, using a combination of its own funds and the procees of one or more third-party loan(s), had made prinicipal and interest advances on any Business Day to more than one Participant, the principal and interest advance to each Particpant shall be deemed to have been made pro rata with the Corporation's own funds and the proceeds of such third-party loan(s).

(d) The availability of third-party loans may be conditioned upon Participants' compliance with such conditions as the third-party lender(s) may impose. Without limiting the generality of the foregoing, each Participant agrees (i) to guarantee the full and prompt payment when due of all third-party loans to the Corporation the proceeds of which are used, in whole or in part, to fund one or more principal and interest advances of such Participant (with the right of recovery against such Participant being limited to its pro rata share of such principal and interest advances made by the Corporation to Participants on Business Day using the proceeds of third-party loans made by such third-party lender(s), less the amount of all subject principal and interest payments relative to such principal and interest advances received and retained by such third-party lender(s), plus interest on such amount and all expenses incurred by such third-party lender(s) in enforcing such guarantee) and (ii) to assign to such third-party lender(s), or any agent of such third party lender(s), all rights of such Participant in and to all subject principal and interest payments relating to all principal and interest advances made by the Corporation to such Participants using, in whole or in part, the proceeds of third-party loans made by such third-party lender(s). Each Participant hereby (i) irrevocably appoints the Corporation as such Participants attorney-in-fact, with full authority in the place and stead of such Participant and in the name of such Participant or otherwise, from time to time in the Corporation's discretion, to take any action and to execute any document required by any third-party lender to affect the guarantee(s) and assignment(s) referenced in the immediately preceding sentence of this Section 2(d), including without limitation, financing statements, and (ii) agrees to be bound by the terms and provisions of any such document as may from time to time be executed by the Corporation, including any such document executed by the Corporation prior to such Participants becoming a Participant.

(*e*) Any financing costs relating to [payment of uncollected] principal and interest *advances* [on Securities] *funded with the Corporation's own funds and/or the proceeds of third-party loans,* net of any savings to the Corporation arising by reason of prepayments of principal and interest, determined on an issue-by-issue basis, shall be charged to Participants in proportion to their Record Date positions in such Securities, as adjusted pursuant to Section 1 of this Rule 2. As used in this section 2(*e*), the term "financing costs" shall mean, [(a)] (*i*) to the extent the Corporation has borrowed funds from third-party lenders, the costs of such borrowing charged by such *third-party* lenders and [(b)] (*ii*) to the extent the Corporation has advanced its own funds, interest at the highest rate that would have been charged to the Corporation by its third-party lenders if they had made a loan.

(*f*) If for any reason the Corporation or a third-party lender, *or any agent for a third-party lender,* to which [the Corporation] a Participant has assigned, *pursuant to the terms of Section 2(d),* its rights [pursuant to the Section 2] *in and to subject principal and interest payments* does not promptly receive *the subject* principal and interest payments form the *issuer(s)* or paying agent(s) or is not entitled to retain them when received, [each] *such* Participant agrees that is shall [be liable to], *upon demand by* the Corporation or such *third-party* lender, *as the case may be, promptly* pay the Corporation or such third-party lender an amount equal to *the product of (i) the subject principal and interest payments multiplied by (ii) the percentage of* [such payments on the same basis as the Participant received advances of such payments on the same basis as the Participant received advances of such payments] *the principal and interest advance funded by the Corporation or such third-party lenders, as the case may be.*

* * * * *

Sec. 4. Adjustments. In the event an Issuer or paying agent errs in a principal and interest payment [and] *of for any reason* a Participant's Cash Balance has been credited to reflect [the] *an* erroneous payment, the Corporation reserves the right, upon written or electronic notice to the Participant, to reverse such credit.

* * * * *

Sec. 6. Enforcement of Guarantees. To the extent entitled or permitted to do so, the Corporation shall, in the event that any issuer or paying agent fails to timely pay principal or interest on any desposited Securities registered in the name of MBSCC's nominee, file appropriate claims for payment under any guarantee by FHLMC, FNMA or GNMA, as the case may be. Except to the extent that (i) the Corporation has made a principal and interest advance to a Participant *pursuant to section 2(a), (b) or (c) of this Rule 2* with the Corporation's own funds [pursuant to Section 2(a) of this Rule 2 and is entitled to retain the subject principal and interest payment] and/or [has] borrowed funds *obtained* from [a] *one or more* third-party lenders [pursuant to Section 2(b) of this Rule] and the subject principal and interest payments *is retainable by the Corporation and/or* has been assigned to the third-party lender(*s*) or (ii) the Securities with respect principal and interest *are payable* have been pledged pursuant to Section 1 of Rule 5 of Article II, the Corporation, in filing such claim for payment and in receiving, holding and disbursing any funds received pursuant to such claim be deemed to be acting solely as agent for the benefit of the Participant entitled to crediting of principal and interest under Section 1 of this Rule 2.

Article IV—Participants

Sec. 11. Indemnification. The Corporation shall be entitled to indemnification from Participants as described below:

(a) In consideration of the Corporation's provision of despository services, Participants shall indemnify the Corporation against any loss, reasonable cost or expense, damage or liability arising out of the performance, non-performance or misperformance of such duties except to the extent that the Depository's conduct violated the standard of care set forth in section 2 of Rule 6 of Article VI[I].

(b) In consideration of the Corporation maintaining custody of Participants' Securities, Participant shall indemnify the Corporation and any nominee of the Corporation in the name of which such Securities are registered against any loss, reasonable cost or expense, damage or liability which they may sustain as a result of maintaining custody of such Securities including (i) assessments, (ii) losses, liabilities and expense arising from claims of third parties (including without limitation claims of a prior lien or other interest in Securities or other property in which the Corporation is granted a lien or acquired title pursuant to these Rules or in principal and interest retainable by the Corporation *or assign to a third-party lender* pursuant to Section [1] *2* of Rule 1 of Article III) and from taxes and other governmental charges and (iii) related expenses in respect of any such Securities, except to the extent that the Depository's conduct violated the standard of care set forth in Section 1 of Rule 6 of Article VI.

* * * * *

As provided in section 2 of Rule 2 of Article II, the amount of any indemnification owed by a Participant to the Corporation shall be charged against such Participant's Proprietary Cash Balance, Agency Transfer Cash Banalde and/or Pledgee Cash Balance in such proportions as the Corporation in its sole judgment shall determined. *If such participant fails to pay any resulting Debit Balance, the assessment procedures described in section 5 of Rule 5 of Article II shall apply.*

Self-Regulatory Organizations; Proposed Rule Change by New York Stock Exchange, Inc., Relating to the Revised Specialist Job Description

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on November 27, 1987, the New York Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of a proposed new Specialist Job Description (the Description). The Description restates and consolidates the Specialist Job Description and the Code of Acceptable Business Practices for Specialists which were adopted in June, 1976 and are being rescinded and replaced in their entirety by the Description.

Section I of the proposed Description points out that an Exchange member registered as a specialist is accountable to the Exchange for the quality of the Exchange markets in the securities in which the specialist is registered. It notes that the specialist is responsible for fostering and acting to maintain liquid and continuous two-sided agency auction markets by acting as agent and principal in those securities on the Exchange Floor and that the specialist helps ensure that such markets are fair, orderly, operationally efficient and competitive with all other markets in those securities. Section I points out that all specialists are expected to comply with all applicable federal laws and regulations, as well as with Exchange rules and policies and that by so doing the specialist actively contributes to maintaining high quality Exchange markets in the public interest. It is also explained that because of the specialist's central position in the Exchange's continuous two-way agency auction market, the manner in which and the degree to which the specialist performs significantly affects the efficiency, competitiveness and overall quality of Exchange markets, and largely determines the Exchange's success as a national securities market. For these reasons, the Description explains that specialists are expected to exhance their performance in the ways set forth in the Description. Section I also points out that a specialist occupies a position of public trust and therefore should act at all times in a manner consistent with that trust. It states that it is essential for the specialist to adhere to the highest standards of business and ethical conduct in the performance of all aspects of his job and that failure to do so can be detrimental to the Exchange and may constitute a breach of the public trust. Section I also points out that acts of omissions by specialists that appear to be inconsistent with the primary duties of the specialist as described in Section II of the Description are addressed by the Market Performance Committee of the Exchange's Board of Directors via the regulatory process under applicable Exchange rules and, in particular, under Exchange Rule 103A which provides the standards that are applied with respect to the adequacy of the performance of a specialist in the discharge of his duties. Exchange Rule 103A as proposed to be amended has been filed with the Commission and awaits approval.

Section II of the Description explains the primary duties of the specialist under seven separate headings: "Agency Function", "Dealer Function", "Maintaining the Auction Market", "Communication Function", "Administrative Function", "Competitive Responsibilities" and "Other Market Responsibilities".

Under the heading, "Agency Function", the specialist is reminded that he is expected to act as agent on behalf of orders entrusted to him and to hold the interests of such orders above his own. He is expected to properly represent each order, regardless of its size or source, in the marketplace to ensure the timely and best possible execution in accordance with ther terms of the order and the rules and policies of the Exchange.

Under the heading, "Dealer Function", the specialist is reminded that in performing as principal he is expected to discharge both his affirmative obligation and his negative obligation. He is also expected to make firm and continuous two-sided quotations and effect principal transactions in a manner consistent with his financial resources. Section II explains the affirmative obligation of a specialist acting as principal as the obligation to buy and sell securities as principal when such transactions are necessary to minimize an actual or reasonably anticipated short-term imbalance between supply and demand in the auction market and do not upset the natural longer term forces of supply and demand, and to effect such transactions when their absence could result in an unreasonable lack of continuity and/or depth. The negative obligation of the specialist acting as principal is explained as the obligation to provide an opportunity for public orders to be executed against each other without undue dealer intervention within the context of the current market, and to refrain from dealing in a manner that is inconsistent with the overall objective of maintaining a fair and orderly market. The specialist is reminded that the negative obligation includes a requirement that, given a reasonable time frame and lack of substantive change in market conditions, the specialist should refrain from interfering with a cross when the specialist has previously indicated "no interest" and that the specialist should also refrain from interfering with a "clean" agency cross unless his bid or offer has been previously solicited or unless the reasonably anticipated needs of the market require the specialist to do so in order to be able to fulfill his market maintenance responsibilities and a Floor Official of the Exchange has been consulted in the event of any disagreement.

Section II explains that the continuous market obligation of a specialist acting as principal requires the specialist to make firm and continuous two-sided quotations that are timely and accurately reflect market conditions, and to ensure that principal transactions are calculated to contribute to the maintenance of price continuity with reasonable depth, and that such transactions are effected relative to the general market, the market in the particular security and the adequacy of the specialist's total position in the security with respect to the actual or reasonably anticipated needs of the market. It is explained that the continuous market requirement also requires the specialist to ensure that the election of Stop Orders results from the fair and orderly price movement of the stock and not from poor performance by the specialist or inadequate depth.

Finally, in performing his dealer function, Section II explains that the specialist should effect principal transactions in a manner that is consistent with his financial resources and in a manner that maximizes the efficient use of those resources. He is reminded to report promptly to the Exchange any actual or imminent financial problems that may affect his ability to fulfill his responsibilities to the market.

Under the heading, "Maintaining the Auction Market", the Description explains the specialist's responsibilities in opening and reopening trading in a listed security. First, insofar as market openings and reopenings are concerned, the specialist is reminded that he should initiate trading in the affected security as soon as market conditions allow, and at a price that reflects a thorough, professional assessment of market conditions at the time and appropriate consideration of the balance of supply and demand as reflected by orders represented in the auction market. He is reminded to take extra care, however, when the opening or reopening price is significantly different from the preceding closing price. The specialist is also reminded of the need to maintain continuous, fair and orderly trading in the aftermarket and to seek the advice of Floor Officials in a timely manner when requesting delays in openings or trading halts. Also, as a part of his duty to maintain the auction market, Section II explains the specialist's duties as market coordinator and reminds him of the need to serve as the market coordinator for all of the securities in which he is registered by exercising leadership and managing trading crowd activity and by promptly identifying unusual market conditions that may affect orderly trading in those securities, seeking the advice and assistance of Floor Officials when appropriate.

The Description also explains that the specialist is expected to act as a market catalyst for the securities in which he is registered by making all reasonable efforts to bring buyers and sellers together to facilitate the public pricing of orders without acting as principal unless reasonably necessary.

In performing his communication function, Section II points out that in view of the specialist's central position in the Exchange's continuous two-way agency auction market, the specialist should equally and impartially provide accurate and timely market information to all inquiring members in a professional and courteous manner and that he should also indicate the depth of the current maket, to the extent his agency responsibility allows, in response to any reasonable inquiry from a member. Finally, it is explained that the specialist should equally and impartially provide all inquiring members with accurate, complete and current opening price indications and pre-opening information, such as the amount of stock paired off and the excess to buy or sell.

In discharging his administrative function, Section II of the Description points out that the specialist's administrative and operating practices can have a significant impact on the quality and competitiveness of the Exchange's market. The Description explains that, for this reason, the specialist should:

1. Employ efficient administrative procedures that enable the specialist to maintain accurate and up-to-date records, process trade documents efficiently and accurately, and respond promptly to requests for order or market information.
2. Promptly provide information when necessary to research the status of an order or a questioned trade, and cooperate with other members in resolving and adjusting errors.
3. Accurately report executions of orders entrusted to the specialist in a timely and complete manner and provide information, when requested, on the status of orders and the confirmation of open orders.
4. Maintain a level of trained staff on the Exchange Floor at all times sufficient to meet periods of reasonable demand, and provide the supervision necessary to insure the efficiency and professionalism of the specialist's operation.
5. Insure that, during an absence from the post, the replacement on the Floor is aware of all pertinent information related to the securities in which the specialist specializes.
6. Make arrangements for supplementary staff and financial resources that may be necessary to meet extraordinary market conditions.
7. Utilize Exchange systems and procedures.

In discharging his competitive responsibilities, Section II points out the intensely competitive environment in which the specialist operates and, in light of that environment, explains that the specialist should:

1. Make every effort to be fully competitive in all segments of the market and to maintain and increase market share in the securities in which he acts as specialist.
2. Establish a positive professional relationship with Exchange listed companies and each year extend an invitation to meet with representatives of the listed companies that have issued the securities in which he specializes to acquaint them with the workings and operational aspects of the agency auction market system.
3. Each year extend an invitation to meet with appropriate on and off-floor representatives of those member firms with which the specialist conducts a significant business and such other member firms as are deemed appropriate to discuss the service, operational and competitive requirements of the member firms.

Finally, Section II of the proposed Specialist Job Description lists a number of other market responsibilities the specialist is expected to discharge. Under this heading, the Description explains that the specialist is expected to:

1. Assist the Exchange in developing and implementing systems and procedures designed to enhance the efficiency and competitiveness of the Exchange's agency auction market, and to satisfy Federal requirements.
2. Comply with all measures and standards of performance established by the Exchange, understanding that failure to meet these standards could subject the specialist to prescribed performance improvement procedures, which may include the reallocation of a security or securities.
3. Keep records required by Federal and Exchange rules, promptly and accurately report required information to the Exchange, and comply with all Exchange rules which govern the financing of specialist operations.
4. Take any actions not prohibited by Federal or Exchange rule or policy or precluded by professional judgment to foster and maintain liquid continuous two-sided agency auction markets on the Exchange Floor and to ensure that such markets are fair, orderly and efficient in the public interest and competitive with non-Exchange markets in Exchange listed securities; and avoid any action which would hinder the achievement of these objectives.

The Description concludes with a Section III which lists the requirements an Exchange member must comply with if he wishes to be registered as an Exchange specialist. These include the requirement that he be associated with an existing or newly created specialist unit approved by the Exchange; that he complete an adequate training period under the supervision of an experienced specialist; that he pass the Exchange administered specialist examination; that he ensure that the specialist unit with which he is to be associated meets the Exchange's specialist capital requirements; and that he participate in an orientation session with a panel of market professionals, whose membership is to be drawn from the Market Performance Committee of the Exchange's Board of Directors, to discuss the responsibilities and duties of being an Exchange specialist.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in Sections A, B, and C below.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the Description is to guide specialists in the performance of their duties in a manner that is consistent with the rules of the Exchange and the provisions of the 1934 Act and the rules thereunder. The Description adds specificity to the rules of the Exchange applicable to registered specialists. It augments and reinforces those rules; and, thus, is in the nature of an interpretation of Exchange rules that govern the conduct of registered specialists on the Exchange.

Given the length of time that had transpired since the Specialist Job Description and the Code of Acceptable Business Practices for Specialists were adopted by the Exchange in 1976, the Exchange commenced a review of those documents in late 1983 to determine whether a restatement of them was necessary to more accurately reflect the specialist's role in the mid-80's. It was recognized that such a restatement might be appropriate in light of the significant changes that had been experienced in the securities markets generally since 1976 and the new trading support systems that had been introduced by the Exchange in the interim.

Input was solicited from the Exchange's various constituent groups as to the revisions thought to be necessary to update the Specialist Job Description and Code. Initial recommendations were developed by a group of specialists and those recommendations were reviewed by Exchange staff with each of the advisory committees of the Board of Directors of the Exchange. Those recommendations were also reviewed with representatives of floor brokers, institutional and upstairs traders, regional and specialty firms of the Exchange, listed companies, and the operations staffs of major Exchange member firms. As a result of this review and dialogue, the Description, restating and consolidating the former Specialist Job Description and Code, had emerged.

By describing with some specificity the performance expected of Exchange members who are registered as specialists with the Exchange, the proposed Specialist Job Description is consistent with the requirements of section 6(b)(5) of the 1934 Act which requires that rules of an exchange be designed "to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, * * * and, in general, to protect investors and the public interests * * * ."

The Description is also consistent with requirements of Rule 11b–1(a)(2)(ii) under the 1934 Act which requires that the rules of a national securities exchange which permit a member of the Exchange to register as a specialist and to act as a dealer shall include "requirements, as a condition of a specialist's registration, that a specialist engage in a course of dealings for his own account to assist in the maintenance, so far as practicable, of a fair and orderly market * * *". By explaining the course of conduct expected by the Exchange from its specialists as a consequence of Exchange rules, the 1934 Act and the rules thereunder, the Description will help assure that the dealings of Exchange specialists comport with the requirements of Rule 11b–1.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the 1934 Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments have been received, nor are written comments to be solicited, from any person relating to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the propose rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by March 29, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: February 29, 1988.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. IC-16297; (812-6275)]

ML Convertible Securities, Inc.; Application

March 2, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 ("the 1940 Act").

Applicant: ML Convertible Securities, Inc. ("the Company").

Relevant 1940 Act Sections: Exemption requested pursuant to section 6(c) from the provisions of section 30(f).

Summary of Application: The Company requests an order exempting any affiliated person of Merrill Lynch Asset Management, Inc. ("MLAM") from

section 30(f) of the 1940 Act, other than (1) Any person who is directly or indirectly the beneficial owner of more than 10 percent of any class of the Company's shares, (2) any director or officer of the Company, (3) the President and all Executive and Senior Vice Presidents of MLAM, and (4) any other officer of MLAM who manages, or supervises the management of, or who makes recommendations or participates in the determination of which recommendations shall be made, or in connection with his duties obtains information concerning which securities are being purchased or sold for the Company.

Filing Dates: The application was filed on January 6, 1986 and amended on August 4, and September 5, 1986.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on the application or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on March 28, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Company with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. ML Convertible Securities, Inc., P.O. Box 9011, Princeton, New Jersey 08543-9011.

FOR FURTHER INFORMATION CONTACT: Fran Pollack-Matz, Staff Attorney (202) 272-3024 or Houghton R. Hallock, Special Counsel (202) 272-3030, Division of Investment Management.

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier, (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. The Company, registered under the 1940 Act as a closed-end, diversified management investment company, is a "dual-purpose" type of investment company which has issued two classes of securities, both of which are listed for trading on the New York Stock Exchange, Inc. The Company is registered under section 12 of the Securities Exchange Act of 1934 ("1934 Act") (File No. 1-8950). The Company's by-laws provide that neither MLAM nor any officer, director or employee with managerial responsibilities of MLAM or the Company may own beneficially more of one class of the Company's securities than the other. MLAM, a wholly owned subsidiary of Merrill Lynch & Co., Inc. ("Merrill Lynch"), which serves as investment adviser to the Company, employed 92 officers and assistant officers as of December 6, 1985.

2. Because the Company is registered pursuant to section 12 of the 1934 Act, any 10% shareholders, directors and officers of the Company are directly subject to the reporting requirements and liabilities of section 16 of the 1934 Act. According to the Company, the significant effect of section 30(f) of the 1940 Act, therefore, on the Company is to subject all other affiliated persons of MLAM—i.e., those affiliated persons who are not also 10% stockholders, directors or officers of the Company—to the requirements and liabilities of section 16 of the 1934 Act.

3. Neither Merrill Lynch nor any Merrill Lynch subsidiary other than MLAM participates in, or is privy to, investment decision making on behalf of the Company (except to these same extent that any unaffiliated purchaser or seller of portfolio securities from or to the Company may be aware of transactions made or declined to be made by the Company). In addition, such participation within MLAM is highly prescribed.

4. Nonetheless, to assure that the purposes of section 30(f) of the 1940 Act are satisfied with respect to the Company's shares, the exemption requested by the Company would not extend to the President or any Executive or Senior Vice President of MLAM. Additionally, a MLAM affiliate who may be a 10% stockholder, director or officer of the Company would remain subject to section 30(f) of the 1940 Act to avoid any implication that the Commission has, in some way, relieved him of his direct responsibilities and liabilities purusant to section 16 of the 1934 Act. Currently, the President, the sole Executive Vice President, two senior Vice-Presidents and two Vice Presidents of MLAM are directly subject to section 16 of the 1934 Act as directors and/or officers of the Company.

Applicant's Legal Conclusions

1. The Company submits that the exemption requested is necessary or appropriate in the public interest and consistent with the protection of investors and purposes fairly intended by the policy and provisions of the 1940 Act. To subject all individuals and corporations affiliated with MLAM to the routine filing of dozens of Form 3's and 4's (the forms required by section 16 of the 1934 Act) will result in increased regulatory costs, both to the Company and to the Commission, without meaningful public benefit. This request for exemption accords with the Commission staff's longstanding analyses of section 30(f) under the 1940 Act as expressed in various no-action letters.

2. The application would in no way diminish the scope or applicability of the anti-fraud provisions of section 10(b) and Rule 10b-5 under the 1934 Act as to any person.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 3190-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Proposed Advisory Circular 121.195(d)–1A]

Operational Landing Distances for Wet, Grooved or Porous Friction Course Overlayed Runways; Transport Category Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability of proposed Advisory Circular (AC) 121.195(d)–1A, and request for comments.

SUMMARY: This notice announces the availability of and requests comments on a proposed advisory circular (AC) pertaining to operational landing distances on wet runways. This notice is necessary to give all interested persons an opportunity to present their views on the proposed AC.

DATE: Comments must be received on or before May 9, 1988.

ADDRESS: Send all comments on the proposed AC to: Federal Aviation Administration, Flight Technical Programs Branch, AFS–210, 800 Independence Avenue, SW., Washington, DC 20591. Comments may be inspected at the above address between 9:00 a.m. and 4:00 p.m. weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Richard Gough, AFS–210, at the address above, telephone (202) 267–3728.

SUPPLEMENTARY INFORMATION:

Comments Invited

A copy of the draft AC may be obtained by contacting the person named above under "FOR FURTHER INFORMATION CONTACT." Interested persons are invited to comment on the proposed AC by submitting such written data, views, or arguments as they may desire. Commenters should identify AC 121.195(d)–1A and submit comments in duplicate, to the address specified above. All communications received on or before the closing date for comments will be considered by the Flight Technical Programs Branch before issuing the final AC.

Background

In determining safe operational runway lengths that provide for operational variables not included in type certification tests, § 121.195(b) of the Federal Aviation Regulations (FAR) requires a runway length adequate to allow a full-stop landing within 60 percent of the effective length of the runway. Section 121.195(d) requires an additional 15 percent runway length for operations into wet or slippery runways. As an alternative, § 121.195(d) allows operational wet distances to be used if they are based "on a showing of actual operating landing techniques on wet runways." Guidelines for operational certification under § 121.195(d) have existed for many years in AC 121.195(d)–1, dated November 19, 1965. Because of the vast amount of operational experience gained since publication of the original AC, it is considered appropriate to issue a revised AC to reflect guidelines more fitting of modern transport category airplanes and their operating environment.

Issued in Washington, DC, on February 22, 1988.

William T. Brennan,

Acting Director of Flight Standards

[FR Doc. 88–4951 Filed 3–7–88; 8:45 am]

BILLING CODE 4910-13-M

Federal Highway Administration

[FHWA Docket No. 87–20]

Contract Procedures; Buy America Requirements

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Denial of national waiver of Buy America.

SUMMARY: The FHWA hereby provides notice of its determination to deny a request for a national waiver of Buy America requirements for Reno Mattresses. The federal regulations in 23 CFR 635.410 provide, with exceptions, that no Federal-aid highway construction project in which steel materials are to be used is to be authorized for advertisement or authorized to proceed unless all manufacturing processes for such material occur in the United States. The decision to deny the request for a national waiver is based on a review of docket comments and other information developed from internal FHWA sources.

FOR FURTHER INFORMATION CONTACT: Mr. Stuart A. Bender, Office of the General Counsel, (202) 366–0780, Federal Highway Administration, 400 Seventh Street SW., Washington, DC 20590.

SUPPLEMENTARY INFORMATION: On October 8, 1987, at 52 FR 37701 the FHWA published a notice of request for a national waiver of the requirements of 23 CFR 635.410 (Buy America Requirements) for Reno Mattresses (Gabion Wire Baskets) and requested that comments be submitted to Docket No. 87–20 on or before December 7, 1987 The request for the waiver was made by Terra Aqua, Inc., Reno, Nevada. After the closing date for receiving comments, FHWA reviewed and considered all of the comments received.

Assessment of Comments

Six comments were received in response to the request for comments. Comments were submitted by representatives from the following interest groups: four state transportation agencies, two private industries. Three state transportation agencies expressed support for the waiver, if it would stimulate competition. The fourth state transportation agency expressed opposition to the waiver, in part due to the small quantity of Gabion wire baskets used on its construction projects.

Of the two comments received from private industry, one company was against the waiver, in part due to its contention that a sufficient domestic quantity exists which is of satisfactory quality. The other company was in favor of only granting a limited waiver for foreign manufactured products made of domestic steel.

After a careful consideration of the public comments received as well as other information developed internally the FHWA has determined that a national waiver of Buy America is not justified for several reasons.

Pursuant to FHWA regulations (23 CFR 635.410(b)(4)), Buy America

requirements do not apply if the amount of foreign steel involved does not exceed 0.1 percent of the total contract cost or $2,500.00, whichever amount is greater. Based on the comments received and internal agency information, it has been determined that Reno Mattresses compose only a small percentage of the cost of Federal-aid highway construction projects. This small percentage in many cases would be too low to trigger the application of the Buy America Act.

Additionally, internal FHWA information reveals that in the past 7 years, four out of five Federal-aid highway construction projects in Illinois involving Reno mattresses and gabions used a quantity of steel less than the $2,500.00 limit allowed for foreign steel.

Furthermore, the comments revealed that Reno Mattresses are not frequently used in sufficient quantity on highway construction projects to warrant granting a national waiver of Buy America. Additionally, internal agency information reveals a limited usage of Reno Mattresses and that such Mattresses are usually used in small quantities. A national waiver seems unnecessary where in fact there is little or nor applicability of Buy America.

Finally, the comments reveal that, in addition to Maccaferri, other U.S. domestic companies, such as Hilfiker, Inc., currently exist to provide competition. Also, internal FHWA information shows that the domestic supply is considered to be adequate. Moreover, an additional source of competition is provided by manufacturers of polypropylene mattresses, which offer an alternative design which has been accepted as equivalent to steel mattresses by several states. These circumstances negate the factual basis for granting the waiver under the regulation, which is lack of production in the United States "in sufficient and reasonably available quantity which are of a satisfactory quality."

Conclusion

In light of the information available from the public comments and FHWA's internal information, the FHWA has determined that the requested national waiver of Buy America requirements for Reno Mattresses is not justified and is not in the public interest and, therefore, is denied. (Sec. 165 of Pub. L. 97–424, 96 Stat. 2097, 2136 as amended; 23 U.S.C. 315; 49 CFR 1.48)

Issued on March 2, 1988.

Robert E. Farris,

Deputy Administrator, Federal Highway Administration.

BILLING CODE 4910-22-M

Federal Railroad Administration

[BS–Ap–No. 2728]

CSX Transportation Co.; Public Hearing

The CSX Transportation Company has petitioned the Federal Railroad Administration (FRA) seeking approval of the proposed discontinuance of the signal systems currently installed on its line between Cottage Grove, Indiana, and LaCrosse, Indiana, a distance of approximately 177 miles. This proceeding is identified as FRA Block Signal Application No. 2728.

After examining the carrier's proposal and the available facts, the FRA has determined that a public hearing is necessary before a final decision is made on this proposal.

Accordingly, a public hearing is hereby set for 10 a.m. on April 28, 1988, in Room 201–D of the YMCA at 6th and Wabash Streets In Peru, Indiana.

The hearing will be an informal one, and will be conducted in accordance with Rule 25 of the FRA Rules of Practice (49 CFR 211.25), by a representative designated by the FRA.

The hearing will be a nonadversary proceeding and, therefore, there will be no cross-examination of persons presenting statements. The FRA representative will make an opening statement outlining the scope of the hearing. After all initial statements have been completed, those persons who wish to make brief rebuttal statements will be given the opportunity to do so in the same order in which they made their initial statements. Additional procedures, if necessary for the conduct of the hearing, will be announced at the hearing.

Issued in Washington, DC, on March 1, 1988.

J.W. Walsh,

Associate Administrator for Safety.

Part II

Department of Transportation

Federal Aviation Administration

14 CFR Part 71

Proposed Establishment of Airport Radar Service Areas; Notice of Proposed Rulemaking

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 88–AWA–2]

Proposed Establishment of Airport Radar Service Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish an Airport Radar Service Area (ARSA) at Fresno Air Terminal, CA; Moline Quad City Airport, IL; Monterey Peninsula Airport, CA; and Greater Peoria Airport, IL. With the exception of Fresno, each location is an airport at which a nonregulatory Terminal Radar Service Area (TRSA) is currently in effect. Establishment of each ARSA would require that pilots maintain two-way radio communication with air traffic control (ATC) while in the ARSA. Implementation of ARSA procedures at each of the affected locations would promote the efficient control of air traffic and reduce the risk of midair collision in terminal areas.

DATES: Comments must be received on or before June 17, 1988. Informal airspace meeting dates are as follows: Fresno Air Terminal, CA—May 18, 1988; Moline Quad City Airport, IL—May 12, 1988; Monterey Peninsula Airport, CA—May 16, 1988; and Greater Peoria Airport, IL—May 18, 1988.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket [AGC–204], Airspace Docket No. 88–AWA–2, 800 Independence Avenue SW., Washington, DC 20591.

The informal airspace meeting places are as follows:

Fresno Air Terminal, CA, ARSA

Date: May 18, 1988
Time: 7:00 p.m.
Location: National Guard Armory, 5140 East Dakota Avenue, Fresno, CA

Moline Quad City Airport, IL, ARSA

Date: May 12, 1988
Time: 7:00 p.m.
Location: Elliott Beechcraft, Quad City Airport, Moline, IL

Monterey Peninsula Airport, CA, ARSA

Date: May 16, 1988
Time: 7:00 p.m.
Location: Ingersoll Hall, Naval Post Graduate School, Third and Sloat, Monterey, CA

Greater Peoria Airport, IL, ARSA

Date: May 18, 1988
Time: 7:00 p.m.
Location: Byerley Aviation Hangar, Greater Peoria Airport, Peoria, IL.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

The informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Joe Gill, Airspace Branch (ATO–240), Airspace—Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–9252.

SUPPLEMENTARY INFORMATION:

Comments Invited

This notice involves four locations. Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 88–AWA–2." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–230, 800 Independence Avenue SW., Washington, DC. 20591, or by calling (202) 267–3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

Meeting Procedures

In addition to seeking written comments on this proposal, the FAA will hold informal airspace meetings for the proposed ARSA locations in order to receive additional input with respect to the proposal. The dates, times, and places for these meetings are listed above. Persons who plan to attend the meetings should be aware of the following procedures to be followed:

(a) The meetings will be informal in nature and will be conducted by the designated representative of the Administrator. Each participant will be given an opportunity to make a presentation.

(b) There will be no admission fee or other charge to attend and participate. The meetings will be open to all persons on a space-available basis. The FAA representative may accelerate the agenda to enable early adjournment if the progress of the meetings is more expeditious than planned.

(c) The meetings will not be recorded. A summary of the comments made at these meetings will be filed in the docket.

(d) Position papers or other handout material relating to the substance of the meetings may be accepted. Participants submitting handout materials should present an original and two copies to the presiding officer. There should be an adequate number of copies provided for further distribution to all participants.

(e) Statements made by FAA participants at the meetings should not be taken as expressing a final FAA position.

Agenda

Presentation of Meeting Procedures
FAA Presentation of Proposal
Public Presentations and Discussion

Background

On April 22, 1982, the National Airspace Review (NAR) plan was published in the Federal Register (47 FR 17448). The plan encompassed a review of airspace use and procedural aspects of the ATC system. Among the main objectives of the NAR was the

improvement of the ATC system by increasing efficiency and reducing complexity. In its review of terminal airspace, NAR Task Group 1–2 concluded that TRSA's should be replaced. Four types of airspace configurations were considered as replacement candidates, of which Model B, since redesignated ARSA, was the consensus recommendation.

In response, the FAA published NAR Recommendation 1–2.2.1, "Replace Terminal Radar Service Areas with Model B Airspace and Service" in Notice 83–9 (July 28, 1983; 48 FR 34286) proposing the establishment of ARSA's at the Robert Mueller Municipal Airport, Austin, TX, and the Port of Columbus International Airport, Columbus, OH. ARSA's were designated at these airports on a temporary basis by SFAR No. 45 (October 28, 1983; 48 FR 50038) in order to provide an operational confirmation of the ARSA concept for potential application on a national basis.

Following a confirmation period of more than a year, the FAA adopted the NAR recommendation and, on February 27, 1985, issued a final rule (50 FR 9252; March 6, 1985) defining an ARSA and establishing air traffic rules for operation within such an area. Concurrently, by separate rulemaking action, ARSA's were permanently established at the Austin, TX, and Columbus, OH, airports and also at the Baltimore/Washington International Airport, Baltimore, MD, (50 FR 9250; March 6, 1985). The FAA has stated that future notices would propose ARSA's for other airports at which TRSA procedures were in effect.

Additionally, the NAR Task Group recommended that the FAA develop quantitative criteria for proposing to establish ARSA's at locations other than those which are included in the TRSA replacement program. The task group recommended that these criteria take into account, among other things, traffic mix, flow and density, airport configuration, geographical features, collision risk assessment, and ATC capabilities to provide service to users. This criteria has been developed and is being published via the FAA directives system.

The FAA has established ARSA's at 101 locations under a paced implementation plan to replace TRSA's with ARSA's. This is one of a series of notices to implement ARSA's at locations with TRSA's or locations without TRSA's which warrant implementation of an ARSA.

Related Rulemaking

This notice proposes ARSA designation at four locations identified as candidates for an ARSA in the preamble to Amendment No. 71–10 (50 FR 9252). Other candidate locations will be proposed in future notices published in the Federal Register.

The Current Situation at the Proposed ARSA Locations

A TRSA is currently in effect at three of the locations at which ARSA's are proposed in this notice. Fresno is a radar facility currently providing Stage II service. A TRSA consists of the airspace surrounding a designated airport where ATC provides radar vectoring, sequencing, and separation for all aircraft operating under instrument flight rules (IFR) and for participating aircraft operating under visual flight rules (VFR). Stage II service, with the exception of separation, provides the same. TRSA airspace and operating rules are not established by regulation, and participation by pilots operating under VFR is voluntary, although pilots are urged to participate. This level of service is known as Stage III and is provided at all locations identified as TRSA's. The NAR task group recommended the replacement of most TRSA's with ARSA's.

A number of problems with the TRSA program were identified by the task group. The task group stated that because there are different levels of service offered within the TRSA, users are not always sure of what restrictions or privileges exist, or how to operate with them. According to the task group, there is a shared feeling among users that TRSA's are often poorly defined, are generally dissimilar in dimensions, and encompass more area than is necessary or desirable. There are other users who believe that the voluntary nature of the TRSA does not adequately adddress the problems associated with nonparticipating aircraft operating in relative proximity to the airport and associated approach and departure courses. There is strong advocacy among user organizations that terminal radar facilities should provide all pilots the same service, in the same way, and, to the extent feasible, within standard size airspace designations.

Certain provisions of FAR § 91.87 can exacerbate a problem identified by the task group. For example, aircraft operating under VFR to or from a satellite airport and within the airport traffic area (ATA) of the primary airport are excluded from the two-way radio communications requirement of § 91.87. This condition is acceptable until the volume and density of traffic at the primary airport dictates further action. At the five proposed locations, the volume and density of traffic have increased to the point where the implementation of ARSA's is strongly recommended.

The Proposal

The FAA is considering an amendment to § 71.501 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish ARSA's at Fresno Air Terminal, CA; Moline Quad City Airport, IL; Monterey Peninsula Airport, CA; and Greater Peoria Airport, IL, which are public airports, three of which currently have nonregulatory TRSA's in effect. The proposed locations are depicted on charts to this notice.

FAA regulations, 14 CFR 91.88, define ARSA and prescribe operating rules for aircraft, ultralight vehicles, and parachute jump operations in airspace designated as an ARSA. The ARSA rule provides in part that, prior to entering the ARSA, any aircraft arriving at any airport in an ARSA or flying through an ARSA must: (1) Establish two-way radio communications with the ATC facility having jurisdiction over the area, and (2) while in the ARSA, maintain two-way radio communications with that ATC facility. For aircraft departing from the primary airport within the ARSA, two-way radio communications must be maintained with the ATC facility having jurisdiction over the area. For aircraft departing a satellite airport within the ARSA, two-way radio communications must be established as soon as practicable after takeoff with the ATC facility having jurisdiction over the area, and thereafter maintained while operating within the ARSA.

All aircraft operating within an ARSA are required to comply with all ATC clearances and instructions and any FAA arrival or departure traffic pattern for the airport of intended operation. However, the rule permits ATC to authorize appropriate deviations to any of the operating requirements of the rule when safety considerations justify the deviation or more efficient utilization of the airspace can be attained. Ultralight vehicle operations and parachute jumps in an ARSA may only be conducted under the terms of an ATC authorization.

The FAA adopted the NAR task group recommendation that each ARSA be of the same airspace configuration insofar as practicable. The standard ARSA consists of airspace within 5 nautical miles of the primary airport extending from the surface to an altitude of 4,000 feet above that airport's elevation, and that airspace between 5 and 10 nautical miles from the primary airport from 1,200 feet above the surface to an altitude of 4,000 feet above that airport's elevation. Proposed deviation from the standard has been necessary at some airports due to adjacent regulatory airspace, international boundaries, topography, or unusual operational requirements.

Definitions, operating requirements, and specific airspace designations applicable to ARSA may be found in 14 CFR Part 71, § 71.14 and § 71.501, and Part 91, § 91.1 and § 91.98.

For the reasons discussed under "Regulatory Evaluation," the FAA has determined that this proposed regulation is not a "major rule" under Executive Order 12291 and is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

Regulatory Evaluation

The FAA has conducted a Regulatory Evaluation of the proposed establishment of these additional ARSA sites. The major findings of that evaluation are summarized below, and the evaluation is available in the regulatory docket.

a. Costs

Costs which potentially could result from the establishment of additional ARSA sites fall into the following categories:

(1) Air traffic controller staffing, controller training, and facility equipment costs incurred by the FAA.

(2) Costs associated with the revision of charts, notification of the public, and pilot education.

(3) Additional operating costs for circumnavigating or flying over the ARSA.

(4) Potential delay costs resulting from operations within an ARSA.

(5) The need for some operators to purchase radio transceivers.

(6) Miscellaneous costs.

It has been the FAA's experience, however, that these potential costs do not materialize to any appreciable degree, and when they do occur, they are transitional, relatively low in magnitude, or attributable to specific implementation problems that have been experienced at a very small minority of ARSA sites. The reasons for these conclusions are presented below.

FAA expects that the additional ARSA sites proposed in this notice can be implemented without requiring additional controller personnel above current authorized staffing levels, because participation in radar services at these locations is already quite high, and the separation standards permitted in ARSA's will allow controllers to absorb the slight increase in participating traffic by handling all traffic much more efficiently. Further, because controller training will be conducted during normal working hours and these facilities already operate the necessary radar equipment, FAA does not expect to incur any appreciable implementation costs. Essentially, the FAA will modify its terminal radar procedures at the proposed ARSA sites in a manner that will make more efficient use of existing resources.

No additional costs are expected to be incurred because of the need to revise sectional charts to incorporate the new ARSA airspace boundaries. Changes of this nature are routinely made during charting cycles, and the planned effective dates for newly established ARSA's are scheduled to coincide with the regular 6-month chart publication intervals.

This rulemaking proceeding and process will satisfy much of the need to notify the public and educate pilots about ARSA operations. The informal public meeting being held at each location where an ARSA is being proposed provides pilots with the best opportunity to learn both how an ARSA works and how it will affect their local operations. The expenses associated with these public meetings are considered costs attributable to the rulemaking process; however, any public information costs following establishment of a new ARSA are strictly attributable to the ARSA. The FAA expects to distribute a Letter to Airmen to all pilots residing within 50 miles of ARSA sites explaining the operation and configuration of the ARSA finally adopted. The FAA also has issued an Advisory Circular on ARSA's. The combined Letter to Airmen and prorated Advisory Circular costs have been estimated to be approximately $500 for each ARSA site. This cost is incurred only once upon the initial establishment of an ARSA.

Information on ARSA's following the establishment of additional sites will also be disseminated at aviation safety seminars conducted throughout the country by various district offices. These seminars are regularly provided by the FAA to discuss a variety of aviation safety issues and, therefore, will not involve additional costs strictly as a result of the ARSA program. Additionally, no significant costs are expected to be incurred as a result of the follow-on user meetings that will be held at each site following implementation of the ARSA which will allow users to provide feedback to the FAA on local ARSA operations. These meetings are being held at public or other facilities which are being provided free of charge or at nominal cost. Further, because these meetings are being conducted by local FAA facility personnel, no travel, per diem, or overtime costs will be incurred by regional or headquarters personnel.

FAA anticipates that some pilots who currently transit a TRSA without establishing radio communications or participating in radar services may choose to circumnavigate the mandatory participation airspace of an ARSA rather than participate. Some minor delay costs will be incurred by these pilots because of the additional aircraft variable operating cost and lost crew and passenger time resulting from the deviation. Other pilots may elect to overfly the ARSA, or transit below the 1,200 feet above ground level (AGL) floor between the 5- and 10-nautical-mile rings. Although this will not result in any appreciable delay, a small additional fuel burn will result from the climb portion of the altitude adjustment (which will be offset somewhat by the descent).

FAA recognizes that the potential exists for delay to develop at some locations following establishment of an ARSA. The additional traffic that the radar facilities will be handling as a result of the mandatory participation requirement may, in some instances, result in minor delays to aircraft operations. FAA does not expect such delay to the appreciable. FAA expects that the greater flexibility afforded controllers in handling traffic as a result of the separation standards allowed in an ARSA will keep delay problems to a minimum. Those that do occur will be transitional in nature, diminishing as facilities gain operating experience with ARSA's and learn how to tailor procedures and allocate resources to take fullest advantage of the efficiencies that an ARSA will permit. This has been the experience at most of the locations where ARSA's have been in effect for the longest period of time and is the recurring trend at the locations that have been more recently designated.

The FAA does not expect that any operator will find it necessary to install radio transceivers as a result of establishing the ARSA's proposed in this notice. Aircraft operating to and from primary airports already are required to have two-way radio communications capability because of existing airport traffic areas and, therefore, will not incur any additional costs as a result of the proposed ARSA's. Further, the FAA has made an

effort to minimize these potential costs throughout the ARSA program by providing airspace exclusions, or cutouts, for satellite airports located within 5 nautical miles of the ARSA center where the ARSA would otherwise have extended down to the surface. Procedural agreements between the local ATC facility and the affected airports have also been used to avoid radio installation costs.

At some proposed ARSA locations, special situations might exist where establishment of an ARSA could impose certain costs on users of that airspace. However, exclusions, cutouts, and special procedures have been used extensively throughout the ARSA program to alleviate adverse impacts on local fixed base and airport operators. Similarly, the FAA has eliminated potential adverse impacts on existing flight training practice areas, as well as soaring, ballooning, parachuting, ultralight and banner towing activities, by developing special procedures to accommodate these activities through local agreements between ATC facilities and the affected organizations. For these reasons, the FAA does not expect that any such adverse impact will occur at the candidate ARSA sites proposed in this notice.

b. Benefits

Much of the benefit that will result from ARSA's is nonquantifiable and is attributable to simplification and standardization of ARSA configurations and procedures. Further, once experience is gained in ARSA operations, the flexibility allowed air traffic controllers in handling traffic within an ARSA will enable them to move traffic with both efficiently and increased safety.

Some of the benefits of the ARSA cannot be specifically attributed to individual candidate airports, but rather will result from the overall inprovements in terminal area ATC procedures realized as ARSA's are implemented throughout the country. ARSA's have the potential of reducing both near and actual midair collisions at the airports where they are established. Based upon the experience at the Austin and Columbus ARSA confirmation sites, FAA estimates that near midair collisions may be reduced by approximately 35 to 40 percent. Further, FAA estimates that implementation of the ARSA program nationally may prevent approximately one midair collision every 1 to 2 years throughout the United States. The quantifiable benefits of preventing a midair collision can range from less than $100,000, resulting from the prevention of a minor nonfatal accident between general aviation aircraft, to $300 million or more, resulting from the prevention of a midair collision involving a large air carrier aircraft and numerous fatalities. Establishment of ARSA's at the sites proposed in the notice will contribute to these improvements in safety.

c. Comparison of Costs and Benefits

A direct comparison of the costs and benefits of this proposal is difficult for a number of reasons. Many of the benefits of the rule are nonquantifiable, and it is difficult to specifically attribute the standardization benefits, as well as the safety benefits, to individual candidate ARSA sites.

FAA expects that any adjustment problems that may be experienced at the ARSA locations proposed in this notice will only be temporary, and that once established, the ARSA's will result in efficient terminal area operations. This has been the experience at the vast majority of ARSA sites that have already been implemented. In addition, establishment of the proposed ARSA sites will contribute to a reduction in near and actual midair collisions. For these reasons, FAA expects that establishment of the ARSA sites proposed in this notice will produce long term, ongoing benefits that will far exceed their costs, which are essentially transitional in nature.

International Trade Impact Analysis

This proposed regulation will only affect terminal airspace operating procedures at selected airports within the United States. As such, it will have no affect on the sale of foreign aviation products or services in the United States, nor will it affect the sale of United States aviation products or services in foreign countries.

Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small entities are not unnecessarily and disproportionately burdened by government regulations. Small entities are independently owned and operated small businesses and small not-for-profit organizations. The RFA requires agencies to review rules that may have "a significant economic impact on a substantial number of small entities."

The small entities that potentially could be affected by implementation of the ARSA program include the fixed-base operators, flight schools, agricultural operators and other small aviation businesses located at satellite airports within 5 nautical miles of the ARSA center. If the mandatory participation requirement were to extend down to the surface at these airports, where under current regulations participation in radar services and radio communication with ATC is voluntary, operations at airports inside the core might be altered, and some business could be lost to airports outside of the ARSA core. FAA has proposed to exclude many satellite airports located within 5 nautical miles of the primary airport at candidate ARSA sites to avoid adversely impacting their operations and to simplify coordinating ATC responsibilities between the primary and satellite airports. In some cases, the same purposes will be achieved through Letters of Agreement between ATC and the affected airports that establish special procedures for operating to and from these airports. In this manner, FAA expects to eliminate any adverse impact on the operations of small satellite airports that potentially could result from the ARSA program. Similarly, FAA expects to eliminate potentially adverse impacts on existing flight training practice areas, as well as soaring, ballooning, parachuting, ultralight, and banner towing activities, by developing special procedures that will accommodate these activities through local agreements between ATC facilities and the affected organizations. FAA has utilized such arrangements extensively in implementing the ARSA's that have been established to date.

Further, because the FAA expects that any delay problems that may initially develop following implementation of an ARSA will be transitory, and because the airports that will be affected by the ARSA program represent only a small proportion of all the public use airports in operation within the United States, small entities of any type that use aircraft in the course of their business will not be adversely impacted.

For these reasons, the FAA certifies that the proposed regulation, if adopted, will not result in a significant economic impact on a substantial number of small entities, and a regulatory flexibility analysis is not required under the terms of the RFA.

List of Subjects in 14 CFR Part 71

Aviation safety, Airport radar service areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.501 [Amended]

2. Section 71.501 is amended as follows:

Fresno Air Terminal, CA [New]

That airspace within a 5-mile radius of the Fresno Air Terminal (lat. 36°46′28″ N., long. 119°42′58″ W.), extending upward from the surface to and including 4,400 feet MSL; and that airspace within a 10-mile radius of the airport extending upward from 1,800 feet MSL to and including 4,400 feet MSL.

Moline Quad City Airport, IL [New]

That airspace within a 5-mile radius of the Moline Quad City Airport (lat. 41°26′55″ N., long. 90°30′29″ W.) extending upward from the surface to and including 4,600 feet MSL; and that airspace within a 10-mile radius of the airport extending upward from 2,200 feet MSL to and including 4,600 feet MSL.

Monterey Peninsula Airport, CA [New]

That airspace within a 5-mile radius of the Monterey Peninsula Airport (lat. 36°35′19″ N., long. 121°50′52″ W.) extending upward from the surface to and including 4,200 feet MSL; and that airspace within a 10-mile radius of the airport beginning at the Pacific Ocean shoreline southwest of the airport clockwise to the 140° bearing from the airport extending upward from 1,500 feet MSL to and including 4,200 feet MSL; and that airspace within a 10-mile radius of the airport beginning at the 140° bearing from the airport clockwise to the Pacific Ocean shoreline, extending upward from 3,200 feet MSL to and including 4,200 feet MSL. The airspace contained within Restricted Area R–2511 is excluded when it is in use.

Greater Peoria Airport, IL [New]

That airspace within a 5-mile radius of the Greater Peoria Airport (lat. 40°39′53″ N., long. 89°41′31″ W.) extending upward from the surface to and including 4,700 feet MSL; and that airspace within a 10-mile radius of the airport extending upward from the surface to and including 4,700 feet MSL, from the 284° bearing from the airport clockwise to the 154° bearing from the airport; and that airspace within a 10-mile radius of the airport extending upward from 1,800 feet MSL to and including 4,700 feet MSL from the 154° bearing from the airport clockwise to the 284° bearing from the airport.

Issued in Washington, DC, on March 1, 1988.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

14 CFR Parts 27 and 29
Airworthiness Standards for Rotorcraft; Normal and Transport Category and Emergency Medical Services; Proposed Rules; Announcement of Public Meeting

BEST COPY AVAILABLE

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 27 and 29

[Docket No. 25287; Notice No. 87-4]

Occupant Restraint in Normal and Transport Category Rotorcraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Proposed rule; announcement of public meeting and reopening of comment period.

SUMMARY: This notice announces that the comment period for the notice of proposed rulemaking which concerns occupant restraint in normal and transport category rotorcraft (52 FR 20938; June 3, 1987) is being reopened to allow additional time for comment. This notice also announces that a public meeting will be held to discuss this proposed rule.

DATES: The public comment period which closed December 30, 1987, is being reopened until May 6, 1988.

The public meeting will begin at 9 a.m. on April 20, 1988.

ADDRESSES: Comments on the notice may be mailed in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, ATTN: Rules Docket (AGC-10), Docket No. 25287, 800 Independence Avenue SW., Washington, DC 20591.

The meeting will be held at the FAA, Southwest Region, Training Room, Room 167, Building 3B, 4400 Blue Mound Road, Fort Worth, Texas.

FOR FURTHER INFORMATION CONTACT: Mr. J.H. Major, FAA, Rotorcraft Standards Staff, Fort Worth, Texas 76193-0111, telephone (817) 624-5117

SUPPLEMENTARY INFORMATION: Notice 87-4 proposes to revise Parts 27 and 29 of the Federal Aviation Regulations (FAR). The proposals would add the dynamic crash impact design requirement conditions for seat and occupant restraint systems, increase the static design load factors for seating devices and items of mass in the cabin or adjacent to the cabin as prescribed, prescribe a shoulder harness for each occupant, and add human impact injury criteria for the dynamic crash impact conditions. These proposals are intended to significantly improve occupant protection levels in a survivable emergency landing impact.

As a result of substantial opposition to some of the proposals by small domestic rotorcraft manufacturers, foreign rotorcraft manufacturers, and foreign airworthiness authorities, the FAA has determined that a public meeting is necessary. The diverging positions of these important segments of the rotorcraft community and the larger domestic manufacturers merit extending the comment period and allowing a public forum for presentation of the issues involved.

Accordingly, the comment period is extended, and a public meeting has been scheduled.

Issued in Fort Worth, Texas, on February 29, 1988.

Don P. Watson,

Acting Director, Southwest Region.

14 CFR Parts 27 and 29

Emergency Medical Services (EMS) Configuration Airworthiness and Operational Forum

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Announcement of public meeting.

SUMMARY: This notice announces a public meeting to discuss current EMS issues that are related to the application of rotorcraft airworthiness and operational standards for both normal and transport category rotorcraft.

DATE: The public meeting will be held on April 20, 1988

ADDRESS: The meeting will be held at the FAA, Southwest Region, Training Room, Room 167, Building 3B, 4400 Blue Mound Road, Fort Worth, Texas.

FOR FURTHER INFORMATION CONTACT: Mr. J.H. Major, FAA, Rotorcraft Standards Staff, Fort Worth, Texas 76193-0111, telephone (817) 624-5117 or Mr. Max Halliburton, FAA, Operations Branch, Flight Standards Division, Fort Worth, Texas 76193-0265, telephone (817) 624-5265.

SUPPLEMENTARY INFORMATION: The FAA is seeking input from all segments of industry and foreign airworthiness authorities regarding the possible need for advisory material and regulatory changes to assure safety and standardization of certification of rotorcraft designed for use in EMS operations.

Some issues which will be considered include but are not limited to the following:

(1) Patient oxygen systems and other life support systems.

(2) Seat, berth, and litter design criteria or standards.

(3) Patient incubators (isolettes) and power supply assurance.

(4) Shoulder harnesses.

(5) Emergency evacuation criteria or standards.

(6) Occupant protection.

(7) Operations specifications.

(8) Weather minimums.

(9) Flight and rest requirements.

(10) Training requirements.

In the interest of conservation of time and travel resources of meeting participants, the FAA has scheduled this EMS meeting to immediately follow a meeting to discuss Notice of Proposed Rulemaking No. 87-4 (52 FR 20938; June 3, 1987) on occupant restraint in rotorcraft which will begin at 9 a.m. on April 20, 1988. (See notice, this issue of **Federal Register.**) The EMS discussion will begin immediately following the close of discussion of the occupant restraint proposals and may continue the following day, if necessary.

Issued in Fort Worth, Texas, on February 26, 1988.

Don P. Watson,

Acting Director, Southwest Region.

Part IV

Department of the Interior

Minerals Management Service

Training and Qualifications of Personnel in Well-Control Training; Notice of Approval

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Training and Qualifications of Personnel in Well-Control Training Schools

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of approved well-control training schools.

SUMMARY: As published in the Federal Register on December 21, 1978, (43 FR 59551) the Minerals Management Service (MMS) is providing, for public information, a current list of MMS approved well-control schools.

FOR FURTHER INFORMATION CONTACT: Mr. T.C. Cable, Minerals, Management Service, Mail Stop 647, 12203 Sunrise Valley Drive, Reston, Virginia 22091, telephone (703) 648-7751.

SUPPLEMENTARY INFORMATION: On January 19, 1982, the MMS was established under Secretarial Order No. 3071. The Federal Register Notice of February 19, 1982, (47 FR 7506) published the MMSS-OCS-T 1 Training Standard, "Training and Qualifications of Personnel in Well-Control Equipment and Techniques for Drilling on Offshore Locations," Second Edition. The following is a list of MMS approved well-control schools:

MMS Approved Well-Control Schools

Legend

Job Classification

RH—Rotary Helper
DM—Derrickman
DR—Driller
TP—Toolpusher
OR—Operator's Representative

Blowout-Preventer Stack Type

SUR—Surface BOP Stack
SUB—Subsea BOP Stack

It is anticipated that periodic Notices of this will be published in the future on an as needed basis.

Dated: February 24, 1988.

John B. Rigg,

Associate Director for Offshore Minerals Management.

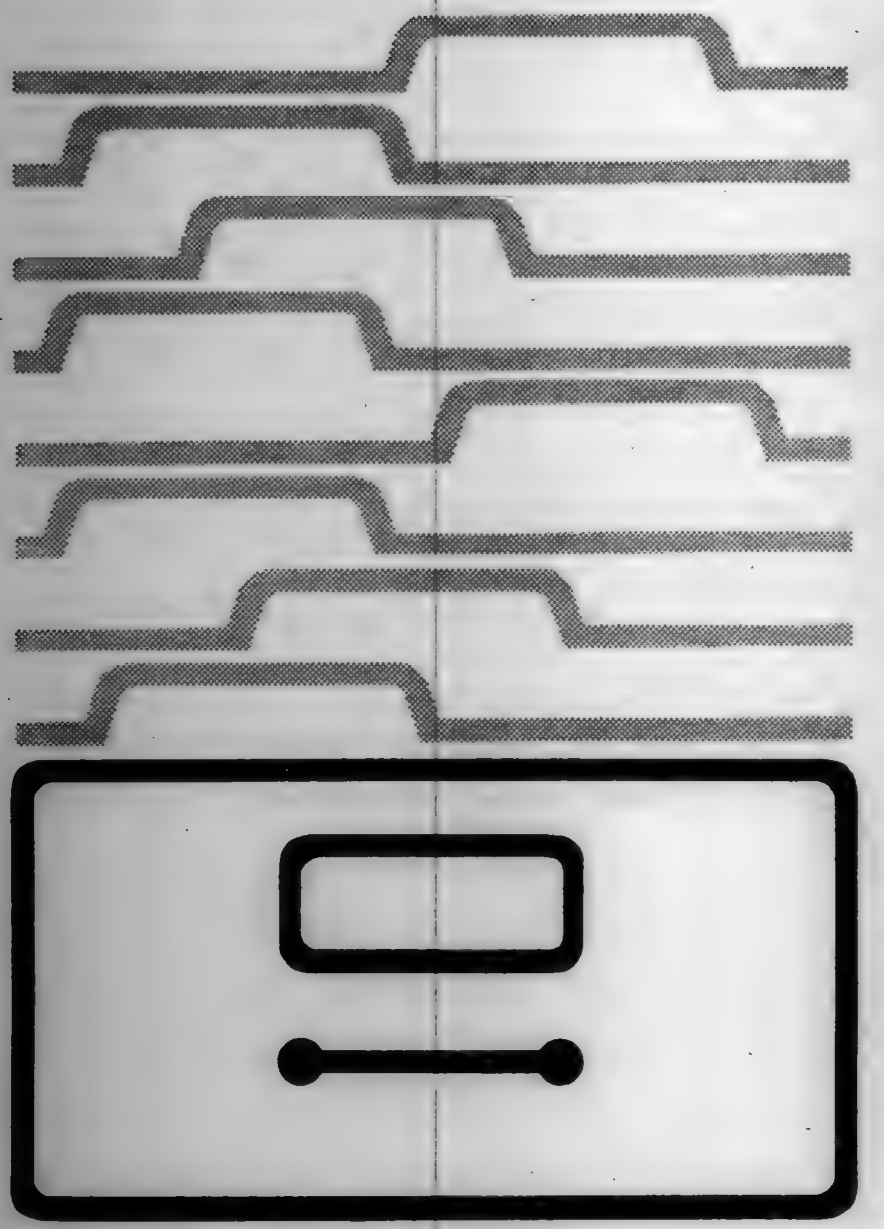
LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List March 3, 1988



Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1986
SUPPLEMENT: Revised January 1, 1988

The GUIDE and the SUPPLEMENT should be used together. This useful reference tool, compiled from agency regulations, is designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Order from Superintendent of Documents,
U.S. Government Printing Office,
Washington, D.C. 20402-9325.

Superintendent of Documents Publication Order Form

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 53, No. 46
Wednesday, March 9, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 354

[Docket No. 88–011]

Overtime Work at Border Ports, Sea Ports, and Airports

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations that establish charges for overtime work performed by Plant Protection and Quarantine inspectors of the U.S. Department of Agriculture at border ports, sea ports, and airports. The regulations are amended by: (1) Increasing the hourly rates charged an owner or operator of an aircraft requesting inspection or quarantine services at an airport outside of the regularly established hours of service; and (2) increasing the hourly rates charged a person, firm, or corporation having ownership, custody, or control of plants, plant products, animals, animal byproducts, or other commodities or articles subject to certain inspection, laboratory testing, certification, or quarantine and who requires the services of an employee of Plant Protection and Quarantine on a Sunday or holiday or at any other time outside the employee's regular tour of duty. These increases reflect salary increases for Federal employees in accordance with the Federal Pay Comparability Act of 1970 (Pub. L. 91–656), and Executive Order 12622 dated December 31, 1987.

EFFECTIVE DATE: March 13, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. Paul R. Eggert, Director, National Administrative Planning and Operations Staff, Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 614, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–7250.

SUPPLEMENTARY INFORMATION:

Executive Order 12291 and Regulatory Flexibility Act and Effective Date

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; and will not have a signficant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

We are amending the regulations by increasing the hourly rates charged an owner or operator of an aircraft requesting inspection or quarantine services at any airport outside of the regularly established hours of service. The rates are increased by $0.56 per hour for services performed outside the regularly established hours on a Sunday and by $0.40 per hour for services performed outside of the regularly established hours on a holiday or any other period.

We are also amending the regulations by increasing the hourly rates charged a person, firm, or corporation having ownership, custody, or control of plants, plant products, animals, animal byproducts, or other commodities or articles subject to certain inspection, laboratory testing, certification, or quarantine and who requires the services of an employee of Plant Protection and Quarantine on a Sunday or holiday or at any other time outside the regular tour of duty of the employee. The rates are increased by $0.64 per hour for services performed outside the regular tour of duty on a Sunday and by $0.48 per hour for services performed outside the regular tour of duty on a holiday or any other period.

Services of an employee of Plant Protection and Quarantine at an airport during regularly established hours and during a regular tour of duty are still provided free of charge to those requesting the service. Based on information compiled by the Department, we have estimated that Plant Protection and Quarantine provided an average of 9,467 hours per week of services for which charges were assessed during 1987, and these services were requested by thousands of entities. We do not expect that the number of hours of service for which charges will be imposed will increase significantly in 1988.

Under these circumstances, the Acting Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The hourly rate for services of an employee of Plant Protection and Quarantine depend entirely upon facts within the knowledge of the Department of Agriculture. The Department has no alternatives to raising the rates. By law, importers and exporters are required to reimburse the Department for its costs associated with services rendered. A cost analysis was performed to determine if fees for overtime are adequate to recover the cost of providing the services. Unless the rates are raised, the Department will not be able to recover the costs for providing services outside regularly established hours or outside regular tours of duty hours.

Accordingly, pursuant to the administrative procedure provisions in 5 U.S.C. 553, we find for good cause that prior notice and other public procedure with respect to this rule are impracticable, unnecessary, and contrary to the public interest; we also find good cause that this rule be made effective less than 30 days after publication of this document in the **Federal Register.**

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Papework Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR Part 3015, Subpart V.)

List of Subjects in 7 CFR Part 354

Agricultural commodities, Exports, Government employees, Imports, Plants (Agriculture), Quarantine, Transportation.

PART 354—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORTS

1. The authority citation for Part 354 continues to read as follows:

Authority: 7 U.S.C. 2260; 49 U.S.C. 1741; 7 CFR 2.17, 2.51, and 371.2(c).

2. Section 354.1(a)(1) is revised to read as follows:

§ 354.1 Overtime work at border ports, sea ports, and airports.

(a)(1) Any person, firm, or corporation having ownership, custody, or control of plants, plant products, animals, animal byproducts, or other commodities or articles subject to inspection, laboratory testing, certification, or quarantine under this chapter and Subchapter D of Chapter I, Title 9 CFR, who requires the services of an employee of Plant Protection and Quarantine on a Sunday or holiday, or at any other time outside the regular tour of duty of the employee, shall sufficiently in advance of the period of Sunday or holiday or overtime service request the Plant Protection and Quarantine inspector in charge to furnish inspection, laboratory testing, certification, or quarantine service during the overtime or Sunday or holiday period, and shall pay the Government therefore at a rate of $33.28 per work-hour per employee on a Sunday and at the rate of $24.96 per work-hour per employee for holiday or any other period; except that for any services performed on a Sunday or holiday, or at any time after 5 p.m. or before 8 a.m. on a weekday, in connection with the arrival in or departure from the United States of a private aircraft or vessel, the total amount payable shall not exceed $25 for all inspection services performed by the Customs Service, Immigration and Naturalization Service, Public Health Service, and the Department of Agriculture; and except that owners and operators of aircraft will be provided service without reimbursement during regularly established hours of service on a Sunday or holiday; and except that the overtime rate to be charged owners or operators of aircraft at airports of entry or other places of inspection as a consequence of the operation of the aircraft, for work performed outside of the regularly established hours of service on a Sunday will be $28.64 and for work performed outside of the regularly established hours of service for a holiday or any other period will be $21.48 per hour, which charges exclude administrative overhead costs.

* * * * *

Done at Washington, DC, this 4th day of March, 1988.

James W. Glosser,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 88-5189 Filed 3-8-88; 8:45 am]

BILLING CODE 3410-34-M

Agricultural Marketing Service

7 CFR Part 910

[Lemon Reg. 602; Amdt. 1]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action increases the quantity of fresh California-Arizona lemons that may be shipped to market during the period February 28, through March 5, 1988, from 335,000 cartons to 360,000 cartons. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

DATES: Regulations 602, Amendment 1 (§ 910.902) is effective for the period February 28 through March 5, 1988.

FOR FURTHER INFORMATION CONTACT: Raymond C. Martin, Section Head, Volume Control Programs, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 447-5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

This regulation is issued under Marketing Order No. 910, as amended (7 CFR 910) regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act," 7 U.S.C. 601-674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee and upon other available information. It is found that this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the marketing policy for 1987-88. The committee conducted a telephone poll on February 26, 1988, and, upon considering the current and prospective conditions of supply and demand, voted 10-3 to recommend that the quantity of lemons deemed advisable to be handled during the specified week be increased from 335,000 cartons to 360,000 cartons. The committee reports that the market for lemons has improved beyond what was anticipated by the Board on February 23, 1988, when the 335,000 cartons recommendation was made.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

For the reasons set forth in the preamble, 7 CFR Part 910 is amended as follows:

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

1. The authority citation for 7 CFR Part 910 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Section 910.902 is revised to read as follows:

Note.—This section will not appear in the Code of Federal Regulations.

§ 910.902 Lemon Regulation 602, Amendment 1.

The quantity of lemons grown in California and Arizona which may be handled during the period February 28, 1988, through March 5, 1988, is estalished at 360,000 cartons.

Dated: March 4, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 88-5124 Filed 3-8-88; 8:45 am]

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Parts 1944 and 1965

Section 515 Rural Rental Housing Loan Policies, Procedures, and Authorizations

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its Section 515, Rural Rental Housing Loan Policies, Procedures, and Authorizations. This action is taken to incorporate a change mandated by the Housing and Community Development Act of 1987. The intended effect of this action is to change the maximum contribution by the borrower to equity from 5 percent to 3 percent.

EFFECTIVE DATE: March 11, 1988.

FOR FURTHER INFORMATION CONTACT: Karen King, Senior Loan Officer, Multi-Family Housing Processing Division, USDA, Farmers Home Administration, Room 5331, South Agriculture Building, Washington, DC 20250, telephone 202-382-1620.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Departmental Regulation 1512-1 which implements Executive Order 12291, and has been determined "nonmajor." It will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises in domestic or export markets. The Executive Order 12291 provision requiring submission to OMB 10 days prior to publication is waived due to the emergency situation created by the Act.

This action requries no increase in costs to the Government. There is no impact on proposed budget levels and funding allocations will not be affected because of this action.

The action is caused by an emergency situation exempt from the publication requirements of the Housing and Urban Rural Recovery Act of 1983.

It is the policy of this Department to publish for comment rules relating to public property, loans, grants, benefits, or contracts, notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. This action, however, is not published for proposed rulemaking due to the emergency situation described below under Statutory authority.

Statutory Authority

The Housing and Community Development Act of 1987 has mandated that Section 515 of the Housing Act of 1949 be amended to require not more than a 3 percent contribution to equity by the borrower (the borrower currently has to supply a 5 percent contribution to equity).

Subpart E of Part 1944 of Chapter XVIII, Title 7, Code of Federal Regulations is being amended to implement this change. The change is being published as a Final Rule under Section 534(c) of the Housing Act of 1949, Title V, on an emergency basis. The following paragraphs provide a justification for publishing as a Final Rule on an emergency basis.

The current Regulation requires that borrowers supply at least a 5 percent contribution to equity. This is in direct conflict with the Congressional mandate of Pub. L. 100-242 which limits FmHA ability to require applicant contribution to equity to not more than 3 percent. The discrepancy between FmHA Regulation and Pub. L. 100-242 must be resolved before new loans can be approved.

This amendment is very straightforward. There are no administrative decisions for the Agency to make in implementation; the Agency is simply putting a statutory requirement in place. Therefore, to minimize the adverse impact on the program, the proposed rule stage is being waived and public comment is not being sought.

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, Environmental Program. It is the determination of FmHA that this proposed action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91-190, an environmental impact statement is not required.

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.415 and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials (7 CFR Part 3015, Subpart V, 48 FR 29112, June 24, 1983).

List of Subjects

7 CFR Part 1944

Administrative practice and procedure, Aged, Handicapped, Loan programs—Housing and community development, Low and moderate income housing, Mobile homes, Mortgages, Nonprofit organizations, Rent subsidies, and Rural housing.

7 CFR Part 1965

Administrative practice and procedure, Low and moderate income housing-Rental, Mortgages and Rurals areas.

Therefore, 7 CFR Chapter XVIII, is amended as follows:

PART 1944—HOUSING

1. The authority citation for part 1944 continues to read as follows:

Authority: 42 U.S.C. 1480; 7 CFR 2.23; 7 CFR 2.70.

Subpart E—Rural Rental Housing Loan Policies, Procedures, and Authorizations

§ 1944.205 [Amended]

2. In § 1944.205 paragraph (t) is amended by replacing "95 percent" with "97 percent".

§ 1944.211 [Amended]

3. In § 1944.211 paragraph (a)(4) is amended by replacing "5 percent" with "3 percent".

§ 1944.213 [Amended]

4. In § 1944.213 paragraph (a)(2) is amended by replacing "95" with "97" in both places it occurs.

5. In § 1944.213 paragraph (b)(11) is amended by replacing "5" with "3".

§ 1944.215 [Amended]

6. In § 1944.215 the introductory text of paragraph (l) is amended by replacing "5" with "3".

7. Section 1944.237 is amended by revising paragraphs (c)(1), (c)(2) and (d)(2) to read as follows:

§ 1944.237 Subsequent RRH loans.

* * * * *

(c) * * *

(1) If the applicant/borrower provided an initial investment greater than required under the initial FmHA loan, the excess may be credited toward the required 3 percent initial investment of the subsequent loan; the applicant/borrower should only be required to put up additional funds for this purpose if needed. The same applies to initial O and M requirements.

(2) If the initial investment and 2 percent O and M amounts are sufficient to cover only the initial FmHA loan, the applicant/borrower must provide the additional 3 and 2 percent amounts to cover the subsequent loan.

(d) * * *

(2) The applicant/borrower must provide the initial 3 percent investment unless it provided more than the required initial investment when the initial loan was made. When the applicant/borrower has more than the required amount invested in the initial loan, the excess may be credited toward the required 3 percent investment for the subsequent loan. The applicant/borrower should be required to contribute additional funds only if needed. The applicant/borrower will not be given consideration for any increased equity or value that the property may have since the date of the initial FmHA loan.

* * * * *

Exhibit A–6 of Subpart E [Amended]

8. In Exhibit A–6 of Subpart E, paragraph I.A.(6) is amended by replacing the term "5 percent" with "3 percent".

PART 1965—REAL PROPERTY

9. The authority citation for Part 1965 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart B—Security Servicing for Multiple Housing Loans

§ 1965.65 [Amended]

10. In § 1965.65, the introductory text of paragraph (c)(10) is amended by removing the phrase "5 percent of the original loan amount" in the fourth sentence and replacing it with "the amount shown in the transferor's loan agreement/resolution".

11. In § 1965.65 paragraph (c)(10)(ii) is amended by inserting the phrase "(97% for loan agreements dated on or after March 11, 1988)" after the "95%".

12. In § 1965.65 paragraph (c)(10)(iii) is amended by inserting the phrase "(3% for loans approved on or after March 11, 1988)" after the "5%".

Dated: February 23, 1988.

Vance L. Clark,

Administrator, Farmers Home Administration.

[FR Doc. 88–5125 Filed 3–8–88; 8:45 am]

BILLING CODE 3410-07-M

Animal and Plant Health Inspection Service

9 CFR Part 97

[Docket No. 88–010]

Overtime Work at Laboratories, Border Ports, Ocean Ports, and Airports

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations that establish charges for overtime work performed by Veterinary Services inspectors of the U.S. Department of Agriculture at laboratories, border ports, ocean ports, and airports. The regulations are amended by: (1) Increasing the hourly rates charged an owner or opertor of an aircraft requesting inspection or quarantine services at an airport outside of the regularly established hours of service; and (2) increasing the hourly rates charged a person, firm, or corporation having ownership, custody, or control of animals, animal byproducts, or other commodities subject to certain inspection, laboratory testing, certification, or quarantine and who requires the services of an employee of Veterinary Services on a Sunday or holiday or at any other time outside the employee's regular tour of duty. These increases reflect salary increases for Federal employees in accordance with the Federal Pay Comparability Act of 1970 (Pub. L. 91–656), and Executive Order 12622 dated December 31, 1987.

EFFECTIVE DATE: March 13, 1988.

FOR FURTHER INFORMATION CONTACT: Louise Rakestraw Lothery, Assistant Director, Resource Management Staff, VS, APHIS, USDA, Room 857, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8511.

SUPPLEMENTARY INFORMATION:

Executive Order 12291 and Regulatory Flexibility Act and Effective Date

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, Federal, state, or local government agencies, or geographic regions; and will not have significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

We are amending the regulations by increasing the hourly rates charged an owner or operator of an aircraft requesting inspection or quarantine services at an airport outside of the regularly established hours of service. The rates are increased by $0.56 per hour for service performed outside of the regularly established hours on a Sunday and by $0.40 per hour for services performed outside of the regularly established hours on a holiday or any other period.

We are also amending the regulations by increasing the hourly rates charged a person, firm, or corporation having ownership, custody, or control of animals, animal byproducts, or other commodities subject to certain inspection, laboratory testing, certification, or quarantine and who requires the services of the employee of Veterinary Services on a Sunday or holiday or at any other time outside the regular tour of duty of the employee. The rates are increased by $0.64 per hour for services performed outside the regular tour of duty on a Sunday and by $0.48 per hour for services performed outside the regular tour of duty on a holiday or any other period.

Services of an employee of Veterinary Services at an airport during regularly established hours and during a regular tour of duty are still provided free of charge to those requesting the service. Based on information compiled by the Department, we have estimated that Veterinary Services provided an average of 979 hours per week of services for which charges were assessed during 1987, and these services were requested by thousands of entities. We do not expect that the number of hours of service for which charges will be imposed will increase significantly in 1988.

Under these circumstances, the Acting Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The hourly rate for services of an employee of Veterinary Services depends entirely upon facts within the knowledge of the Department of Agriculture. The Department has no alternatives to raising the rates. By law, importers and exporters are required to reimburse the Department for its costs associated with services rendered. A cost analysis was performed to determine if fees for overtime are adequate to recover the cost of providing the services. Unless the rates are raised, the Department will not be able to recover the costs for providing services outside regularly established hours or outside regular tours of duty hours.

Accordingly, pursuant to the administrative procedure provisions in 5 U.S.C. 553, we find for good cause that prior notice and other public procedure with respect to this rule are impracticable, unnecessary, and contrary to the public interest; we also find good cause that this rule be made effective less than 30 days after publication of this document in the Federal Register.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*)

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR Part 3015, Subpart V).

List of Subjects in 9 CFR Part 97

Exports, Government employees, Imports, Livestock and livestock products, Poultry and poultry products, Transportation.

PART 97—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORTS

1. The authority citation for Part 97 continues to read as follows:

Authority: 7 U.S.C. 2260; 49 U.S.C. 1741; 7 CFR 2.17, 2.51, and 371.2(d).

2. The first sentence of § 97.1(a) and the last sentence of § 97.1(b) are revised to read as follows:

§ 97.1 Overtime work at laboratories, border ports, ocean ports, and airports.

(a) Any person, firm, or corporation having ownership, custody, or control of animals, animal byproducts, or other commodities subject to inspection, laboratory testing, certification, or quarantine under this subchapter and Subchapter G of this Chapter, and who requires the services of an employee of Veterinary Services on a Sunday or holiday, or at any other time outside the regular tour of duty of such employee, shall sufficiently in advance of the period of Sunday or holiday or overtime service request the Veterinary Services provided in paragraph (b) of this section, shall pay the Government therefor at a rate of $33.28 per work-hour per employee on a Sunday and at the rate of $24.96 per work-hour per employee for holiday or any other period; except that for any services performed on a Sunday or holiday, except as provided in paragraph (b) of this section for inspection or quarantine services requested by an owner or operator of an aircraft at an airport on a Sunday or holiday which are performed within regularly established hours of service, or at any time after 5 p.m or before 8 a.m. on a weekday, in connection with the arrival in or departure from the United States of a private aircraft or vessel, that total amount payable shall not exceed $25 for all inspection services performed by the Customs Service, Immigration and Naturalization Service, Public Health Service, and the Department of Agriculture. * * *

(b) * * * When services are performed outside of the regularly established hours of service on a holiday or Sunday or any other day, the rate to be charged owners or operators of aircraft shall be $28.64 per hour on a Sunday and $21.48 per hour on a holiday or any other day, which charges exclude administrative overhead costs.

BILLING CODE 3410-34-M

Food Safety and Inspection Service

9 CFR Parts 317, 318 and 381

[Docket No. 87-006F]

Glucono Delta-Lactone as an Acidifier in Meat and Poultry Products

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The Food Safety and Inspection Service (FSIS) is amending the Federal meat inspection regulations and the poultry products inspection regulations to permit the use of glucono delta-lactone as an acidifier in meat food and poultry products. FSIS has also been petitioned to approve the use of glucono delta-lactone as an acidifier alternate to encapsulated lactic acid (lactic acid and calcium lactate) in the binder matrix containing sodium alginate and calcium carbonate used in the production of restructured meat food products. The Food Safety and Drug Administration has affirmed glucono delta-lactone as generally recognized as safe (GRAS) for use as a direct human food ingredient. FSIS has determined that it is now appropriate to add glucono delta-lactone to the tables of substances as an alternate acidifier in the aforementioned binder matrix, and to the list of acceptable acidifying agents in the Federal meat and poultry products inspection regulations. This action will provide for the use of an additional acidifier.

EFFECTIVE DATE: April 8, 1988.

FOR FURTHER INFORMATION CONTACT: Ms. Margaret O'K. Glavin, Director, Standards and Labeling Division, Technical Services, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447–6042.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

The Administrator has determined that this final rule would not be a major rule under Executive Order 12291. It will not result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

OL 53 ISS 46 MR 9 988 MI

This final rule provides for the use of glucono delta-lactone as an alternate acidifier in an approved meat binder, and as a general acidifier in various meat and poultry products. Industry may benefit from this action through the ability to use a wider variety of acidifying agents. Use of glucono delta-lactone is voluntary. Firms may choose to use this substance or they may use other acidifiers currently permitted in the regulations.

Effect on Small Entities

The Administrator has determined that this final rule will not have a significant economic impact upon a substantial number of small entities, as defined by the Regulatory Flexibility Act (5 U.S.C. 601–612). This rulemaking would impose no new requirement on industry; rather, it would permit the meat and poultry industries to use a wider variety of acidifiers in formulating meat food and poultry products. The use of glucono delta-lactone would be voluntary.

Background

This is a final rule issued without prior proposal for public comment under authority of § 318.7(a) of the Federal meat inspection regulations (9 CFR 318.7(a)). Under that provision, the Administrator may approve new substances, new uses, or new levels of substances in meat or meat food products provided that (1) the substance has been previously approved by the Food and Drug Administration (FDA) for use in meat or meat food products as a food additive, color additive, or as a substance generally recognized as safe, and is listed in 21 CFR Parts 73, 74, 81, 172, 173, 179, 182, or 184, and (2) that its intended use would be in compliance with applicable FDA requirements. If these criteria are met, the Administrator may issue a final rule without prior proposal for public comment upon further finding that (1) the use of the substance will not render the product in which it is used adulterated, misbranded, or otherwise not in compliance with the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*), and (2) that the substance is functional and suitable for the product and is permitted for use at the lowest level necessary to accomplish the stated technical effect.

FSIS is amending the Federal meat inspection regulations and the poultry products inspection regulations to permit the use of glucono delta-lactone as an acidifier in meat food and poultry products. In addition, FSIS has been petitioned by Finnsugar Biochemicals, Inc., to approve the use of glucono delta-lactone as an alternate acidifying agent to encapsulated lactic acid (lactic acid and calcium lactate) in the binder matrix containing sodium alginate and calcium carbonate for use in restructured meat food products. This request is a follow-up to the final rule approving a binder consisting of sodium alginate, calcium carbonate, lactic acid and calcium lactate for use in restructured meat food products published in the Federal Register on August 18, 1986 (51 FR 29456). Colorado State University researchers submitted supporting data for use of glucono delta-lactone in their original petition to FSIS for the aforementioned binder. However, glucono delta-lactone did not yet have GRAS affirmation by the FDA. Consequently, Colorado State researchers revised their petition by substituting encapsulated lactic acid for glucono delta-lactone in the binder matrix even though their data suggested that glucono delta-lactone performed better as the acidifying agent and was less expensive as an ingredient.

As an acidulant, glucono delta-lactone has unique functional properties. In the crystalline state, glucono delta-lactone is not an acid, but in the presence of water it slowly hydrolizes into gluconic acid. This is a very weak and bland tasting acid. Its rate of hydrolysis is temperature-dependent and virtually no acid is formed at refrigerated temperatures. This unique ability provides processors with greater flexibility during formulation and production. Data on the functions and properties of glucono delta-lactone are available free of charge from the Standards and Labeling Division at the address given under "For Further Information Contact."

Glucono delta-lactone was affirmed as GRAS by the FDA on September 24, 1986, for use as a direct human food ingredient (51 FR 33896). It is also listed in the Federal meat inspection regulations in 9 CFR 318.7(c)(4) as a color fixing accelerator permitted for use in cured, comminuted products and genoa salami. FDA advised FSIS on April 23, 1987, in an opinion letter that "the proposed use of glucono delta-lactone either as an acidifier in meat and poultry products or as an alternate acidifier to encapsulated lactic acid in restructured meat food products is consistent with the use as a 'pH control agent' listed in 21 CFR 170.3(o)(23)." FDA advised further that it saw no conflict between the provisions of 21 CFR 184.1318 and our proposed uses.

FSIS has determined, based on its technical review of available data and information, that these two uses of glucono delta-lactone are appropriate. FSIS has also determined that the following use levels will accomplish the desired technical effects: (1) Glucono delta-lactone as an acidifier—an amount sufficient for purpose (this amount is determined on a case-by-case basis during label review by the Standards and Labeling Division); (2) glucono delta-lactone as an acidifier alternate in the binder matrix—0.3 percent of product formulation in place of lactic acid and calcium lactate.

The Administrator concurs with FDA's conclusions regarding the safety and uses of the substance in meat food and poultry products. He further finds that information provided by petitioner and other data available to the Agency indicates that (1) the proposed use of this substance as described will be in compliance with applicable FDA requirements, (2) its use will be functional and suitable for the products intended, (3) the substance will be used at the lowest level necessary to accomplish the intended technical effect, and (4) the use of this substance will not render the products in which it is used, adulterated, misbranded, or otherwise not in compliance, with the Federal Meat Inspection Act.

Therefore, the FSIS is amending the tables of approved substances in the Federal meat and poultry products inspection regulations (9 CFR §§ 318.7(c)(4) and 381.147(f)(4)) to include the use of glucono delta-lactone as an acidifier in various meat food and poultry products and as an acidifier alternate in place of encapsulated lactic acid when used in the binder matrix containing sodium alginate and calcium carbonate for addition to restructured meat food products.

This approval of glucono delta-lactone as an acidifier alternate in the binder matrix containing sodium alginate and calcium carbonate necessitates a technical amendment to labeling provisions contained in § 317.8(b)(36) of the Federal meat inspection regulations (9 CFR § 317.8(b)(36)). This section requires that whenever this binder matrix is added to restructured meat food products, a statement indicating the use of these substances must appear contiguous to the product name. Therefore, § 317.8(b)(36) is being amended to reflect the approval of glucono delta-lactone as an acidifier alternate, which, when used in the matrix, requires its declaration contiguous to the product name.

List of Subjects

9 CFR Part 317

Meat inspection, Food labeling.

9 CFR Part 318

Food additives, Meat inspection.

9 CFR Part 381

Food additives, Food labeling, Poultry, Poultry products and inspection.

For the reasons set out in the preamble, Parts 317, 318 and 381 are amended as set forth below.

PART 317—LABELING, MARKING DEVICES, AND CONTAINERS

1. The authority citation for Part 317 continues to read as follows:

Authority: 34 Stat. 1260, 79 Stat. 903, as amended, 81 Stat. 584, 84 Stat. 91, 438; 21 U.S.C. 71 *et seq.*, 601 *et seq.*, 33 U.S.C. 1254.

2. Paragraph (b)(36) of § 317.8 is revised to read as follows:

§ 317.8 False or misleading labeling or practices generally; specific prohibitions and requirements for labels and containers.

* * * * *

(b) * * *

(36) When sodium alginate, calcium carbonate, and lactic acid and calcium carbonate (or glucono delta-lactone) are used together in a dry binding matrix in restructured, formed meat food products, as permitted in Part 318 of this subchapter, there shall appear on the label contiguous to the product name, a statement to indicate the use of sodium alginate, calcium carbonate and lactic acid and calcium carbonate (or glucono delta-lactone).

* * * * *

PART 318—ENTRY INTO OFFICIAL ESTABLISHMENTS; REINSPECTION AND PREPARATION OF PRODUCTS

3. The authority citation for Part 318 continues to read as follows:

Authority: 34 Stat. 1260, 81 Stat. 584, as amended (21 U.S.C. 601 *et seq.*); 72 Stat. 862, 92 Stat. 1069, as amended (7 U.S.C. 1901 *et seq.*); 76 Stat. 663 (7 U.S.C. 450 *et seq.*), unless otherwise noted.

4. Section 318.7(c)(4) is amended by adding the substance "glucono delta-lactone" to the chart of substances. This substance is placed in alphabetical order (1) under the class of substances entitled "Acidifiers," and (2) under the class of substances entitled "Binders" in the entry entitled "A mixture of sodium alginate, calcium carbonate, lactic acid and calcium lactate" as follows:

§ 318.7 Approval substances for use in the preparation of products.

* * * * *

(c) * * *

(4) * * *

Class of substance	Substance	Purpose	Products	Amount
Acidifiers	Glucono delta-lactone	do	do	Do.
Binders	A mixture of sodium alginate, calcium carbonate, and calcium lactate/lactic acid (or glucono delta-lactone).	To bind meat pieces	Restructured meat food products.	Sodium alginate not to exceed 1.0 percent; calcium carbonate not to exceed 0.2 percent; and lactic acid/calcium lactate (or glucono delta-lactone) not to exceed 0.3 percent of product formulation. Added mixture may not exceed 1.5 percent of product at formulation. Ingredients of mixture must be added dry.

PART 381—POULTRY PRODUCTS INSPECTION REGULATIONS

5. The authority citation for Part 381 continues to read as follows:

Authority: 71 Stat. 441, 82 Stat. 791, as amended, 21 U.S.C. 451 *et seq.*; 76 Stat. 663 (7 U.S.C. 450 *et seq.*), unless otherwise noted:

6. Section 318.147(f)(4) is amended to add the substance "glucono delta-lactone" to the chart of substances. This substance is placed in alphabetical order under the class of substances entitled "Acidifiers" as follows:

§ 381.147 Restrictions on the use of substances in poultry products.

the Purchased Gas Adjustment Regulations, 52 FR 43854 (Nov. 17, 1987), III FERC Stats. & Regs., ¶ 30,788.)

This order grants rehearing of Order No. 483 in part and denies rehearing in part and clarifies in response to 18 requests for rehearing filed in response to the final rule.

EFFECTIVE DATE: This rule is effective April 8, 1988.

FOR FURTHER INFORMATION CONTACT: Andrew S. Katz, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (202) 357–8020

For Further Technical Information Contact: Sherri L. Booye, Office of Pipeline and Producer Regulation, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426.

SUPPLEMENTARY INFORMATION: The FERC Form No. 542–PGA (Form 542), although not published in this order, is currently available at the Division of Public Affairs, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Room 1000, Washington, DC 20426, during regular business hours.

Order on Rehearing

Before Commissioners Martha O. Hesse, Chairman; Anthony G. Sousa, Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

I. Introduction

On November 10, 1987, the Federal Energy Regulatory Commission (Commission) issued a final rule (Order No. 483) amending its regulations governing the procedures by which a natural gas pipeline company (company or pipeline) passes through the cost of purchased gas to its jurisdictional customers.[1] In that rule, the Commission retained the existing PGA mechanism consisting of a current adjustment and surcharge rate adjustment to the base rates a pipeline establishes in a NGA section 4 general rate proceeding. The rule requires a pipeline to revise its projections of gas costs four times per year.

Under the rule, a pipeline submits a current adjustment that reflects three months of projected gas costs in an annual PGA filing and in three quarterly PGA filings which will track any changes in gas costs that occur after the annual filing becomes effective. The final rule established a schedule of annual and quarterly PGA effective dates for each pipeline that filed a PGA under the former PGA regulations. The final rule also permitted a pipeline to use its flexible PGA tariff as an optional cost tracking mechanism.

This order grants clarification and rehearing of Order No. 483 in part and denies rehearing in part in response to 18 requests for rehearing filed in response to the final rule.[2] [3]

II. Discussion

A. Projections of Gas Costs for the Current Adjustment

1. *Changes in Pipeline Supplier Rates.* Columbia Gas Transmission Corporation's (Columbia) and Columbia Gas Distribution Companies' (CDC) request the Commission to allow a pipeline to include in its current adjustment cost estimates based on a pipeline supplier's suspended rate which will come out of suspension during the PGA effective period.

The Commission agrees with Columbia and CDC. Under current Commission policy, when a pipeline supplier files a section 4(e) general rate increase, it is often suspended by the Commission to take effect, subject to refund, at a later date. In fact, the Commission suspends rate filings if a preliminary study leads the Commission to believe that the filing may be unjust, unreasonable or inconsistent with other statutory standards.[4]

The Commission is modifying its regulations. This change will result in a more accurate projection of the gas costs a pipeline will experience and should prevent the pipeline from undercollecting its gas costs when a pipeline supplier's rates increase during the effective period of the PGA.[5]

2. *Spot Market Projections.* Enron Interstate Pipeline (Enron) argue that it is unnecessary for a pipeline to provide additional detailed support in the PGA for projected spot market purchases. The Commission required the filing of additional information in the final rule because it was concerned that spot market transactions are typically of short duration and the cost of a spot market purchase is usually much lower than the cost of a long term supplement commitment.

However, the Commission no longer believes that detailed support for spot gas projections is necessary. As argued by Enron, the final rule's provisions relating to the assessment of past performance should provide an adequate oversight of the accuracy of a pipeline's projections of gas costs.[6] However, the Commission is still requiring a pipeline to project its spot purchases in accordance with the provisions for estimating supplier costs in § 154.305(c)(1) (i) and (ii), as amended by this order. Also, a pipeline will be required to support its spot market projections in conjunction with the assessment of past performance.

3. *Estimates of Contract Prices Undergoing Renegotiation.* In the final rule, the Commission permitted estimates of gas purchase prices to allow for known and measurable changes that occur during the PGA effective period based on contractual obligations. However, the Commission will not permit pipelines to estimate the price of contracts that are undergoing renegotiation, as requested by ANR Pipeline Company and Colorado Interstate Gas Company (ANR/CIG) and Enron on rehearing. As the Commission recently noted,[7] projections of gas prices in contracts undergoing renegotiation are too speculative to accurately reflect future costs.[8]

---

[1] Revisions to the Purchased Gas Adjustment Regulations, 52 FR 43854 (Nov 17 1987), III FERC Stats & Regs. ¶ 30,778.

[2] *See* Appendix for complete listing of persons filing requests for rehearing or clarification.

[3] As a final background note, the Commission observes that Order No. 483 is a complex, 172 page document that does not lend itself to brief summarization. Therefore, this rehearing order proceeds on the assumption that the reader is already familiar with Order No 483 and that the issues on rehearing may discussed here with a minimum of explanatory background

[4] *See e.g.,* Great Lakes Gas Transmission Co., 13 FERC ¶ 61,292 (1980).

[5] Section 154.305(c)(1)(ii) provides that the projected rate for pipeline supplier costs will be the rate in effect as of the effective date of the PGA filing. Consolidated Gas Transmission Corp. (Consolidated) argues that this provision prevents a pipeline from estimating the rate of its pipeline supplier when both pipelines' rates are effective on the same date Consolidated is incorrect In fact, the pipeline may estimate the rate of an upstream pipeline supplier that will become effective on the same date as the estimating pipeline's PGA

[6] Section 154.308.

[7] Colorado Interstate Gas Company 37 FERC ¶ 61,300 (1986).

[8] ANR/CIG's argument that many existing tariffs allow pipelines to include estimates of contract prices undergoing renegotiation is incorrect The Commission recognizes that some pipeline that now file annual PGAs have tariffs that allow some

Continued

The Commission disagrees with ANR/CIG's interpretation that the final rule restricts a pipeline's ability to project market-out prices. The Commission is clarifying that a pipeline's plan to exercise its contractually authorized market-out rights in an upcoming PGA period, is a known and measurable change that the pipeline could include in its gas cost projections under § 154.305. Also, a pipeline may file an interim adjustment under § 154.309 on 24-hours' notice to reflect market-outs in its rates.

4. *Effect of 60-day Notice Period on Cost Projection in the Annual PGA.* The Commission agrees with the arguments that the annual PGA 60-day notice requirements makes it harder for a pipeline to project gas costs for the current adjustment accurately.[9] Therefore, the Commission will accept revisions to the original projections of gas costs contained in Schedule A–1 up to 30 days before the effective date of an annual PGA.[10] The revision to the cost projection will be optional, will be filed in the quarterly format specified by the FERC Form No. 542–PGA, and will not require a filing fee.

The Commission agrees with Panhandle/Trunkline that NGA section 4(d) requires a pipeline to provide a minimum 30-day notice before its rates can go into effect. However, the NGA does not preclude a pipeline from voluntarily providing more than 30-days notice in return for receiving a PGA mechanism.

B. Refunds

1. *Amounts Included in the Refund Subaccount.* Order No. 483 requires a pipeline to maintain a separate refund subaccount in Account No. 191 in which supplier refunds, billing adjustments, and revenue credits are recorded.[11] These amounts will be disbursed in lump sum to the pipeline's customers when the refund subaccount reaches a set amount.[12] A pipeline must record in the refund subaccount all past period credit billing adjustments that decrease gas costs, including meter or computation adjustments. However, all past period debit billing adjustments that increase gas costs must be recorded in the other subaccounts of Account No. 191 to be collected through the annual PGA surcharge adjustment.

Several pipelines argue on rehearing that the deferred gas costs in Account No. 191 will be distorted if past period amounts in settlement of gas purchase transactions are separated.[13] The Commission intends that the lump sum refund requirement will operate to ensure that a large credit balance in the deferred account does not accumulate so as to distort current rates. Accordingly, the Commission will require pipelines to offset the refund, billing adjustment, and revenue credit subaccount balance with past period debit billing adjustments.[14] However, a pipeline still will be prohibited from offsetting refunds against current period deferred purchased gas costs and a pipeline still must maintain a separate refund subaccount.

The Commission will require each component of the amount ultimately paid to a supplier to be separately identified in the refund subaccount. In other words, a pipeline may not "net" past period debit against past period credit billing adjustments before it records the remainder in the refund subaccount. Because credit billing adjustments are treated as refunds for purposes of computing carrying charges, they must be separately identified.

Some pipelines state that their accounting systems cannot report the discrete components of each gas purchase transaction.[15] Therefore, the Commission will consider a pipeline's request for waivers of the refund reporting requirements on a case-by-case basis.

A pipeline is required to record all out-of-period debit billing adjustments in the refund subaccount every month. If the resulting balance is a net debit balance, a pipeline must carry the refund subaccount balance forward to the next month. The next month's credit billing adjustments, refunds, and revenue credits would be offset against this net refund subaccount balance. At the end of the deferral period a net debit balance must be transferred to the current deferral subaccount.

If after a month's entries are recorded to the refund subaccount, the result is a net credit balance, and the refund disbursement level is reached, a pipeline must make a cash refund. If a net credit balance remains at the end of the deferral period the pipeline may either make a cash refund or transfer the balance to the current deferral subaccount.

When a refund subaccount debit or credit balance is transferred to the current deferral subaccount, a pipeline must treat the credit component as refunds for purposes of computing carrying charges. The pipeline must continue to treat these credits as refunds when computing carrying charges until the effective date of the surcharge rate that amortizes the current deferral subaccount balance.

2. *Pipeline Supplier Refunds.* The Commission will not allow a pipeline to credit its deferred purchase gas costs in Account No. 191 when it receives refunds from an upstream pipeline supplier. Columbia and Consolidated contend that a pipeline supplier's rates are generally higher than the rates ultimately determined through settlement and hearing to be just and reasonable. The Commission often suspends the effectiveness of a pipeline's rate change for up to five months. While the pipeline's rate change is suspended it cannot cause a significant buildup of the deferred account balance of a downstream pipeline.

3. *Refund Disbursement.* In response to arguments raised by ANR/CIG and El Paso, the Commission is amending the regulations [16] to require a pipeline to make cash refunds within 90 days after the month in which the refund subaccount balance reaches the disbursement level. Although the Commission required in the final rule that cash refunds be made within 30 days, monthly actual purchased gas costs are determined on a 60-day accounting cycle.[17] Therefore, a pipeline may not be able to determine the extent of all the transactions in the refund subaccount until 60 days after an accounting month.

---

latitude to estimate some costs during the 12-month PGA period. However, no tariff on file with the Commission gives a pipeline the authority cited by ANR/CIG.

[9] *See.* Panhandle Eastern Pipe Line Company and Trunkline Gas Company (Panhandle/Trunkline) and Texas Eastern Transmission Corporation (TETCO).

[10] The Commission also will consider on a case-by-case basis allowing a pipeline to make an adjustment to the surcharge rate in effect during an annual PGA period should a pipeline experience a substantial unexpected gain or loss of sales load.

[11] Section 154.305(i).

[12] Under § 154.305(i)(1)(iii), this amount is the lesser of $2 million or one cent per MMBtu of a pipeline's most recent 12 months of sales.

[13] *See, e.g.,* El Paso Natural Gas Co. (El Paso), Enron, Panhandle/Trunkline, Tennessee Gas Pipeline Co. (Tennessee), and Transcontinental Gas Pipe Line Co. (Transco).

[14] Debit billing adjustments are defined as any pricing adjustments that are increases to a prior month's actual gas costs and are recorded outside the prior month's 60-day billing and payment cycle.

[15] El Paso claims that its purchase gas account settlement system can only retrieve the net amounts payable to a supplier. Northwest Pipeline Corporation (Northwest) states that it previously received special accounting and reporting relief in Docket No. SA82–31–001 because the company cannot separately track prior period adjustments and billing adjustments for purchases from unitized wells. The PGA refund accounting rules are not intended to terminate the relief given Northwest in Docket No. SA82–31–001.

[16] Section 154.305(i)(1)(iii). The Commission is also adding the term "billing adjustment" because it was inadvertently omitted from the regulations in Order No. 483.

[17] Section 154.305(g)(1)(iii).

The Commission is not changing the refund disbursement level or providing for semi-annual refunds as suggested by Panhandle/Trunkline. In fact, the lump sum refund requirement ensures that customers are actually provided with the benefits of the refunds a pipeline obtains. If a pipeline includes refunds in Account No. 191 and offsets refunded amounts against costs incurred, that pipeline may simply absorb the refund amounts by incurring additional gas costs or by delaying cost reductions. The Commission established the refund disbursement levels in the final rule based on the level of refunds and total system sales reported in the Annual Report of Major Natural Gas Companies (FERC Form No. 2) of several pipelines.[18] The Commission believes that the disbursement level it established will ensure that pipeline customers receive refunds as soon as possible. Furthermore, the Commission believes that a pipeline will want to reduce the amount in its refund subaccount as soon as possible because interest also is computed on the refund balances and disbursed to customers.

Arizona Direct Customers (Arizona) argue that pipelines should allocate cash refunds of past period overcharges by matching customers' purchases to actual sales levels during the period of overcharges.[19] The Commission declines to adopt Arizona's suggestion. To do so on a generic basis would be administratively burdensome. Instead, the Commission intends to consider requests for a special allocation of extraordinary prior period refunds on a case-by-case basis.

C. Storage Issues

1. *Effect of Storage Inventory Accounting on Quarterly Adjustments.* The Commission is not amending its regulations to allow pipelines to make annual estimates of their supply and requirements for the quarterly PGA adjustment, as requested by Consolidated, Columbia, and National Fuel Gas Supply Corporation (National Fuel). These pipelines have large gas storage operations and use the "Last In First Out" (LIFO) storage inventory costing methodology. They contend that the quarterly current adjustments will result in significant price swings, artificially inflated demand and commodity rates in winter, and artificially decreased demand rates in summer.[20]

In Order No. 483, the Commission noted that it had rejected an annual supply and requirements proposal of Consolidated's in 40 FERC ¶ 61,205 (1987). On rehearing, Consolidated states that the Commission ultimately approved its proposal. The Commission's approval of Consolidated's tariff revision under the former PGA regulations to use annualized supply and requirement estimates is not a precedent for this proceeding. The emphasis of the revised PGA regulations is on rapid transmission of market signals which is inconsistent with the annualization of current costs.

The Commission recognizes that pipelines with extensive storage operations that employ an annualized LIFO inventory costing methodology experience fluctuating commodity rates.[21] Therefore, the Commission will consider a company's allegation that storage accounting causes significant price swings between quarterly adjustments on case-by-case basis. However, the Commission believes that those costs as incurred and adjusted for storage are representative of the costs a pipeline will incur during the PGA period and should be passed through on a quarterly basis.

2. *Adjustment to the Carrying Charge Base for Estimates of Storage Costs.* Order No. 483 requires a pipeline to reduce its carrying charge base in Account No. 191 for computing interest to a cash basis if it uses estimates to compute storage costs. The carrying charge base must be adjusted for the difference between the estimated storage gas rates and storage gas rates computed using a rolling weighted average inventory costing methodology.[22]

Natural Gas Pipeline Company of America (Natural) requests that the Commission allow it to incorporate in its next general rate case an appropriate procedure to achieve the effect of a cash-based Account No. 191 and eliminate the use of estimated storage rates reflect a LIFO inventory allowance that was based on estimates. However, Natural's current LIFO credit does not result in a cash based Account No. 191 because storage inventory is considered as part of the rate base.

The Commission will require Natural to compute carrying charges only on the cash balances in Account No. 191. Even a pipeline with a current LIFO credit in its base rate must compare the difference between the cash-based Account No. 191 and the credit in its rate base and return any difference to its jurisdictional customers. However, the Commission will consider other suggestions as to how to compute a cash-based Account No. 191 for carrying charge purposes.

Enron requests clarification of whether a rolling weighted average inventory costing methodology would include the costs and volumes associated with cushion gas (Account No. 117) and those costs and volumes associated with cycle gas (Account Nos. 164.1 and 164.2): The rolling weighted average inventory costs should be determined using those volumes and costs that are part of the cycle gas because cycle gas is sold and replaced by the pipeline. However, a pipeline should not include cushion gas to determine its rolling weighted average inventory costs unless those volumes are withdrawn from storage for resale to its customers. Ordinarily, cushion gas is not sold and replaced by the pipeline.

Transco argues that the carrying charge base adjustment for LIFO storage estimates would require the company to maintain two sets of accounting records to differentiate between the LIFO valuation of storage costs and storage costs determined using a rolling weighted average inventory costing methodology. The Commission believes that most pipelines have all the data necessary to compute the rolling weighted average inventory costing methodology without keeping two sets of books. However, even if a company has to maintain two sets of books, the benefit to the customer and the pipeline of receiving the time value of funds out-of-pocket outweighs any additional accounting burden.

---

[18] See discussion in the Preamble to the Notice of Proposed Rulemaking (NOPR), Revisions to the Purchased Gas Adjustment Regulations, IV FERC Stats. & Regs. ¶ 32,443 at 30,469 (1987).

[19] Under § 154.305(i)(2), a customer's share of the cash refund is determined by reference to the customer's purchases and the pipeline's actual sales during the 12-month period ending three months prior to the month that the disbursement level is reached.

[20] When these pipelines inject gas into storage during summer, the injections are priced at an annualized LIFO rate and are treated as a credit to purchased gas costs. When the pipelines withdraw gas from storage during winter, the withdrawals are priced at the annualized LIFO rate and are treated as a debit to purchased gas costs. The annualized LIFO rate is equal to the estimated average annual purchased gas unit cost and may include demand costs if gas purchased from a pipeline with a two-part rate is in the storage inventory.

[21] National Fuel includes in Appendix A of its request for rehearing an illustration of the effect storage gas costs have on the quarterly commodity rates during the year.

[22] Order No. 483 defined "rolling weighted average inventory costing methodology," in § 154.302(e), as a way to price gas inventory where injections are priced at the month's jurisdictional system cost of purchase gas and withdrawals are priced by dividing the total purchase costs of the gas in storage by the quantity of gas in storage.

D. Schedule of Annual and Quarterly PGA Effective Dates

Three pipelines request the Commission to change the PGA effective dates established for them in Order No. 483.

Consolidated requests that its annual PGA effective date be changed from June 1 to September 1, in order to maintain a consistent amortization of its Account No. 191 balance. Consolidated states that its current annual surcharge is effective on September 1. National Fuel requests that its annual PGA effective date be changed from February 1 to January 1 because its largest pipeline supplier, Tennessee, has a January 1 annual PGA effective date. Neither pipeline requested a change of PGA effective dates in their comments filed in response to the NOPR.

Panhandle and its subsidiary Trunkline renew their request to have the same annual PGA effective date instead of Panhandle's March 1 date and Trunkline's September 1 date. They argue that this change would allow Panhandle to track Trunkline's rates without the need for special tracking filings. The Commission previously denied this request in Order No. 483.

The Commission is granting Consolidated's and National Fuel's requests. The Commission is persuaded that its transition procedures would prevent Consolidated from recovering nearly 20 months of its deferred purchased gas costs, until its second annual PGA filing to be effective June 1, 1989.[23] Similarly, the change of National Fuel's effective date will enable the company to track its major pipeline supplier's rates on a more current basis.

The Commission is affirming its denial of Panhandle/Trunkline's requests for a change in PGA effective date. As the Commission stated in Order No. 483, to do so would disrupt the balanced schedule of effective dates the Commission established because of the number of pipelines that track these companies' rates. The Commission recognizes that Panhandle must file its March 1 annual PGA 30 days before Trunkline's March 1 quarterly PGA is filed. However, Pandhandle can amend its current adjustment 30 days after filing to reflect Trunkline's March 1 PGA under new § 154.305(c)(4).

E. Accounting Cycle for Determining Monthly Actual Purchased Gas Costs

The Commission is clarifying in this order that pipelines must determine their monthly actual purchased gas costs using a 60-day billing and payment cycle.[24] As discussed in Order No. 483, the Commission's experience with gas purchase contracts and the terms of gas sales service agreements in pipeline tariffs indicates that the majority of gas purchase transactions anticipate the completion of a gas purchase transaction within 60 days.[25]

The Commission agrees with ANR/CIG and Transco that certain transactions involving marketing affiliate purchases and purchases at the tailgate of gas processing plants have extended billing and payment cycles. However, the Commission believes that a pipeline should determine the cost of its gas purchases as soon as possible. If it does so, it will be better able to compete. Therefore, a pipeline should shorten its billing and payment cycle for gas payments from its marketing affiliate or purchases behind the plant. The Commission notes that an extended billing and payment cycle is only important to a pipeline when it determines its actual costs under the assessment of past performance procedures. If the pipeline does not have the ability to change its billing and payment cycle, the pipeline will have the opportunity to explain why the exclusion of certain transactions caused the pipeline to exceed the three-percent margin for underrecoveries.[26]

F. Assessment of Past Performance

The Commission established procedures to review a pipeline's performance in projecting gas costs during the 12-month deferral period when the company files its annual PGA filing. Without prior Commission approval, a pipeline may include in its surcharge balance any underrecovered actual gas costs accumulated in each of its four test intervals, provided these underrecovered gas costs do not exceed, in each interval, three percent of the company's projeted gas costs. The Commission received requests to rehear several aspects of the procedures that relate to its assessment of past performance.

1. *Actual costs included in the Assessment of Past Performance.* The regulations require a pipeline to include all its valid actual gas supply costs. For purposes of the performance test, actual gas costs are those amounts known or paid within the 60-day accounting cycle (as determined in § 154.305(g)(1)). The Commission excluded from the test adjustments for exchange and transportation imbalances and all prior month adjustments (§ 154.306(d)). However, it included in the test actual amounts of Canadian gas costs, demand charges, pipeline supplier costs, and minimum bill costs if these costs were projected as gas costs during the test period.

ANG/CIG and El Paso request the Commission to clarify whether adjustments should be included in the assessment test. They explain that in certain situations a pipeline may not receive billings for gas purchases promptly. Therefore, they argue that their unadjusted gas costs will not be accurate.

The Commission recognizes that certain gas purchase transactions may involve accounting cycles beyond the 60-day billing and payment cycle established in the regulations. Therefore, the Commission is clarifying that a pipeline may use any out-of-period costs attributable to delayed billing transactions to justify why it exceeded the three-percent margin for underrecoveries during the test period. However, a pipeline must first compute the test without using out-of-period adjustments. Then, the Commission will permit the pipeline to recalculate the test by moving the adjustments from the month they were recorded into the applicable purchase month to satisfy the assessment. When it recalculates the test, the pipeline must separately identify the adjustments. Also, the Commission will not permit a pipeline to use only credit adjustments to bring its monthly deferrals within the appropriate level for surcharge recovery.[27]

In response to El Paso, the Commission is clarifying that a pipeline may include billing adjustments as actual gas costs for the assessment of past performance if they are attributable to quantities of gas purchased and received during a month, and if the billing adjustments are made or known within 60 days of that month. However, a pipeline must include billing adjustments in the refund subaccount even though they were made (or known) within 60 days after a purchase month if the credit adjustments are not related to gas purchased and received during the purchase month.[28]

---

[23] In Order No. 483, the Commission granted Mountain Fuel Resources, Inc. a change in effective date so the company could maintain a consistent amortization of its surcharge balance.

[24] The Commission will continue to require a pipeline to record as an accrued expense (unpaid accrual) known amounts that remain unpaid after the 60-day billing and payment cycle, instead of 90 days as suggested by ANR/CIG.

[25] See ANR/CIG, Exxon, Transco.

[26] This should alleviate Tenneco's concern over the accounting cycle for Plant Volume Reduction (PVR) credits it receives for volumes of purchased gas lost during plant processing operations.

[27] For example, a pipeline may not include only credit billing adjustments to lower a test interval's actual cost of gas if the pipeline also receives debit billing adjustments applicable to that test interval's purchase volumes.

The Commission agrees with arguments that pipeline supplier demand costs should not be included in the assessment of past performance if a pipeline has a two-part rate structure.[29] The purpose of the test is to ensure that customers receive the most accurate price signals for the gas they purchase. Unlike commodity costs, demand costs are charged to a pipeline and passed on to the pipeline's customers based on predetermined billing determinants. Neither a pipeline nor its customers, therefore, have any discretion to pay for these costs. Instead, customers make purchasing decisions on the basis of the relative variable costs amongst supply options. Since the assessment test's purpose is not served by reviewing demand costs, the Commission will exclude from the test any demand costs that are permitted to be passed through a pipeline's two-part rates on an "as billed" basis. However, pipelines with one-part rates may not adjust for demand costs because these costs are imbedded in the overall rate charged their customers and could impact the market signals sent by the commodity portion of the rate.

The Commission is requiring a pipeline to include the commodity portion of its pipeline supplier costs in the assessment review. This is because the pipeline has control over the amount of its pipeline supply purchases, even though it may not control the rates charged by its pipeline suppliers.

The Commission also received arguments that storage operations cause fluctuations in gas costs which are beyond the control of the pipeline.[30]

Since the Commission considers storage as legitimate gas supply costs, they must be included in the assessment of past performance as actual gas costs. The Commission recognizes that the seasonal storage cycle will give rise to cost fluctuations. These price fluctuations are caused, in part, by the LIFO accounting method because the demand costs embedded in the pipeline suppliers' rates are included in the LIFO rates and thus are treated as commodity costs.[31] Since the pipeline has the discretion to choose the methodology it uses to price its storage gas, the Commission does not agree that the price fluctuations are beyond the control of the pipeline. Also, if a cost item causes the pipeline to exceed the threshold of three percent during a particular test interval, it will have the opportunity to explain the overage in its annual PGA filing.

The Commission is not granting Northwest's request that the Commission list specific reasons a pipeline must file to justify its inability to meet the three-percent margin. A pipeline's argument that it is unable to meet the three-percent test must be considered on its own merits. This kind of review does not lend itself to a generic determination. The Commission expects a pipeline to cite the particular circumstances which led to its inability to control its costs within the threshold and to provide sufficient data to support the pipeline's position.

Great Lakes Transmission Company (Great Lakes) seeks rehearing of the Commission's decision in Order No. 483 to include Canadian gas costs in the assessment of past performance. Great Lakes believes that it should not be subject to the assessment, because it acts as a conduit for the purchase of Canadian gas by its resale customers and has no control over the price or the volumes of these supplies.[32] The Commission notes that Great Lakes continues to pass its purchased gas costs through a PGA clause. Therefore, the company must remain subject to the PGA regulations until such time as Great Lakes restructures its tariff to reflect its service obligations to its customers.

2. *The need for the assessment of past performance.* Several pipelines argue on rehearing that the assessment of past performance is not necessary, justified, or legal.[33] The Commission disagrees. The three percent margin for underrecoveries is not an arbitrary standard and was justified in Order No. 483. In the final rule, the Commission traced the history of the three-percent margin which had been applied in individual pipelines' flexible PGA rate proceedings. In fact, the Commission noted that its approved in individual proceedings not only pipelines' initial requests to adopt a three-percent margin for underrecoveries, but also pipelines' requests to continue using this margin after the mandatory one-year review period. Therefore, the Commission adopted this standard on a generic basis.

The assessment of past performance does not replace existing statutory standards under the NGA and the Natural Gas Policy Act (NGPA) for reviewing the passthrough of purchased gas costs. The Commission recognizes that the test does not give the Commission the authority to deny passthrough of gas costs automatically. Section 601(c)(2) of the NGPA [34] limits the Commission's ability to deny the passthrough of statutorily defined "just and reasonable" purchased gas costs unless the Commission finds that the amounts were excessive due to fraud, abuse, or similar grounds.

However, the Commission has the authority to suspend the effective date of rate filings pending review under section 4 of the NGA. As such, the Commission may suspend the effectiveness of that portion of a surcharge rate that reflects costs above the three-percent margin for up to five months. During the suspension period, the Commission may conduct an evidentiary hearing to determine if a pipeline violated the statutory tests under either the NGA or the NGPA. Alternatively, the Commission may permit the full surcharge to become effective after a one-day suspension, subject to further proceedings. Whether the Commission suspends the filing for up to five months will depend on the extent to which a pipeline shows that its incurred costs over the three-percent margin were beyond its control.

G. FERC Form No. 542–PGA

1. *Annual statement of purchasing policies.* The Commission is requiring a pipeline to submit an annual statement of the purchasing policies that gave rise to the pipeline's actual and projected gas costs contained in Schedule A–1 of the FERC Form No. 542–PGA (Form 542). However, while the Commission recognizes that the pipeline may deviate from the plan due to operating conditions, it expects the pipeline to follow its purchasing policies as much as possible. Furthermore, the Commission will not require pipelines to disclose confidential information as argued by Enron. The Commission only requires a pipeline to make a general statement about its past and future purchasing policies. In particular, the Commission expects a pipeline to explain why its projected or actual costs include purchases above the prevailing market rates, and if the pipeline is

---

[28] This is consistent with the Commission's regulations at § 154.305 (g)(1)(iii) and (g)(2).

[29] Columbia, Consolidated, and National Fuel.

[30] Columbia, Consolidated, and National Fuel.

[31] *See*, Request of National Fuel for rehearing, page 7, n. 2.

[32] Great Lakes argues that the Commission issued orders on December 9, 1987, in Docket No. TA88-6-51-004 and TA87-1-51-002 which found that its resale customers negotiate directly with the company's Canadian supplier, TransCanada PipeLines Limited, concerning the price and other terms and conditions relative to the importation of Canadian gas.

[33] Consolidated, Panhandle/Trunkline, Northwest, TETCO, and Williams Natural Gas Company (Williams).

[34] 15 U.S.C. 3431(c) (2) (1982).

taking any steps to reduce its high cost purchases.

2. *Reporting of Order No. 451 negotiations.* Enron and Panhandle/Trunkline claim that the reporting of negotiated contracts under Order No. 451 [35] will require a pipeline to disclose properietary information and may hamper negotiations with other producers. Collection of this information is necessary for the Commission to review the impact of Order No. 451 on the pipelines' purchased gas costs. However, a pipeline may file a request for confidential treatment of the data if the company believes that its ongoing negotiation efforts would be at risk.

3. *Report of actual purchase data in Schedule A1.* The Commission denies Transco's request that pipelines gradually phase in the computerized reporting of actual purchase data in Schedule A1. Transco states that it will need additional time to develop this capability because the level of detail in Schedule A1 was not necessary for compliance with the prior PGA Regulations. The Commission believes that most pipelines will be ready to comply with this reporting requirement when they file their first annual PGA. However, the Commission will consider individual pipelines' requests for a waiver on a case-by-case basis.

4. *Revisions to the Form 542.* In response to Transco's petition, the Commission will not require pipelines to submit the transmittal letter, form of notice, and service list for a PGA filing on nine-track magnetic computer tape. Submitting these documents in a computerized format will not enhance the Commission's ability to review the data submitted with a PGA filing.

The Commission will adopt Natural's suggestion to add a column in Schedule C2—"Carrying charges on Account No. 191", to report the storage inventory cost adjustments required by the regulations.[36] Also, added to Schedule C2 is a column for "other adjustments" because pipelines may need additional adjustments to the carrying charge base.

Finally, the revised Form 542 reflects corrections of typographical errors; conforming changes to reflect amendment of the regulations; corrections to the computerized format; and clarifications of the instructions.

On March 15, 1988, the Commission Staff will conduct a technical conference in the offices of the Commission.[37] The Commission Staff will be present to answer questions concerning the revised Form 542.

H. Miscellaneous Issues and Clarifications

1. *General comments to the PGA revisions.* The Commission disagrees with the arguments of several pipelines [38] that the Commission failed to justify the revisions to the PGA mechanism mandated in this proceeding. In both the NOPR and in Order No. 483, the Commission fully discussed the pipelines' requests for waivers of the existing PGA regulations on a case-by-case basis to allow them to compete in an unstable gas market. Therefore, based on the large number of waiver requests the Commisison received, it was reasonable for the Commission to conclude that a more flexible PGA mechanism was necessary.

Also, the Commission discounts claims that the quarterly filing schedule is burdensome because it now receives numerous PGA filings from pipelines in addition to their scheduled annual or semi-annual filings.[39] Therefore, the Commission will maintain a schedule of quarter PGA filings for all pipelines that elect a PGA clause under the regulations.

Finally, the Commission is not persuaded by arguments that the new PGA regulations make it difficult for pipelines to compete with unregulated sellers of gas. An unregulated seller of gas must absorb the cost of any gas it purchases and is unable to sell. However, the passthrough provision in NGPA section 601(c) gives the jurisdictional pipeline an advantage over the unregulated seller because, in most cases, it guarantees the pipeline's right to make up any underrecovered costs in the surcharge rate.

2. *Application of Opinion No. 256.* The Commission intends to apply its Canadian gas "as billed" policy expressed in *Natural Gas Pipeline Company of America*,[40] and review the appropriate classification of imported natural gas demand costs in both PGA filings and section 4 general rate proceedings. However, the Commission denies Producer Association's request to delay a pipeline's inclusion of Canadian supplier purchases in its PGA until the Commission reviews the underlying contracts. To conduct such a review would intrude on the jurisdiction of the Department of Energy's Economic Regulatory Administration.

3. *Concurrent exchange transactions.* In response to Columbia's request for clarification, there are no gas costs associated with concurrent exchange transactions. The assignment of a weighted average cost of gas to exchange imbalances under § 154.305(i) is intended to remove the rate impact of the imbalances for pipelines that compute their monthly deferred costs on a unit-of-sales basis.

4. *Unpaid accruals.* The regulations permit a pipeline to include suspended payable (SP)[41] unpaid accruals as a gas cost in the PGA. To prevent the possibility that a pipeline would be unjustly enriched if SP accruals are never paid, the Commission requires that a pipeline list and describe in its annual PGA filing each unpaid accrual if it has remained unpaid for three or more years from the month it was originally recognized as a gas cost. The Commission agrees with Transco that the separate tracking and listing of unpaid accruals may impose a burden on some pipelines. However, the Commission believes that this burden is justified because the regulations allow a pipeline to collect for gas costs that the pipeline has not paid. If a pipeline finds the tracking and reporting requirements overly burdensome the pipeline will not be required to list its outstanding SP accruals. However, the pipeline must forgo collection of the accrued gas costs until it makes payment.

5. *Transition rules.* Although requested by ANG/CIG, the Commission will not delay implementation of Order No. 483 until a pipeline files its first PGA scheduled six months after this order on rehearing is effective. The Commission established a uniform effective date of June 1, 1988, to ensure that pipelines do not gain a competitive advantage over others during the transition. However, the Commission agrees with ANR/CIG that the transition procedures may create a hardship for certain pipelines. Therefore, the Commission will consider requests for waivers of certain provisions of the transition rules on a case-by-case basis.

In response to a request by El Paso, the Commission is clarifying that only the purchased gas costs a pipeline projects to occur after June 1, 1988 will be tested in the assessment of past

performance in the pipeline's first annual PGA effective after June 1, 1988.

III. Paperwork Reduction Act and Effective Date

The Paperwork Reduction Act[42] and the Office of Management and Budget's (OMB) regulations[43] require that OMB approve certain information collection requirements imposed by agency rule. The provisions of this order on rehearing have been submitted to OMB for its approval. Interested persons can obtain information on those provisions by contacting the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426 (Attention: Ellen Brown, (202) 357–5311). Comments on the provisions of this order on rehearing can be sent to the Office of Information and Regulatory Affairs of OMB, New Executive Office Building, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission).

This order on rehearing is effective on April 8, 1988. In the event OMB has not approved this order, the Commission will issue a notice postponing the effective date.

List of Subjects in 18 CFR Part 154

Alaska, Natural gas, Pipelines, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission amends Part 154, Chapter I, Title 18, Code of Federal Regulations as set forth below.

By the Commission.

Lois D. Cashell,
Acting Secretary.

PART 154—RATE SCHEDULES AND TARIFFS

1. The authority citation for Part 154 is revised to read as follows:

Authority: Natural Gas Act, 15 U.S.C. 717–717w (1982); Department of Energy Organization Act, 42 U.S.C. 7102–7352 (1982); E.O. 12009, 3 CFR 1978 Comp., p. 142; Independent Offices Appropriation Act, 31 U.S.C. 9701 (1970).

2. In § 154.304, paragraph (c) is revised to read as follows:

§ 154.304 Scheduled annual and quarterly PGA filings.

* * * * *

(c) *Effective dates.* A pipeline must file its annual and quarterly PGA filings with the Commission to be effective as follows:

Annual Date: January 1

(Quarterly Dates: April 1, July 1, October 1)

Alabama-Tennessee Natural Gas Company
Granite State Gas Transmission, Inc.
East Tennessee Natural Gas Company
Northern Natural Gas Company
Sea Robin Pipeline Company
Tennessee Gas Pipeline Company
National Fuel Gas Supply Corporation

Annual Date: February 1

(Quarterly Dates: May 1, August 1, November 1)

Lawrenceburg Gas Transmission Corporation
Texas Eastern Transmission Corporation
Texas Gas Transmission Corporation

Annual Date: March 1

(Quarterly Dates: June 1, September 1, December 1)

Algonquin Gas Transmission Company
Natural Gas Pipeline Company of America
North Penn Gas Company
Panhandle Eastern Pipe Line Company

Annual Date: April 1

(Quarterly Dates: July 1, October 1, January 1)

Arkla Energy Resources, A Division of Arkla, Inc.
Commercial Pipeline Company, Inc.
Midwestern Gas Transmission Company, Southern Division
Northwest Pipeline Corporation
Southern Natural Gas Company

Annual Date: May 1

(Quarterly Dates: August 1, November 1, February 1)

ANR Pipeline Company
Columbia Gas Transmission Company
Florida Gas Transmission Company
Kentucky-West Virginia Gas Company

Louisiana-Nevada Transit Company
Western Transmission Corporation.

3. In § 154.305, paragraphs (c)(1)(ii), (h)(3)(i), (i)(1)(i), (i)(1)(ii), (i)(1)(iii), and (i)(3) are revised and a new paragraph (c)(4) is added to read as follows:

§ 154.305 Annual PGA filing.

* * * * *

(c) *Determining the current adjustment.*

(1) *Method for projecting cost of purchased gas.* * * *

(ii) Known and measurable changes in the rate, for all but pipeline supplier rates, based on contractual obligations that are in existence on the date the PGA is filed. The rate to be used for each projected purchase of pipeline supply will be the rate in effect as of the effective date of the PGA or a rate which will come out of suspension during the PGA effective period. The rate for producer supply may be adjusted, if applicable, by the monthly ceiling price escalations allowed under the Natural Gas Policy Act of 1978; and

* * * * *

(4) *Revision to the current adjustment.* A pipeline may file a revision to the current adjustment filed with its annual PGA. The revision must be filed with the Commission and posted under § 154.16, at least 30 days before a pipeline's annual PGA effective date, as established in § 154.304(c). At the same time, the pipeline must serve its jurisdictional customers and interested state commissions with a copy of the filing as described in paragraph (a) of this section. The revision must conform to the following:

---

[42] 44 U.S.C. 3501–3520 (1982).

[43] 5 CFR Part 1320 (1987).

(i) The filing must contain tariff sheets as specified in paragraph (a)(1) of this section.

(ii) This report must contain detailed computations that clearly show the derivation of the revision to the current adjustment. The format in which this report must be submitted and the information that the report must contain should conform to the format for the quarterly PGA filing as set forth in FERC Form No. 542–PGA, Purchased Gas Adjustment (PGA) Filing.

(iii) The current adjustment must be determined as described in paragraphs (b) and (c) of this section. A pipeline must not make an adjustment to the surcharge rate in this filing.

* * * * *

(h) *Carrying charges.* * * *

(3) *Carrying charge base.* (i) The carrying charge base for the refund, revenue credits and billing adjustments subaccount will be the prior month's ending refund, revenue credit and billing adjustment subaccount balance of Account No. 191 adjusted for any applicable deferred income taxes recorded consistent with § 154.303(c)(3) and reduced for unpaid accruals, if any.

* * * * *

(i) *Refunds.* (1) *General rule.* * * *

(i) Establishing a separately identified refund subaccount of Account No. 191. During a deferral period a pipeline must:

(A) Credit the subaccount with the jurisdictional portion of all refunds, revenue credits, and the related interest received;

(B) Debit the subaccount with the out-of-period billing adjustments; and,

(C) Debit if the subaccount balance is a debit balance or credit if the subaccount balance is a credit balance with the carrying charges computed under paragraph (h) of this section.

(ii) If the refund subaccount balance is a credit balance, disbursing to its jurisdictional customers in cash the total refund subaccount balance when the total refund subaccount balance equals or exceeds an amount which is the lesser of:

(A) $2 million, or

(B) 1 cent per MMBtu, determined by dividing X by Y where:

X = The monthly ending refund balance, and
Y = The quantity of a pipeline's most recent 12 months of actual jurisdictional sales.

(iii) The disbursement must be made by the pipeline within 90 days of the end of the month in which a pipeline receives a refund, revenue credit, or billing adjustment which causes the refund subaccount balance to reach the level stated in paragraph (1)(ii)(A) or (l)(ii)(B) of this section.

* * * * *

(3) *Debiting refund subaccount.* * * *

(i) If the balance is a credit balance, disburse the amounts in cash in the manner described in paragraphs (h)(2)(i) or (h)(2)(ii) of this section; or

(ii) If the balance is a debit balance or the pipeline elects not to make a cash disbursement under paragraph (h)(3)(i) of this section, transfer the amounts to the current deferral subaccount balance determined under paragraphs (e) and (g) of this section.

* * * * *

4. In § 154.306, paragraphs (d)(1) and (d)(2) are revised and paragraph (d)(3) is added to read as follows:

§ 154.306 Assessment of past performance.

* * * * *

(d) *Actual cost of gas purchased.* * * *

(1) Less adjustments for exchange transactions and transportation imbalances;

(2) Including only the gas cost components that were used to compute the projected average cost of gas that is compared in a test interval; and

(3) Excluding any demand costs permitted to be passed through a pipeline's two-part rates on an as-billed basis under § 154.305(b) (2) and (3).

Note: This appendix will not be published in the *Code of Federal Regulations.*

BILLING CODE 4717-01-M

---

18 CFR Part 157

[Docket Nos. RM86-3-003 through -068, Order No. 451-A]

Ceiling Prices; Old Gas Pricing Structure; Correction

Issued March 1, 1988.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order on rehearing; correction.

SUMMARY: Order No. 451–A, issued December 15, 1986, revised the due date for reports of sales made under the authority of the blanket certificate granted by 18 CFR 157.301 (1987) from March 1 to April 1 (51 FR 46762 at 46805 (Dec. 24, 1986)). This notice corrects the text of § 157.301 to reflect the April 1 deadline for such reports.

EFFECTIVE DATE: March 1, 1988.

FOR FURTHER INFORMATION CONTACT: Darrell Blakeway, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (202) 357–8224.

SUPPLEMENTARY INFORMATION: In Order No. 451 (51 FR 22168 (June 18, 1986)), the Commission promulgated 18 CFR 157.301, granting certificates of public convenience and necessity to authorize sales of natural gas abandoned under the good faith negotiation procedures of 18 CFR 270.201. Section 157.301(c) required first sellers who make sales under such certificates to file reports with the Commission by March 1 of each year providing certain information with respect to sales initiated during the preceding calendar year. In Order No. 451–A, granting rehearing in part and clarifying the final rule, the Commission revised the deadline for filing such reports from March 1 to April 1 (51 FR 46762 at 46805 (Dec. 24, 1986)). However, the text of § 157.301 was not amended accordingly. This correction notice is issued, as a ministerial action, to incorporate the revised deadline in the text of the *Code of Federal Regulations.*

BILLING CODE 6717-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 524

Ophthalmic and Topical Dosage Form New Animal Drugs not Subject to Certification; Levamisole

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by American Cyanamid Co. providing for use of levamisole as a pour-on liquid for treating cattle for stomach, intestinal, and lung worm infestation.

EFFECTIVE DATE: March 9, 1988.

FOR FURTHER INFORMATION CONTACT: Adriano R. Gabuten, Center for Veterinary Medicine (HFV-135), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4913.

SUPPLEMENTARY INFORMATION: American Cyanamid Co., Agricultural Division, Wayne, NJ 07470, filed NADA 140-844 providing for the use of a 200-milligram-per-milliliter levamisole pour-on liquids (TRAMISOL®) for treatment of cattle for stomach worm, intestinal worm, and lung worm infections. Levamisole is currently approved as a bolus, drench, gel, injectable, and pour-on liquid to treat cattle for stomach worm, intestinal worm, and lung worm infections. Based on the data in the NADA and additional information, the NADA is approved and 21 CFR 524.1240(b) is amended to reflect the approval. The basis of approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.24(d)(1)(i) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 524

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 524 is amended as follows:

PART 524—OPHTHALMIC AND TOPICAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR Part 524 is revised to read as follows:

Authority: Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)); 21 CFR 5.10 and 5.83.

§ 524.1240 [Amended]

2. Section 524.1240 *Levamisole* is amended in paragraph (b) by inserting the phrase "010042 and" before sponsor number "011716".

Dated: March 2, 1988.

Gerald B. Guest,

Director, Center for Veterinary Medicine.

BILLING CODE 4160-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 602

[T.D. 8186]

Income Tax, Taxable Years Beginning After December 31, 1953; Election To Be Taxed as a Real Estate Mortgage Investment Conduit and Other Administrative Matters; and OMB Control Numbers Under the Paperwork Reduction Act

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary income tax regulations relating to real estate mortgage investment conduits. The relevant provisions in the Internal Revenue Code were added or amended by the Tax Reform Act of 1986. These regulations prescribe the manner in which an entity elects status as a real estate mortgage investment conduit (REMIC) for Federal income tax purposes and the procedures to be followed when filing a Federal income tax return as a REMIC. The regulations also require a REMIC to file information returns with the Internal Revenue Service and to provide notice to holders of interests in the REMIC of income and certain allocable expenses attributable to their interests.

DATES: The temporary regulations are effective after December 31, 1986, and, with respect to certain reporting requirements contained in §§ 1.67–3T (f)(3)(ii), 1.67–3T (f)(5)(i)(B), 1.860F–4T (e)(1)(i)(D) and (E), 1.6049–7T (f)(2)(ii) (C), (D), and (G), and 1.6049–7T (f)(3), for calendar quarters and calendar years after 1987.

FOR FURTHER INFORMATION CONTACT: Beverly A. Baughman (202-566-3297), with respect to the allocation of expenses by REMICs and Laura Ann M. Lauritzen (202-566-3829), with respect to all other matters, of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 (Attention: CC:LR:T).

SUPPLEMENTARY INFORMATION:

Background

This document adds new temporary regulations to the Income Tax Regulations (26 CFR Part 1) under sections 67, 860D, 860F, and 6049 (d)(7) of the Internal Revenue Code of 1986 (Code), relating to real estate mortgage investment conduits. Section 671 of the Tax Reform Act of 1986 (the 1986 Act) added to the Code new sections 860A through 860G to provide rules relating to real estate mortgage investment conduits, or REMICs, while section 674 of the 1986 Act amended section 6049 to impose certain information reporting requirements with respect to REMIC interests and certain other debt instruments. In general, a REMIC is a fixed pool of mortgages in which multiple classes of interests are held by investors and which elects to be taxed as a REMIC. The temporary regulations under section 860D prescribe the manner in which an entity elects status as a REMIC. The temporary regulations under section 860F govern the filing of a REMIC's income tax return and, together with the temporary regulations under section 6049, require that the REMIC provide notice of income and other information to its investors and the Internal Revenue Service.

Section 132 of the 1986 Act added to the Code new section 67 which disallows certain miscellaneous itemized deductions in computing the taxable income of an individual to the extent that the aggregate of those deductions does not exceed 2 percent of the individual's adjusted gross income section 67(c) directs that regulations be issued to prohibit the indirect deduction through pass-through entities of amounts which are not allowable as a deduction if paid or incurred directly by an individual. Section 67(c) also directs that regulations provide any necessary reporting requirements. The temporary regulations under section 67 that are contained in this document fulfill the requirements of section 67(c) as it applies to REMICs.

Under section 675(a) of the 1986 Act, new sections 860A through 860G of the Code and the conforming amendments made to other sections are effective for taxable years beginning after December 31, 1986. Section 106(v)(1) of the Technical Corrections Bill would amend section 675(a) of the 1986 Act so that all provisions relating to REMICs take effect as of January 1, 1987. Accordingly, the Service has announced that it will apply these provisions to any holder of an interest in a REMIC as of January 1, 1987, regardless of the holder's taxable year. See Notice 87–41, 1987–24 I.R.B. 17 (June 15, 1987).

Explanation of Provisions

Treatment of a REMIC as a Partnership

Section 860F(e) provides that, for purposes of Subtitle F of the Code (Procedure and Administration), a REMIC is treated as a partnership and any holder of a residual interest is treated as a partner. Thus, the rules relating to the tax treatment of partnership items (Subchapter C of Chapter 63 of Subtitle F) generally apply to a REMIC. For example, under § 1.860F–4T(d), a REMIC may designate a tax matters person in the same manner in which a partnership may designate a tax matters partner under § 301.6231(a)(7)–1T. If there is only one holder of the REMIC residual interest, however, § 1.860F–4T(a) provides an exception to the application of those rules.

REMIC Income Tax Return and Election

Section 1.860F–4T(b) generally requires a REMIC to file an income tax return annually with the Internal Revenue Service. The Service has developed new Form 1066, U.S. Real Estate Mortgage Investment Conduit Income Tax Return, for this purpose. As required by section 860F(e), the return must include the amount of the daily accruals determined under section 860E(c). The due date and any extensions for filing the REMIC's annual return are determined as if the REMIC were a partnership that uses the calendar year. Form 1066 may be signed by any one of the holders of a residual interest during that taxable year or, as provided in section 6903, by a fiduciary as defined in section 7701(a)(6).

As provided in § 1.860D–1T(a), an entity or a segregated pool of assets within an entity elects to be treated as a REMIC by furnishing certain information and by computing its taxable income (or net loss) as a REMIC in accordance with section 860C(b) and the regulations thereunder. This election is made on the Form 1066 for the first taxable year of the entity's existence. Once made, the election is irrevocable for that taxable year and all succeeding taxable years.

Section 1.860D–1T(b) requires that the REMIC provide certain information with its income tax return for the year of the election. That information includes the REMIC's employer identification number (a REMIC may apply for an EIN on Form SS–4, "Application for Employer Identification Number"), information concerning the terms of each class of regular interest and the designated residual interest, and any other information that is required by the form. The REMIC must also provide on its first return a description of the prepayment and reinvestment assumptions that are made pursuant to section 1272(a)(6). Finally, under § 1.860D–1T(c), an entity or segregated pool of assets that elects to be a REMIC must keep sufficient records concerning investments and other assets to be able to show that it is in compliance with the provisions of sections 860A through 860G during each taxable year.

Notice to Residual Interest Holders

At the close of each calendar quarter, a REMIC is required under § 1.860F–4T(e)(1) to provide to each person who held a residual interest in the REMIC during the quarter notice on Schedule Q (Form 1066) of certain information. That information includes (a) the residual holder's share of REMIC taxable income or net loss for the calendar quarter, (b) the amount of the excess inclusion with respect to the holder's residual interest, (c) in the case of certain holders, the allocable investment expenses for the quarter, (d) for calendar years after 1987, certain information with respect to the percentage of the REMIC's assets that are qualifying real property loans under section 593, assets of a domestic building and loan association (as described in section 7701(a)(19)), and real estate assets under § 1.860F–4T(e)(1)(ii)(C). The requirements concerning real estate assets under section 856 anticipate certain provisions of the Technical Corrections Bill amending the 1986 Act.

Generally, § 1.860F–4T(e)(2) requires that Schedule Q be mailed (or otherwise delivered) to each holder of a residual interest during a calendar quarter no later than the last day of the month following the close of the calendar quarter. Under § 1.860F–4T(e)(2)(ii), however, the notice for each of the four calendar quarters of 1987 must be mailed (or otherwise delivered) to each holder no later than March 28, 1988. Finally, § 1.860F–4T(e)(4) provides that a copy of Schedule Q for each person who was a residual interest holder at any time during a REMIC's taxable year and for each quarter in which that person was a residual interest holder must be attached to the REMIC's income tax return for that taxable year. Quarterly notice to the Internal Revenue Service is not required.

Reporting to Regular Interest Holders

Section 6049 of the Code requires that certain returns of information be made regarding payments of interest. Under section 6049(d)(7) and § 1.6049F–7T(a), the term "interest" includes amounts includible in the gross income of any holder of a REMIC regular interest or any other debt instrument to which section 1272(a)(6) applies. In accordance with Notice 87–41, this expanded definition of the term "interest" is effective, for purposes of section 6049(a), with respect to any REMIC regular interest or any other debt instrument to wich section 1272(a)(6) applies that is issued after December 31, 1986.

As required by § 1.6049–7T(b)(1), an information return must be made with respect to any amount aggregating $10 or more that is includible as interest under § 1.6049–7T(a). This return must be made by any REMIC or other issuer of a debt instrument to which section 1272(a)(6) applies and by any broker or middleman who holds as a nominee any REMIC regular interest or any other debt instrument to which section 1272(a)(6) applies. Under § 1.6049–7T(c), information returns are not required to be made with respect to amounts includible as interest by certain holders.

In the case of an amount includible as interest, other than original issue discount, § 1.6049–7T(b)(3)(i) requires that the information return be made on Form 1099 for each calendar year showing the aggregate amount includible, the name, address, and taxpayer identification number of the person in whose income this amount is includible, and such other information as is required by the form. Section 1.6049–7T(b)(3)(ii) requires similar information with respect to amounts of original issue discount includible by any holder of a REMIC regular interest or any other debt instrument to which section 1272(a)(6) applies.

The information returns required under § 1.6049–7T are to be filed annually in the manner prescribed in paragraph (e) of that section. Generally, § 1.6049–7T(f) requires that the same information that is provided to the Service also be furnished to each person in whose income amounts are includible as interest. Under § 1.6049–7T(f)(3), certain information regarding REMIC assets must be also be provided to investors. The additional information specified in §§ 1.67–3T(f)(3)(ii), 1.6049–7T(f)(2)(ii) (C), (D) and (G), and 1.6049–7T(f)(3) shall be furnished to investors for calendar years after 1987.

The Service is interested in comments on possible alternatives that would simplify the reporting requirements to holders of REMIC regular interests by brokers and middlemen who hold as nominees. These comments should address the cost and administrability of any suggested alternative methods.

Information Required on Debt Instrument

Under § 1.6049–7T(g), the issuer of any REMIC regular interest or any other debt instrument to which section 1272(a)(6) applies is required to set forth certain information on the face of the regular interest or other debt instrument. This requirement is effective, however, only with respect to any regular interest or other debt instrument that is issued after April 8, 1988.

Treatment of Allocable Investment Expenses

Section 1.67–3T(a)(1) requires a REMIC to allocate to each of its pass-through interest holders the holder's proportionate share of the aggregate amount of allocable investment expenses of the REMIC for the calendar quarter. In general, a pass-through interest holder (as defined in § 1.67–3T(a)(2)(i)(A)) is any holder of a residual interest that is either an individual (other than certain nonresident aliens), a person that computes its taxable income in the same manner as in the case of an individual, or a pass-through entity, interests in which are owned by either an individual or a person that computes its taxable income in the same manner as in the case of an individual.

The term "pass-through interest holder" includes, pursuant to §1.67–3T(a)(3)(i), a grantor trust, a partnership, an S corporation, a common trust fund, a regulated investment company, and a REMIC. It does not include an estate, a nongrantor trust, a cooperative, a real estate investment trust, or other entities such as a qualified pension plan, an individual retirement account, or an insurance company holding assets in a separate asset account to fund certain variable contracts. The term "allocable investment expenses" (as defined in § 1.67–3T(a)(4)) means the aggregate amount of the expenses paid or accrued in the calendar quarter for which a deduction is allowable under section 212 in determining the taxable income of the REMIC for the calendar quarter.

Pursuant to § 1.67–3T(b)(1) a pass-through interest holder is treated both as having received or accrued income and as having paid or incurred an expense described in section 212 (or section 162 in the case of a pass-through interest holder that is a regulated investment company) in an amount equal to the pass-through interest holder's proportionate share of the allocable investment expenses of the REMIC.

Under § 1.67–3T(b)(1)(i), a pass-through interest holder whose taxable year is the calendar year or ends with a calendar quarter takes into account such amounts in those calendar quarters that fall within the holder's taxable year. Separate inclusion rules apply under § 1.67–3T(b)(1)(ii) to a holder whose taxable year does not end with a calendar quarter. An interest holder in a REMIC that is not a pass-through interest holder does not take into account in computing its taxable income any amount of its proportionate share of allocable investment expenses. Under § 1.67–3T(c)(1), a REMIC generally computes a pass-through interest holder's proportionate share of its allocable investment expenses by determining the daily amount of such expenses and allocating this daily amount to the pass-through interest holder in proportion to its respective holdings on that day. Generally, a pass-through interest holder's proportionate share of the daily amount of the allocable investment expenses is determined by taking into account all holders of a REMIC residual interest, whether or not pass-through interest holders.

A REMIC is required under § 1.67–3T(f)(1) to provide written notice to each pass-through interest holder to whom an allocation of expenses is required to be made. Except in the case of notice to a regular interest holder in a single-class REMIC (as described in § 1.67–3T(a)(2)(ii)(B)), notice is furnished quarterly on Schedule Q (Form 1066). The notice must list the aggregate amount of expenses paid or accrued during each calendar quarter for which the REMIC is allowed a deduction under section 212 and the interest holder's proportionate share of these expenses for the calendar quarter. This information must also be furnished annually by the REMIC to the Internal Revenue Service pursuant to § 1.67–3T(f)(3)(i).

If a pass-through interest holder's interest in a REMIC is held in the name of a nominee, the REMIC may provide the written notice to the nominee and make the information return to the Internal Revenue Service with respect to the nominee. Section 1.67–3T(f)(5) provides reporting requirements for nominee to which a REMIC provides notice.

In the case of a single-class REMIC, the term "pass-through interest holder" is defined more broadly to include any regular or residual interest holder that is either an individual (other than certain nonresident aliens), a person that computes its taxable income in the same manner as in the case of an individual, or a pass-through entity, interests in which are owned by certain types of holders. Under § 1.67–3T(c)(3), a single-class REMIC allocates its investment expenses for a calendar quarter to each holder in proportion to the amount of income that accrues to the holder for that quarter.

As required under § 1.67–3T(f) for all other REMICs, a single-class REMIC must report to pass-through interest holders and the Internal Revenue Service the holder's proportionate share of allocable investment expenses Such a REMIC is required to report this information quarterly to pass-through interest holders who hold residual interests on Schedule Q (Form 1066) and annually to the Internal Revenue Service as required in § 1.860F–4T(e)(4). A single-class REMIC is required to report the information quarterly to pass-through interest holders who hold regular interests on a separate statement and annually to the Internal Revenue Service on information return Form 1099.

Special Analyses

The Commissioner of Internal Revenue has determined that these temporary regulations do not constitute a major rule as defined in Executive Order 12291 and, therefore, a regulatory impact analysis is not required.

No general notice of proposed rulemaking is required by 5 U.S.C. 553(d) for temporary regulations. Accordingly, the Regulatory Flexibility Act (5 U.S.C. Chapter 6) does not apply and no Regulatory Flexibility Analysis is required for this rule.

The collection of information requirements added by this document have been submitted to the Office of Management and Budget (OMB) in accordance with the requirements of the Paperwork Reduction Act of 1980. These requirements have been approved by OMB.

Drafting Information

The principal authors of these temporary regulations are Beverly A. Baughman of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service and Michel A. Dazé, formerly of that office. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, on matters of both substance and style.

26 CFR 1.6001–1 through 1.6109–2

Income taxes, Administration and procedure, Filing requirements.

26 CFR Part 602

Reporting and recordkeeping requirements. *Adoption of amendments to the regulations.*

Accordingly, 26 CFR Parts 1 and 602 are amended as follows:

Income Tax Regulations

PART 1—[AMENDED]

Paragraph 1. The authority for Part 1 is amended by adding the following citations:

Authority: 26 U.S.C. 7805. * * * § 1.67–3T also issued under 26 U.S.C. 67(c). * * * § 1.860F–4T also issued under 26 U.S.C. 860G(c)(3). * * * § 1.6049–7T also issued under 26 U.S.C. 1275(c) and 27 U.S.C. 6049(d)(7)(D). * * *

Par. 2. New § 1.67–3T is added immediately following §1.63–2 and reads as set forth below:

§ 1.67–3T Allocation of expenses by real estate mortgage investment conduits (temporary).

(a) *Allocation of allocable investment expenses*—(1) *In general.* A real estate mortgage investment conduit or REMIC (as defined in section 860D) shall allocate to each of its pass-through interest holders that holds an interest at any time during the calendar quarter the holder's proportionate share (as determined under paragraph (c) of this section) of the aggregate amount of allocable investment expenses of the REMIC for the calendar quarter.

(2) *Pass-through interest holder*—(i) *In general*—(A) *Meaning of term.* Except as provided in paragraph (a)(2)(ii) of this section, the term "pass-through interest holder" means any holder of a REMIC residual interest (as definition in section 860G(a)(2)) that is—

(*1*) An individual (other than a nonresident alien whose income with respect to his or her interest in the REMIC is not effectively connected with the conduct of a trade or business within the United States),

(*2*) A person, including a trust or estate, that computes its taxable income in the same manner as in the case of an individual, or

(*3*) A pass-through entity (as defined in paragraph (a)(3) of this section) if one or more of its partners, shareholders, beneficiaries, participants, or other interest holders is (*i*) a pass-through entity or (*ii*) a person described in paragraph(a)(2)(i)(A) (*1*) or (*2*) of this section.

(B) *Examples.* The provisions of this paragraph(a)(2)(i) may be illustrated by the following examples:

Example (1). Corporation X holds a residual interest in REMIC R in its capacity as a nominee or custodian for individual A, the beneficial owner of the interest. Because the owner of the interest for Federal income tax purposes is an individual, the interest is owned by a pass-through interest holder.

Example (2). Individual retirement account I holds a residual interest in a REMIC. Because an individual retirement account is not a person described in paragraph (a)(2)(i)(A) of this section, the interest is not held by a pass-through interest holder.

(ii) *Single-class REMIC*—(A) *In general.* In the case of a single-class REMIC, the term "pass-through interest holder" means any holder of either—

(*1*) A REMIC regular interest (as defined in section 860G(a)(1)), or

(*2*) A REMIC residual interest, that is described in paragraph (a)(2)(i)(A) (*1*), (*2*), or (*3*) of this section.

(B) *Single-class REMIC.* For purposes of paragraph (a)(2)(ii)(A) of this section, a single-class REMIC IS either—

(*1*) A REMIC that would be classified as an investment trust under § 301.7701–4(c)(1) but for its qualification as a REMIC under section 860D and § 1.860D–1T, or

(*2*) A REMIC that—

(*i*) Is substantially similar to an investment trust under § 301.7701–4(c)(1), and

(*ii*) Is structured with the principal purpose of avoiding the requirement of paragraph (a)(1) and (2)(ii)(A) of this section to allocate allocable investment expenses to pass-through interest holders that hold regular interests in the REMIC.

For purposes of this paragraph (a)(2)(ii)(B), in determining whether a REMIC would be classified as an investment trust or is substantially similar to an investment trust, all interests in the REMIC shall be treated as ownership interests in the REMIC, without regard to whether or not they would be classified as debt for Federal income tax purposes in the absence of a REMIC election.

(C) *Examples.* The provisions of paragraph (a)(2)(ii) of this section must be illustrated by the following examples:

Example (1). Corporation M transfers mortgages to a bank under a trust agreement as described in Example (2) of § 301.7701–4(c)(2). There are two classes of certificates. Holders of class C certificates are entitled to receive 90 percent of the payment of principal and interest on the mortgages; holders of class D certificates are entitled to receive the remaining 10 percent. The two classes of certificates are identical except that, in the event of a default on the underlying mortgages, the payment rights of class D certificates holders are subordinated to the rights of class C certificate holders. M sells the class C certificates to investors and retains the class D certificates. The trust would be classified as an investment trust under § 301.7701–4(c)(1) but for its qualification a REMIC under section 860D, the class C certificates represent regular interests in the REMIC and the class D certificates represent residual interest in the REMIC. The REMIC is a single-class REMIC within the meaning of paragraph (a)(2)(ii)(B)(*1*) of this section and, accordingly, holders of both the class C and class D certificates who are described in paragraph (a)(2)(i)(A) (*1*), (*2*), or (*3*) of this section are treated as pass-through interest holders.

Example (2). Assume that the facts are the same as in Example (1) except that M structures the REMIC to include a second regular interest represented by class E certificates. The principal purpose of M in structuring the REMIC to include class E certificates is to avoid allocating allocable investment expenses to class C certificate holders. The class E certificate holders are entitled to receive the payments otherwise due the class D certificate holders until they have been paid a stated amount of principal plus interest. The fair market value of the class E certificate is ten percent of the fair market value of the class D certificate and, therefore, less than one percent of the fair market value of the REMIC. The REMIC would not be classified as an investment trust under § 301.7701–4(c)(1) because the existence of the class E certificates is not incidental to the trust's purpose of facilitating direct investment in the assets of the trust. Nevertheless, because the fair market value of the class E certificates is de minimis, the REMIC is substantially similar to an investment trust under § 301.7701–4(c)(1). In addition, avoidance of the requirement to allocate allcoable investment expenses to regular interest holders is the principal purpose of M in structuring the REMIC to include class E certificates. Therefore, the REMIC is a single-class REMIC within the meaning of paragraph (a)(2)(ii)(B)(*2*) of this section, and, accordingly, holders of both residual and regular interests who are described in paragraph (a)(2)(i)(A) (*1*), (*2*), or (*3*) of this section are treated as pass-through interest holders.

(3) *Pass-through entity*—(i) *In general.* Except as provided in paragraph (a)(3)(ii) of this section, for purposes of this section, a pass-through entity is—

(A) A trust (or any portion thereof) to which Subpart E, Part 1, Subchapter J, Chapter 1 of the Code applies,

(B) A partnership,

(C) An S corporation,

(D) A common trust fund described in section 584,

(E) A nonpublicly offered regulated investment company (as defined in paragraph (a)(5)(i) of this section),

(F) A REMIC, and

(G) Any other person—

(*1*) Which is not subject to income tax imposed by Subtitle A, Chapter 1, or which is allowed a deduction in computing such tax for distributions to owners or beneficiaries, and

(*2*) The character of the income of which may affect the character of the income recognized with respect to that person by its owners or beneficiaries.

Entities that do not meet the requirements of paragraphs (a)(3)(i)(G) (*1*) and (*2*), such as qualified pension plans, individual retirment accounts, and insurance companies holding assets in separate asset accounts to fund variable contracts defined in section 817(d), are not described in this paragraph (a)(3)(i).

(ii) *Exception.* For purposes of this section, a pass-through entity does not include—

(A) An estate,

(B) A trust (or any portion thereof) not described in paragraph (a)(3)(i)(A) of this section,

(C) A cooperative described without regard to subparagraphs (A) and (C) thereof, or

(D) A real estate investment trust.

(4) *Allocable investment expenses.* The term "allocable investment expenses" means the aggregate amount of the expenses paid or accrued in the calendar quarter for which a deduction is allowable under section 212 in determining the taxable income of the REMIC for the calendar quarter.

(5) *Nonpublicly offered regulated investment company*—(i) *In general.* For purposes of this section, the term "nonpublicly offered regulated investment company" means a regulated investment company to which Part I of Subchapter M of the Code applies that is not a publicly offered regulated investment company.

(ii) *Publicly offered regulated investment company.* For purposes of this section, the term "publicly offered regulated investment company" means a regulated investment company to which Part I of subchapter M of the Code applies, the shares of which are—

(A) Continuously offered pursuant to a public offering (within the meaning of section 4 of the Securities Act of 1933, as amended (15 U.S.C. 77a to 77aa)),

(B) Regularly traded on an established securities market, or

(C) Held by or for no fewer than 500 persons at all times during the taxable year.

(b) *Treatment of allocable investment expenses*—(1) *By pass-through interest holders*—(i) *Taxable year ending with calendar quarter.* A pass-through interest holder whose taxable year is the calendar year or ends with a calendar quarter shall be treated as having—

(A) Received or accrued income, and

(B) Paid or incurred an expense described in section 212 (or section 162 in the case of a pass-through interest holder that is a regulated investment company), in an amount equal to the pass-through interest holder's proportionate share of the allocable investment expenses of the REMIC for those calendar quarters that fall within the holder's taxable year.

(ii) *Taxable year not ending with calendar quarter.* A pass-through interest holder whose taxable year does not end with a calendar quarter shall be treated as having—

(A) Received or accrued income, and

(B) Paid or incurred an expense described in section 212 (or section 162 in the case of a pass-through interest holder that is a regulated investment company), in an amount equal to the sum of—

(C) The pass-through interest holder's proportionate share of the allocable investment expenses of the REMIC for those calendar quarters that fall within the holder's taxable year, and

(D) For each calendar quarter that overlaps the beginning or end of the taxable year, the sum of the daily amounts of the allocable investment expenses allocated to the holder pursuant to paragraph (c)(1)(ii) of this section for the days in the quarter that fall within the holder's taxable year.

(2) *Proportionate share of allocable investment expenses.* For purposes of paragraph (b) of this section, a pass-through interest holder's proportionate share of the allocable investment expenses is the amount allocated to the pass-through interest holder pursuant to paragraph (a)(1) of this section.

(3) *Cross-reference.* See § 1.67–1T with respect to limitations on deductions for expenses described in section 212 (including amounts treated as such expenses under this section).

(4) *Interest income to holders of regular interests in certain REMICs.* Any amount allocated under this section to the holder of a regular interest in a single-class REMIC (as described in paragraph (a)(2)(ii)(B) of this section) shall be treated as interest income.

(5) *No adjustment to basis.* The basis of any holder's interest in a REMIC shall not be increased or decreased by the amount of the holder's proportionate share of allocable investment expenses.

(6) *Interest holders other than pass-through interest holders.* An interest holder of a REMIC that is not a pass-through interest holder shall not take into account in computing its taxable income any amount of income or expense with respect to its proportionate share of allocable investment expenses.

(c) *Computation of proportionate share*—(1) *In general.* For purposes of paragraph (a)(1) of this section, a REMIC shall compute a pass-through interest holder's proportionate share of the REMIC's allocable investment expenses by—

(i) Determining the daily amount of the allocable investment expenses for the calendar quarter by dividing the

total amount of such expenses by the number of days in that calendar quarter.

(ii) Allocating the daily amount of the allocable investment expenses to the pass-through interest holder in proportion to its respective holdings on that day, and

(iii) Totaling the interest holder's daily amounts of allocable investment expenses for the calendar quarter.

(2) *Other holders taken into account.* For purposes of paragraph (c)(1)(ii) of this section, a pass-through interest holder's proportionate share of the daily amount of the allocable investment expenses is determined by taking into account all holders of residual interests in the REMIC, whether or not pass-through interest holders.

(3) *Single-class REMIC*—(i) *Daily allocation.* In lieu of the allocation specified in paragraph (c)(1)(ii) of this section, a single-class REMIC (as described in paragraph (a)(2)(ii)(B) of this section) shall allocate the daily amount of the allocable investment expenses to each pass-through interest holder in proportion to the amount of income accruing to the holder with respect to its interest in the REMIC on that day.

(ii) *Other holders taken into account.* For purposes of paragraph (c)(3)(i) of this section, the amount of the allocable investment expenses that is allocated on any day to each pass-through interest holder shall be determined by multiplying the daily amount of allocable investment expenses (determined pursuant to paragraph (c)(1)(i) of this section) by a fraction, the numerator of which is equal to the amount of income that accrues (but not less than zero) to the pass-through interest holder on that day and the denominator of which is the total amount of income (as determined under paragraph (c)(3)(iii) of this section) that accrues to all regular and residual interest holders, whether or not pass-through interest holders, on that day.

(iii) *Total income accruing.* The total amount of income that accrues to all regular and residual interest holders is the sum of—

(A) The amount includible under section 860B in the gross income (but not less than zero) of the regular interest holders, and

(B) The amount of REMIC taxable income (but not less than zero) taken into account under section 860C by the residual interest holders.

(4) *Dates of purchase and disposition.* For purposes of this section, a pass-through interest holder holds an interest on the date of its purchase but not on the date of its disposition.

(d) *Example.* The provisions of this section may be illustrated by the following example:

Example. (i) During the calendar quarter ending March 31, 1989, REMIC X, which is not a single-class REMIC, incurs $900 of allocable investment expenses. At the beginning of the calendar quarter, X has 4 residual interest holders, who hold equal proportionate shares, and 10 regular interest holders. The residual interest holders, all of whom have calendar-year taxable years, are as follows:

A, an individual.

C, a C corporation that is a nominee for individual I.

S, an S corporation, and

M, a C corporation that is not a nominee.

(ii) Except for A, all of the residual interest holders hold their interests in X for the entire calendar quarter. On January 31, 1989, A sells his interest to S. Thus, for the first month of the calendar quarter, each residual interest holder holds a 25 percent interest (100%/4 interest holders) in X. For the last two months, S's holding is increased to 50 percent and A's holding is decreased to zero. The daily amount of allocable investment expenses for the calendar quarter is $10 ($900/90 days).

(iii) The amount of allocable investment expenses apportioned to the residual interest holders is as follows:

(A) $75 ($10 × 25% × 30 days) is allocated to A for the 30 days that A holds an interest in X during the calendar quarter. A includes $75 in gross income in calendar year 1989. The amount of A's expenses described in section 212 is increased by $75 in calendar year 1989. A's deduction under section 212 (including the $75 amount of the allocation) is subject to the limitations contained in section 67.

(B) $225 ($10 × 25% × 90 days) is allocated to C. Because C is a nominee for I, C does not include $225 in gross income or increase its deductible expenses by $225. Instead, I includes $225 in gross income in calendar year 1989, her taxable year. The amount of I's expenses described in section 212 is increased by $225. I's deduction under section 212 (including the $225 amount of the allocation) is subject to the limitations contained in section 67.

(C) $375 [($10 × 25% × 30 days) + ($10 × 50% × 60 days)] is allocated to S. S includes in gross income $375 of allocable investment expenses in calendar year 1989. The amount of S's expenses described in section 212 for that taxable year is increased by $375. S allocates the $375 to its shareholders in accordance with the rules described in sections 1366 and 1377 in calendar year 1989. Thus, each shareholder of S includes its pro rata share of the $375 in gross income in its taxable year in which or with which calendar year 1989 ends. The amount of each shareholder's expenses described in section 212 is increased by the amount of the shareholder's allocation for the shareholder's taxable year in which or with which calendar year 1989 ends. The shareholder's deduction under section 212 (including the allocation under this section) is subject to the limitations contained in section 67.

(D) No amount is allocated to M. However, M's interest is taken into account for purposes of determining the proportionate share of those residual interest holders to whom an allocation is required to be made.

(iv) No allocation is made to the 10 regular interest holders pursuant to paragraph (a) of this section. In addition, the interests held by these interest holders are not taken into account for purposes of determining the proportionate share of the residual interest holders to whom an allocation is required to be made.

(e) *Allocable investment expenses not subject to backup withholding.* The amount of allocable investment expenses required to be allocated to a pass-through interest holder pursuant to paragraph (a)(1) of this section is not subject to backup withholding under section 3406.

(f) *Notice to pass-through interest holders*—(1) *Information required.* For each calendar quarter, a REMIC shall provide to each pass-through interest holder to which an allocation of allocable investment expenses is required to be made pursuant to paragraph (a)(1) of this section notice of—

(i) The aggregate amount of expenses paid or accrued during the calendar quarter for which the REMIC is allowed a deduction under section 212, and

(ii) The proportionate share of these expenses allocated to that pass-through interest holder for the calendar quarter, as determined under paragraph (c) of this section.

(2) *Statement to be furnished*—(i) *To residual interest holder.* For each calendar quarter, a REMIC shall provide to each pass-through interest holder who holds a residual interest during the calendar quarter the notice required under paragraph (f)(1) of this section on Schedule Q (Form 1066), as required in § 1.860F–4T(e).

(ii) *To regular interest holder*—*(A) In general.* For each calendar quarter, a single-class REMIC (as described in paragraph (a)(2)(ii)(B) of this section) generally shall provide to each pass-through interest holder who holds a regular interest during the calendar quarter the notice required under paragraph (f)(1) of this section on a separate statement mailed (or otherwise delivered) in a separate mailing to the regular interest holder's last known address no later than the last day of the month following the close of the calendar quarter. No promotional or advertising information may be included on the statement. The information required to be included in the notice for the last calendar quarter of the calendar year may, however, be separately stated on the statement described in § 1.6049–

7T(f) instead of on a separate statement provided in a separate mailing. See § 1.6049–7T(f) (4) and (6)(i)(A).

(B) *Special rule for 1987.* The statement required under paragraph (f)(2)(ii)(A) of this section for any calendar quarter of 1987 shall be mailed (or otherwise delivered) to each pass-through interest holder who holds a regular interest during that calendar quarter no later than March 28, 1988.

(3) *Returns to the Internal Revenue Service*—(i) *With respect to residual interest holders.* Any REMIC required under paragraphs (f) (1) and (2)(i) of this section to furnish information to any pass-through interest holder who holds a residual interest shall also furnish such information to the Internal Revenue Service as required in § 1.860F–4T(e)(4).

(ii) *With respect to regular interest holders.* A single-class REMIC (as described in paragraph (a)(2)(ii)(B) of this section) shall make an information return on Form 1099 for each calendar year beginning after December 31, 1987, with respect to each pass-through interest holder who holds a regular interest to which an allocation of allocable investment expenses is required to be made pursuant to paragraphs (a) (1) and (2)(ii) of this section and for which the REMIC is required to make an information return to the Internal Revenue Service pursuant to section 6049 and § 1.6049–7T(b)(2)(i) (or would be required to make such information return but for the $10 threshold described in section 6049(a)(1) and § 1.6049–7T(b)(1)). The REMIC shall state on the information return—

(A) The sum of—

(*1*) The aggregate amounts includible in gross income as interest (as defined in § 1.6049–7T(a)(2) (i) and (ii)), for the calendar year, and

(*2*) The sum of the amount of allocable investment expenses required to be allocated to the pass-through interest holder for each calendar quarter during the calendar year pursuant to paragraph (a) of this section, and

(B) Such other information as may be specified by the form or its instructions.

(4) *Pass-through interest holder's interest held by a nominee.* If a pass-through interest holder's interest in a REMIC is held in the name of a nominee, the REMIC may make the information return described in paragraphs (f)(3) (i) and (ii) of this section with respect to the nominee in lieu of the pass-through interest holder and may provide the written statement described in paragraphs (f)(2 (i) and (ii) of this section to such nominee in lieu of the pass-through interest holder.

(5) *Nominee reporting*—(i) *In general.* In any case in which a REMIC provides, pursuant to paragraph (f)(4) of this section, a written statement to the nominee of the pass-through interest holder for a calendar quarter—

(A) The nominee shall furnish each pass-through interest holder with a written statement described in either paragraph (f)(2) (i) or (ii) of this section, whichever is applicable, for the calendar quarter showing the information described in paragraph (f)(1) of this section, and

(B) If—

(*1*) The nominee is a nominee for a pass-through interest holder who holds a regular interest in a single-class REMIC (as described in paragraph (a)(2)(ii)(B) of this section), and

(*2*) The nominee is required to make an information return pursuant to section 6042 and § 1.6049–7T (b)(1) and (2)(ii) (or would be required to make an information return but for the $10 threshold described in section 6049(a)(2) and § 1.6049–7T(b)(1)) with respect to the pass-through interest holder,

the nominee shall make an information return on Form 1099 for each calendar year beginning after December 31, 1987, with respect to the pass-through interest holder and state on this information return the information described in paragraph (f)(3)(ii) (A) and (B) of this section.

(ii) *Time for furnishing statement.* The statement required by paragraph (f)(5)(i)(A) of this section to be furnished by a nominee to a pass-through interest holder for a calendar quarter shall be furnished to this holder no later than 30 days after receiving the written statement described in paragraph (f)(2) (i) or (ii) of this section from the REMIC.

(6) *Special rules*—(i) *Time and place for furnishing returns.* The return required by paragraphs (f)(3)(ii) and (5)(i)(B) of this section for any calendar year shall be filed at the time and place that a return required under section 6049 and § 1.6049–7T(b) is required to be filed. See § 1.6049–4(g) and § 1.6049–7T(e).

(ii) *Duplicative returns not required.* The requirements of paragraphs (f)(3)(ii) and (5)(i)(B) of this section for the making of an information return shall be met by the timely filing of an information return pursuant to section 6049 and § 1.6049–7T(b) that contains the information required by paragraph (f)(3)(ii) of this section.

Par. 3. New §§ 1.860D–1T and 1.860F–4T are added immediately following § 1.860–5. These new sections are set forth below.

§ 1.860D–1T Election to be treated as a real estate mortgage investment conduit (temporary).

(a) *In general.* An entity, or a segregated pool of assets within an entity, shall elect to be treated as a REMIC by complying with the requirements of paragraph (b) of this section and computing taxable income as a REMIC on its return (as prescribed in §1.860F–4T(b)) for the first taxable year of its existence. Once made, this election is irrevocable for that taxable year and all succeeding taxable years.

(b) *Required information.* When electing to be treated as a REMIC, the entity, or segregated pool of assets within an entity, shall provide either on its return or in a separate statement attached to its return—

(1) The REMIC's employer identification number, which shall not be the same as the identification number of any other entity,

(2) Information concerning the terms and conditions of the regular interests and the designated residual interest of the REMIC, or a copy of the offering circular or prospectus containing such information,

(3) A description of the prepayment and reinvestment assumptions that are made pursuant to section 1272(a)(6) and the regulations thereunder, including a statement supporting the selection of the prepayment assumption,

(4) The form of the electing entity under State law or, if an election is being made with respect to a segregated pool of assets within an entity, the form of that latter entity under State law, and

(5) Such other information as the Commissioner may by form or revenue procedure require.

(c) *Determination of status.* An entity, or segregated pool of assets within an entity, that elects to be a REMIC shall keep sufficient records as to investments and other assets to be able to show that it has complied with the provisions of sections 860A through 860G and the regulations thereunder during each taxable year.

§ 1.860F–4T REMIC reporting requirements and other administrative rules (temporary).

(a) *In general.* For purposes of Subtitle F of the Code, a REMIC shall be treated as a partnership and any holder of a residual interest in the REMIC shall be treated as a partner. A REMIC shall not be subject, however, to the rules of Subchapter C of Chapter 63 of Subtitle F, relating to the treatment of partnership items, for a taxable year, if there is at no time during the taxable year more than one holder of a REMIC residual interest.

(b) *REMIC tax return*—(1) *Return of income.* To satisfy the requirement under section 6031 to make a return of income for each taxable year, a REMIC shall file the return required by paragraph (b)(2) of this section. The due date and any extensions for filing the REMIC's annual return shall be determined as if the REMIC were a partnership.

(2) *Income tax return.* Because a REMIC, unlike a partnership, may be liable for taxes imposed under Subtitle A of the Code (for example, the tax imposed under section 860F(a) on net income from prohibited transactions), the REMIC shall make a return, as required by section 6011(a), for each taxable year on Form 1066, U.S. Real Estate Mortgage Investment Conduit Income Tax Return. The return shall include—

(i) The amount of principal outstanding on each class of regular interests as of the close of the taxable year,

(ii) The amount of the daily accruals determined under section 860E(c),

(iii) The REMIC's employer identification number, and

(iv) Such other information as the Commissioner may by form or revenue procedure require.

(c) *Signing of REMIC return.* For purposes of section 6063, a REMIC's income tax return for any taxable year may be signed by any one of the holders of a residual interest during that taxable year or, as provided in section 6903, by a fiduciary as defined in section 7701(a)(6) who is acting for the REMIC and who has furnished adequate notice in the manner prescribed in § 301.6903–1(b).

(d) *Designation of tax matters person.* A REMIC may designate a tax matters person in the same manner in which a partnership may designate a tax matters partner under § 301.6231(a)(7)–1T. For purposes of applying that section, all holders of a residual interest in the REMIC are treated as general partners.

(e) *Notice to holders of residual interests*—(1) *Information required*—(i) *In general.* At the close of each calendar quarter, a REMIC shall provide to each person who held a residual interest in the REMIC during that quarter notice on Schedule Q (Form 1066) of all the information required by the form and the information required by paragraphs (e) (1) (i) (A) Through (F) of this section.

(A) The REMIC shall provide to a residual interest holder that person's share of the taxable income or net loss of the REMIC for the calendar quarter.

(B) The REMIC shall provide to a residual interest holder the amount of the excess inclusion (as defined in section 860E and the regulations thereunder), if any, with respect to that person's residual interest for the calendar quarter.

(C) If the holder of a residual interest is also a pass-through interest holder (as defined in § 1.67–3T (a) (2)), the REMIC shall provide to that holder the allocable investment expenses (as defined in § 1.67–3T (a) (3)) for the calendar quarter.

(D) For calendar quarters after 1987, if the percentage of the REMIC's assets, computed on the basis of the average fair market value of the assets held during the calendar quarter (as described in paragraph (e) (1) (ii) (A) of this section), represented by each of the following categories:

(*1*) Qualifying real property loans under section 593,

(*2*) Assets of a domestic building and loan association (as described in section 7701 (a) (19)), and

(*3*) Real estate assets as defined in paragraph (e) (1) (ii) (C) of this section,

is at least 95 percent, the REMIC shall provide a statement for each category for which the REMIC met this test, specifying that at least 95 percent of the REMIC's assets were represented by that category. If the REMIC fails to meet the 95 percent test for any category, the percentage of the REMIC's assets represented by that category shall be provided.

(E) For calendar quarters after 1987, if less than 95 percent of the assets of the REMIC are real estate assets (as defined in paragraph (e) (1) (ii) (C) of this section), the REMIC shall also provide to any real estate investment trust (REIT) that holds a residual interest the following information:

(*1*) The percentage of the REMIC's assets described in section 856 (c) (5) (A), excluding from real estate assets any property (not otherwise a real estate asset) attributable to the temporary investment of new capital, computed on the bases of the average fair market value of the assets of the REMIC during the calendar quarter (as described in paragraph (e) (1) (ii) (A) of this section), and

(*2*) The percentage of the REMIC's gross income (as defined in paragraph (e) (1) (ii) (B) of this section) described in section 856 (c) (3) (A) through (F), computed as of the close of the calendar quarter. For purposes of this paragraph, the term "foreclosure property" contained in section 856 (c) (3) (F) shall have the meaning specified in section 860G (a) (8).

In determining whether a REIT satisfies the limitations of section 856 (c) (2), all gross income shall be deemed to be derived from a source specified in section 856 (c) (2).

(F) For calendar quarters in 1987, the percentages of assets required in paragraph (e) (1) (i) (D) and (E) of this section may be computed on the basis of the fair market value of the assets of the REMIC as of the close of the calendar quarter, instead of on the basis of the average during the calendar quarter.

(ii) *Special provisions.* For purposes of this paragraph (e) (1) (ii) and paragraph (e) (1) (i) (D), (E), and (F) of this section:

(A) The average fair market value of the assets during each calendar quarter is determined by making the appropriate computation as of the close of each month, week, or day, and by using the quarterly average of the monthly, weekly or daily percentages. The monthly, weekly, or daily computation period shall be applied uniformly during the calendar quarter to all categories of assets and gross income, and may not be changed in succeeding calendar quarters without the consent of the Commissioner.

(B) Gross income shall mean gross income excluding gross income from prohibited transactions defined in section 860F (a) (2).

(C) Real estate assets shall mean real estate assets and defined in section 856 (c) (6) (B) excluding any property (not otherwise a real estate asset) attributable to the temporary investment of new capital.

(2) *Quarterly notice required*—(i) *In general.* Schedule Q shall be mailed (or otherwise delivered) to each holder of a residual interest during a calendar quarter no later than the last day of the month following the close of the calendar quarter.

(ii) *Special rule for 1987.* Notice to any holder of a REMIC residual interest of the information required in paragraph (e) (1) of this section for any of the four calendar quarters of 1987 shall be mailed (or otherwise delivered) to each holder no later than March 28, 1988.

(3) *Nominee reporting*—(i) *In general.* If a REMIC is required under paragraphs (e) (1) and (2) of this section to provide notice to an interest holder who is a nominee of another person with respect to an interest in the REMIC, the nominee shall furnish such notice to the actual owner or owners.

(ii) *Time for furnishing statement.* Under paragraph (e) (3) (i) of this section, the nominee shall furnish the required notice to the actual owner or owners of a REMIC interest no later than 30 days after receiving such information.

(4) *Reports to the Internal Revenue Service.* A copy of Schedule Q for each

person who was a residual interest holder at any time during a REMIC's taxable year and for each quarter in which that person was a residual interest holder shall be attached to the REMIC's income tax return for that taxable year. Quarterly notice to the Internal Revenue Service is not required.

Par. 4. New § 1.6049–7T is added immediately after § 1.6049–6 and reads as set forth below.

§ 1.6049–7T Returns of information with respect to REMIC regular interests and certain other debt instruments (temporary).

(a) *Definition of interest*—(1) *In general.* For purposes of section 6049(a) in taxable years beginning after December 31, 1986, the term "interest" includes amounts includible in the gross income of any holder (other than a holder described in paragraph (c) of this section) of—

(i) A REMIC regular interest (as defined in section 860G(a)(1)), or

(ii) Any other debt instrument to which section 1272(a)(6) applies.

(2) *Amounts includible.* Amounts includible in gross income as interest under paragraph (a)(1) of this section may consist of—

(i) Interest actually paid to the holder,

(ii) Interest accrued, but not paid, with respect to the REMIC regular interest or other debt instrument, or

(iii) Original issue discount accrued with respect to the REMIC regular interest or other debt instrument.

(b) *Requirement of reporting*—(1) *In general.* Except as provided in paragraph (c) of this section, an information return shall be made by any person described in paragraph (b)(2) of this section with respect to any amount aggregating $10 or more includible as interest under paragraph (a)(1) of this section by any other person during a calendar year.

(2) *Person required to make reports.* The persons required to make an information return under section 6049(a) of this section are—

(i) The REMIC or other issuer of a debt instrument to which section 1272(a)(6) applies, and

(ii) Any broker or middleman who holds as a nominee any REMIC regular interest or any other debt instrument to which section 1272(a)(6) applies.

(3) *Information to be reported*—(i) *Amounts other than original issue discount.* In the case of an amounts includible as interest, other than original issue discount treated as interest, an information return on Form 1099 shall be made for the calendar year showing the aggregate amount includible, the name, address, and taxpayer identification number of the person in whose income these amounts are includible, and such other information as is required by the forms.

(ii) *Original issue discount.* In the case of original issue discount, an information return on Form 1099 shall be made for each calendar year of any holder of a REMIC regular interest, or any other debt instrument to which section 1272(a)(6) applies, with respect to which there is original issue discount includible in gross income aggregating $10 or more (as determined under section 1272(a)(6) and the regulations thereunder). The information return shall show—

(A) The name, address, and taxpayer identification number of each record holder for whom an amount of original issue discount is includible in gross income,

(B) The account or serial number, or other identifying number or information, of each REMIC regular interest or other debt instrument with respect to which a return is being made,

(C) The aggregate amount of original issue discount includible in the gross income of each holder for the period during the calendar year for which the return is made,

(D) The name and address of the person filing the return, and

(E) Such other information as is required by the form.

(iii) *Cross-reference.* See § 1.67–3T(f)(3)(ii) for additional information required to be included on an information return on Form 1099 with respect to certain holders of regular interest in REMICs described in § 1.67–3T(a)(2)(ii).

(c) *Information returns not required.* An information return shall not be required under section 6049(a) and this section with respect to amounts includible as interest by the holder of a REMIC regular interest, or any other debt instrument to which section 1272(a)(6) applies, if the holder is—

(1) An organization exempt from taxation under section 501(a) or an individual retirement plan,

(2) The United States or a State, the District of Columbia, a possession of the United States, or a political subdivision or a wholly-owned agency or instrumentality of any one or more of the foregoing,

(3) A foreign government, a political subdivision thereof, or an international organization,

(4) A foreign central bank of issue (as defined in § 1.895–1(b)(1) to be a bank which is by law or government sanction the principal authority, other than the government itself, issuing instruments intended to circulate as currency), or

(5) Any trust which is described in section 4947(a)(1) (relating to certain charitable trusts).

(d) *Special rules*—(1) *Incorporation by reference.* Except as provided in paragraph (d)(2) of this section, the special rules of § 1.6049–4(d) are incorporated in this section, as applicable.

(2) *Exception.* Sections 11.6049–4(d)(2) and 1.6049–5(c) shall not apply to any REMIC regular interest or any other debt instrument to which section 1272(a)(6) applies until such time as the Commissioner determines that the broader reporting of amounts includible as interest required by this section is not sufficient for an accurate accounting for those amounts by the holder of any such interest. At that time, the Commissioner may by ruling or other announcement require the submission of Form 8281 (or similar form) to the Internal Revenue Service with respect to any such interest.

(e) *Time and place for filing a return with respect to amounts includible as interest.* The returns required under this section for any calendar year with respect to amounts includible as interest to which this section applies shall be filed after September 30 of that year, but not before the payor's final payment to the payee for the year, and on or before February 28 of the following year. These returns shall be filed with the appropriate Internal Revenue Center, the address of which is listed in the instructions for Form 1099. For extensions of time for filing returns under this section, see § 1.6081–1. For magnetic media filing requirements, see § 301.6011–2.

(f) *Requirement of furnishing statement to recipient*—(1) *In general.* Every person filing a Form 1099 under section 6049(a) and this section shall furnish to the person whose identifying number is required to be shown on the form a written statement showing the information required by paragraph (f)(2) of this section.

(2) *Form of statement*—(i) *Amounts other than original issue discount.* With respect to amounts includible as interest (other than original issue discount) in the gross income of any person during a calendar year, the written statement required to be furnished under paragraph (f)(1) of this section shall show—

(A) The aggregate amounts shown on Form 1099 to be included in income by that person,

(B) The name and address of the person filing the form, and

(C) A legend, including a statement that the amount is being reported to the

Internal Revenue Service, that conforms to the legend on Form 1099, Copy B, For Recipient.

(ii) *Original issue discount.* With respect to original issue discount includible in the gross income of a holder, during the calendar year, of a REMIC regular interest or other debt instrument to which section 1272(a)(6) applies, the written statement required to be furnished under paragraph (f)(1) of this section shall show—

(A) The aggregate amount of original issue discount includible in gross income by (or on behalf of) the holder for the calendar year with respect to the regular interest or other debt instrument,

(B) The information required by paragraph (b)(3)(ii)(B) of this section,

(C) For calendar years after 1987, the daily portion of original issue discount that is allocated to each day of an accrual period as determined under section 1272(a)(6) and the regulations thereunder,

(D) For calendar years after 1987, the length of the accrual period,

(E) All other items shown on Form 1099 for the calendar year,

(F) A legend, including a statement that the information required under paragraphs (f)(2)(ii) (A), (B), and (E) of this section is being reported to the Internal Revenue Service, that conforms to the legend on Form 1099, Copy B, For Recipient,

(G) For calendar years after 1987, the adjusted issue price (as defined in section 1275(a)(4)(B)(ii)) of the regular interest at the beginning of each accrual period with respect to which interest income is required to be reported on Form 1099–OID, and

(H) Information necessary to compute accrual of market discount. [Reserved.]

(3) *Information with respect to REMIC assets*—(i) *95 percent asset test.* For calendar years after 1987, the statement required by paragraph (f) of this section with respect to any REMIC regular interest shall also specify for each calendar quarter during which the percentage of the REMIC's assets, computed on the basis of the average fair market value of assets held during the calendar quarter (as described in § 1.860F–4T(e)(1)(ii)(A)), represented by each of the following categories:

(A) Qualifying real property loans under section 593,

(B) Assets of a domestic building and loan association (as described in section 7701(a)(19)), and

(C) Real estate assets as defined in § 1.860F–4T (e)(1)(ii)(C) is at least 95 percent, that, for each category for which the REMIC meets this test, at least 95 percent of the REMIC's assets were represented by that category for that calendar quarter. If the REMIC fails to meet the 95 percent test for any category in any calendar quarter, the percentage of the REMIC's assets represented by that category for that calendar quarter shall be provided.

(ii) *Additional information required if the 95 percent test not met.* For calendar years after 1987, if for any calendar quarter less than 95 percent of the assets of the REMIC are real estate assets (as defined in § 1.860F–4T(e)(1)(ii)(C)), the REMIC shall also report for each such calendar quarter to any real estate investment trust (REIT) that holds a regular interest the following information:

(A) The percentage of the REMIC's assets described in section 856(c)(5)(A), excluding from real estate assets any property (not otherwise a real estate asset) attributable to the temporary investment of new capital, computed on the bases of the average fair market value of the assets of the REMIC during the calendar quarter (as described in § 1.860F–4T(e)(1)(ii)(A)), and

(B) The percentage of the REMIC's gross income (as defined in § 1.860F–4T(e)(1)(ii)(B)) described in section 856(c)(3)(A) through (F), computed as of the close of the calendar quarter. For purposes of this paragraph, the term "foreclosure property" contained in section 856(c)(3)(F) shall have the meaning specified in section 860G(a)(8).

In determining whether a REIT satisfies the limitations of section 856(c)(2), all gross income shall be deemed to be derived from a source specified in section 856(c)(2).

(4) *Cross-reference.* See § 1.67–3T(f)(2)(ii) for additional information that may be separately stated on the statement required by paragraph (f) of this section with respect to certain holders of regular interest in REMICs described in § 1.67–3T(a)(2)(ii).

(5) *Time for furnishing statements—(i) In general.* Each statement required under paragraph (f) of this section to be furnished to any person for a calendar year with respect to amounts includible as interest shall be furnished to that person after April 30 of that year and on or before January 31 of the following year, but not before the final interest payment (if any) for the calendar year.

(ii) *Nominee reporting.* Each statement required under paragraph (f) of this section to be furnished by a nominee shall be furnished to the actual owner or owners of a REMIC interest no later than 30 days after the nominee receives such information.

(6) *Special rules*—(i) *Copy of Form 1099 permissible.* The requirements of paragraph (f) of this section for the furnishing of a statement to any person, including the legend requirement of paragraphs (f)(2)(i)(C) and (ii)(F) of this section, may be met by furnishing to that person—

(A) A copy of the Form 1099 filed pursuant to paragraph (b) of this section in respect of that person, plus a separate statement that contains the information described in paragraphs (f)(2)(ii)(C), (D), and (G) (f)(3), and (f)(4), if applicable, of this section, or

(B) A substitute form that contains all the information required under paragraph (f) of this section and that complies with any current revenue procedure concerning the reproduction of paper substitutes of Forms 1099 and the furnishing of substitute statements to forms recipients.

(ii) *Statement furnished by mail.* A statement mailed to the last known address of any person shall be considered to be furnished to that person within the meaning of this section.

(g) *Information required to be set forth on face of debt instrument.* In the case of any REMIC regular interest, or any other debt instrument to which section 1272(a)(6) applies, that is issued after April 8, 1988, and that has original issue discount, the issuer shall set forth on the face of the regular interest or other debt instrument—

(1) The amount of the original issue discount,

(2) The issue date,

(3) The rate at which interest is payable (if any) as of the issue date, and

(4) The yield to maturity, including a statement as to the assumption made under section 1272(a)(6)(B)(iii), the method used to determine yield where there is a short accrual period, and the amount of the original issue discount allocable to the short accrual period.

In cases where it is not possible to set forth the information required by this paragraph (g) on the face of the regular interest or other debt instrument by the issue date, the issuer shall deliver to the holder a sticker containing this information within 10 days after the issue date. For rules relating to the penalty imposed for failure to show the information required by this paragraph (g) on the regular interest or other debt instrument, see section 6706(a) and the regulations thereunder.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[AD–FRL–3291–1]

Standards of Performance for New Stationary Sources; Appendix B, Performance Specification 6; Addition of Specifications and Test Procedures for Continuous Emission Rate Monitoring Systems in Stationary Sources

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: On March 9, 1987, EPA proposed an amendment to Appendix B of 40 CFR Part 60 to add Performance Specification 6 (PS 6) to address continuous emission rate monitoring systems (CERMS's) that may be required by subparts to Part 60 (52 FR 7178). This action promulgates the amendment. The intended effect of this addition is to provide a protocol needed for the evaluation of the quality of the data produced by a CERMS. PS 6 contains specifications for acceptable data quality, and describes how test procedures from Appendix A of Part 60 are to be used to measure that quality. PS 6 will apply to Subpart LLL and any other stationary source category where CERMS's are required, except when specifically excluded by the governing regulation.

DATES: *Effective Date:* March 9, 1988.

Under section 307(b)(1) of the Clean Air Act, judicial review of the actions taken by this notice is available *only* by the filing of a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit within 60 days of today's publication of this notice. Under section 307(b)(2) of the Clean Air Act, the requirements that are the subject to today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

ADDRESSES: *Docket.* A docket, number A–86–21, containing information considered by EPA in development of the promulgated rulemaking, is available for public inspection between 8:00 a.m. and 4:00 p.m., Monday through Friday, at EPA's Central Docket Section (LE–131), South Conference Center, Room 4, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Mr. William Grimley or Mr. Roger T. Shigehara, Emission Measurement Branch, Emission Standards and Engineering Division (MD–19), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone (919) 541–2237.

SUPPLEMENTARY INFORMATION:

I. The Rulemaking

A performance specification for continuous emission rate monitoring systems is being added to Appendix B of 40 CFR Part 60. Subpart LLL of Part 60 specifies the use of such systems, and this performance specification is needed for their evaluation.

This rulemaking does not impose emission monitoring requirements beyond those specified in the current regulations, nor does it change any emission standard. Rather, the rulemaking would simply add a protocol for evaluating the achievement of emission monitoring requirements that would apply irrespective of this rulemaking.

II. Public Participation

The proposed amendment to Appendix B was published in the Federal Register on March 9, 1987 (52 FR 7178). Public comments were solicited at the time of proposal. To provide interested persons the opportunity for oral presentation of data, views, or arguments concerning the proposed procedures, a public hearing was scheduled for April 23, 1987, beginning at 10:00 a.m. The hearing was not held because no one requested to speak. The public comment period was from March 9, 1987, to May 26, 1987. Two comment letters were received concerning issues related to the proposed amendment. The comments have been considered carefully and, where determined to be appropriate by the Agency, changes have been made to the proposed rulemaking.

III. Significant Comments and Changes to the Proposed Standards

Two comment letters were received on the proposed addition—one that contained five comments from a State agency, and one that contained two comments from an industry trade association.

The State agency's first comment was that an operational test period specification should be added to verify the short-term reliability of the sensor.

The test period for the calibration drift (CD) is 7 consecutive days. The CD specification for all measurement parameters provides the verification of short-term reliability for any portion of the CERMS, including the flow rate sensor.

The State agency's second comment was that a calibration error specification should be added to verify sensor accuracy and repeatability throughout the entire measurement range.

The CD definition already encompasses calibration error, since CD is defined in terms of an established reference value, as opposed to a previous instrument reading. The extent of calibration error, in terms of the CD, is determined at both zero and high level values. In addition, the midpoint error is determined by the results of the relative accuracy (RA) test.

The State agency's third comment was that a response time specification which would verify that the flow sensor response is at least as quick as pollutant concentration analyzers should be added to prevent inaccurate emission rates being reported during periods of fluctuating flow.

It is the EPA's opinion that flow rate sensors have a response time equally as fast as pollutant concentration analyzers. It is also the EPA's opinion that a response time specification is not necessary because the applicable regulations specify an averaging time of generally 60 minutes or more. The potential for problems in meeting the RA specification due to the type of situation described by the commenter is considerably lessened because of the averaging of nine separate paired measurements to yield one RA value. No reporting requirement for instantaneous emission rate values is envisioned.

The State agency's fourth comment was that an orientation sensitivity specification should be added to verify that the flow sensor is not overly sensitive to alignment.

The EPA agrees that some flow sensors may be more sensitive to alignment than others; however, if the flow sensor is overly sensitive to alignment, then the CERMS will not pass the RA test.

The State agency's fifth and final comment was that since other PS's require RA to be determined in units of the applicable standard, there is no reason to repeat this specification in PS 6 for cases where the flow sensor is used to convert pollutant concentrations to mass emission rates. However, an RA specification that would apply only to the flow sensor should be added for cases where the flow sensor would be used for other purposes (e.g., estimation of emission rates using factor-generated concentrations, or back-calculation of heat inputs to combustion units).

An RA specification that would apply only to the flow sensor cannot be added because no regulatory requirement exists for such a specification. However, a regulatory requirement does exist for determining emission rates as total mass in a measured quantity of stack gas per unit of time. PS 6 includes a flow rate sensor and, therefore, the RA specification is not a repetition of other PS's.

The trade association's first comment was that the proposed 3 percent CD specification does not appear to be consistent with those in other PS's. The commenter noted that the 3 percent is lower than the 5 percent span value limit (6 out of 7 days) specified in PS 5 for total reduced sulfur (TRS) monitors. The commenter also noted that, although PS 2 has a 2.5 percent drift limit for SO_2 and NO_x monitors, it does not include the O_2 and CO_2 monitors which are allowed a CD of no more than 0.5 percent from the reference value. The commenter then suggested language to include in PS 6 to state that the CD shall be determined separately for each analyzer in terms of its specific measurement, and that for analyzers for which PS's have been established (e.g., PS 2 for SO_2 and NO_x monitors, PS 3 for CO_2 and O_2 monitors, and PS 5 for TRS monitors), the CD limit shall be the same as in the applicable PS.

The EPA is in agreement with this comment, and PS 6 has been revised accordingly.

The trade association's second and final comment dealt with the RA specification. The commenter questioned whether the 20 percent RA requirement was developed with an allowance for flow measurement errors, and noted that a 20 percent RA requirement also applies to PS 2, where flow measurements are not required. The commenter then stated that if flow measurement errors have not been considered, an increase in the 20 percent figure may be appropriate.

The 20 percent RA specification of PS 6 includes an allowance for errors in the flow measurement. PS 2 has the same RA specification which includes an allowance for error in the measurement of O_2 or CO_2. Errors in the measurement of flow rate are essentially the same magnitude as errors in the measurement of CO_2 or O_2 concentration, so no change has been made in the RA specification.

IV. Administrative

The docket is an organized and complete file of all the information considered by EPA in the development of this rulemaking. The docket is a dynamic file, since material is added throughout the rulemaking development. The docketing system is intended to allow members of the public and industries involved to identify readily and locate documents so that they can effectively participate in the rulemaking process. Along with the statement of basis and purpose of the proposed and promulgated standards, and EPA responses to significant comments, the contents of the docket, except for interagency review materials, will serve as the record in case of judicial review (Clean Air Act, Section 307(d)(7)(A)).

Under Executive Order 12291, EPA is required to judge whether a regulation is a "major rule" and, therefore, subject to the requirements of a regulatory impact analysis. The Agency has determined that this regulation would result in none of the adverse economic effects set forth in Section 1 of the Order as grounds for finding a regulation to be a "major rule." The rulemaking does not impose emission monitoring requirements beyond those specified in the current regulations; instead, it provides a protocol for evaluating the achievement of emission monitoring requirements that would apply irrespective of the rulemaking. The Agency has, therefore, concluded that this regulation is not a "major rule" under Executive Order 12291.

The Regulatory Flexibility Act of 1980 requires the identification of potentially adverse impacts of federal regulations upon small business entities. The Act specifically requires the completion of a regulatory flexibility analysis (RFA) in those instances where small business impacts are possible. Because these standards impose no adverse economic impacts, an RFA has not been conducted.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that the promulgated rule will not have any economic impact on small entities, because the rule does not add either to the existing requirement for the installation of continuous monitoring systems or increase their associated maintenance costs. These costs (initial investment $45,000; annualized operating $40,000) for Subpart LLL were considered at the time that the regulation was developed, and the costs have not increased.

This regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any written comments from OMB and any written EPA responses are in the docket.

List of Subjects in 40 CFR Part 60

Air pollution control, Intergovernmental relations, Onshore natural gas processing, Reporting and recordkeeping requirements, Incorporation by reference.

Date: March 3, 1988.

Lee M. Thomas,
Administrator.

40 CFR Part 60 is amended as follows:

PART 60—[AMENDED]

1. The authority citation for Part 60 continues to read as follows:

Authority: Secs. 101, 111, 114, 116, and 301 of the Clean Air Act, as amended (42 U.S.C. 7401, 7411, 7414, 7416, 7601).

2. By adding Performance Specification 6 to Appendix B as follows:

Appendix B—Performance Specifications

* * * * *

Performance Specification 6—Specifications and Test Procedures For Continuous Emission Rate Monitoring Systems in Stationary Sources

1. Applicability and Principle

1.1 Applicability. The applicability for this specification is the same as Section 1.1 of Performance Specification 2 (PS 2), except this specification is to be used for evaluating the acceptability of continuous emission rate monitoring systems (CERMS's). The installation and measurement location specifications, performance specification test procedure, data reduction procedures, and reporting requirements of PS 2, Section 3, 5, 8, and 9, apply to this specification.

1.2 Principle. Reference method (RM), calibration drift (CD), and relative accuracy (RA) tests are conducted to determine that the CERMS conforms to the specification.

OL

MR
9
988
MI

2. Definitions

The definitions are the same as in Section 2 of PS 2, except that this specification refers to the continuous emission rate monitoring system rather than the continuous emission monitoring system. The following definitions are added:

2.1 Continuous Emission Rate Monitoring System (CERMS). The total equipment required for the determination and recording of the pollutant mass emission rate (in terms of mass per unit of time).

2.2 Flow Rate Sensor. That portion of the CERMS that senses the volumetric flow rate and generates an output proportional to flow rate. The flow rate sensor shall have provisions to check the CD for each flow rate parameter that it measures individually (e.g., velocity pressure).

3. Performance and Equipment Specifications

3.1 Data Recorder Scale. Same as Section 4.1 of PS 2.

3.2 CD. Since the CERMS includes analyzers for several measurements, the CD shall be determined separately for each analyzer in terms of its specific measurement. The calibration for each analyzer used for the measurement of flow rate except a temperature analyzer shall not drift or deviate from either of its reference values by more than 3 percent of 1.25 times the average potential absolute value for that measurement. For a temperature analyzer, the specification is 1.5 percent of 1.25 times the average potential absolute temperature. The CD specification for each analyzer for which other PS's have been established (e.g., PS 2 for SO_2 and NO_x), shall be the same as in the applicable PS.

3.3 CERMS RA. The RA of the CERMS shall be no greater than 20 percent of the mean value of the RM's test data in terms of the units of the emission standard, or 10 percent of the applicable standard, whichever is greater.

4. CD Test Procedure

The CD measurements are to verify the ability of the CERMS to conform to the established CERMS calibrations used for determining the emission rate. Therefore, if periodic automatic or manual adjustments are made to the CERMS zero and calibration settings, conduct the CD tests immediately before these adjustments, or conduct them in such a way what CD can be determined.

Conduct the CD tests for pollutant concentration at the two values specified in Section 4.1 of PS 2. For each of the other parameters that are selectively measured by the CERMS (e.g., velocity pressure), use two analogous values: one that represents zero to 20 percent of the high-level value (a value that is between 1.25 and 2 times the average potential value) for that parameter, and one that represents 50 to 100 percent of the high-level value. Introduce, or activate internally, the reference signals to the CERMS (these need not be certified). Record the CERMS response to each, and subtract this value from the respective reference value (see example data sheet in Figure 6–1).

5. RA Test Procedure

5.1 Sampling Strategy for RM's Tests, Correlation of RM and CERMS Data, Number of RM's Tests, and Calculations. These are the same as PS 2, Sections 7.1, 7.2, 7.3, and 7.5, respectively. Summarize the results on a data sheet. An example is shown in Figure 6–2. The RA test may be conducted during the CD test period.

5.2 Reference Methods (RM's). Unless otherwise specified in the applicable subpart of the regulations, the RM for the pollutant gas is the Appendix A method that is cited for compliance test purposes, or its approved alternatives. Methods 2, 2A, 2B, 2C, or 2D, as applicable are the RM's for the determination of volumetric flow rate.

[SWH–FRL–3338–3]

Hazardous Waste Management System; Burning of Used Oil Fuel in Boilers and Industrial Furnaces

AGENCY: Environmental Protection Agency.

ACTION: Notice of determination to deny petitions.

SUMMARY: On November 29, 1985, EPA issued final rules to control the burning of used oil and hazardous waste as fuel under Subtitle C of the Resource Conservation and Recovery Act (RCRA). One provision of those rules established a specification for used oil fuel. Fuel meeting the specification may be burned in any boiler or furnace, while fuel not meeting the specification may only be burned in industrial boilers or furnaces. EPA made this specification effective December 9, 1985, except for the lead limit (of 100 ppm) which became effective May 29, 1986. EPA received petitions from three parties requesting (among other things) that the lead limit be suspended. On January 26, 1987, EPA issued a notice to tentatively deny these petitions, and to solicit comments on the tentative determination. In response to the tentative determination, EPA received four public comments. In this notice, EPA is announcing its final determination to deny these petitions.

FOR FURTHER INFORMATION CONTACT: RCRA Hotline, toll free at (800) 424–9346 or (202) 382–3000. For technical information, contact David Tomten, Office of Solid Waste, (202) 382–7917. Single copies of this notice can be obtained by calling the RCRA Hotline (above).

Decision to Deny Petitions to Eliminate or Modify Used Fuel Oil Specifications

I. Background

On November 29, 1985 (50 FR 49164–49211) EPA established, among other provisions, a burning specification for used oil fuel (see 40 CFR 255.40(e)). See Table 1, below, for the fuel specification. Fuel meeting the specification may be burned in any boiler or furnace, while fuel exceeding any specification limit may only be burned in an *industrial* boiler or furnace (see 40 CFR 266.41). EPA has established that fuel not meeting the specification may pose a significant hazard when burned in non-industrial boilers and, therefore, that its use must be restricted (50 FR 49180–49187). For now, the principal restriction is the prohibition on burning in *non*-industrial boilers and furnaces. There are other regulations such as record-keeping requirements. Industrial burners may burn off-specification used oil fuel provided they comply with the notification, certification, and record-keeping provisions of 40 CFR 266.44 (50 FR 49195–49198). EPA may impose further restrictions to control emissions from burning off-specification used oil fuel in any type of combustion unit in a future rulemaking.

TABLE 1.—THE EPA USED OIL FUEL SPECIFICATION[a]

Constituent/property	Allowable level
Arsenic	5 ppm maximum.
Cadmium	2 ppm maximum.
Chromium	10 ppm maximum.
Lead	100 ppm maximum.
Flash Point	100 °F minimum.
Total Halogens	4,000 ppm maximum.[b]

[a] The specification does not apply to used oil fuel mixed with a hazardous waste other than hazardous waste from small quantity generators conditionally exempt under 40 CFR 261.5.

[b] Used oil containing more than 1,000 ppm total halogens is presumed to be a hazardous waste under the rebuttable presumption provided under 40 CFR 266.40(c). Such used oil is subject to 40 CFR Part 266, Subpart D, rather than Part 266, Subpart E, when burned for energy recovery unless the presumption of mixing can be successfully rebutted.

II. The Petitions and Comments

EPA received three petitions to amend the final used oil fuel rules, all of which dealt principally with eliminating or deferring the specification for the contaminant lead:

(1) Petition from the National Oil Recyclers Association (NORA), dated May 9, 1986. NORA is an association of firms in the business of processing used oil for use as fuel. NORA requested that EPA postpone the effective date of the 100 ppm lead limit until such time as at least 80% of used oil samples, on a nationwide basis, meet the limit.

(2) Petition from the Midwest Oil Refining Company, dated May 13, 1986. Midwest Oil processes used oil for use as fuel. Midwest Oil requested that first, EPA rescind the burner notification requirement or, as an alternative, delay the lead limit as NORA recommends; and second, that EPA withdraw its proposed listing of used oil as a hazardous waste (see 50 FR 49258, November 29, 1985).

(3) Petition from the the Association of Environmentally Regulated Connecticut Industries (AERCI), dated May 22, 1986. AERCI is an association of firms in the business of processing used oil for use as fuel. AERCI requested delay of the lead limit until September 30, 1986, or later.

In summary, the three petitioners are concerned that EPA's requirements, chiefly the lead specification, and also the requirement that used oil fuel burners notify the Agency of their activities, are having an adverse impact on the used oil fuel market, causing them economic hardship. Consequently, they assert that EPA's requirements are leading to improper disposal of used oil. The petitioners also assert that the Agency's rule rests on flawed assumptions. They cite EPA's projection that by May 1986, nearly 80% of used oil samples would be at or below 100 ppm lead (50 FR 49186). The petitioners, however, provided limited self-sampling data showing that as of March and April 1986, lead levels in used oil being processed for use as fuel were more typically 300–400 ppm and sometimes as high as 500–700 ppm. NORA and Midwest Oil also claim that they market used oil fuel to industrial burners; and that these burners are reluctant to notify EPA that they are burning off-specification used oil fuel. NORA and Midwest Oil claim that the reduced demand for used oil fuel will lead to the collapse of the used oil recycling system and to widespread uncontrolled disposal of used oil. The petitioners argue that temporarily suspending the lead limit would allow the continued sale of most used oil fuel as "specification" fuel, exempt from regulation, and would thus prevent such adverse impacts.

On January 26, 1987, we tentatively denied these petitions primarily for the following reason. The Agency has determined that the 100 ppm limit is necessary to protect human health and the environment. Our studies show that burning fuel oil exceeding the 100 ppm lead specification would result in violations of the national Ambient Air Quality Standard (NAAQS) of 1.5 micrograms per cubic meter ($\mu g/m^3$). We have concluded that, as a minimum, the NAAQS must be met to protect human health. See also 52 FR 2695 (January 26, 1987) for a more detailed discussion of the basis for EPA's tentative denial of the petitions.

EPA has received four comments on the tentative decision to deny the petitions. They are:

(001) Letter to U.S. Senator Strom Thurmond, from Statewide Service and Supply, Inc., dated November 21, 1986. From the content of the letter, it is difficult to tell in what area of the used oil business Statewide Service and Supply is involved (i.e., hauler, burner). The commenter wants the "lead credit" and National Ambient Air Quality Standard established by EPA to be considered when setting the lead specification.

(002) Comment from the Midwest Oil Refining Company, dated February 24, 1987. Midwest Oil processes used oil for use as fuel. In their comment, Midwest Oil reiterates their requests that first EPA rescind the burner notification requirement or, as an alternative, delay the lead limit as NORA recommends; and second, that EPA withdraw its proposed listing of used oil as a hazardous waste (see 50 FR 49258, November 29, 1985).

(003) Comment from Patchem, Inc., dated March 17, 1987. The company manages fuel blending programs at cement plants. The commenter claims that lead in oil burned for cement kilns would not be emitted to the atmosphere and that the 100 ppm specification is excessively stringent for this type of burning. The commenter agreed with EPA's level of 100 ppm lead to classify oil as off-specification for use in industrial boilers.

(004) Comment from the National Oil Recyclers Association (NORA), dated March 27, 1987. NORA is an association of firms in the business of processing used oil for use as fuel. NORA reiterates their request, in their comment, that EPA postpone the effective date of the 100 ppm lead limit until such time as at least 80% of used oil samples, on a nationwide basis, meet the limit.

In summary, the commenters objecting to the 100 ppm lead specification level for used oil repeated the petitioners' arguments that EPA's requirements ultimately lead to improper disposal of used oil by discouraging the burning of used oil as fuel in industrial boilers and furnaces. Commenters claim that the fuel brokers and industrial burners who are their customers refuse to register or notify and no longer buy used oil. In their comments, they stated that the stigma and potential liability associated with burning hazardous fuel coupled with the low market price of virgin fuel oil has deterred burners from using off-specification fuel.

Of the four parties commenting on the specification levels for used oil constituents, one, Patchem Inc., agreed that industrial boilers with capacity to generate 50 million Btus per hour should burn only oil with less than 100 ppm lead. The commenter states that a lime scrubber would be necessary for safe burning of oil containing greater than 100 ppm lead.

III. EPA Response to the Petitions and Comments

A. Proposed Listing of Used Oil

Midwest Oil petitioned and later commented to EPA that the Agency withdraw its proposed listing of used oil (when recycled) as a hazardous waste because fuel customers fear adverse publicity, increased liability, etc., perceived to be associated with handling hazardous waste. The Agency, as explained in a recent Federal Register notice, has determined that recycled used oil will *not* be listed as hazardous waste (51 FR 41900, November 19, 1986). This aspect of the petition, then, is no longer relevant and no specific response is provided here. Marketers of used oil fuel may cite the listing determination notice to those burners who were concerned because of the listing proposal. As explained further below, burners may also notify EPA using a form or letter without reference to "hazardous waste."

B. The Lead Specification

Lead is a very toxic pollutant with serious health effects even at very low levels. EPA promulgated the 100 ppm limit because levels higher than 100 ppm are expected to result in violations of the National Ambient Air Quality Standard (NAAQS) of 1.5 micrograms per cubic meter ($\mu g/m^3$) under certain conditions (50 FR 1697–1698, January 11, 1985, and 50 FR 49184–49185, November

29, 1985). EPA concluded that exceedances of the NAAQS could cause adverse health effects, especially in children and other sensitive populations and, as a *minimum*, the Agency must meet the NAAQS. As we discussed at 50 FR 49185 (November 29, 1985), EPA is considering establishing a used oil lead specification lower than 100 ppm.

A commenter stated that EPA's level of 100 ppm lead, when found in used oil, should classify it as an off-specification fuel even for use in industrial boilers. Unless controlled through the use of lime-scrubbing air pollution control devices, the commenter stated that emissions from such units could be detrimental to human health and the environment. No data were provided. Based on available data as summarized in the November 1985 final rule (50 FR 49184), EPA believes the 100 ppm level is protective because it protects against lead emissions from burning used oil exceeding the NAAQS, for a Most Exposed Individual in reasonable worst case conditions (multiple boilers burning 100 percent used oil fuel in an urban area with poor air dispersion). Since the Agency has been provided with no data disputing this analysis, the Agency's original conclusion still stands.

The petitioners and commenters argue that EPA cited projections of lead content in used oil showing that by May 1986 approximately 80% of used oil samples nationwide would meet the 100 ppm lead limit as-generated (i.e., without blending with virgin fuel oil). The petitioners provided, however, self-sampling data showing that by March or April of 1986, lead levels in used oil they processed were not near 100 ppm, but more typically 300–400 ppm. They argue that EPA should therefore delay imposition of the 100 ppm limit until such time as 80% of used oil samples, on a nationwide basis, meet the limit.

Petitioners' and commenters' reasoning here, however, starts with the incorrect premise that EPA only established a 100 ppm lead limit for used oil because we thought 80% of used oil, as generated, would meet such limit by May 29, 1986. As explained above, EPA established the limit to prevent adverse health effects; we never conditioned the limit on any set percentage of samples meeting the limit. In fact, EPA expected that even if lead levels dropped substantially, most unblended used oil would still be off-specification in May 1986 (see 50 FR 49186, Table 5, November 29, 1985). Data submitted by the petitioners (Table 2) confirms that this was a reasonably accurate prediction.

TABLE 2.—DATA SUBMITTED BY PETITIONERS

A. Petitioner	Number Samples Analyzed.	Number Samples Analyzed for Arsenic, Cadmium, or Chromium.	Number Samples Exceeding Specification Levels for either Arsenic, Cadmium, or Chromium
NORA	34	11	3
AERCI	18	2	1
B. Petitioner	Number Samples Analyzed.	Number Samples Analyzed for Total Halogens	Number Samples Exceeding 1000 ppm Halogen Level[a]
NORA	34	5	2
C. Petitioner	Number Samples Analyzed.	Number Samples Analyzed for Individual Chlorinated Solvents.	Number Samples Exceeding 100 ppm for Any Individual Chlorinated Solvent[b]
AERCI	18	18	11
D. Petitioner	Number Samples Analyzed.	Number Samples Analyzed for Lead	Number Samples Exceeding Lead Specification
NORA	34	34	34
AERCI	18	18	18

[a] Used oil containing greater than 1,000 ppm total halogens is rebuttably presumed to be hazardous waste. See 40 CFR 266.40(c), discussed at 50 FR 49176, November 29, 1985.

[b] Used oil containing greater than 100 ppm of a hazardous spent solvent has probably been mixed with that solvent. See 50 FR 49176, November 29, 1985.

Petitioners and commenters also cite the staggered effective date EPA promulgated as justification for suspension of the 100 ppm lead limit. EPA made the specification (and the ban on burning off-specification fuel in nonindustrial boilers) effective December 9, 1985, except that the 100 ppm lead limit did not become effective until May 29, 1986 (50 FR 49185–49186, November 29, 1985). The petitioners argue that EPA was "delaying" the imposition of the lead limit until 80% of used oil samples meet the 100 ppm limit. As discussed above, EPA did not condition imposition of the 100 ppm limit on any set percentage of samples meeting the limit; nor did we establish an effective date on this basis. Making the lead limit effective May 29, 1986, gave the regulated community six months to comply with the rules; this is the usual amount of time comtemplated for compliance with RCRA subtitle C regulations. See RCRA section 3010(b). The somewhat unusual action in this case was making the remainder of the specification effective within only 10 days. This action was taken to control the potentially toxic or carcinogenic effects of the other constituents as soon as practicable during the 1985–86 heating season (50 FR 49202).

Some of the petitioners (*after* submission of their original petitions) and commenters later raised the issue that EPA, in making its projections on lead levels in used oil, did not take into account the Agency's "lead credits" program, under which gasoline marketers can use "banked" lead to market leaded gas in exceedance of the national standard of 0.1 grams per gallon (see 40 CFR 80.20(e)). EPA agrees that when banked lead is taken into account, lead levels in used oil (nationwide) will fall more slowly than was predicted on November 29, 1985. As discussed above, however, imposition of the used oil rules was not conditioned on any set percentage of used oil meeting the specification. The effect of the phased reduction of lead in gasoline on lead content of used crankcase oil, therefore, is not a factor. In any case the credits expired in December 1987. The discussion at 50 FR 49185–49186 (November 29, 1985) concerned whether the lead limit should be imposed almost immediately (i.e., December 9, 1985) or 6 months later, both dates being within the normal scope of effective dates under RCRA section 3010(b). Neither in the January 11, 1985 proposal nor at any other time did EPA propose an extended phase-in of its used oil fuel specifications that would be similar to the Agency's leaded gasoline reduction program. The two situations are very different.

In the case of leaded gasoline, EPA is working toward reduction or elimination of the use of lead as a fuel additive (see § 80.20(a)(1)). Refiners must modify production processes to eventually eliminate the addition of lead or leave the gasoline production business. In contrast, EPA has not banned the marketing of off-specification used oil fuel, but limits marketing only to industrial burners. To implement this restriction, the Agency established minimal paperwork requirements (i.e., §§ 266.43(b) and 266.44). Industrial burners have historically comprised 80% of the used oil fuel market.

In summary, EPA finds no basis for suspending the used oil fuel lead limit. Petitioners' and commenters' arguments are based on misconceptions of the original basis for the specification. Most importantly, the specification is EPA's definition of contaminated fuel, and the rules in Part 266, Subpart E are designed to keep such fuel out of residential and other nonindustrial boilers. In making this determination, EPA has considered how easy or difficult it would be to meet the specifications. We expected most used oil, as-generated, would not meet the specification. By analogy with section 3010(b), we provided that the regulations would become effective six months after promulgation.

C. Burner Notification

EPA does not see a basis for rescinding the notification requirement for burners of off-specification fuel. First, the notification is a necessary part of EPA's efforts to control the burning of contaminated fuels. Second, the notification is by no means a burdensome requirement and, therefore, the Agency has concluded it does not adversely affect used oil recycling.

1. *Uses of the notification.* Congress, in amending RCRA sections 3004 and 3010 in 1984 to include the special waste-as-fuel provisions, was reacting to what they perceived as a "major deficiency in the * * * RCRA regulations * * *" (H.R. Rep. No. 98–198 at 39). RCRA section 3010(a), as amended, was self-implementing so that if EPA did not act, all burners of used oil (with certain exceptions specified in the statute) would have been required to notify by February 1986. EPA did act to require notification but, as authorized by Congress, we exempted from the statutory notification requirement (and all other requirements) burners of *specification* used oil fuel. EPA determined that since burning *specification* used oil fuel does not pose a serious hazard, no regulation is necessary (see 50 FR 49180, November 29, 1985).

EPA determined that a continuing notification requirement was needed for processors, marketers, and burners of off-specification used oil fuel. To the extent the requirement applies after February 1986, the requirement does not derive from section 3010, but rather serves, and is derived from, general information-gathering authority.

EPA does not agree with the petitioner who asserts that notification by burners of *off*-specification used oil fuel is also unnecessary. As stated on November 29, 1985 (50 FR 49195): "Notification is necessary because EPA must be able to identify those persons who engage in waste-as-fuel activities in order to ensure that waste fuels are managed properly and not routed to nonindustrial markets." It is not sufficient, as the petitioner suggests, for EPA to inspect sales records (logs, invoices, etc.) of used oil fuel marketers. We believe the burner notification requirement serves the important function of providing the Agency with an independent means of checking the assertions of marketers that they are in fact selling off-specification used oil fuel only to the industrial market. For example, as noted in our previous tentative denial of the petitions, if the Agency suspected a specific marketer off selling of-specification used oil fuel to non-industrial burners, one way to determine whether this was in fact occurring would be to compare fuel sales invoices at the marketer's facility with the Agency's own list of industrial burners who have notified as required.

The Agency does not agree with the commenter who stated that notification adds nothing to the enforcement process. The notification is used as a means for enforcement officials to identify the regulated community of marketers and legitimate off-specification used oil burners. Without this device, enforcement officials would have to monitor the regulated community in a piece-meal way (i.e., watching trucks, reviewing company history, etc.).

2. *Impacts on recycling.* When EPA issued its final used oil fuel burning regulations on November 29, 1985 (50 FR 49201–49202), we concluded that the regulations as a whole would have a minimal impact on used oil recycling. The notification requirement for burners of off-specification used oil fuel itself was estimated to be a one-time cost of $50 per burner (see 50 FR 1708, January 11, 1985). We cannot agree with the petitioners' and commenters' argument that the notification requirement is per se burdensome and therefore inhibits recycling. Although the petitioners and commenters argue that the notification requirement is causing reduced fuel sales, the Agency believes that burners' misunderstanding about the significance of the notification, and the unusually low price of virgin fuels, are the real causes of burners' reluctance to purchase used oil fuel (particularly now that the Agency has determined not to list recycled oil as a hazardous waste). For example, the petition by Midwest Oil cites, almost exclusively, burners' concerns over the listing of used oil as hazardous waste. EPA has been active in attempting to help burners understand current requirements, and is now working to publicize the November 19, 1986, decision that recycled oil is not listed as a hazardous waste, thereby reducing and eliminating the stigma that may be associated with using such fuel. We have also made it known that burners who are concerned that the RCRA notification form (EPA Form 8700–12) includes the term "hazardous waste" may notify on a form amended to remove that term, or may notify by letter, so long as all required information is provided. Finally, EPA has made available information bulletins that explain and reiterate current burner requirements. (Bulletins may be obtained by calling the RCRA Hotline at (800) 424–9346 or (202) 382–3000.) These steps, we believe, should allay burners' fears and clear up misconceptions.

EPA also notes that in written comments to the Agency and in oral testimony before the House Subcommittee on Energy, Environment, and Safety Issues Affecting Small Business (May 19, 1986), the National Asphalt Pavement Association (NAPA) indicated that its membership remained interested in burning used oil fuel, provided that only limited requirements were imposed. (Asphalt concrete plants comprise a large segment of the industrial market for off-specification used oil fuel, and NAPA member firms produce about 75% of the total hot mix asphalt produced in the U.S.) The notification requirement was not cited by NAPA as being onerous. And, in fact, NAPA states that most of its members were required to notify the EPA under the small quantity generator rules made final March 24, 1986 (51 FR 10146).

The only conceivable impact a notification requirement could have is to stigmatize partially the recycled oil as being not completely safe to burn because it is called "off-specification." Although the off-specification designation has limited legal significance—it triggers notification and record-keeping requirements; and off-specification used oil fuel may not be burned in non-industrial boilers—the name connotes potential risks from burning; and the possibility of future regulation. EPA believes this potential stigma to be unavoidable. We have found that off-specification used oil fuel can pose significant risks when burned in non-industrial boilers. There may well be future regulation of such fuel, such as restricting circumstances when it may be burned in devices without air pollution control equipment. These possibilities exist no matter what the used oil fuel is called, and whether or not burners file a one-time notification. Any such possible stigma does not pose an adequate basis for rescinding the notification requirement.

Finally, the Agency cannot help but remark on the absence of comment from any burning facility. Surely if the existing regulatory framework was a substantial factor in their decisionmaking, there would have been more interest (as there was in the Agency's 1985 proposal). The Agency infers that this absence of comment supports its view that the minimal existing record-keeping requirements are not substantial factors in burners' decisionmaking. For instance, we believe that the price differential between used oil and virgin oil products influences the demand for used oil. When the price differential is great, used oil demand goes up.

IV. Summary

In summary, based on the information presented, EPA is rejecting petitioners' and commenters' arguments that it modify the 40 CFR Part 266, Subpart E regulations for used oil fuel.

V. Supporting Documents

Documents relevant to this rulemaking are listed below. They have been placed in the RCRA Docket at EPA (Sub-basement), 401 M Street, SW., Washington, DC 20460. The docket number for this rulemaking is F-86-LSP-FFFFF. The docket is open from 9:30 a.m. to 3:30 p.m., Monday through Friday, except for Federal holidays. The public must make an appointment to review docket materials by calling Michelle Lee at (202) 475-9327. The public may copy a maximum of 50 pages of material from any one regulatory docket at no cost. Additional copies cost $0.20 per page.

Documents

1. Petition from the National Oil Recyclers Association, dated May 9, 1986.
2. Petition from Midwest Oil Refining Company, dated May 13, 1986.
3. Petition from the Association of Environmentally Regulated Connecticut Industries, dated May 22, 1986.
4. EPA *Information Bulletin* for used oil recyclers and burners, dated June 13, 1986.
5. Written comments of National Asphalt Pavement Association to EPA, dated April 9, 1986.
6. Testimony of National Asphalt Pavement Association, dated May 19, 1986.
7. Written comments of Statewide Service and Supply, Inc. to Senator Strom Thurmond, United States Senate, dated November 21, 1986, Transmitted to EPA on January 15, 1987.
8. Written comments of Midwest Oil Refining Company, dated February 24, 1987.
9. Written comments of Patchem, Inc. dated March 17, 1987.
10. Written comments of National Oil Recyclers Association, dated March 27, 1987.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6666

[OR-943-07-4220-10-GP-07-291; OR-36222]

Withdrawal of Public Land for Fields Administrative Site; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order withdraws 5 acres of public land from surface entry and mining for a period of 20 years for the Bureau of Land Management to protect the Fields Administrative Site. The land has been and remains open to mineral leasing.

EFFECTIVE DATE: March 9, 1988.

FOR FURTHER INFORMATION CONTACT: Champ Vaughan, BLM, Oregon State Office, P.O. Box 2965, Portland, Oregon 97208, 503-231-6905.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following described public land is hereby withdrawn from settlement, sale, location, or entry under the general land laws, including the United States mining laws (30 U.S.C. Ch. 2), but not from leasing under the mineral leasing laws, to protect a Bureau of Land Management administrative site:

Willamette Meridian

T. 38 S., R. 34 E.,
Sec. 23, E½E½SW¼NE¼NE¼ and W½W½SE¼NE¼NE¼.

The area described contains 5 acres in Harney County.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the lands under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

3. This withdrawal will expire 20 years from the effective date of this order unless, as a result of a review conducted before the expiration date pursuant to section 204(f) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f), the Secretary determines that the withdrawal shall be extended.

J. Steven Griles,

Assistant Secretary of the Interior.

February 26, 1988.

BILLING CODE 4310-33-M

FEDERAL MARITIME COMMISSION

46 CFR Part 572

[Docket No. 86-16]

Conference Service Contract Authority

AGENCY: Federal Maritime Commission.

ACTION: Final rule.

SUMMARY: The Federal Maritime Commission is amending its rules governing agreements with regard to conference service contract authority. The Final Rule requires conferences to state in their agreements their generally applicable rules affecting or implementing conference service contract authority. The Final Rule further requires that conferences file an amendment to their agreements whenever these rules are changed. The Final Rule also requires that conference service contract authority provisions be located in a designated article of the conference agreement.

DATE: Effective June 7, 1988.

FOR FURTHER INFORMATION CONTACT:

Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573, (202) 523-5740

Austin L. Schmitt, Director, Bureau of Trade Monitoring, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573, (202) 523-5787.

SUPPLEMENTARY INFORMATION:

I. Background

The Commission instituted this proceeding by Notice of Proposed Rulemaking ("Notice" or "Proposed Rule") published in the **Federal Register**. The Proposed Rule would amend the Commission's regulations regarding agreements with respect to conference service contract authority. As proposed, the rule would require that a conference specify in its agreement the method for regulating or prohibiting the use of service contracts and file an amendment with the Commission before implementing any significant change in the method of regulating service contracts. The Proposed Rule further provided examples of what would be considered a significant change in the method of regulating service contracts. Finally, the Proposed Rule would require that conference service contract authority be located in a reserved numbered article of the agreement.

Interested persons were invited to comment on the Proposed Rule and twelve comments were filed. Comments were submitted by: (1) The U.S. Department of Justice ("DOJ"); (2) the U.S. Department of Transportation ("DOT"); (3) the Chemical Manufacturers Association ("CMA"); (4) IBP, Inc. ("IBP"); (5) Sea-Land Service, Inc. ("Sea-Land"); (6) a group of conferences serving the U.S.-Latin America trade ("Latin American Conferences"); [1] (7) a group of conferences serving the U.S.-North Europe Trade ("North Europe Conferences" or "NEC"); [2] (8) a group of conferences serving the U.S. trades with the Far East, Australia-New Zealand, and Mediterranean ("ANERA *et al.*"); [3] (9) a group of conferences serving the U.S.-Japan trade ("Trans-Pacific Conferences"); [4] (10) the Pacific/Australia-New Zealand Conference ("PANCON"); (11) the Trans-Pacific Westbound Rate Agreement ("TWRA"); and (12) the Council of European & Japanese National Shipowners' Associations ("CENSA").

The comments represented a broad spectrum of views on the Proposed Rule ranging from those that fully supported the proposal, to those who supported the rule with reservations, to those who urged that this rulemaking proceeding be discontinued. The Commission has carefully considered these comments and has determined to issue a Final Rule. The Final Rule retains the basic requirements of the Proposed Rule but makes a number of modifications in order to incorporate certain suggested improvements and to accommodate, to the extent possible, concerns expressed in the comments. A discussion of the comments and the specific changes in the Proposed Rule follows.[5]

II. Discussion

A. Pre-Implementation Review of Conference Agreements

The Notice initiating this proceeding discussed the Commission's responsibility and authority under the Shipping Act of 1984, 46 U.S.C. app. 1701-1720 (the "Act" or the "1984 Act"), to review agreements prior to their becoming effective. A number of comments contend that the Notice overstates the Commission's pre-implementation review authority. They generally argue that the Commission's role is limited and that the discussion in the Notice exaggerates the Commission's review authority as well as the function of the 1984 Act's public notice requirement.

Aside from general assertions that the Commission's review function has been overstated, these comments are not persuasive that then Proposed Rule exceeds the Commission's statutory authority. Briefly stated, the 1984 Act requires that every agreement within the scope of the Act, including conference agreements, be filed with the Commission prior to implementation. An agreement must observe a brief waiting period before it becomes effective, during which time the Commission reviews the agreement to determine whether it meets the filing requirements of section 5, is consistent with the general standard set forth in section 6(g), and does not violate the specific prohibitions of section 10. During this pre-implementation review period, the Commission may reject an agreement that fails to meet section 5 requirements, seek to enjoin the operation of an agreement, or request additional information and thereby suspend the running of the waiting period. In addition, the 1984 Act requires that notice of the filing of an agreement be published in the **Federal Register**, thereby affording the shipping public an opportunity to comment on an agreement before it becomes effective.

The Proposed Rule would require each conference agreement to set forth the basic rules established by the members regarding the use of service contracts by the conference or by individual members, and to file changes in those rules with the Commission prior to implementation. A major purpose of the Proposed Rule is to assure that each conference agreement reflects the complete understanding among the parties regarding a conference's control over the use of service contracts so that the Commission is able to conduct a meaningful review of the agreement and the shipping public is apprised of the rules which a conference has established regarding the use of service contracts. As the Notice indicated, meaningful review by the Commission and public notice of the agreement are thwarted where conference authority over service contracts is set forth only in the most general terms or where a conference can change the rules governing the use of service contracts without first filing an amendment with the Commission.

The Proposed Rule is based upon the Commission's regulatory need to know, at least in broad outline, how the members of a conference have agreed to regulate their competitive relationships, as well as the rules for dealing with shippers, and the need to know when those basic provisions have changed.

---

[1] This group consists of: the Atlantic and Gulf/West Coast of South America Conference; the United States Colombia Conference; the United States Atlantic and Gulf/Ecuador Conference; the United States Atlantic and Gulf/Hispaniola Steamship Freight Association; the United States Atlantic and Gulf/Southeastern Caribbean Steamship Freight Association; and the United States Atlantic and Gulf/Venezuela Conference.

[2] This group consists of: the U.S. Atlantic-North Europe Conference; the North Europe-U.S. Atlantic Conference; the Gulf-European Freight Association; and the North Europe-U.S. Gulf Freight Association.

[3] This group consists of: the Asia North America Eastbound Rate Agreement ("ANERA"); the Greece/U.S. Atlantic & Gulf Conference; the Mediterranean North Pacific Coast Freight Conference; the Mediterranean/U.S.A. Freight Conference; and the U.S. Atlantic & Gulf/Australia-New Zealand Conference.

[4] This group consists of: the Trans-Pacific Freight Conference of Japan and the Japan-Atlantic and Gulf Freight Conference.

[5] In the following discussion, reference is made to the basis and purpose of the Proposed Rule. Those objectives which are discussed here and which were also set forth in the Notice apply equally to the Final Rule. Although a number of changes have been made in the language of the Final Rule, its basis and purpose remain the same as that set forth for the Proposed Rule.

Without this minimum essential information, meaningful pre-implementation review would be frustrated.

The Proposed Rule also ensures that the shipping public is adequately informed of the conference's general policies regarding the use of service contracts. The Proposed Rule thus fulfills the purpose that is inherent in the 1984 Act's requirement that notice of the filing of an agreement be published in the Federal Register. Without a sufficiently detailed statement of agreement authority, the shipping public would be disadvantaged in commenting on an agreement or providing relevant information to the Commission during the period prior to an agreement's becoming effective.

In addition, it should be noted that agreements are public documents that are intended to reflect the current conference policies with respect to the exercise of service contract authority. Thus, the shipping public should be able to determine a conference's general policies by consulting the agreement language.

Although some comments contended that the Proposed Rule is contrary to the 1984 Act's stated policy of establishing a regulatory process "with a minimum of government intervention," the Proposed Rule requires only that minimum level of specificity needed to ensure meaningful review and adequate public notice.

The Proposed Rule does not re-establish a prior approval type of review as existed under the Shipping Act, 1916 ("1916 Act"). Nor does it expand or overstate the role of non-parties under the 1984 Act. It merely ensures that the basic rules which a conference establishes for the use of service contracts be reflected in the terms of the agreement.[6]

B. Guidelines for Specificity in Conference Service Contract Authority

The Notice discussed, in the context of conference service contract authority, certain guidelines that may be applied in determining the degree of specificity that may be required in a conference agreement and in determining whether a specific activity is covered by existing agreement authority. In this discussion, a number of cases decided under the 1916 Act were mentioned. Some commenters object that the guidelines enunciated in these 1916 Act cases are not applicable in the regulatory scheme established by the 1984 Act. The Commission is not persuaded that reference to these guidelines is unsound under the 1984 Act.

The 1916 Act cases were cited in the Notice is connection with two concerns. The first concern is the degree of specificity that may be required in an agreement. In *Joint Agreement Between Member Lines of the Far East Conference and the Member Lines of the Pacific Westbound Conference*, 8 F.M.C. 553 (1965), *Aff'd in part, rev'd in part, Pacific Westbound Conference v. Federal Maritime Commission*, 440 F.2d 1303 (5th Cir.), *cert. denied*, 404 U.S. 881 (1971) ("*Joint Agreement*"), the Commission formulated the following test regarding the degree of detail required in an agreement:

> * * * the applicable test here is whether or not the agreement as filed with the Commission and as approved sets out in adequate detail the procedures and arrangements under which the concerted activity permitted by the agreement is to take place.

Joint Agreement, supra, 8 F.M.C. at 558. In *Agreement 9448—N. Atlantic Outbound/European Trade*, 10 F.M.C. 299, 307 (1967), the Commission stated that agreements which were so broadly worded that they failed to "* * * set forth clearly, and in sufficient detail to apprise the public just what activities will be undertaken * * *" would be subject to disapproval under section 15 of the 1916 Act.

The fact that this principle was enunciated in cases decided under the 1916 Act does not detract from its relevance to the question of the degree of specificity that may be required in an agreement filed pursuant to the 1984 Act. Adequate detail regarding concerted activity is as relevant to antitrust immunity under the 1984 Act as to antitrust immunity under the 1916 Act. Nor does the reliance upon these cases in any way resuscitate the *Svenska* Standard,[7] as some commenters fear. Clearly, the Commission no longer "approves" agreements under a "public interest" standard. It does, however, conduct a substantive review of an agreement to determine its conformity with the requirements of sections 5, 6 and 10 of the 1984 Act. The requirement that an agreement be filed and reviewed is more than a formality, as some comments seem to imply. That review function only has meaning if an agreement is clear and definite and reasonably specific.

Furthermore, agreements filed under the 1984 Act are not filed on a confidential basis. They are public documents and should provide sufficient detail to apprise the public of the scope and kind of activities that will be conducted under the agreement. With regard to service contract authority, this means more than a general statement that does not inform the shipping public of such basic matters as whether or not individual service contracts are permitted. Service contracts are one of the major elements of the legislative bargain that resulted in the 1984 Act. It is in keeping with the Act's scheme to assure that the shipping public has adequate knowledge of conference policies on the use of service contracts.

A second concern is when an agreed to change in operations may be made pursuant to existing authority and when an agreement is necessary. The Notice cited two cases which enunciated general principles for determining whether a further agreement is interstitial to existing authority: *Agreements 7770—Establishment of a Rate Structure*, 10 F.M.C. 61, 65 (1966), *aff'd sub nom, Persian Gulf Outward Freight Conference v. Federal Maritime Commission*, 375 F.2d 335 (D.C. Cir. 1967) ("*Agreement 7770*" or "*Persian Gulf*"); and *Tariff FMC 8, Rule 22 of the Continental North Atlantic Westbound Freight Conference*, 21 F.M.C. 594, 597 (1978), *Vacated and remanded, Interpool Ltd. v. Federal Maritime Commission*, 663 F. 2d 142 (D.C. Cir. 1980).

In *Agreement 7770*, the Commission stated that further agreements are not interstitial when they: (1) Introduce an entirely new scheme of rate combination and discrimination not embodied in the basic agreement; (2) represent a new course of conduct; (3) provide new means of regulating and controlling competition; (4) are not limited to the pure regulation of intraconference competition; or (5) constitute an activity the nature and manner of effectuation of which cannot be ascertained by a mere reading of the basic agreement.

Agreement 7770, supra, 10 F.M.C. at 65.

The changes wrought by the 1984 Act do not appear to make these principles obsolete or remove their statutory underpinnings. Rather they would appear to be relevant to the Commission's review of an agreement to determine conformity to sections 5, 6 and 10 of the Act. If these 1916 cases did not exist, we would be obliged to establish the principles embodied in them anew.

The Commission understands the concern which some conference commenters have expressed with regard to the question of antitrust immunity. The Commission recognizes that the 1984 Act was intended to remove uncertainty about antitrust immunity. The Commission's rule is not intended to intrude upon that policy. Nor would it appear to do so since section 7(a)(2) grants antitrust immunity for * * *

> any activity or agreement within the scope of this Act * * * undertaken or entered into with a reasonable basis to conclude that (A) it is pursuant to an agreement on file with the Commission and in effect when the activity took place * * *.

46 U.S.C. app. 1706(a)(2). This would appear to be a sufficiently broad grant of antitrust immunity which is not jeopardized by the rule at issue here. Those who act on service contracts in a way arguably not covered by a conference provision would still be governed by the "reasonable basis to conclude" language of the Act. Finally, the Final Rule should provide adequate guidance as to when an agreement amendment should be filed.

C. Conference Authority To Control the Use of Service Contracts

The Proposed Rule would require that service contrast authority be stated in the conference agreement with a reasonable degree of specificity and that changes in that Commission prior to implementation. Some comments object theat the Proposed Rule is contrary to the 1984 Act because it unduly interferes with the authority of a conference to control the use of service contracts. According to one commenter, Congress did not intend any rule that limits a conference's ability to regulate service contracts or requires a conference to explain why or how it intends to do so. Another commenter argues that conferences have absolute authority over service contracts and are to be given wide latitude in the regulation of these contracts. Finally, some commenters object that the Proposed Rule interferes with a conference's commercial flexibility and disadvantages a conference competing with independent carriers. These comments suggest that a conference should have the same degree of flexibility and discretion with regard to service contracts as an individual independent carrier.

The basic authority of an individual ocan common carrier or conference of carriers to enter into service contracts is provided for by section 8(c), which states:

> An ocean common carrier of conference may enter into a service contract with a shipper or shippers' association subject to the requirements of this Act.

Section 4(a)(7) authorizes a conference to "* * * regulate or prohibit their use of service contracts."

The Proposed Rule would not "interfere with" conference authority to control the use of service contracts. Conferences would be free to establish conditions for their use or to prohibit their use entirely. The Proposed Rule would not limit this authority. It merely states that once a conference has exercised its authority to establish conference rules regarding service contracts, that it file an amendment to its agreement with the Commission. The Proposed Rule does not require conferences to explain why they have chosen a particular course of action or to justify that choice.[8] Nor does the Proposed Rule interfere with the terms of a service contract negotiated with a shipper.[9] Rather, it would require that the general rules for use of service contracts, to the extent that they have been collectively determined, be reflected in the agreement.

The Proposed Rule was not intended to deal with the terms that may be negotiated with an individual shipper. Moreover, those matters that would be subject to filing with the Commission can be processed and become effective in as few as 14 days after notice in the Federal Register. Conferences will thus have considerable flexibility even in those matters that would require an amendment filing.

Nevertheless, some comments suggest that a conference should have the same degree of flexibility and discretion with a regard to service contracts as an individual independent carrier. Conference action, however, is different from action by a single independent carrier. When it acts on service contracts, a conference acts collectively under the protection of antitrust immunity. The *quid pro quo* for this immunity is that a conference's rules for governing its members' commercial relationships, at least in broad outline, must be included in its organic agreement. A conference does not have absolute authority to alter the terms of that relationship without filing an appropriate amendment with the Commission. Accordingly, the Commission is not persuaded that the basic requirements of the Proposed Rule unduly interfere with a conference's authority to control the use of service contracts.

D. Section-by-section Discussion of the Proposed Rule

The comments advance a number of concerns, objections and suggestions regarding particular aspects of the Proposed Rule. Most of these comments address three terms used in the Proposed Rule: "method," "significant change," and "terms and conditions." Some comments pointed out alleged ambiguities in the Proposed Rule. Others offered drafting suggestions to improve a Final Rule.

1. *Section 572.502(a)(5)(i)—Specification of the Method for Regulating Service Contracts.* Subparagraph (i) of the Proposed Rule would require that a conference agreement that contains service contract authority specify the method for regulating the use of service contracts. The Proposed Rule states:

> (i) Each conference agreement that contains service contract authority shall specify the method for regulating or prohibiting the use of service contracts by the conference or by individual members.

CMA suggests that the word "contains" be deleted and replaced by the words "regulates or prohibits" in order to clarify that a conference member may enter into a service contract on its own, unless explicitly prohibited or limited by the conference.

This suggested clarification has merit. A member of a conference does retain the authority under section 8(c) to enter into service contracts unless the conference takes some collective action to control that authority. This principle is implicit in the language of the Proposed Rule which states that a conference agreement that "contains" service contract authority must state the

---

[6] A clear statement of conference service contract authority, which the Proposed Rule would require, is also necessary in order to fulfill the Commission's monitoring and enforcement responsibilities over agreements that are in effect. In order to assure that conference operations are conducted in accordance with the terms of the agreement, the Commission must have some idea of what the terms of the agreement are.

[7] The *Svenska* Doctrine is the proposition affirmed in *Federal Maritime Commission v. Aktiebolaget Svenska Amerika Linien*, 390 U.S. 238 (1968), whereby agreements filed pursuant to section 15 of the 1916 Act which interfere with the policies of the antitrust laws will be disapproved as "contrary to the public interest" unless justified by evidence establishing that the agreement, if approved, will meet a serious transportation need, secure an important public benefit or further a valid regulatory purpose of the Shipping Act, 1916. The burden is on the proponents of such agreements to come forward with the necessary evidence. The 1984 Act legislatively overruled *Svenska* with respect to agreements among carriers in the foreign commerce of the United States. The *Svenska* doctrine is now limited to agreements in the domestic commerce of the United States which are subject to section 15 of the 1916 Act.

[8] Although the Proposed Rule does not require this, this is not to say that the Commission could not, under certain circumstances, require a conference to expalin its policy for controlling the use of service contracts and to justify that policy.

[9] On this point, there is some uncertainty regarding the meaning of the reference to "terms and conditions" in the Proposed Rule. This reference was not intended to mean that the terms which would be bargained for in a service contract with a shipper must be included in the agreement. This is addressed below in the specific discussion of that aspect of the Proposed Rule.

BEST COPY AVAILABLE

method by which it controls the use of service contracts. The change suggested by CMA removes any uncertainty and is adopted in the Final Rule.

The other suggested change to subparagraph (i) concerns the term "method." Sea-Land states that the term "method" "* * * could be read so broadly as to embrace literally everything the conference does with respect to service contracts, whether generically, as to a particular class of cargo, or as to a particular shipper's cargo." (Sea-Land Comment at p. 2). In place of the reference to "method," Sea-Land offers a revised rule which would require a conference to state whether it permits or prohibits: (1) Conference service contracts; (2) individual member service contracts; and (3) independent action on service contracts.

NEC points out that the term "method" is never defined in the Proposed Rule. NEC states that, undefined, the term is so general as to embrace everything from routine operational matters to "an entirely new scheme of combination and discrimination not embodied in an effective Agreement." (NEC Comment at p. 4).

IBP, on the other hand, fears that the Proposed Rule, by focusing on "method," creates an ambiguity as to when an agreement modification must be filed. This is because IBP believes that the Proposed Rule may be read as requiring a conference to inform the Commission of the procedure by which it makes decisions regarding the use of service contracts, *i.e.*, the "method," but not the "results" of such deliberations, *i.e.*, conference guidelines governing service contracts. IBP also suggests a revised rule that in some respects is similar to that suggested by Sea-Land and NEC.

The term "method" was not intended to embrace everything a conference does with regard to service contracts. Nor was it intended to include routine operational matters or the procedures by which a conference reached a decision on service contract matters.[16] The term "method" was intended to apply to the general scheme established by the conference for regulating the use of service contracts. Where the members of the conference agree upon certain rules which will govern the use of service contracts, those rules must be filed with the Commission. Inasmuch as the word "rules" is more precise than the vaguer term "method" which may be interpreted to apply to strictly operational details, it shall be substituted for the term "method" in the Final Rule.

As proposed, subparagraph (i) sets forth a requirement that conference rules governing service contracts be stated in the agreement. A number of comments suggest that this general requirement be replaced by a list of specific agreement provisions which must be stated in agreement if adopted by a conference. NEC, for example, offers the following alternative to the Proposed Rule:

> Conference agreements shall state whether the parties thereto have agreed to (i) permit all or any of them, collectively or individually, to enter into service contracts; (ii) prohibit all or any of them, collectively or individually, from entering into service contracts; and (iii) permit or prohibit independent action on service contracts by all or any of them and if and to the extent such independent action is so permitted, any notice or other procedural requirements upon which its exercise may be contained.

The virtue in drafting a rule as proposed by NEC is that its application is definite and requires little, if any, interpretation. It sets forth a specific list of possible conference rules, affecting the use of service contracts, that would be subject to filing. Such an approach, however, has two drawbacks. First, it would not cover a provision that might restrict or control service contract use in a significant way but not be specifically mentioned in the rule. Second, such a proposal would not address provisions which would allow a conference to change its rules for regulating service contracts by a vote of the parties and without filing an amendment with the Commission. Under the NEC proposal, for example, conference authority which determined whether to permit or prohibit individual service contracts by a conference vote would be acceptable. All the NEC proposal would mandate is that the procedural requirements be stated in the agreement. Thus, a conference could take virtually any action it wished without the filing of an amendment with the Commission. The 1984 Act does not authorize, nor can the Commission sanction, such unfettered discretion.

However, the rule, as proposed, is not intended to interfere with the flexibility of a conference to negotiate with shippers. A conference would be free, for example, to agree upon its negotiating position with a shipper. It would not be required to make its negotiating position a part of its agreement. However, where the conference decided to agree upon rules of general applicability to all shippers, then such a rule would be required to be filed as part of the conference agreement.

Therefore, subparagraph (i) shall be preserved basically as proposed with some language changes to make it more precise. The revised text of subparagraph (i) of the Final Rule shall read as follows:

> (i) Each conference agreement that regulates or prohibits the use of service contracts shall specify its rules governing the use of service contracts by the conference or by individual members.

As revised, subparagraph (i) states the requirement that collectively established rules governing the use of service contracts must be included in a conference agreement.

2. *Section 572.502(a)(5)(ii)—Filing of Significant Changes in the Method of Regulating Service Contracts.* Subparagraph (ii) of the Proposed Rule would require the filing of any significant change in the method of regulating service contracts. The text states:

> (ii) Any significant change in the method of regulating service contracts, whether accomplished by a vote of the membership or otherwise, shall not be implemented prior to the filing and effectiveness of an agreement modification reflecting that change.

The comments on this subparagraph focus on the meaning of the term "significant change." Sea-Land states that the term "significant change" defies precise definition. NEC also states that the meaning of "significant change" is ambiguous and uncertain. Moreover, NEC points out that the law requires the filing of every modification to an agreement whether or not it is significant whereas the Proposed Rule seems to require a filing only of significant changes.

The point raised by NEC, which has advanced some critical but constructive comments in this proceeding, is well taken. Conferences are required to file all changes in their agreements whether or not they are "significant." The qualifier "significant" therefore shall be deleted from the Final Rule. It should improve the clarity and predictability of the rule to simply refer to "any change" in place of any "significant change." In addition, the use of the term "method" shall be replaced by a reference to "conference provisions regulating or prohibiting the use of service contracts" for the reasons discussed above. Subparagraph (ii) as revised reads as follows:

> (ii) Any change in conference provisions regulating or prohibiting the use of service contracts, whether accomplished by a vote of the membership or otherwise, shall not be implemented prior to the filing and effectiveness of an agreement modification reflecting that change

---

[16] Voting procedures would, however, be required to be stated in the conference agreement.

Revised in this manner, subparagraph (ii) should remove the ambiguity surrounding the term "significant", and at the same time retain the key feature of the rule, namely the filing requirement.

3. *Section 572.502(a)(5)(iii)—Illustrative Definition of Significant Change.* Subparagraph (iii) of the Proposed Rule provides a definition of "significant change." The text states:

> (iii) For the purpose of this section, a significant change includes one which: permits or prohibits conference service contracts; permits or prohibits individual service contracts, establishes terms or conditions under which conference or individual service contracts may be offered; or permits or prohibits independent action on service contracts.

The purpose of this subparagraph was to furnish to illustrative definition of the meaning of the term "significant change" used in subparagraph (ii) and thereby provide some guidance as to when an agreement modification must be filed. However, inasmuch as subparagraph (ii) is revised in the Final Rule to delete the reference to "significant" change and instead require that "any" change in conference service contract rules be filed, the reference to "significant change" shall also be deleted from subparagraph (iii).

One objection to subparagraph (iii), as proposed, was that the use of the term "includes" would create serious uncertainty because there is no way of knowing what other changes not listed might be regarded as significant. According to TWRA, the practical effect of this and other "catch-all" provisions of the Proposed Rule would be that virtually any change in conference regulation of service contracts would be required to be submitted to the Commission before implementation. "Otherwise the conference will risk being found, after the fact, in violation of its agreement." (TWRA Comment at 11). The catch-all provisions, in TWRA's view, "* * * revive the regulatory uncertainty and retroactive liability which the 1984 Act sought to abolish." (TWRA Comment at 11). TWRA objects to a rule which implies that "* * * every conference policy or practice with regard to service contracts must be spelled out in the agreement." (TWRA Comment at 11). TWRA goes on to state that: "If a proposed rule did no more than require a conference agreement to state the general authority of the conference with respect to service contacts, it would not be objectionable." (TWRA Comment at 11).

While TWRA does not indicate what it believes should be included in a statement of "general authority", it would appear that some of TWRA's concerns might be met by the language changes suggested above. Deletion of references to "significant change" and "method" improves the precision of the rule. The one additional language modification that would remove any ambiguity from the rule would be the deletion of the word "includes" from subparagraph (iii). This change would result in subparagraph (iii) consisting of a list of those service contract provisions which must be filed in an agreement. The deletion of the word "includes", however, would sacrifice the comprehensiveness of the rule. The rule would then merely list the kinds of service contract provisions that must be filed. If this approach were to be taken, the list could, of course, always be expanded in the future if the Commission found other types of provisions that should be added. There are, however, disadvantages to this approach. First, it would require additional time and resource-consuming rulemakings to add new provisions to the list. More importantly, the Commission might never become aware of significant restrictive service contract provisions that might be imposed. Especially once a rule is made final, the presumption would be that only those listed provisions need be filed. Other provisions might never come to the Commission's attention.

The other aspect of this subparagraph, which attracted considerable comment, is the reference to "terms or conditions." DOT suggests that the Commission either describe the pertinent "terms or conditions" that are viewed as agreement modifications or otherwise address the ambiguity created by the phase. Sea-Land objects that this phrase is too vague to permit members to know their legal obligations and could be read so expansively as to intrude on case-by-case contractual negotiations. NEC believes that it is an unnecessary and vague catch-all standard. The Trans-Pacific Conferences object that it could require inclusion of commercial contract terms in agreements. ANERA states that this requirement interferes with commercial flexibility. The Latin American Conferences argue that terms and conditions are negotiated by a conference and shipper on an *ad hoc* basis and cannot be reduced to a rule of general applicability.

The reference to "terms or conditions" in the Proposed Rule was not intended to include the terms or conditions that would be the subject of service contract negotiations with a shipper. Thus, the Proposed Rule was not intended to interfere with the commercial process of negotiating service contracts or to impede the flexibility of a conference or its members in such negotiations. As with the other items listed in subparagraph (iii), what is intended is that conference *rules* with regard to the use of service contracts by its members be included in the agreement.

Section 8(c) of the 1984 Act confers authority to enter into service contracts upon all ocean common carriers whether or not they are a member of a conference. A carrier retains that authority when it becomes a member of a conference, subject only to those restrictions and limitations which the members collectively agree upon pursuant to section 4(a)(7) of the Act. When the members reach agreement on whether to permit or prohibit conference service contracts, or whether to permit or prohibit individual members from entering into service contracts, or whether to permit or prohibit independent action on service contracts, they establish fundamental rules for dealing with the shipping public. Those rules should be reflected in the agreement.

The conference may also impose specific requirements on the members as a whole or on individual members. For example, the conference may determine to permit individual members to enter into service contracts subject to the condition that such contracts be for a minimum term of 12 months. In such a case, the members would as a group have imposed a significant restriction on an individual member's ability to exercise that member's service contract authority.

It is admittedly difficult to define "terms and conditions" in such a way that conference-agreed-to restrictions would be required to be stated in an agreement but conference flexibility to negotiate service contract terms would not be hampered. For example, a conference could adopt a rule that no conference service contract shall be entered into for a term of less than 12 months. The rule might apply to all commodities and all shippers. On the other hand, the conference could vote to adopt as the conference's negotiating position with a particular shipper that a service contract should be for at least 12 months duration. In the first instance, the rule should be stated in the conference agreement; in the second, it need not.

The difference between the two rules is that the first is a rule that is more or less permanent and has general applicability to all shippers or perhaps to a class of shippers. The second is simply a negotiating position for dealing with a particular shipper. Presumably, it would be subject to change in the negotiating process. What this proceeding is intended to address are those rules of general applicability which are of a more permanent nature and which would not be subject to change during contract negotiations. Conference negotiating positions, on the other hand, should not be affected by the Final Rule and conference flexibility should not be unduly hampered.

A second area of concern is where terms or conditions are imposed upon individual conference members. For example, a conference might adopt a rule that no individual service contract may be for less than a 12-month term. Or it might deny all service contract authority to individual members except upon the vote of the members and subject to such conditions as they may impose. A member should know in advance whether individual service contracts are permitted and what restrictions if any are attached. The Final Rule requires the statement in an agreement of any limitations placed upon individual members. All members will thus know in advance what rules govern individual service contracts, and all will be treated equally. Finally, subparagraph (iii) shall also be modified to add that opt-out rules should be stated in the agreement. This is discussed below in connection with the PANCON comment.

Finally, some comments suggest that subparagraph (iii) could be deleted entirely without substantive loss. Conferences would then simply be required to state in their agreements any rules collectively agreed upon regarding the use of service contracts and file modifications with the Commission whenever those rules were changed. However, subparagraph (iii) does appear to serve a useful function by providing guidance as to certain conference rules that must be stated in an agreement. Therefore, it shall be retained in the Final Rule with the above modifications. Based on all the foregoing, paragraph (iii) of the Proposed Rule shall be amended to read as follows:

> (iii) For the purpose of this section, conference provisions regulating or prohibiting the use of service contracts include, but are not limited to, those which permit or prohibit conference service contracts; permit or prohibit individual service contracts; permit or prohibit independent action on service contracts; permit or prohibit individual members to elect not to participate in conference service contracts; impose restrictions or conditions under which individual service contracts may be offered.

4. *Mandtory Placement of Service Contract Authority In A Designated Article 14.* The Proposed Rule adds a new paragraph (a)(5) to § 572.502 "Organization of conference and interconference agreements." The new paragraph (a)(5) would require conferences to reserve Article 14 of their agreements as the repository for the conference's statement of its service contract authority.[11]

Only one comment addressed the Article 14 requirement of the Proposed Rule. NEC opposes mandatory placement of service contract authority in Article 14 on the grounds that such placement is costly, cumbersome, and creates legal uncertainties. NEC argues that service contract provisions should be set forth in Article 5 (the basic authorities article) of conference agreements, if necessary in a separately numbered paragraph. NEC also argues that the rule should provide "that (i) except as may be otherwise provided in such article 5 service contract provisions, all of the other provisions of the Agreement shall be applicable thereto, *e.g.*, voting, delegation of authority, meetings, shippers' requests, etc.) and (ii) the parties may rely on the contents of the entire agreement as authority for their service contract activities." (NEC Comment at p. 43).

The Commission's authority to prescribe "the form and manner in which an agreement shall be filed" is clearly set forth in section 5(a) of the Act. The Commission has exercised that authority in its agreement regulations by requiring that certain numbered articles of conference agreements be reserved for specific subject matter. *See* 46 CFR 572.501–502. These existing format regulations, which provide for a clear and logical arrangement of agreement authority, have been of great assistance to the Commission in meeting the statutory deadlines for processing agreements established under the streamlined review procedures of the 1984 Act.

The placement of service contract authority in a reserved Article 14 appears to be of sufficient benefit to the Commission in its review, audit, and monitoring functions as to justify the slight burden that may be placed on conferences by requiring them to locate their service contract authority in Article 14.[12] Such placement, for example, would ease the Commission's administrative burden were it to audit service contract authority in all conferences.[13]

Finally, the question of whether members can rely on their entire agreement as authority for their activities has arisen before. It led to the modification of the agreements rules when they were issued as Final Rules. Section 572.501(b)(5), 46 CFR 572.501(b)(5), states that:

> Article 5 is not necessarily definitive of the authority that the parties may collectively exercise pursuant to the agreement and parties may rely on the contents of the entire agreements as authority for their activities.

Thus, the second concern of NEC appears to have been addressed. In addition, NEC is correct in assuming that the agreement provisions such as voting, delegations of authority, meetings, etc. are applicable to service contract matters.

5. *Effective Date of Final Rule.* The Proposed Rule did not specify a time period in which any Final Rule would become effective. NEC states that because of reformatting requirements, drafting complexities, and the conference approval process, no less than 90 days should be afforded to parties to file any agreement modifications that might be required by the Final Rule.

The Commission accepts NEC's position and will allow a period of 90 days before the Final Rule becomes effective. This liberal timetable for compliance should substantially alleviate my administrative burdens or costs that might be incurred. This period of time should afford ample time for review of agreements by the parties, for drafting any necessary changes, and for obtaining member approval of agreement modifications. In addition, in many cases, conferences may be able to reduce any costs associated with filing by submitting service contract modifications in connection with other agreement filings or even in connection with the periodic required republication of agreements.

---

[11] At present, Subpart E of Part 572 reserves the first 13 articles of a conference agreement for specific subject matter.

[12] The Final Rule, however, does not preclude statements of, or references to, service contract authority in Article 5 or other articles of a conference agreement. Conferences would not be required to delete such references as may appear elsewhere in their agreements provided, of course, that the particular language otherwise conforms to statutory and regulatory requirements.

[13] Such an audit was conducted of conference agreement independent action authority to determine compliance with Docket No. 85-7, *Independent Action—Notice and Meeting Provisions in Conference Agreements*, 23 S.R.R. 1022 (1986).

E. Additional Issues

A number of comments raised other additional issues related to the Proposed Rule.

1. Information Form Requirement and Service Contract Authority

NEC contends that service contract provisions are not subject to section 6(g) as a matter of law and that the filing of such provisions and modifications thereto should never be subject to the requirement to file an Information Form. In the Notice the Commission, at least implicitly, rejected the notice that service contract authority is not subject to review under the general standard. The Proposed Rule did not, however, require the Information Form in connection with service contract authority filings and the Commission has not done so in the past. Generally, there does not seem to be any need for the Information Form in connection with service contract filings. Should a particular filing raise possible section 6(g) concerns, then relevant information could be obtained through a formal or informal request. Therefore, the Final Rule does not require that an Information Form be filed with the initial service contract filing or with subsequent modifications of service contract authority.

2. Notice and Waiting Period Requirements.

NEC also urges that service contract filings be exempted from the notice and waiting period requirements of the 1984 Act. In NEC's view, the purpose of the Proposed Rule should be simply to insure that appropriate provisions are filed. NEC says that third parties have little or no interest in such filings and have no standing to sue to block them. NEC says that the Commission could still act against improper filings after they become effective.

This proposed exemption from notice and waiting period requirements, whatever might be its merits, cannot be accommodated within the scope of this rulemaking.[14] The Proposed Rule did seek to accomplish the purpose cited by NEC, namely to ensure that appropriate provisions are filed. The Final Rule, however, cannot and does not alter the statutory notice and waiting period requirements with respect to service contract filings. Such an exemption is clearly beyond the scope of this rulemaking and would require a separate exemption proceeding pursuant to section 16 of the 1984 Act.

3. PANCON Comment

PANCON's comment focuses upon the particular service contract provisions in its agreement and offers a defense of those provisions. PANCON, however, does not consider its comment a "special-exemption application." Rather it believes that its agreement provisions raise issues which are of industry-wide concern.

The PANCON agreement contains a provision which allows one or more members to elect not to participate in a service contract entered into in the conference's name. It provides that such non-participation be expressly noted in the contract. PANCON is concerned that such a case-by-case "opt-out" provision would be prohibited by the Proposed Rule. PANCON apparently believes that the Proposed Rule might be read as precluding all such contemporaneous decisions not to participate in a conference-wide service contract, unless the agreement itself is first amended.

PANCON's concern is misplaced. The Proposed Rule does not prohibit "opt-out" provisions of the type contained in the PANCON agreement. Such provisions clearly state the right of an individual member line to elect not to participate in the contract. Such a right is conferred by existing effective language of the agreement and is not dependent upon the contemporaneous action of the conference. The case would be different if the provision were to state that a member's decision not to participate is subject to express permission granted by the conference. As stated, however, the PANCON provision establishes the member's right to "opt-out."

The PANCON agreement also contains a provision which prohibits a member from entering independently into a service contract, or from taking independent action on a service contract, unless the members expressly permit it by a contemporaneous vote. PANCON characterizes this provision as being merely the "flip-side" of the opt-out provision discussed above and believes that it should not be prohibited.

This provision, however, is quite different from the "opt-out" provision. Unlike the "opt-out" provision which establishes a member's right to elect not to participate, this provision conditions a member's right to offer service contracts on a vote of the membership. Individual service contracts would thus be decided on a case-by-case basis and a member would always require approval from the conference prior to entering into a contract with a shipper. This is precisely the kind of provision that is reached by the Final Rule.

The third PANCON provision provides as follows:

> The members may vote to "open" rates on a particular commodity or commodities, with or without authority thereby granted to individual members to enter separately into service contracts respecting such commodities, and/or setting the maximum, term, or successive terms, of any such individual-party service contract, during the period in which the rate is open.

This provision also controls a member's right to enter into service contracts on open rated items by a vote of the membership and would also appear to be prohibited under the Final Rule.

III. Conclusion

Upon review of the comments received, the Commission has determined that issuance of a Final Rule, modified somewhat from that as proposed, will enable the Commission to fulfill its agreement review responsibilities and is well within the Commission's authority under the 1984 Act. In addition, the Final Rule will assure that conference agreements are complete and that the shipping public is adequately informed of conference policies on service contracts. Moreover, the legal precedent established under the 1916 Act, which addresses issues of agreement authority that were not affected by the enactment of the 1984 Act, offers useful guidelines on these questions. Finally, the Final Rule does not appear to interfere in any way with the authority of a conference to control the use of service contracts and does not unduly restrict conference service contract activity.

The Federal Maritime Commission has determined that this rule is not a "major rule" as defined in Executive Order 12291, 46 FR 12193, February 27, 1981, because it will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effect on competition, employment, investment, productivity, innovations, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Chairman of the Commission certifies pursuant to section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*) that this Rule will not have a significant economic impact on a substantial number of small entities.

---

[14] To the extent the rationale of the Proposed Rule is based upon the public notice and pre-implementation review provisions of the 1984 Act, an exemption from notice and waiting period requirements might not be consistent with that rationale.

including small businesses, small organizational units, and small governmental jurisdictions.

The collection of information requirements contained in this Final Rule have been approved by the Office of Management and Budget under provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511) and have been assigned OMB Control Number 3072-0044.

List of Subjects in 46 CFR Part 572

Administrative practice and procedure, Antitrust, Contracts, Maritime carriers, Reporting and recordkeeping requirements.

Therefore, pursuant to 5 U.S.C. 553 and sections 5, 6 and 17 of the Shipping Act of 1984, 46 U.S.C. app. 1704, 1709, 1716, Part 572 of Title 46, Code of Federal Regulations, is amended as follows:

PART 572—[AMENDED]

1. The authority citation for Part 572 continues to read as follows:

Authority: 5 U.S.C. 553; 46 U.S.C. app. 1701–1707, 1709, 1710, 1712, 1714–1717.

2. Paragraph (a) of § 572.502 is amended to add a new paragraph (a)(5) to read:

§ 572.502 Organization of conference and interconference agreements.

(a) * * *

(5) *Article 14—Service Contracts.* (i) Each conference agreement that regulates or prohibits the use of service contracts shall specify its rules governing the use of service contracts by the conference or by individual members.

(ii) Any change in conference provisions regulating or prohibiting the use of service contracts, whether accomplished by a vote of the membership or otherwise, shall not be implemented prior to the filing and effectiveness of an agreement modification reflecting that change.

(iii) For the purpose of this section, conference provisions regulating or prohibiting the use of service contracts include, but are not limited to, those which permit or prohibit conference service contracts; permit or prohibit individual service contracts; permit or prohibit independent action on service contracts; permit or prohibit individual members to elect not to participate in conference service contracts; impose restrictions or conditions under which individual service contracts may be offered.

BILLING CODE 6730-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 301

[Docket No. 71276-8031]

Pacific Halibut Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of approval of Pacific halibut catch sharing plan.

SUMMARY: NOAA announces approval by the Secretary of Commerce of a Catch Sharing Plan (plan) developed and adopted by the Pacific Fishery Management Council (PFMC) to allocate the catch of Pacific halibut in International Pacific Halibut Commission (IPHC) statistical catch Area 2A. This allocation plan is for 1988 only, as it pertains to catch by treaty Indian fishermen, and 1988 and 1989 only, as it pertains to non-Indian commercial and recreational fishermen. The plan will be forwarded to the IPHC for implementation by regulations.

The plan establishes a distribution of harvest of the poundage of halibut determined by the IPHC to be available for harvest in Area 2A between treaty Indian and non-Indian commercial and recreational fishermen. The intended effect of this action is to ensure the conservation and management of Pacific halibut stocks by limiting the total harvest to the level determined by the IPHC to be biologically acceptable while equitably distributing the allowable harvest among affected user groups.

DATE: The plan was approved on March 1, 1988.

ADDRESSES: Copies of the plan combined with the environmental assessment and the regulatory impact review are available from Lawrence D. Six, Executive Director, Pacific Fishery Management Council, Metro Center Suite 420, 2000 SW. First Ave., Portland, OR, 97201, or Rolland A. Schmitten Regional Director, National Marine Fisheries Service, Northwest Region, 7600 Sand Point Way NE., BIN C15700, Bldg. 1, Seattle, WA, 98115.

FOR FURTHER INFORMATION CONTACT: Lawrence D. Six at 503-221-6352 or William L. Robinson, 206-526-6140.

SUPPLEMENTARY INFORMATION: The Northern Pacific Halibut Act (the Act), Pub. L. 97-176; 16 U.S.C. 773c(c), authorizes the Regional Fishery Management Council having authority for the geographic area concerned to develop regulations governing the Pacific halibut catch in U.S. Convention waters which are in addition to but not in conflict with regulations of the IPHC. The geographic area involved is all U.S. marine waters lying south of the United States-Canada border including Puget Sound, known as statistical Area 2A.

The Under Secretary of Commerce, in compliance with the Act, directed the Pacific and North Pacific Fishery Management Councils to allocate halibut catches should such allocations be necessary. In compliance with this directive, the PFMC initiated development of a plan for Area 2A. The process for developing the allocation plan involved State, Federal, and treaty Indian fishery managers and technicians, user group representatives, and the general public.

The PFMC adopted a proposed catch sharing plan for public review at its November 18–19, 1987, meeting in Portland, Oregon. The proposed plan was subsequently submitted to the Secretary of Commerce (Secretary) for review and approval. The Secretary published the proposed plan in the Federal Register (53 FR 156, January 5, 1988), with a request for public comments. On January 14, 1988, the PFMC, following review of public comments and a public hearing, adopted a final catch sharing plan which is identical to the proposal plan except that the treaty Indian commercial fishing season will begin on March 1, 1988, instead of April 1, 1988.

Establishment of the total allowable catch (TAC) is the responsibility of the IPHC. This plan allocates TAC in area 2A among treaty Indian and non-Indian commercial and recreational fisheries as follows:

1. Treaty Indian commercial fishing will commence March 1, 1988, and terminate October 31, 1988, using hook-and-line gear only, with a 32-inch minimum size limit. Ceremonial and subsistence fishing may commence on February 1, 1988, or as soon afterward as regulations can be promulgated, and will terminate December 31, 1988, with no minimum size limit. A daily ceremonial and subsistence catch limit of two fish per fisherman will apply only from February 1 through March 31, 1988, and November 1 through December 31, 1988. Under the PFMC plan, a reserve will be established which is equal to the difference between the midpoint and the upper limit of the TAC range. This reserve may be taken by the treaty Indian fisheries, if necessary, to permit them to continue fishing throughout their reason.

2. Non-Indian fisheries will be allowed to harvest poundage equal to the midpoint of the IPHC TAC range minus the estimated treaty Indian catch. This amount will be divided 55 percent for the commercial catch and 45 percent for the recreational fishery. If the TAC midpoint minus the estimated treaty Indian catch equals more than 600,000 lbs., the amount in excess will be divided 60 percent for the commercial harvest and 40 percent for the recreational. The commercial quota will apply to all of Area 2A with no subarea quotas; however, the Oregon share of the recreational catch quota shall not be less than 60,000 lbs.

The PFMC forwarded the plan to the Secretary for review and approval and to the IPHC for implementation. The Secretary received 55 comments during the comment period, of which 50 were by form letters. Public comments received during the comment period are summarized and responded to below:

Comment 1: Many commercial longliners were not aware of the public meetings and negotiations and consequently weren't able to meaningfully participate or influence the outcome.

Response: The PFMC's process for developing the catch sharing plan spanned 6 months with numerous opportunities for public participation and comment. The process followed was initially proposed at the July, 1987, meeting of the PFMC. Subsequently, the treaty-Indian/non-Indian portion of the plan was developed at eight separate meetings of representatives of the treaty Indian tribes and State and Federal resource management agencies. The Oregon Department of Fish and Wildlife (ODFW) and Washington Department of Fisheries (WDF) led discussions between non-Indian commercial and recreational users which included at least four meetings as well as three public workshops held in Newport, Oregon, and Olympia and Port Angeles, Washington, during October. Announcement of the public workshops was widespread by means of newspaper and radio announcements. Formal opportunities for public comment at PFMC meetings were announced and provided at three meetings, September and November 1987 and January 1988.

Comment 2: The recreational fishery received too high a share of the total non-Indian quota based on historical catches.

Response: The PFMC's catch sharing plan represents a realistic compromise between the interests of commercial and recreational fishermen. Commercial fishermen, having been the sole harvester of Pacific halibut for over 100 years, are understandably reluctant to relinquish a large share of the commercial harvest to the recreational community. However, recreational fishermen and the businesses and communities that support recreational fishing in Washington and Oregon have turned to halibut fishing as a result of severe reductions in fishing opportunities for salmon brought on by depressed salmon stocks and various Federal Court decisions.

As a result, the recreational halibut catch in Area 2A has grown from less than 100,000 pounds in 1984 to over 460,000 pounds in 1987. The catch sharing plan, which allocates 55 percent of the total allowable catch to commercial and 45 percent to recreational fishermen, cuts off the uncontrolled growth of the recreational fishery and protects the traditional preeminence of the commercial fishery. In 1988, the recreational fishery will be reduced almost 40 percent from the 1987 catch level. Despite the desires for an even greater share of the catch by commercial fishermen, the catch sharing plan appears to strike a reasonable balance between the two harvesting groups.

Comment 3: The WDF estimate of the 1987 recreational catch of Pacific halibut was inaccurate and inflated and should not have been used as a basis for developing the 1988 catch sharing plan.

Response: At the beginning of the process, the WDF estimate of the recreational harvest of Pacific halibut was erroneous due to the inadvertent inclusion of other species of groundfish. That error was corrected before the non-Indian commercial and recreational representatives developed the 1988 and 1989 catch shares. Some discomfort was expressed by some of the participants in the process with the possible confidence levels and variability associated with the WDF estimate of the 1987 recreational harvest in Puget Sound. However, the data were the best available. WDF has received additional funding and manpower from the IPHC to improve monitoring of the recreational fishery in 1988.

Comment 4: Representatives of commercial fishermen were coerced into accepting the catch sharing formula by the ODFW and WDF negotiators.

Response: The subject of alleged coercion was discussed in detail at the January 14, 1988, PFMC meeting, at which time representatives of commercial fishing associations involved in development of the plan categorically denied such charges.

Comment 5: Because some commercial fishing groups felt they were not adequately informed and thus were unable to participate in the development of the catch sharing plan, the catch sharing formula between commercial and recreational fishermen should not be a 2-year plan but be only for the 1988 season. After the 1988 season, the plan should be renegotiated.

Response: This catch sharing plan being approved by the Secretary contains catch sharing provisions between non-Indian commercial and recreational fishermen for both the 1988 and 1989 seasons. NOAA has no objection, however, if all parties to the plan desire to modify certain provisions for the 1989 season.

Classification

This Pacific halibut catch sharing plan is a general statement of Agency policy which does not require notice and comment rulemaking under the Administrative Procedures Act at 5 U.S.C. 553(b)(A). As such, the Regulatory Flexibility Act does not apply.

Based on a regulatory impact review prepared to fulfill the requirements of E.O. 12291, the Assistant Secretary, NOAA, concludes that actions taken under the plan are not "major" and a regulatory impact analysis is not required. An environmental assessment was prepared by the Council in accordance with the National Environmental Policy Act regulations. The Assistant Administrator for Fisheries, NOAA, concluded that any action taken under the plan will not have any significant adverse impact on the human environment. The environmental assessment and regulatory impact review are available at the address above.

As required by section 307 of the Coastal Zone Management Act, it has been determined that this action is consistent to the maximum extent practicable with applicable state coastal zone management programs as required.

This notice of approval of a catch sharing plan does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612.

This rule contains no collection of information requirement subject to the Paperwork Reduction Act.

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 51

Mixed Nuts in the Shell; Grade Standards

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This action would revise the voluntary United States Standards for Grades of Mixed Nuts in the Shell. A large packer has requested that the standards be revised to relax the required minimum percentage in a mixture for each individual nut species. The Agricultural Marketing Service (AMS) has the responsibility, in cooperation with industry, to keep U.S. grade standards up-to-date with current marketing practices.

DATE: Comments must be received on or before April 8, 1988.

ADDRESS: All persons interested in commenting on this proposal should submit written comments, in duplicate to the Docket Clerk, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, P.O. Box 96456, Room 2056, South Building, Washington, DC 20090-6456. Comments should reference the date and page number of this issue of the Federal Register and will be made available for public inspection in the above office during regular business hours.

FOR FURTHER INFORMATION CONTACT: Philip C. Eastman, Fresh Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, P.O. Box 96456, Room 2056 South Building, Washington, DC 20090-6456, Phone: 202-447-2185.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been designated as "nonmajor."

Pursuant to the requirements set forth in the Regulatory Flexibility Act, The Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities. The proposed revisions to the standards for mixed nuts in the shell will not impose substantial direct economic costs, recordkeeping, or personnel workload changes on small entities, and will not alter the market share or competitive position of these entities relative to large business. In addition, this action will result in a relaxation of current minimum requirements under the grade standards to the benefit of the industry.

The U.S. Standards for Grades of Mixed Nuts in the Shell were established in August 1965 and were last revised in August 1981. These standards provide that only the tree nut species Almonds, Brazils, Filberts, Pecans and Walnuts may be used in the mixture. The current standards for U.S. Extra Fancy and U.S. Fancy grades provide that for each species there be a minimum of 10 percent and a maximum of 40 percent by weight of the mixture. Mixed nuts are primarily marketed from early October through December, with majority of the demand occurring prior to Thanksgiving. Consequently, to insure adequate during this peak marketing period mixed nut packaging should begin in September.

A large packer and marketer of in-shell mixed nuts, has requested that the current grade standards be revised to reduce the minimum requirement for each species from 10 to 5 percent in the U.S. Extra Fancy and U.S. Fancy grade designations. The packer states that because of crop shortages in past years, the majority of packers in the industry would not have been able to meet the 10 percent minimum for each of the species of nuts in the final pack. In 1982 and 1983, there were not enough almonds during the major portion of the mixed nut marketing season to meet the minimum percentage requirement for the U.S. Fancy and U.S. Extra Fancy grades. During these production seasons there was less than adequate almond production as a result of growing conditions, as well as a sharp reduction in almonds that would meet grade requirements as a result of staining discoloration due to rain damage. As a result the Agricultural Marketing Service issued temporary rules during those seasons to lower the 10 percent minimum for almonds to 5 percent for the U.S. Extra Fancy and U.S. Fancy grades. In addition, it appears the current requirements do not meet the needs of the industry. In fact most of the larger packers have stopped requesting inspection under the U.S. grade standards.

Under the current U.S. grade standards, packages of in-shell mixed nuts must contain 5 separate species of nuts; almonds, Brazil nuts, filberts, pecans, and walnuts. When applying U.S. Extra Fancy and U.S. Fancy grade criteria, the 5 species of nuts must be mixed to a degree so that no single species consists of less than 10 percent or more than 40 percent of the mixture. Packages containing less than 10 percent or more than 40 percent of any single species would fail to meet either of these two grades, regardless of the quality or size of the nuts. Under the U.S. Commercial or U.S. Select grade, the minimum mixture requirement is 5 percent.

This action proposes to relax the minimum percent of mixture requirement for each species of nut in a mixture for U.S. Extra Fancy and U.S. Fancy from 10 to 5 percent. The proposed changes would, we believe, more closely reflect current marketing practices and better serve the needs of the industry. Although there would be a reduction in the minimum requirement for each species under this proposed rule, there would not be any changes in the current quality or size requirements of the U.S. Standards for Grades of Mixed Nuts.

List of Subjects in 7 CFR Part 51

Fresh fruits, vegetables, and other products (Inspection, certification, and standards).

For the reasons set forth in the preamble, it is proposed that 7 CFR Part 51 be amended as follows:

PART 51—[AMENDED]

1. The authority citation for 7 CFR Part 51 continues to read as follows:

Authority: Secs. 203, 205, 60 Stat. 1087, as amended, 1090 as amended (7 U.S.C. 1622, 1624).

§ 51.3521 [Amended]

2. Section 51.3521, the chart designating the U.S. Extra Fancy grade

VOL
53
ISS
46
MR
9
1988
UMI

requirements, would be amended by removing the 10 percent minimum percentage allowable in a mixture and inserting a 5 percent minimum allowable percentage for each of the nut species Almonds, Brazils, Filberts, Pecans, and Walnuts.

§ 51.3522 [Amended]

3. Section 51.3522, the chart designating the U.S. Fancy grade requirements would be amended by removing the 10 percent minimum percentage allowable in a mixture and inserting a 5 percent minimum allowable percentage for each of the nut species Almonds, Brazils, Filberts, Pecans, and Walnuts.

Done at Washington, DC on March 4, 1988.

William T. Manley,

Deputy Administrator, Marketing Programs.

7 CFR Part 52

United States Standards for Grades of Pickles

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule; extension of public comment period.

SUMMARY: On December 8, 1987 (52 FR 46486), the Agricultural Marketing Service proposed to revise the United States Standards for Grades of Pickles. A correction to the proposed rule was published on February 5, 1988 (53 FR 3403 and 53 FR 3490) to correct two table references and make minor editorial changes. In order to provide additional time for all interested persons to respond, the public comment period is reopened and extended to April 7, 1988.

DATES: Comments must be received on or before April 7, 1988.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in duplicate to the Docket Clerk, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Room 2085, South Building, P.O. Box 96456, Washington, DC 20090-6456.

FOR FURTHER INFORMATION CONTACT: Harold A. Machias, Processed Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Room 0709, South Building, P.O. Box 96456, Washington, DC 20090-6456, Telephone (202) 447-6247.

Dated: March 4, 1988.

J. Patrick Boyle,

Administrator.

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Part 1924

Planning and Performing Construction and Other Development

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration (FmHA) proposes to amend its regulations dealing with planning and performing construction and other development. This action is intended to allow applicants to obtain the services necessary to plan projects, including analysis of project design, preparation of drawings, specifications and bidding requirements, and general administration of the construction contracts, from a wider range of individuals or organizations. A major effect of this action would be to increase FmHA's ability to provide decent, sanitary, and safe housing to eligible applicants in rural areas.

DATES: Written comments must be received on or before May 9, 1988.

ADDRESSES: Submit written comments in duplicate to the Office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6348, South Agriculture Building, 14th and Independence Avenue SW., Washington, DC 20250. All written comments will be available for public inspection during regular work hours at the above address.

FOR FURTHER INFORMATION CONTACT: Reginald J. Rountree, Loan Specialist, Special Programs Branch, Single Family Housing Processing Division, Farmers Home Administration, USDA, Room 5534, South Agriculture Building, 14th and Independence Avenue SW., Washington, DC 20250, Telephone (202) 382-1474.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Departmental Regulation 1512-1 which implements Executive Order 12291, and has been determined "non-major." It will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions, or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Programs Affected

This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.410–Low Income Housing Loans (section 502 Rural Housing Loans). For the reasons set forth in the Final rule and related Notice(s) to 7 CFR Part 3015, Subpart V, this activity affects the following programs that are included in the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials: 10.405–Farm Labor Housing Loans and Grants; 10.406–Farm Ownership Loans; 10.413–Recreation Facility Loans; 10.415–Rural Rental Housing Loans; and 10.416–Soil and Water Loans.

Regulatory Flexibility Act

The Administrator, Farmers Home Administration, USDA, has determined that this action will not have a significant economic impact on a substantial number of small entities because it deals with the general administration of construction contracts and minimum certification requirements.

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." FmHA has determined that this action does not constitute a major Federal action significantly affecting the quality of the human environment and, in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

Discussion of Proposed Rule

Background

At the present time, FmHA requires that applicants have their drawings and specifications certified only by licensed architects, professional engineers, authorized building officials, or certified code authorities as meeting applicable laws, ordinances, codes, and regulations related to the safety and sanitation of buildings. This requirement has caused approved loan applicants hardship in finding qualified certifiers at reasonable cost and has resulted in delays in assisting low-income and very low-income applicants in obtaining adequate

housing. The major purpose for revising the FmHA regulations at this time is to authorize individuals or organizations trained and experienced in the compliance, interpretation or enforcement of the applicable development standards to certify that drawings and specifications meet adopted codes and standards. By allowing the use of qualified persons such as builders, contractors, and community officials in addition to those previously mentioned, such delays would be eliminated.

1. Section 1924.5(f)(1)(iii) is partially revised as follows:

(a) Paragraph (A) is revised to list individuals or organizations who are authorized to certify plans and specification.

(b) Paragraph (B) is revised to state the certifier's license, certificate or authorization must be current at the time of certification and a building permit or professional stamp is not an acceptable substitute for the certification statement.

(c) Paragraph (C) is revised to list others authorized to certify drawings and specifications.

(d) Paragraph (D) is revised to contain the provisions of what was paragraph (B) in the current regulation, which required that the same individual or organization (if available) that certified the original drawing and specifications certify any modifications to the original drawings and specifications. If that person is not available, the drawings and specifications must be recertified by another authorized plan certifier.

(e) Paragraph (E) is revised to contain the provisions of what was paragraph (C) in the current regulation, which stated under what circumstance the certification of a modification of drawings and specifications may be waived.

(f) Paragraph (F) is added to contain and revise the provisions of what was paragraph (D) in the current regulation, which provide the suggested format for certification contain the minimum representation from the certifier that is acceptable to FmHA.

(g) Paragraph (G) is added to contain the statement a contractor must sign to receive final payment.

List of Subjects in 7 CFR Part 1924

Agriculture, Construction management, Construction and repair, Energy conservation Housing, Loan program-Agriculture, low and moderate income housing.

Accordingly, as proposed, Chapter XVIII, Title 7, Code of Federal Regulations is amended as follows:

PART 1924—GENERAL

1. The authority citation for Part 1924 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 42 U.S.C. 2942; 5 U.S.C. 301; sec. 10 Pub. L. 93–357, 88 Stat. 392; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70; delegation of authority by Dir., OEO 29 FR 14764, 33 FR 9850.

Subpart A—Planning and Performing Construction and Other Development

2. Section 1924.5 is amended by revising paragraphs (f)(1)(iii) to read as follows:

§ 1924.5 Planning development work.

* * * * *

(f) * * *
(1) * * *
(iii) * * *

(A) Certifications may be accepted from individuals or organizations who are trained and experienced in the compliance, interpretation or enforcement of the applicable development standards for drawings and specifications. Plan certifiers may be any of the following:

(*1*) Licensed architects,

(*2*) Licensed engineers,

(*3*) Registered Professional Building Designers certified by the American Institute of Building Design.

(*4*) Plan reviewers certified by a national model code organization listed in Exhibit E to this subpart.

(*5*) Local building officials authorized to review and approve building plans and specifications.

(*6*) National technical standards and codes organizations listed in Exhibit E to this subpart.

(*7*) Others with equivalent qualifications.

(B) The license, certificate, or authorization of the individual must be current at the time for the certification statement. A building permit (expect as noted in paragraph (f)(*1*)(iii) (C)(*1*) of this section) or professional's stamp is not an acceptable substitute for the certification statement. However, a code compliance review conducted by one of the National recognized code organizations indicating no deficiencies or the noted deficiencies have been corrected is an acceptable substitute for the certification statement.

(C) For one to four family dwelling units, FmHA may also accept drawings and specifications that have been certified or approved by:

(*1*) A local community, if that community has adopted, by reference, one of the model building codes and has trained official(s) who review and inspect for compliance as a requisite for issuing a building permit. The building permit, issued by the community, may serve as evidence of acceptance. The State Director will determine eligible communities upon request and publish, as a State supplement to this section, a list of those communities that qualify.

(*2*) A builder or contractor

(*i*) If the drawings and specifications meet the development standards adopted by the State Director and are accompanied by the signed certification contained in paragraph (f)(1)(iii)(F) of this section and:

(*ii*) The FmHA State Architect, Engineer, construction analyst, or construction inspector post reviews the first set of plans and specifications submitted by a builder and spot checks subsequent submittals to determine if the plans, specifications or construction complies with the code. All violations will be rendered in writing to the builder or contractor. If the builder or contractor fails to take corrective action within 30 days, the County Supervisor will recommend to the State Director that the advance of funds be halted and the contractor be suspended or debarred.

(D) The modifications of certified drawings or specifications must be certified by the same individual of organization that certified the original drawings and specifications. If such individual or organization is not available, the entire set of modified drawings and specifications must be recertified.

(E) The certification of modifications for single family housing (SFH) construction may be waived if the builder provides a written statement that the modifications are not regulated by the applicable development standard. The County Supervisor may consult with the State Office Architect/Engineer as to acceptance of the statement and granting a waiver.

(F) The following format is suggested for certification and contains the minimum representation acceptable to FmHA:

"I ___________ being a (licensed architect, engineer, builder, contractor, or authorized building official, etc.) hereby certify that I have reviewed:

___________ the drawings and specifications dated ___________ prepared by

____

(name of firm or individual)
and related to the development of the

____

(project/applicant name (if known) and location)

___________ modifications listed below, that have been clearly indicated on the drawings and specifications dated ___________ prepared by __________, certified by __________ and related to the development of the

____

(project/applicant name (if known) and location).

Based upon this review, to the best of my/our knowledge and belief, these documents conform to the (names and editions of applicable development standards) designated as the development standard for the project.

I further understand that if it is determined by FmHA that the drawings and/or specifications do not meet the applicable development standard that, within 30 days of being notified, the necessary corrections shall be made. It is also understood that false certification and failure to comply may result in suspension or debarment from participating in future government programs.

____

Date

____

Signature (Title)

(G) FmHA will obtain from the contractor, the following signed statement prior to final payment:

I, __________, have constructed this dwelling in accordance with the certified drawings and specifications and all modifications, if any, were approved by FmHA.

* * * * *

Dated: February 5, 1988.

LaVerne Ausman,

Acting Under Secretary for Small Community and Rural Development.

BILLING CODE 3410-07-M

NUCLEAR REGULATORY COMMISSION

10 CFR Ch. 1

Issuance of Quarterly Report on the Regulatory Agenda

AGENCY: Nuclear Regulatory Commission.

ACTION: Issuance of Regulatory Agenda.

SUMMARY: The Nuclear Regulatory Commission has issued the December 1987 Regulatory Agenda. The Agenda, which is a quarterly compilation of all rules on which the NRC has proposed, or is considering action as well as those on which it has recently completed action, and all petitions for rulemaking which have been received and are pending disposition by the Commission, is issued to provide the public with information regarding NRC's rulemaking activities.

ADDRESSES: A copy of this report, designated NRC Regulatory Agenda (NUREG–0936) Vol. 6, No. 4 is available for inspection and copying at a cost of six cents per page at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555.

Single copies of the report may be purchased from the U.S. Government Printing Office (GPO). Customers may call (202) 275–2060 or (202) 275–2171 or write to the Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082, Washington, DC 20013–7082.

FOR FURTHER INFORMATION CONTACT: David L. Meyer, Chief, Rules and Procedures Branch, Division of Rules and Records, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: 301–492–7086, toll free number (800) 368–5642.

Dated: at Bethesda, Maryland, this 4th day of March 1988.

For the Nuclear Regulatory Commission.

David L. Meyer,

Chief, Rules and Procedures Branch, Division of Rules and Records, Office of Administration and Resources Management.

10 CFR Parts 50 and 73

Nuclear Power Plant Access Authorization Program; Policy Statement

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed policy statement.

SUMMARY: This proposed policy statement defines the policy of the Nuclear Regulatory Commission (NRC) regarding unescorted access to protected areas and vital areas at nuclear power plants. On August 1, 1984, the Nuclear Regulatory Commission published in the **Federal Register** for public comment a proposed rule to establish an access authorizing program. The nuclear industry responded to this request for comment by proposing industry guidelines for nuclear power plant access authorization programs. The Commission has reviewed these guidelines and is considering either the issuance of a policy statement which endorses the industry-developed guidelines or the promulgation of a rule codifying access authorization provisions. If the policy option is selected, commitments to adhere to these guidelines would be formalized through amendments to the physical security plans to licensed nuclear power plants and be subject to inspection and enforcement by the NRC. The Commission specifically invites public comment regarding the policy statement vs. rulemaking option.

DATE: Comment period expires May 9, 1988. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before this date.

ADDRESSES: Mail written comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch.

Deliver comments to: Room 1121, 1717 H Street NW., Washington, DC, between 7:30 and 4:15 p.m. weekdays.

FOR FURTHER INFORMATION CONTACT: Dr. Sandra D. Frattali, Division of Regulatory Applications, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492–3773; or, for information of a legal nature, Robert L. Fonner, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492–1643.

SUPPLEMENTARY INFORMATION:

Background

On August 1, 1984, the NRC published in the **Federal Register** (49 FR 30726) proposed amendments to 10 CFR Parts 50 and 73 of its regulations which would establish an employee screening program for individuals requiring unescorted access to nuclear power plant protected and vital areas. Industry groups, including the Nuclear Utility Management and Resource Committee (NUMARC), the Edison Electric Institute, and later, the Atomic Industrial Forum and KMC, Inc., recommended the rule be withdrawn and proposed that it be replaced with an industry-proposed initiative to voluntarily commit to industry guidelines for an access authorization program. The Commission believes there may be merit in considering this approach and directed that a policy statement be developed endorsing the NUMARC Guidelines. This proposed policy statement and the NUMARC Guidelines are being published for public comment.

Proposed Statement of Policy

The Commission has concluded that it is appropriate for each licensee who operates a nuclear power plant to establish an access authorization program to ensure that individuals who require unescorted access to protected areas or vital areas of their facilities are trustworthy, reliable, emotionally stable and do not pose a threat to commit radiological sabotage. Accordingly, the NRC published a proposed rule on August 1, 1984, which would require an access authorization program at nuclear power plants (49 FR 30726).

An alternative proposal by the Nuclear Utility Management and Resources Committee (NUMARC) was submitted as a public comment on this proposed rule. The alternative proposed a voluntary industry commitment to implement an access authorization program at nuclear power plants based upon industry guidelines. The Commission endorses the program developed by NUMARC which is described in the document entitled, "Industry Guidelines for Nuclear Power Plant Access Authorization Program, Rev. 8" dated October 3, 1986 (hereafter referred to as the Guidelines). Major provisions of this program include background investigation, psychological evaluation, and behavioral observation. The Guidelines are also being published in the **Federal Register** and follow this statement of policy.

The Commission recognizes that the availability of a review procedure for use in the event the employment of a permanent utility employee is or will be terminated as a direct result of a denial or revocation of unescorted access authorization is an important element of this program. The Guidelines contain provision for such a review procedure.

Consistent with the requirements of 10 CFR 50.70(b)(3), the Commission expects that individuals certified by the NRC as having met the requirements of a program essentially equivalent to the Guidelines will be granted unescorted access to protected areas and vital areas without further investigation or screening. Further, under emergency conditions, the provisions of 10 CFR 50.54 (x) and (y) may be applied as needed by the licensee.

The Commission understands that all licensees who operate nuclear power plants are members of NUMARC and will incorporate the provisions of the Guidelines and of this policy statement into their NRC approved physical security plans. This expectation does not preclude the licensee from committing to or conducting more stringent screening of individuals, if so desired. The power reactor utilities will submit by 120 days from the effective date of this notice amendments to their physical security plans, including an implementation schedule. These amendments will include commitments to implement and maintain access authorization programs consistent with this policy and the Guidelines within 180 days of security plan amendment approval. The commitment will state, "All elements of the NUMARC guidelines, *Industry Guidelines for Nuclear Power Plant Access Authorization Programs (Revision 8)*, or any NRC-approved future revisions will be implemented in accordance with the NRC policy statement, Nuclear Power Plant Access Authorization Program, (licensee insert date of publication and citation in the **Federal Register**). "Amended plans submitted in accordance with this commitment will be accepted by the NRC without further review. The NRC will monitor compliance with this program through its normal inspection and enforcement activities.

This policy is based upon a Commission understanding that to implement the Guidelines and policy in this statement, nuclear power plant licensees are prepared to commit voluntarily to a program that is subject to NRC inspection and to enforcement action for noncompliance. Because this policy statement will replace a proposal for rulemaking that had previously received backfit approval and because the NRC staff considers the Guidelines to be equivalent in substance to the requirements, benefits, and costs of the proposed rulemaking, no additional backfit analysis for this policy statement has been prepared.

(Single copies of the backfit analysis may be obtained from Sandra D. Frattali, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492–3773.) It is further understood that the provisions of the Industry Guidelines will not supersede any requirements imposed by NRC regulations.

Dated at Washington, DC, this 4th day of March, 1988.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

  13.2 Contractor and Vendor Programs
14 Records
Attachment A—Minimum Audit Criteria

1 Purpose

To support the safe operations of licensed nuclear power plants, utilities will implement an access authorization program in accordance with the following guidelines. These guidelines have been designed with the objective of achieving high assurance that personnel granted unescorted access authorization to the protected and vital areas of utility nuclear power plants are trustworthy and reliable and do not pose a threat to commit radiological sabotage. Individual utilities may have additional requirements.

2 Scope

These guidelines define the acceptable levels for conducting and evaluating the elements of the screening program. Major elements include background investigation, psychological evaluation, and behavioral observation. Additionally the guidelines (1) provide evaluation criteria for the determination of access authorization, (2) establish provisions for accepting unescorted access authorization from other utilities, (3) include a grandfathering of personnel who were previously screened and (4) discuss records maintenance, and evaluation and audits of the access authorization program is being met.

3 Responsibility

The final granting and controlling of unescorted access authorization is the responsibility of the utility. Each nuclear utility will inform contractors and vendors of the existence of these guidelines and of the necessity to follow these guidelines. The utilities are responsible to audit non-utilities who conduct their own screening and/or implement continual behavioral observation programs (CBOP) to assure these guidelines are followed. Each utility is responsible for having an independent evaluation conducted of its program in accordance with Section 13.1 of these guidelines.

4 Applicability

These guidelines apply to all nuclear utilities, and nuclear utilities shall require those contractors and vendors who provide services at the utility's nuclear power plants to also follow them.

One level of permanent unescorted access authorization will be granted to personnel who have been processed in accordance with these guidelines. Such unescorted access authorization will allow access to both protected and vital areas as needed.

5 General Requirements for Unescorted Access

A utility may grant unescorted access authorization to an individual following the satisfactory completion of a screening program (6.0) which consists of a background investigation (6.2) and a psychological evaluation (6.3). All of the foregoing may be waived if the individual satisfies any of the following: (1) Satisfies requirements for grandfathering (11.0); (2) has a transferable access authorization from another utility (8.1); (3) has a previously granted reinstateable access authorization from the utility (8.2); or (4) will be restricted to protected or devitalized areas during cold shutdown or refueling (10.1). Also, a utility may grant a temporary nontransferable unescorted access authorization valid for no more than 180 days based on a psychological evaluation and a limited background check (6.4).

6 Screening Program

6.1 *Initiation of a Screening Program*

No element of the screening program may be initiated without the knowledge and written consent of the person who is subject to such screening. The applicant for unescorted access authorization shall be informed of the types of records that may be produced and retained, where such records are normally maintained, the duration such records are usually retained, the applicant's rights concerning access to the information, and to whom and under what circumstances the information will be released.

Initial screening requirements are applicable to those individuals who have never been screened or granted unescorted access authorization except as defined in Section 11.0. The initial screening program has two components: a background investigation (Section 6.2) and a psychological evaluation (Section 6.3).

An applicant may withdraw consent to a psychological evaluation or background investigation at any time. When withdrawal of consent is made, all processing of work in connection with either the psychological evaluation or background investigation must cease as soon as practical. Withdrawal of consent must be deemed as withdrawal of the application for unescorted access authorization.

Information collected under these guidelines may be released only on a need-to-know basis.

6.2 *Background Investigation Elements*

The background investigation covers the time period specified in each element below or since the eighteenth birthday, whichever is shorter. The applicant's employment history, education history, credit history, criminal history, military service, and the applicant's character and reputation must be addressed in the following manner.

6.2.1 *Employment History*

Except as noted below, employment history must be obtained for the past five years through contacts with previous employers, by obtaining the following information:

a. Verification of claimed periods of employment of 30 days or more;

b. Disciplinary history;

c. Reasons for termination and eligibility for rehire;

d. Any other information that would adversely reflect upon the reliability and trustworthiness of the individual as it relates to the individual being permitted unescorted access; and

e. Activities during interruptions of employment in excess of 30 days must be verified.

Note.—Because of the multitude of employments many employees experience during a five-year period, especially craft and trade workers, verification of all such employments may not be possible. Consequently, utilities may consider these applicants for unescorted access based upon an inclusive three-year retrospective employment check if the entire five-year period cannot be covered. Under no circumstances may unescorted access be granted based on an employment check of less than three years, and attempts should be made to include the entire five-year period.

6.2.2 *Education History*

Verify any claimed enrollment at an educational institution during the previous five years. In addition, verify the highest claimed post high school attendance or degree regardless of time.

6.2.3 *Criminal History*

As required by Federal law (Pub. L. 99-399, "Omnibus Diplomatic Security and Anti-Terrorism Act of 1986"), the utility shall perform a criminal history record check through the Federal Bureau of Investigation in accordance with NRC regulations.

6.2.4 *Military Service*

If within the last five years, military period of service (claimed or developed) must be verified by receipt of a Form DD214 or other National Personnel Records Center (NPRC) records. This information must be obtained from the NPRC through acquisition and submittal of an applicant's authorization for release of military history information. The utility may grant unescorted access for 180 days or less to individuals prior to receipt of DD214 or other military records if all other applicable elements of the guidelines are met and a record is maintained which documents that the request for military history was submitted within 10 working days of granting unescorted access. If it becomes known that an individual's discharge is other than honorable based solely on receipt of a DD214, further investigation must be made.

6.2.5 *Character and Reputation*

The applicant's reputation for emotional stability, reliability and trustworthiness must be examined through contact with two references supplied by the applicant and at least two additional references (not related to the applicant) developed during the investigation. (It is not necessary that reference's (individually or collectively) association with or knowledge of the applicant for unescorted access cover the entire five-year retrospective period.) Emphasis must be placed on:

a. Identified psychological problems;

b. Criminal history;

c. Illegal use or possession of a controlled substance;

d. Abuse of alcohol;

e. Susceptibility to coercion; and

f. Any other conduct relating to an applicant's trustworthiness of reliability to discharge job duties within the environment of a nuclear power plant.

6.2.6 *Verification of Identity*

Identity must be verified through means such as photograph, social

security number, date of birth, or comparison of applicant's physical characteristics with employment, education, military and other records and/or employer and character references who have a personal acquaintance with the applicant.

6.2.7 *Credit check*

A check of the applicant's credit history must be performed through checks with credit bureaus and/or credit references.

6.3 *Psychological Evaluation*

Reliability and stability must be determined by the result of a reliable written personality test or by any other professionally accepted clinical evaluation procedure. The results of such test or procedures, must be evaluated by a qualified and, if applicable, licensed psychologist or psychiatrist. If the results of the written test or other procedure identify any psychological abnormalities which may indicate emotional instability, unreliability, or untrustworthiness, or the results need further clarification, a clinical interview must be conducted by a qualified and, if applicable, licensed psychologist or psychiatrist.

6.4 *Temporary Unescorted Access Authorization*

A utility may grant unescorted access authorization not exceeding a period of 180 continuous days based on a temporary authorization. This temporary authorization cannot be transferred from one licensee to another in accordance with Section 8.1 with the exception of the FBI criminal history check which may be transferred. The 180-day temporary authorization may be granted based upon satisfaction of the following conditions:

a. Passing a psychological evaluation within the past year;

b. Conduct of a credit check;

c. Recommendation of one developed character reference who has had frequent and direct association with the applicant; and

d. Evidence that a request for a criminal history check of the individual by the FBI has been submitted to the NRC.

7 Evaluation Criteria for Unescorted Access Authorization

7.1 *Criteria*

In its decision to grant an individual authorization for unescorted access, the utility shall consider information obtained during the background investigation any psychological evaluation. This information must be reviewed using the guidelines specified in this section. Each utility shall define the appropriate level of management to adjudicate matters covered by these criteria. In making a determination of trustworthiness or reliability, the following must be considered:

a. Willful omission or falsification of material information submitted in support of employment or request for unescorted access authorization to protected or vital areas;

b. Illegal use or possession of a controlled substance or abuse of alcohol without adequate evidence or rehabilitation;

c. A criminal history without adequate evidence of rehabilitation which establishes untrustworthiness or unreliability;

d. History of mental illness or emotional instability that may cause a significant defect in the individual's judgment or reliability;

e. Any evidence of coercion, influence or pressure that may be applied by outside sources to compel an individual to commit any act of sabotage or other act which would adversely reflect upon the individual's trustworthiness or reliability;

f. Evidence that the individual has committed or attempted to commit, or aided or abetted another who committed or attempted to commit, any act of sabotage or other act that would pose a threat or reflect adversely upon that individual's trustworthiness or reliability;

g. A psychological evaluation which indicates that the individual is a risk in terms of trustworthiness or reliability; and

h. Any other information that would adversely reflect upon the reliability and trustworthiness of the individual as it relates to the individuals being permitted unescorted access.

7.2 *Review Procss*

Each permanent employee [1] of a utility whose employment is or will be terminated as a direct result of a denial or revocation of access authorization will; (1) Be informed of the basis of denial or revocation of unescorted access; (2) have the opportunity to provide any additional information; and (3) have the decision, together with any additional information, reviewed by another designated manager of the utility who is equivalent or senior to and independent of the individual who made the initial decision to deny or revoke unescorted access. The determination from this review is final. An alternative review process which is independent and impartial is acceptable. If an alternative review process is used, the utility will include a description of its review process in its plan which meets this guideline.

8 Transfer and Reinstatement of Unescorted Access Authorization

Transfer or reinstatement of unescorted access authorization requires verification of the individual's identity by the utility.

8.1 *Transfer*

An individual's unescorted access authorization granted by one utility in accordance with these guidelines may be transferred to another utility via correspondence, computer data transfer, or telecopy if the gaining utility: (1) Verifies or receives confirmation that the individual currently holds a valid unescorted access authorization or had a valid unescorted access authorization which was terminated under favorable conditions within the previous 365 days, and (2) cross-checks information such as name, date of birth, social security number, sex, and other applicable physical characteristics for identification.

8.2 *Reinstatement*

The utility may reinstate the unescorted access authorization granted an individual if the individual returns to the same utility and unescorted access authorization has not been interrupted for a continuous period of more than 365 days and if the previous unescorted access authorization was terminated under favorable conditions.

8.3 *Update Requirements*

A utility shall not authorize unescorted access where the individual's unescorted access authorization has been interrupted for more than 365 calendar days unless the psychological evaluation and the background investigation is updated to cover the individual's activities from the date of the previous background investigation, not to exceed retrospective periods in 6.2, or to the period when unescorted access was last held, whichever is less. A temporary unescorted access authorization (6.4) may be issued while the background investigation update is occurring.

9 Continual Behavioral Observation Program (CBOP)

Each individual granted unescorted access shall be subject to a CBOP. This

---

[1] The term "permanent employee" refers to a person who is employed by a utility for an undefined term. It does not include employees who were temporarily hired for a specific project or other temporary work or who were hired under an employement contract with a defined term.

CBOP applies to all personnel who are granted unescorted access. The following must be included in the overall program:

a. A program with the objective for assuring the detection of alcohol and drug abuse and other behavior that may evidence a threat to commit radiological sabotage;

b. A continual behavioral observation program that provides for management/supervisory personnel responsibility for observing personnel for behavioral traits and patterns that may reflect adversely on their trustworthiness or reliability and reporting those observations to appropriate utility management; and

c. A training program which reasonably assures that management/supervisory personnel have the awareness and sensitivity to detect and report changes in behavior, to include suspected alcohol and drug abuse, which adversely reflect upon the individual's trustworthiness or reliability, and to refer these persons to the utility's management for appropriate evaluation and action.

Individuals with unescorted access authorization must be notified of his/her responsibility to report any arrest that may impact upon his/her trustworthiness.

10 Screening During Cold Shutdown

10.1 Devitalization of Vital Areas

During refueling or maintenance outage in which all or a part of a nuclear power plant is in a cold shutdown, refueling, or devitalized status, the utility may grant unescorted access authorization to the protected and devitalized areas for personnel who have not been screened in accordance with Section 6.0 providing that:

a. The unescorted and unscreened person is restricted to the protected or devitalized areas;

b. Other requirements of the approved security plan remain in force, and the requirements of 10 CFR 73.55 are followed for unscreened personnel granted unescorted access;

c. Prior to start-up, a thorough visual inspection of the devitalized area is made by knowledgeable plant personnel to identify signs of tampering or attempted sabotage; and

d. Appropriate safety start-up procedures are followed to assure that all operating and safety systems are functioning normally.

11 Grandfathering

The utility may grant unescorted access authorization to individuals if they hold a valid unescorted access authorization on the date security plan amendments in response to these guidelines are approved or have been granted unescorted access authorization within the 365 days prior to the date of amended security plan approval.

12 Contractor and Vendor Requirements

The utility may accept the results of the entire screening program or any part thereof conducted by a contractor or vendor, provided that the contractor or vendor meets the requirements of these guidelines and that it makes its records available for auditing by the licensee or its designated representative in accordance with sections 13 and 14. The utility retains the ultimate responsibility for assuring that individuals granted unescorted access to the facility have been subjected to the screening elements of this program.

13 Evaluations and Audits

13.1 Utility Programs

An independent evaluation of the access authorization program and its conformance to these guidelines must be made within 12 months of the effective date of implementation of the amended security plan which commits to these guidelines. Thereafter, an independent evaluation must be conducted at least once every 24 months. The utility shall retain all reports of evaluation for a period of three years.

13.2 Contractor and Vendor Programs

The utility or its designated representative shall conduct annual audits of contractor and vendor access authorization programs to ensure compliance with these guidelines. Other utilities may accept the originating utility's audit and need not reaudit the same contractor or vendor for the same period of time providing the scope of the audit meets the minimum auditing criteria contained in Attachment A. A copy of the audit report, to include findings, recommendations and corrective action must be provided to the sharing utility.

14 Records

Utilities and contractors and vendors of utilities who conducted screening programs in accordance with these guidelines shall maintain actual data that:

a. A background investigation and psychological evaluation were conducted for each person who is screened under Section 6.0 of these guidelines;

b. Other persons were granted unescorted access authorization in accordance with Section 11; and

c. Satisfaction with the conditions of Section 6.4 which resulted in the granting of temporary unescorted access authorization.

The utility, contractor, or vendor shall retain records for each person who is granted unescorted access for a three-year period following termination of access authorization.

Each utility or utility's contractor or vendor who collects personal information for the purpose of processing access authorizations shall establish and maintain a system of files and procedures for the protection of the personal information. This information must not be disclosed to persons other than the subject or his/her representative, utility counsel and officers, auditors whose purpose for review would be to inspect program conformance, other utilities if an individual's access authorization is transferred, and those individuals who have a need to have access to the information in performing assigned duties in the process of granting or denying access authorization.

Attachment A—Minimum Audit Criteria

The following information must be reviewed during the conduct of an audit of a contractor/vendor screening program to meet the objective that the intent of these guidelines have been met.

A. Background Investigation

The auditor shall review screening activities by examining records and conducting interviews with appropriate personnel to determine that screening activities were accomplished in a correct and accurate manner.

In conducting an audit of the background information to reasonably assure contractor conformance with these guidelines, the auditor shall randomly verify the following:

1. Employment History

Date the verification was made, complete dates of employment, position, disciplinary history, reason for termination, eligibility for rehire, and any other information which would adversely reflect upon the reliability and trustworthiness of the individual. The retrospective period for employment history must be reasonably attempted for five years; however, due to the nature of employment histories of some transient craft workers, a minimum period of three years is required.

2. Education

Copies of transcripts, diplomas, etc., documentation which verifies all claimed attendance within the previous five years. In addition, the highest post-high school attendance or degree must be verified regardless of time. Records must include, as a minimum, dates of check, dates of attendance, highest level of attendance, and reason for leaving, i.e., graduation, transfer, expulsion, etc.

3. Criminal History

Date of check and results of FBI criminal history records check. If temporary unescorted access authorization was granted, evidence of submittal of request for FBI criminal history records prior to granting unescorted access.

4. Military History

Date of receipt and copy of Form DD214 or other military records from the National Personnel Records Center if military service was within previous five years. If unescorted access was granted prior to receipt of NPRC records, evidence of submission of request for military history within ten working days of granting unescorted access shall be contained in the access authorization file.

5. Character References

Dates of contact, names of references, association with applicant, period of association and any information related to identified psychological problems, criminal history, illegal use or possession of a controlled substance, abuse of alcohol, susceptibility to coercion and any other conduct relating to applicant's trustworthiness and reliability. Each file must contain two listed references and two developed references (not related to applicant) as a minimum.

6. Verification of Identity

How verification of identity was accomplished through such means as photograph, social security number, date of birth, and comparison of applicant's physical characteristics with records and/or references.

7. Credit History

Date of the credit check(s), name and location of credit bureau or other source, and results of initial check(s).

B. Psychological Evaluation

To reasonably assure contractor conformance concerning psychological evaluation, the auditor must be concerned with the date of the testing and that a psychologist/psychiatrist reviewed the evaluation. Contracter records must include a copy of the report signed by a licensed, if applicable psychologist/psychiatrist.

C. Continual Behavioral Observation Program (CBOP)

To reasonably assure contractor conformance concerning a CBOP, the auditor must review contractor's program to determine compliance with these guidelines, specifically to address that supervisors are sensitized to alcohol and drug abuse and other behavioral traits/patterns which may cause a threat to commit radiological sabotage, and to report/refer persons displaying such behavior to the utility's management for appropriate evaluation and action.

D. Temporary Unescorted Access Authorization

To reasonably assure contractor conformance concerning temporary unescorted access authorization, the auditor must be concerned with completion dates for credit check, reference check, psychological evaluation (within previous year from date unescorted access was granted) and date of submission to the NRC of FBI criminal history check. The auditor shall follow criteria set forth in Section A for credit history and character references and Section B for psychological evaluation. Evidence of submission of FBI criminal history request or receipt of results transferred from another utility or received directly from the NRC must be contained in access authorization file.

E. Update Requirements

To reasonably assure contractor conformance concerning updating access authorizations when access authorizations have been interrupted for more than 365 days, the auditor must be concerned with the dates of psychological evaluation and background investigation, and the retrospective period of the background investigation must cover activities from the date of the previous background investigation not to exceed the retrospective period of Section 6.2 or the period when unescorted access was last held, whichever is less. The criteria listed in Sections A and B must be met in updating unescorted access authorization.

F. Grandfathering

To reasonably assure contractor conformance concerning grandfathering, the auditor must be concerned with the date of the previous unescorted access authorization to determine that the individual held unescorted access authorization on the date security plan amendments in response to these guidelines were approved or was granted access authorization within the 365 days prior to the date of amended security plan approval. The auditor must be concerned that no individuals were grandfathered earlier than the 365 days prior to the date of amended security plan approval or subsequent to the date of amended security plan approval.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[PP 4E3146/P443; FRL-3337-2]

Pesticide Tolerance for Permethrin

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that tolerances be established for the combined residues of the insecticide permethrin and the sum total of its metabolites DCVA and 3-PBA in or on the raw agricultural commodities avocados and papayas. The proposed regulation to establish maximum permissible levels for residues of the insecticide in or on the commodities was requested in a petition submitted by the Interregional Research Project No. 4 (IR-4).

DATE: Comments, identified by the document control number [P 4E3146/P443], must be received on or before April 8, 1988.

ADDRESS: By mail, submit written comments to:

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

In person, bring comments to: Room 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Informatin" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Inforamtion not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address

given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT:

By mail: Hoyt Jamerson, Emergency Response and Minor Use Section (TS-767C), Registration Division, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

Office location and telephone number: Room 716C, CM # 2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703) 557-2310.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 4E3146 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR-4 Project and the Agricultural Experiment Stations of California, Florida, and Puerto Rico.

The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for the combined residues of the insecticide permethrin [(3-phenoxyphenyl)methyl-3-(2,2-dichloroethenyl)-2,2-dimethycyclopropane carboxylate] and the sum of its metabolites, 3-(2,2-dichloroethenyl)-2,2-dimethycyclopropane carboxylic acid (DCVA) and (3-phenoxybenzyl)-methanol (3-PBA), in or on the agricultural commodities avocados and papayas at 1.0 part per million (ppm).

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerances are sought. The toxicological data considered in support of the proposed tolerances were discussed in a final rule document (PP 8F2099-R422), published in the **Federal Register** of October 13, 1982 (47 FR 45008). Tolerances for residues of the insecticide on various raw agricultural commodities have been previously established, ranging from 0.05 to 60.0 ppm.

The acceptable daily intake (ADI), based on the 2-year rat chronic feeding/oncogenicity study (no-observed-effect level (NOEL) of 5.0 mg/kg/day or 100 ppm) and using a 100-fold safety factor, is calculated to be 0.05 mg/kg of body weight (bw)/day. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 3.0 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5-kg daily diet is calculated to be 0.015461 mg/kg/day; the current action will increased the TMRC by 0.000020 mg/kg/day (0.1 percent) to 0.015481 mg/kg/day.

The nature of the residues is adequately understood, and an adequate analytical method, gas-liquid chromatography, is available in the Pesticide Analytical Method (PAM), Volume II, for enforcement pruposes. No secondary residues in meat, milk, poultry, or eggs are expected from use of permethrin on avocados and papayas; a label restriction precludes the grazing of livestock in treated fields or feeding of treated cover crops to livestock. There are currently no actions pending against the continued registration of this chemical.

Based on the above information and data considered by the Agency, the tolerance established by amending 40 CFR 180.378 would protect the public health. Therefore, it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 4E3146/P443]. All written comments filed in response to this petition will be available in the Information Service Section, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements to do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: February 17, 1988.

Edwin F. Tinsworth,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR Part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.378(b) is amended by adding and alphabetically inserting entries for the commodities avocados and papayas, to read as follows:

§ 180.378 Permethrin; tolerances for residues.

* * * * *

(b) * * *

Commodities	Parts per million
* * * * *	
Avocados	1.0
* * * * *	
Papayas	1.0
* * * * *

40 CFR Part 180

[OPP-300181; FRL-3339-2]

Definitions and Interpretations; Proposed Technical Amendments

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes to add an entry for green onions in the commodity definitions and to revise the established commodity definition for onions. This proposed amendment, which would define onions and green onions, was requested by the Interregional Research Project No. 4 (IR-4).

DATE: Comments, identified by the document control number [OPP-300181], must be received on or before April 8, 1988.

ADDRESSES: By mail, submit written comments to:

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460

In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail:

Hoyt Jamerson, Emergency Response and Minor Use Section (TS-767C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460

Office location and telephone number: Rm. 716H, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-557-2310.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted this request to EPA on behalf of Dr. Robert H. Kupelian, National Director, and the IR-4 Technical Committee.

IR-4 requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose that 40 CFR 180.1(h) be amended by adding "green onions" to the general category of commodities listed in column A and defining that commodity as "green onions, leeks, spring onions or scallions, Japanese bunching onions, and green shallots or green eschalots" by inserting these corresponding commodities in the specific commodities listing in column B.

The IR-4 supports this request by pointing out that the growth habits, cultural and production practices, pest complex and harvest techniques for these green onion commodities are all similar.

The IR-4 requested to more specifically define the commodity term "green onions" already listed in column B of 40 CFR 180.1(h) as a specific raw agricultural commodity for the general commodity "onions."

As a logical result of the green onion definition, the specific raw agricultural commodities listing corresponding to the general commodity onions would be amended by redefining the onion definition.

The Agency concurs with IR-4 on the proposed revision of 40 CFR 180.1(h) to add the general category "green onions" in Column A and a corresponding listing of the specific raw agricultural commodities in Column B. This revision will expand the tolerances and exemptions established for residues of pesticide chemicals in or on the general category "green onions" to include the specific raw agricultural commodities as listed. Based on the information considered by the Agency, it is concluded that the regulation established by amending 40 CFR Part 180 will protect the public health. Therefore, it is proposed that 40 CFR 180.1(h) be amended as set forth below.

Interested persons are invited to submit written comments on the proposed amendment. Comments must bear a notation indicating the document control number, [OPP 300181]. All written comments filed in response to this petition will be available in the Information Services Section, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: March 1, 1988.

Edwin F. Tinsworth,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR Part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.1(h) is amended by revising the definition for onions and by adding a definition for green onions, to read as follows

§ 180.1 Definitions and interpretations.

* * * * *

(h) * * *

A	B
* * * * *	
Onions	Dry bulb onions, green onions, and garlic.
* * * * *	
Onions, green	Green onions, leeks, spring onions or scallions, Japanese bunching onions, green shallots, or green eschalots.
* * * * *	

* * * * *

40 CFR Part 180

[OPP-300183; FRL 3338-9]

Ultramarine Blue; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that ultramarine blue (CAS Reg. No. 57455-37-5) be exempted from the requirement of a tolerance when used as an inert ingredient (pigment/colorant) in pesticide formulations applied to animals. This proposed regulation was requested by Y-Tex Corp.

DATE: Written comments, identified by the document control number [OPP-300183], must be received on or before March 24, 1988.

ADDRESSES: By mail, submit comments to:

Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

In person, deliver comments to: Registration Support and Emergency Response Branch, Registration Division (TS-767C), Environmental Protection Agency, Room 716, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in Rm. 236 at the address given above from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT:

By mail: Lynn M. Bradley, Registration Support and Emergency Response Branch, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460

Office location and telephone number: Registration Support and Emergency Response Branch, Rm. 716, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–7700.

SUPPLEMENTARY INFORMATION: At the request of Y-Tex Corp., the Administrator proposes to amend 40 CFR 180.1001(e) by establishing an exemption from the requirement of a tolerance for ultramarine blue when used as a component (pigment/colorant) of plastic animal tags in pesticide formulations applied to animals.

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 162.3(c), and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): Solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting and spreading agents; and propellants in aerosol dispensers and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

Preambles to proposed rulemaking documents of this nature include the common or chemical name of the substance under consideration, the name and address of the firm making the request for the exemption, and toxicological and other scientific bases used in arriving at a conclusion of safety in support of the exemption.

Name of inert ingredient. Ultramarine blue (CAS Reg. No. 57455–37–5).

Name and address of requestor. Y-Tex Corporation, P.O. Box 1450, 1825 Big Horn Avenue, Cody, WY 82414

Bases for approval of ultramarine blue 1. Ultramarine blue is not expected to result in residues in meat and milk or to be bioavailable by reason of its solid form and insoluble nature.

2. Ultramarine blue is cleared under 21 CFR 73.50 for use in coloring salt used in feeding animals subject to the restriction that the quantity of ultramarine blue does not exceed 0.5 percent by weight of the salt.

3. Ultramarine blue is cleared under 21 CFR 73.2725 for use as a colorant in externally applied cosmetics, including cosmetics intended for use in the area of the eye.

4. Ultramarine blue is cleared under 21 CFR 177.1680 as a pigment in polyurethane resins used as the food-contact surface of articles intended for use in contact with bulk quantities of dry food of the type identified in 21 CFR 176.170(c).

5. Ultramarine blue is cleared under 21 CFR 177.2600 as a color (not to exceed 10 percent by weight of the rubber product) in rubber articles intended for repeated use in producing, packing, processing, preparing, treating, packaging, transporting, or holding food.

6. Ultramarine blue is cleared under 21 CFR 177.2800 as a substance used in the production of or as a component of textiles fibers used as articles or components of articles intended for use in producing, manufacturing, packing, processing, preparing, treating, packaging, transporting, or holding food.

7. Ultramarine blue is cleared under 21 CFR 178.3970 as a colorant when used in the manufacture of flexible, semirigid, and rigid plastic materials, and textiles and textile fibers [as provided in 21 CFR 178.2800] intended for use in producing, manufacturing, packing, processing, preparing, treating, packaging, transporting, or holding food.

EPA has initiated new review procedures for tolerance exemptions for inert ingredients. Under these procedures the Agency conducts a review of the data base supporting any prior clearance, the data available in the scientific literature, and any other relevant data. Based on a review of such data, the Agency has determined that no additional test data will be required to support this regulation.

Based on the above information and review of its use, it has been found that when used in accordance with good agricultural practices this ingredient is useful and does not pose a hazard to humans or the environment In conclusion, the Agency has determined that the proposed amendments to 40 CFR Part 180 will protect the public health. It is therefore proposed that the regulations be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, that contains this inert igredient may request within 15 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating both the subject and the petition and document control number [OPP–300183]. All written comments filed in response to this proposal will be available for inspection in the Registration Support and Emergency Response Branch at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: March 3, 1988.

Edwin F. Tinsworth,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that Part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.1001(e) is amended by adding and alphabetically inserting the inert ingredient as follows:

§ 180.1001 Exemptions from the requirement of a tolerance.

* * * * *

(e) * * *

Inert ingredients	Limits	Uses
* *	*	* *
Ultramarine blue (CAS Reg. No. 57455–37–5).	Not more than 1.5% of pesticide formulation.	Pigment/colorant in animal tag.
* *	*	* *

40 CFR Part 180

[PP 7E3565, 7E3567, 7E3568/P446; FRL-3338–7]

Pesticide Tolerances for Fluazifop-Butyl

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that tolerances be established for residues of the herbicide fluazifop-butyl in or on the raw agricultural commodities asparagus, spinach, and endive. The proposed regulation to establish a maximum permissible level for residues of the herbicide in or on the commodities was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments, identified by the document control number [PP 7E3565, 7E3567, 7E3568/P446], must be received on or before April 8, 1988.

ADDRESS: By mail, submit written comments to: Information Services Section, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m., to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT:

By mail:

Hoyt Jamerson, Emergency Response and Minor Use Section (TS–767C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–2310.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petitions to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project, and the named Agricultural Experiment Stations. These petitions requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of tolerances for residues of the herbicide (R)–2–[4–[[5–(trifluoromethyl)–2–pyridinyl]oxy]phenoxy]–propanoic acid (resolved isomer of fluazifop-P-butyl), all expressed as fluazifop, in or on certain raw agricultural commodities as follows:

1. PP 7E3565 on behalf of the Agricultural Experiment Stations of New Jersey and Washington in or on asparagus at 3.0 parts per million (ppm). The petitioner proposed that use on this commodity be limited to Maryland, New Jersey, Oregon, and Washington based on the geographical representation of the residue data submitted. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

2. PP 7E3567 on behalf of the Agricultural Experiment Stations of Arkansas, California, Connecticut, Maryland, North Carolina, Oklahoma, and Texas in or on spinach at 6.0 ppm.

3. PP 7E3568 on behalf of the Agricultural Experiment Station of Florida in or on endive at 6.0 parts per million (ppm). The petitioner proposed that use on this commodity be limited to Florida based on the geographical representation of the residue data submitted. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerances are sought. The toxicological data considered in support of the proposed tolerances include:

1. A 2-year chronic feeding/oncogenicity study in rats which was negative for oncogenic potential under the conditions of the study at all feeding levels of 0.1, 0.3, 1.0, and 3.0 milligrams (mg) per kilogram (kg) of body weight (bw) per day (equivalent to 2, 6, 20, and 60 ppm) and a systemic no-observed-effect level (NOEL) of 1 mg/kg/day.

2. A 90-day rat feeding study with a NOEL of 0.5 mg/kg/day (equivalent to 10 ppm).

3. A 90-day dog feeding study with a NOEL of 25 mg/kg/day (equivalent to 1,000 ppm).

4. A rat oral lethal dose LD_{50} of 3,300 mg/kg.

5. A rat teratology study with a teratogenic and maternal toxicity NOEL of 10 mg/kg/day (equivalent to 200 ppm) and a NOEL for fetotoxicity of 1 mg/kg/day.

6. A rabbit teratology study with no teratogenic effect at 90 mg/kg/day (highest dose tested) and a NOEL for fetotoxicity of 10 mg/kg/day (equivalent to 330 ppm).

7. A two-generation rat reproduction study with a NOEL of 1 mg/kg/day.

8. A 1-year dog feeding study with a NOEL of 5 mg/kg/day.

9. An 18-month mouse chronic feeding/oncogenicity study with no observed oncogenic potential under conditions of the study at all feeding levels of 0.1, 0.3, 1.0, and 3.0 mg/kg/day and a NOEL for systemic toxicity of 1.0 mg/kg/day (equivalent to 7 ppm).

10. An Ames test (negative), a rat cytogenetic study (negative), and an in-vitro transformation assay (negative).

11. An acute delayed neurotoxicity study in hens (negative).

The acceptable daily intake (ADI), based on the 2-year rat feeding study (NOEL of 1.0 mg/kg/day) and using a 100-fold safety factor, is calculated to be 0.01 mg/kg/day of body weight (bw)/day. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 0.6 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5–kg daily diet is calculated to be 0.001766 mg/kg/day; the current action will increase the TMRC by 0.000308 mg/kg/day (17.4 percent). Published tolerances utilize 17.7 percent of the ADI; the

BEST COPY AVAILABLE

current action will utilize an additional 3.1 percent.

The nature of the residues is adequately understood and adequate analytical methods, high-pressure liquid chromatography using an ultraviolet detector, are available in Pesticide Analytical Manual, Vol. II (PAM–II), for enforcement purposes.

Based on the above information considered by the Agency, the tolerances established by amending 40 CFR 180.411 would protect the public health. No secondary residues in meat, milk, poultry, or eggs are expected since asparagus, endive, and spinach are not considered livestock feed commodities.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interest persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 7E3565, 7E3567, 7E3568/P446]. All written comments filed in response to this petition will be available in the Information Services Section, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: March 1, 1988.

Edwin F. Tinsworth,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR Part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.411 is amended in paragraph (c) by adding and alphabetically inserting the raw agricultural commodity spinach and in paragraph (d) by adding and alphabetically inserting the raw agricultural commodities asparagus and endive, to read as follows:

§ 180.411 Fluazifop-butyl; tolerances for residues.

* * * * *

(c) * * *

Commodity	Parts per million
* * * *	*
Spinach	6.0
* * * *	*

(d) * * *

Commodity	Parts per million
* * * *	*
Asparagus	3.0
* * * *	*
Endive	5.0

Notices

Federal Register
Vol. 53, No. 46
Wednesday, March 9, 1988

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

March 4, 1988.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) form number(s), if applicable; (4) how often the information is requested; (5) who will be required or asked to report; (6) an estimate of the number of responses; (7) an estimate of the total number of hours needed to provide the information; (8) an indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

BILLING CODE 3410-01-M

Agricultural Marketing Service

Advisory Committee on Cotton Marketing Meeting

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Advisory Committee on Cotton Marketing will meet on Wednesday, April 13, from 8:30 a.m. to 4:30 p.m. in room 104–A of the USDA Administration Building, Jefferson Drive, Washington, D.C. The purpose of the meeting, the first held by the committee, will be to establish a common understanding of committee objectives and to initiate a review of prominent marketing system issues.

Tentative agenda items include the establishment of spot quotations, the Universal Cotton Standards Agreement, and the utilization of high-volume-instrument quality factors in the Commodity Credit Corporation price-support loan structure. This meeting is open to the public, and written comments may be submitted in advance to Jesse F. Moore, Director, Cotton Division. Time, however, will be inadequate to permit lengthy public comment on the day of the meeting.

FOR FURTHER INFORMATION CONTACT: Jesse F. Moore, Director, Cotton Division, AMS, USDA, P.O. Box 96456, Washington, DC 20090–6456, (202) 447–3193.

SUPPLEMENTARY INFORMATION: The Advisory Committee on Cotton Marketing is being established by the U.S. Department of Agriculture to review the cotton marketing system and to recommend ways of improving its efficiency. Notice of this meeting is provided in accordance with section 10 (a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463).

Dated: March 4, 1988.

William T. Manley,

Deputy Administrator, Marketing Programs.

[FR Doc. 88–5185 Filed 3–8–88; 8:45 am]

BILLING CODE 3410-02-M

Forest Service

Significant Amendment to the George Washington National Forest Land and Resource Management Plan; Intent To Prepare Environmental Impact Statement

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare a supplement to an environmental impact statement.

SUMMARY: The Department of Agriculture, Forest Service will prepare a Draft and Final Supplement to the Final EIS on the George Washington National Forest Land and Resource Management Plan filed in September, 1986. The supplement will address the following main issues: (1) Whether and how much the Forest should increase or decrease the supply of timber to

industry; (2) to what extent the Forest's timber sale program and associated road construction provides benefits to the recreation and wildlife programs; (3) whether the efficiency of the Forest's timber sale program can be increased; (4) whether the mix of uneven-aged (group selection) or even-aged (shelterwood or clearcut) management is adequate to produce timber on the Forest; (5) how much land suited for timber production should be identified; and (6) how the Forest's timber sale program affects other resources such as local economies, nonmotorized recreation experiences, and sensitive wildlife.

The agency invites written comments and suggestions on the scope of the analysis. In addition, the agency gives notice that a full environmental analysis and decision-making process will occur on the proposal so that interested and affected people are aware of how they may participate and contribute to the final decision.

DATE: Comments concerning the scope of the analysis should be received by April 15, 1988 to assure timely consideration.

ADDRESSES: Submit written comments and suggestions concerning the scope of the analysis to George W. Kelley, Forest Supervisor, George Washington National Forest, P.O. Box 233, Harrison Plaza, Harrisonburg, VA 22801.

FOR FURTHER INFORMATION CONTACT: Direct questions about the proposed action and environmental impact statement to Steve Parsons, Planning Staff officer, George Washington National Forest, P.O. Box 233, Harrison Plaza, Harrisonburg, VA 22801, phone number 703–433–2491.

SUPPLEMENTARY INFORMATION: The George Washington Land and Resource Management Plan was approved September 9, 1986. Additional analysis of the Forest Plan was required by Regional Forester John Alcock's decision of August 1987 directing the Forest Supervisor to perform a supplemental analysis based on issues raised by interested and affected publics.

The Forest Plan will remain in effect and continue to be implemented during the supplemental analysis. However, in recognizing the concerns of the interested and affected publics, the Chief, USDA Forest Service set the following interim guidelines for the Forest: (1) Annual timber sales offered may not exceed thirty eight million board feet per year; (2) All parties to the appeals will be notified of proposed surface disturbing projects associated with timber harvest and road building; and (3) major conflict areas will be determined and timber harvest activities postponed or relocated where feasible. Conflict areas were identified and discussed with interested parties at a January 14, 1988 meeting. Some timber harvesting activities on the Forest have been postponed or relocated as a result of that meeting and other public comments.

The Forest has been communicating with interested and affected members of the public to determine the scope of the supplemental analysis since October 1987. A meeting with interested publics was held on January 14, 1988 to review the process to be used, and better identify the issues, including those issues surrounding major areas of conflict. Subsequent public participation activities have included presentations to various public groups, individual meetings and phone calls, and requests for written comments on timber sale programs. In continuation of this process, the Forest will periodically send interim analysis documents for public review and comment, culminating with a draft and final supplemental environmental impact statement.

In preparing the environmental impact statement, the Forest Service may develop additional alternatives that: (1) Increase and/or decrease timber harvest and road construction levels, analyze various mixes of timber harvest methods, and analyze various mixes of nontimber and timber activities for producing recreation and wildlife benefits; and (2) provide timber harvesting at levels where direct timber revenues exceed direct costs as well as alternatives where timber harvesting is economically efficient considering the contribution harvesting makes to providing other resource benefits; and (3) emphasize different mixes of recreation, wildlife, and timber resources which may or may not meet demand for those resources.

Some original alternatives described in the FEIS Chapter II will be redesigned to reflect any changes resulting from issues addressed in the SEIS. Submit requests for material describing the alternatives to the address noted below for the George Washington National Forest.

The draft supplemental environmental impact statement is expected to be filed with the Environmental Protection Agency (EPA) and available for public review by August, 1989. At that time EPA will publish a notice of availability of the DESEIS in the Federal Register. The comment period on the DSEIS will be 90 days from the date the EPA notice of availability appears in the Federal Register. It is very important that those interested in the management of the George Washington National Forest participate at that time. To be most helpful, comments on the DSEIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3).

In addition, Federal court decisions have established that reviewers of draft EIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviwers' position and contentions, *Vermont Yankee Nuclear Power Corp. v. NRDC, 435 U.S. 519, 553, (1978)*, and that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement. *Wisconsin Heritages, Inc., v. Harris, 490 F. Supp. 1334, (E.D. Wis. 1980)*. The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the FSEIS.

After the comment period ends on the DSEIS, the comments will be analyzed and considered by the Forest Service in preparing the final supplemental environmental impact statement. The final SEIS is scheduled to be completed by April, 1990. In the final SEIS the Forest Service is required to respond to the comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, environmental consequences discussed in the SEIS, and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in a Record of Decision. That decision will be subject to appeal under 36 CFR 211.18.

The responsible official is John E. Alcock, Regional Forester, Southern Region 1720 Peachtree Road, NW., Atlanta, Georgia 30367.

Dated: March 1, 1988.

John E. Alcock,

Regional Forester.

BILLING CODE 3410-11-M

ARMS CONTROL AND DISARMAMENT AGENCY

The President's General Advisory Committee on Arms Control and Disarmament; Closed Meeting

In accordance with the Federal Advisory Committee Act, as amended, the U.S. Arms Control and Disarmament Agency announces the following Presidential Committee meeting:

Name: General Advisory Committee on Arms Control and Disarmament.

Date: March 24, 1988.

Time: 8:30 a.m.

Place: State Department Building, Washington, DC.

Type of Meeting: Closed.

Contact: Colonel William C. Golbitz, General Advisory Committee on Arms Control and Disarmament, Room 5927, Washington, DC 20451 (202) 647–5178.

Purpose of Advisory Committee: To advise the Director of the U.S. Arms Control and Disarmament Agency on arms control and disarmament policy and activities, and from time to time to advise the President and the Secretary of State respecting matters affecting arms control, disarmament, and world peace.

Agenda: The Committee will review the impacts of treaty compliance and verification issues, and will hold executive sessions.

Reason for Closing: The GAC members will be reviewing and discussing matters specifically required by Executive Order to be kept secret in the interest of national defense and foreign policy.

Authority to Close Meeting: The closing of this meeting is in accordance with a determination by the Director of the Arms Control and Disarmament Agency dated April 1, 1987, made pursuant to the provisions of section 10(d) of the Federal Advisory Committee Act as amended.

William J. Montgomery,

Committee Management Officer.

[FR Doc. 88–4207 Filed 3–8–88; 8:45 am]

BILLING CODE 6820-32-M

COMMISSION ON CIVIL RIGHTS

Ohio Advisory Committee; Agenda of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. on Civil Rights, that a meeting of the Ohio Advisory Committee to the Commission will convene at 11:00 a.m. and adjourn at 1:30 p.m., on March 11, 1988, at the Terrace Hilton Hotel, 15 West Sixth Street, Cincinnati, Ohio. The purpose of the meeting is to provide orientation for the rechartered SAC and discuss plans for future activities.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Donald Prock, or Melvin Jenkins, Director of the Central Regional Division (816) 374–5253, (TDD 816/374–5009). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Division at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, March 2, 1988.

Susan J. Prado,

Acting Staff Director.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Export Administration

[Docket No. 7685–01]

Actions Affecting Export Privileges; Andre A. Buccolier

Summary

Pursuant to the Decision and Order set out below, Andre Buccolier (Respondent), with an address in care of Marvin Margolis, Esq., 770 Lexington Avenue, New York, New York 10021, is denied all export privileges for a period of ten (10) years from the date of this Order; provided, however, that commencing five (5) years from the date hereof, the denial of export privileges shall be suspended, in accordance with § 388.16 of the Regulations, for the remainder of the ten (10) year period provided that the Respondent has committed no further violations of the Act, the Regulations, or the final Order in this proceeding.

Decision and Order

Procedural and Factual Background

This proceeding against Respondent Andre A. Buccolier (Respondent) began with the issuance February 5, 1987 of a charging letter by the Office of Export Enforcement (Agency), Export Administration,[1] U.S. Department of Commerce. This letter was issued under the authority of the Export Administration Act of 1979 (50 U.S.C. App. 2410–2420), as reauthorized and amended by the Export Administration Amendments Act of 1985, Pub. L. 99–64, 99 Stat. 120 (July 12, 1985) (Act), and under the authority of the Export Administration Regulations (currently codified at 15 CFR Parts 368–399 (1987)) (Regulations). The letter charged generally that Respondent had violated § 387.5 of the Regulations in 1982, with a specific allegation that Respondent had represented that Italy was the ultimate destination of three exports of U.S.-origin equipment from the United States, when Respondent knew that the shipments were to be reexported from Italy to the Soviet Union.

Respondent filed a March 2, 1987 answer requesting a hearing. The hearing was held October 6–8 and December 1–5, 1987 together with the hearing of charges by the Agency, under the Act and the Regulations, against a company of which Respondent was president. At the hearing, Respondent was accompanied by counsel for addressing most procedural issues, but was unaccompanied by counsel for addressing the substantive issue involving the allegations of the charging letter. The due date for the last post-hearing filings was January 12, 1988.

Preceding this 1987–88 administrative proceeding were two judicial trials against Respondent and the company of which he was president. These trials involved essentially the same charges that were raised in this administrative proceeding against Respondent and in the administrative proceeding against the company of which he was president. The first judicial trial, in November 1985, ended in a mistrial when Respondent's counsel became ill and was unable to continue. (Respondent's counsel in that first trial was different from his counsel in the second trial, and both were different from his counsel in these administrative proceedings.) The second trial, in May 1986, was concluded when the company of which Respondent was president pled guilty to one charge, and the government dismissed all the remaining charges against both Respondent and the company of which he was president.

The Agency's specific charge is that Respondent, for two 1982 shipments of a laser system and for one 1982 shipment of a computer system from the United States to Italy, told the persons who filled out the shipper's export declarations (Ex.[2] 42; Ex. 44; Ex. 63) that the destination of each shipment was Italy. In fact, both the laser system and the computer system were reexported by the Italian consignee to the Soviet Union. The shipper's export declaration listing Italy as the destination had been presented to the U.S. government, and the Agency thus alleged that Respondent had caused a misrepresentation on these documents of the destination.

---

[1] When the Office of Export Enforcement issued the charging letter February 5, 1987, it was part of an organization within the U.S. Department of Commerce titled the International Trade Administration. As of October 1, 1987, however, it became part of an organization within the Department titled the Export Administration.

The primary dispute between Respondent and the Agency during the hearing, and apparently the only focus of the Administrative Law Judge (ALJ), was whether Respondent knew in advance that the shipments to Italy were to be reexported to the Soviet Union. Much of the factual background was either stipulated or uncontested. The parties stipulated that the shipments to Italy were actually reexported to the Soviet Union (Oct. Tr.[3] 280–83). Respondent did not contest the Agency's showing that both the laser system and the computer system required a validated license for export to either Italy or the Soviet Union, that licenses were not obtained, and that a presumption existed to issue licenses for exports to approved Italian and users, but to deny licenses for exports to the Soviet Union (Ex. 19; Ex. 20). After a lengthy discussion of the evidence on whether or not the Respondent knew in advance that the shipments to Italy were to be reexported to the Soviet Union, the Administrative Law Judge, in his recommended Decision and Order of February 1, 1988, found that the Agency had not met its burden of proof to sustain the specific charge of misrepresenation of final destination by a preponderance of the evidence and dismissed all charges contained in the February 5, 1988 charging letter. Pursuant to section 2412(c)(1) of the Export Administration Act of 1979, as amended (50 U.S.C. App. 2401–2420) (1982 and Supp III 1985)), that Decision and Order has been referred to me for final action.

Issues

1. Was the ALJ correct in his finding that the evidence did not support the specific charge that Respondent knew of and falsely represented the ultimate destination of the three shipments?

2. If the ALJ was correct in his findings with respect to the charge of specific knowledge of the ultimate destination, was he correct in dismissing the charges altogether in the face of evidence establishing another violation of § 387.5 of the Regulations?

Discussion

With respect to the first issue, although there is substantial evidence to support the Agency's charge that the Respondent knew that the ultimate destination of the three shipments was the Soviet Union, it cannot be said that the ALJ was clearly in error in holding otherwise. The ALJ had the benefit of conducting the hearing, including the benefit of observing the demeanor of the Respondent. In essence, the destination issue revolved around the testimony of Carlo Laviani in the form of his 1983 grand jury testimony (Ex. K) and a June 1985 deposition in Italy (Ex. 9) for the Agency and the direct testimony of the Respondent supported by the deposition of Carlo Banfi (Ex. N), the president of the Italian consignee in all three shipments. While one might reasonably come to a different conclusion upon reading the record of the proceedings, unless there has been clear and convincing error, the ALJ's decision on the facts must be accepted. To do otherwise would require a *de novo* consideration of the issue, something certainly not contemplated by the Act or the regulations. With respect to the second issue, certain exhibits in this case and exhibits in and findings made by the ALJ in the companion case of Buel Electronic Connectors, Inc. (Docket No. 7696–01) (hereafter "Buel"), which case was affirmed by me on this date, document a separate violation of § 387.5 of the Regulations which must be recognized with appropriate penalty imposed. Section 387.5 provides in part that

> No person may make any false or misleading representation, statement, or certification, or falsify or conceal any material fact * * * [i]n connection with the preparation, submission, issuance, use, or maintenance of any export control document, as defined in § 370.2 * * *

Section 370–2 includes the Shipper's Export Declaration among those defined as export control documents.

In Buel the ALJ found that the corporate respondent was the exporter of the two laser shipments which are the subject of this case and that the exportation to Italy was made "without the validated export licenses that Respondent (Buel) knew or had reason to know were required by the Regulations." (Buel, p. 16). In making that finding, the ALJ had previously found that "it was the Respondent that made arrangements for the freight forwarder, and in that relationship Respondent approved a shipper's export declaration naming it as the exporter and the Italian company as the ultimate consignee." (Buel, p. 14). What is clear from the SEDs in question (Ex. 42, 44) is that Buel either misrepresented to or concealed from the SED preparer the facts concerning the requirement of an export license which the ALJ found that Buel knew or had reason to know. That being so, the only question to be addressed is whether Respondent Buccolier can be held personally accountable for the corporate misrepresentation or concealment already found by the ALJ to have occurred. I find that he can and must be held accountable.

Buccolier was the president and principal, perhaps only, stockholder of Buel Electronic Connectors, Inc. at all times relevant to these proceedings. (See, eg. Ex. 7). Mr. Buccolier had been made aware of the absolute necessity of complying with the Regulations as early as 1968. (Ex. 11). Finally, it was Buccolier, the Respondent in this action, who personally provided the information to the freight forwarder for the preparation of the SEDs in question. (Buel, p. 5 and exhibits cited). Since the evidence shows Respondent's personal knowledge of the regulatory requirements, and personal direction of preparation and final approval of the SEDs which either misrepresented or concealed the license requirement of the laser system for export to Italy, the Respondent is personally culpable within the language of § 387.5. The fact that he was acting on behalf of the corporation cannot shield the Respondent when he personally caused, with knowledge found by the ALJ, the violation in the name of the corporation. Thus, based on the findings in Buel and the evidence in the instant case, I find the Respondent has committed two violations of § 387.5 of the Regulations (the two laser shipments) which cannot be ignored notwithstanding the failure of the Agency to prevail on the greater offense: the misrepresentation of destination with express knowledge that the ultimate destination is a proscribed destination. This lesser offense (falling within the general charge by the Agency) was proved conclusively in the

---

[2] References to hearing exhibits will be as follows: Ex. (plus a number for Agency Exhibits and plus a letter for Respondent Exhibits). This abbreviation corresponds to that used in the Agency's January 4, 1988 Post-Hearing Brief.

[3] For the two judicial trials and for the October and December 1987 administrative hearings, references to the respective transcripts will be abbreviated as follows: November 1985 trial—1985 Tr.; May 1986 trial—1986 Tr.; October 1987 hearing—Oct. Tr.; and December 1987 hearing—Dec. Tr. These abbreviations correspond to those used in the Agency's January 4, 1988 Post-Hearing Brief.

course of the two proceedings, which were conducted simultaneously. They should have been recognized by the ALJ on his own motion, with the record amended to reflect that fact.

With respect to the computer system export, the system was shipped pursuant to an SED indicating a Distribution License number. Although the number was not valid for the transaction and consignee involved, the evidence is unclear on Respondent's involvement, if any, with the listing of that number. Thus no finding is made against Respondent with respect to that shipment.

As to the penalty to be imposed on Respondent Buccolier, I find it reasonable to adopt that recommended by the ALJ and affirmed by me in the Buel case. Having been on warning since 1968 of the applicability of the Regulations to exports to Italy, at the very least Respondent showed a cavalier attitude regarding the legal particulars of exporting. He did so at his peril. In fact, there is much in the record that might suggest a harsher penalty.

Finally, Respondent, personally and through counsel, raised two additional issues. The claim is made that the ALJ errored in not granting a continuance with respect to the December 1, 1987 hearing date, and that the final denial order in Buel was overboard. With respect to the hearing date, the ALJ was merely following the schedule which had been directed by me in an interlocutory order of October 21, 1987. No error was committed. With respect to the denial order, denied parties are free to seek advisory opinions from the office of the Under Secretary for Export Administration with respect to activities which they feel justifiably fall outside the order but appear to be otherwise covered by it. I find no reason to revise the language of the denial order at this time.

Order

I. For a period of 10 years from the date of the final Agency action, as modified during the second half of such period by the suspension set forth in Paragraph VI below, Respondent Andre A. Buccolier, % Marvin Margolis, Esq., 770 Lexington Avenue, New York, New York 10020, is hereby denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or that are otherwise subject to the Regulations.

II. Participation prohibited in any such transaction, either in the United States or abroad, shall include, but not be limited to, participation:

(i) As a party or as a representative of a party to a validated export license application;

(ii) In preparing or filing any export license application or reexport authorization, or any document to be submitted therewith;

(iii) In obtaining or using any validated or general export license or other export control document;

(iv) In carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported; and

(v) In the financing, forwarding, transporting, or other servicing of such commodities or technical data.

Such denial of export privileges shall extend to matters which are subject to the Act and the Regulations.

III. After notice and opportunity for comment, such denial of export privileges may be made applicable to any person, firm, corporation, or business organization with which the Respondent is now or hereafter may be related by affiliation, ownership, control, position or responsibility, or other connection in the conduct of export trade or related services.

IV. All outstanding individual validated export licenses in which Respondent appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of Respondent's privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, are hereby revoked.

V. No person, firm, corporation, partnership, or other business organization, whether in the United States or elsewhere, without prior disclosure and specific authorization from the Office of Export Licensing, shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with Respondent or any related person, or whereby Respondent or related person may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly:

(a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to, or for Respondent or related person denied export privileges, or

(b) Order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance or otherwise service or participate in any export, reexport, transshipment or diversion of any commodity or technical data exported or to be exported from the United States.

VI. Commencing five years from the date that this Order becomes effective, the denial of export privileges set forth in Paragraphs I–V above shall be suspended, in accordance with § 388.16 of the Regulations, for the remainder of the 10-year period set forth in Paragraph I above, and shall be terminated at the end of such 10-year period, provided that Respondent has committed no further violations of the Act, the Regulations, or the final Order entered in this proceedings.

VII. This Order constitutes an affirmation in part, a vacation in part, and a modification in part of the recommended Decision and Order of the ALJ dated February 1, 1988.

VIII. This constitutes final Agency action in this matter.

Date: March 2, 1988.

Paul Freedenberg,

Acting Under Secretary for Export Administration.

[FR Doc 88–5155 Filed 3–8–88; 8:45 am]

BILLING CODE 3510-DT-M

[Docket No. 7696–01]

Actions Affecting Export Privileges; Buel Electronic Connectors, Inc.

Summary

Pursuant to the Decision and Order of the Administrative Law Judge, which Decision and Order is affirmed by me, Buel Electronic Connectors, Inc. (Respondent), with an address at 770 Lexington Avenue, New York, New York 10021, is denied all export privileges for a period of ten (10) years from the date of this Order; provided, however, that commencing five (5) years from the date hereof, the denial of export privileges shall be suspended, in accordance with § 388.16 of the Regulations, for the remainder of the ten (10) year period provided that the Respondent has committed no further violations of the Act, the Regulations, or the final Order in this proceeding.

Order

On February 1, 1988 the Administrative Law Judge entered his recommended Decision and Order in the above reference matter. That Decision and Order, a copy of which is attached hereto and made a part hereof, has been referred to me pursuant to section 2412(c)(1) of the Export Administration Act of 1979, as amended (50 U.S.C. App. 2401–2420 (1982 and Supp III 1985)) for final action. Having examined the record, and based on the facts of this case, I affirm the Decision and Order of the Administrative Law Judge.

This constitutes final agency action in this matter.

Date: March 2, 1988.

Paul Freedenberg,

Acting Under Secretary for Export Administration.

Decision and Order

Procedural Background

In the matter of Buel Electronic Connectors, Inc., Respondent. Docket No. 7686–01.

Appearance for Respondent: Joseph H. Sharlitt, Esq., P.C., Suite 300, 1300 19th St. NW., Washington, DC 20036–1609.

Appearance for Agency: Margo E. Jackson, Esq., Office of the Chief Counsel for Export Administration, U.S. Department of Commerce, Room H–3329, 14th & Constitution Ave. NW., Washington, DC 20230.

This proceeding against Respondent Buel Electronic Connectors, Inc. began with the issuance February 11, 1987 of a charging letter by the Office of Export Enforcement (Agency), Export Administration,[1] U.S. Department of Commerce. This letter was issued under the authority of the Export Administration Act of 1979 (50 U.S.C. app. sections 2410–2420), as reauthorized and amended by the Export Administration Amendments Act of 1985, Pub. L. 99–64, 99 Stat. 120 (July 12, 1985) (Act), and under the authority of the Export Administration Regulations (currently codified at 15 CFR Parts 368–399 (1987)) (Regulations). The letter charged that Respondent had violated §§ 387.3, 387.4, and 387.6 of the Regulations in 1982–83 exports and attempted exports from the United States to Italy of U.S.-origin laser systems and semiconductor manufacturing equipment.

Respondent filed a March 2, 1987 answer requesting a hearing. The hearing was held October 6–8 and December 1–5, 1987 together with the hearing of charges by the Agency, under the Act and the Regulations, against Respondent's president individually. At the hearing, Respondent was accompanied by counsel for addressing most procedural issues, but was unaccompanied by counsel for addressing the substantive issues involving the allegations of the charging letter. The due date for the last post-hearing filings was January 12, 1988.

Preceding this 1987–88 administrative proceeding were two judicial trials against Respondent and its president involving essentially the same charges that were raised in this administrative proceeding against Respondent and in the proceeding against its president. The first judicial trial, in November 1985, ended in a mistrial when Respondent's counsel became ill and was unable to continue. (Respondent's counsel in that first trial was different from its counsel in the second trial, and both were different from its counsel in this administrative proceeding.) The second trial, in May 1986, was concluded when Respondent pled guilty to the charge regarding the semiconductor manufacturing equipment, and the government dismissed all the remaining charges against both Respondent and its president.

Positions of the Parties

The Agency charged that Respondent, on or about February 13 and March 23, 1982, exported the components of a U.S.-origin laser system from the United States to Italy, in two separate shipments, without the validated export licenses that Respondent knew or had reason to know were required by the Regulations. Such exports, the Agency charged, violated §§ 387.4 and 387.6 of the Regulations.

The Agency charged also that Respondent, on or about January 21 and 24, 1983, attempted to export U.S.-origin semiconductor manufacturing equipment from the United States to Italy, in two separate shipments, without the validated export licenses that it knew or had reason to know were required by the Regulations. Such attempted exports, the Agency charged, violated §§ 387.3 and 387.4 of the Regulations. As a sanction for both the alleged 1982 and 1983 violations, the Agency proposed a 20-year denial of all U.S. export privileges.

Respondent denied the charge regarding the laser system (Dec. Tr[2] 45–92), and basically admitted the charge regarding the semiconductor manufacturing equipment, but cited mitigating circumstances (*id.* 412–744). As to both these 1982 and 1983 transactions, Respondent explained that it conducted them pursuant to a commercial relationship it then had with an Italian company. According to Respondent, it would investigate the American market for products that the Italian company was interested in obtaining and, if the Italian company so decided, would arrange for the Italian company to acquire them. For this function, Respondent said that it received a monthly payment from the Italian company, first of $500 and then of $800, plus a commission of about 5% or 10% of the price of items selected for purchase by the Italian company. (*Id.* 332–40.)

Laser Exports

Agency. To support its charges against Respondent regarding this equipment, the Agency argued chiefly that Respondent, and not the U.S. manufacturer, was the exporter. The Agency introduced Respondent's order form for the laser system that Respondent sent to the manufacturer, which listed only Respondent and not the Italian company (Ex. 25). The Agency also presented testimony from the manufacturer's official who handled the transaction stating that she dealt only with Respondent, not with the Italian company (1985 Tr. 70; see also *id.* 82–83; 1986 Tr. 106). She testified further that Respondent directed specifically that the two shipments include only Respondent's invoices and packing slips, and none of the manufacturer's (1985 Tr. 66, 73–74; 1986 Tr. 102–04, 109–11; Ex. 36).

The Agency introduced testimony that Respondent's president arranged for an American freight forwarder to handle transportation of the laser system from the United States to Italy (1985 Tr. 68, 86–90). An official of the freight forwarder testified that, for the first of the two shipments, his preparation of the air waybill (Ex. 50) and of the shipper's export declaration (Ex. 42) was based on information provided by Respondent's president (1985 Tr. 93–95). This shipper's export declaration listed Respondent as the exporter and the Italian company as the ultimate consignee (Ex. 42). The official of the freight forwarder stated that Respondent's president reviewed and approved this document (1985 Tr. 94–95). For the second and final shipment, this official testified that he, the official, completed the air waybill (Ex. 43) and the shipper's export declaration (Ex. 44) with essentially the same information as for the first (1985 Tr. 96–98; 1986 Tr. 193–94), the shipper's export declaration again listing Respondent as the exporter and the Italian company as the ultimate consignee (Ex. 44).

---

[1] When the Office of Export Enforcement issued the charging letter February 11, 1987, it was part of an organization within the U.S. Department of Commerce titled the International Trade Administration. As of October 1, 1987, however, it became part of an organization within the Department titled the Export Administration.

[2] For the two judicial trials and for the October and December 1987 administrative hearings, references to the respective transcripts will be abbreviated as follows: November 1985 trial—1985 Tr.; May 1986 trial—1986 Tr.; October 1987 hearing—Oct. Tr.; and December 1987 hearing—Dec. Tr. References to exhibits will be as follows: Ex. (plus a number for Agency Exhibits and plus a letter for Respondent Exhibits). These abbreviations for the transcripts and exhibits correspond to those used in the Agency's January 4, 1988 Post-Hearing Brief.

As to licensing requirements for this laser system, the Agency showed that this export to Italy required a validated license for national security reasons, and that a presumption existed to issue such a license for an export to an approved Italian end user (Ex. 19). As for Respondent's awareness of U.S. licensing requirements, the Agency introduced copies of license applications that Respondent had submitted for previous exports (Ex. 12) and of a warning letter Respondent's president had received regarding previous violations (Ex. 11). The license applications and the warning letter concerned exports from Respondent's company to this Italian company during the 1968–71 period.

Respondent. In reply, Respondent argued that the export was actually handled by the manufacturer, or at least by an official of the manufacturer (Dec. Tr. 45–47, 53), citing, among other points, two invoices of the manufacturer to the Italian company (*id.* 47). In addition, Respondent contended that this official of the manufacturer had told Respondent's president that the laser system could be exported under a general license (*id.* 47, 410–11).

Agency. The Agency challenged both of these arguments. As to who really conducted the export, the Agency cited the evidence, described above, that it was Respondent (Agency's January 4, 1988 Post-Hearing Brief 6–8). Specifically as to the manufacturer's invoices, the Agency explained them as a special feature only of the letter of credit arrangements. As accounted for by this explanation, the Italian company had opened a letter of credit to pay for the laser system, and the beneficiary was Respondent (Ex. 30). The U.S. manufacturer, however, to ensure that it would be paid directly by the bank, required Respondent to have this letter revised to make the manufacturer the beneficiary (1985 Tr. 65–70; 1986 Tr. 99–108, 136–45; Ex. 31).

To comply with the terms of the revised letter of credit, the manufacturer had to provide the bank with its invoices reflecting direct billing to the Italian company for the laser system (1985 Tr. 69; Ex. 35; Ex. 39); and it was these invoices that Respondent cited as evidence that the manufacturer was the exporter. But, the Agency observed, these invoices were for purposes of the bank only, and Respondent specifically directed, as noted above, that only Respondent's invoices be sent with the shipments to the Italian company (Agency's January 4, 1988 Post-Hearing Brief 8).

As for Respondent's claim that it had been told by an official of the manufacturer that the laser system could be exported under a general license, the Agency replied with testimony by this official on two points. First, this official denied having discussed licensing with Respondent's president (1985 Tr. 71). Second, this official testified that, although the manufacturer's invoices for the bank incorrectly listed the export as going under a general license (*id.* 70–71), copies of these invoices were not sent to Respondent until after the shipments had been made (*id.* 76–76A). Thus, argued the Agency, this incorrect listing by the manufacturer could not have influenced Respondent's arrangements for the export (Agency's January 4, 1988 Post-Hearing Brief 8).

Semiconductor Equipment Exports

Collateral Estoppel. The Agency moved that Respondent be collaterally estopped from disputing that it attempted to export U.S.-origin semiconductor manufacturing equipment in January 1983 in violation of the Regulations, because it pled guilty to this charge at the end of the second judicial trial. Respondent showed no reason why this motion should not be granted, and it was granted (Oct. Tr. 185–98; Dec. Tr. 447). Consequently, the basic issue that remained—which Respondent did argue—was whether the circumstances of the violation should mitigate any sanction to be imposed.

Agency. The Agency introduced evidence that, on October 20, 1982, Respondent ordered some semiconductor manufacturing equipment from the company that made this equipment (Ex. 71). According to the Agency, this company subsequently notified the Agency about this order pursuant to a general request made by the Agency of companies that make equipment requiring a validated license for export. The purpose of this request is to alert the Agency to orders that have characteristics associated with orders that sometimes are for illegal exports.

An example are orders for equipment that omit a request for installation, when such a request normally accompanies such equipment orders. Testimony presented by the Agency was that a request for installation by the seller ordinarily accompanies orders for this semiconductor manufacturing equipment (Dec. Tr. 639–40), but that Respondent's order omitted it (*id.* 797–98, 801–02). Another example are orders for which the location of the ultimate consignee is changed. Respondent's order, according to the Agency, changed its ultimate consignee first among domestic addresses and then to the address of the Italian company (*id.* 806–07).

Consequently the Agency, after being notified about Respondent's order for the semiconductor manufacturing equipment, followed its progress. When Respondent attempted to export two shipments of this equipment (Ex. 103; Ex. 104) while the license application for its export was still pending, the Agency detained and seized the shipments (Dec. Tr. 843). The Agency presented testimony that export of this equipment to Italy required a validated license for national security reasons, and that a presumption existed to issue such a license for an export to an approved Italian end user (*id.* 630–31, 640).

Respondent. Respondent argued basically that its mistake as to the licensing requirement was simply an honest error, and also that it was unfairly induced by the Agency and the equipment's manufacturer to make, or possibly even entrapped into making, the attempted exports. As to the honesty of its error, Respondent's president sought to show the commercial legitimacy of those characteristics of Respondent's order that triggered the company's notification of the Agency.

With respect to Respondent's omission of a request for installation by the seller, Respondent's president testified that the Italian company had asked for just the equipment, not for installation, and it was Respondent's function simply to transmit the Italian company's order (*id.* 950–52). Respondent's president added that he understood that the Italian company was going to use a Swiss facility of the seller for the installation, not the seller's American company with which he was dealing (*id.* 951). As for listing the ultimate consignee initially as domestic, Respondent's president testified that this listing was a negotiating tactic to learn the seller's domestic price, on the theory that for many sellers it is less than the foreign price, and Respondent was seeking the lowest possible price (*id.* 900, 907–08).

Respondent sought also to show the reasonableness of its thinking on the export licensing requirements, albeit that it came to an erroneous conclusion regarding the two attempted shipments. Respondent's president emphasized that Respondent had applied for a license (Ex. I–1), showing that it was trying to comply with the licensing requirements and not seeking to export the equipment covertly (e.g., Dec. Tr. 542–45, 577–92, 710–13). When Respondent attempted the two January 1983 shipments of parts of the equipment that were seized, it honestly believed, according to its president, that no validated license was required for these parts.

Respondent's situation then, as described by its president, was that it was under pressure from the Italian company to ship all the semiconductor manufacturing equipment, for which the Italian company had already paid through a letter of credit (e.g., *id.* 591). But Respondent still had not received the export license for which it had applied. Respondent's solution was to ship parts of the equipment other than the computer (e.g., *id.* 591–92), on the theory that it was only the computer that required the license (e.g., *id.* 584–88). Respondent so concluded, its president testified, because an environmental chamber, thought by Respondent to be a part of the equipment (e.g., *id.* 455–61, 538–39, 644–49, 672–74), had already been exported without a validated license (*id.* 608–09). Therefore, as testified by an official of the freight forwarder, Respondent arranged for the other parts save the computer to be exported, specifically withholding the computer from the shipments (1985 Tr. 300–01).

Respondent argued also that its attempted exports of parts of the semiconductor manufacturing equipment were the result of an unfair inducement or entrapment by the Agency and by the company that made this equipment (e.g., Dec. Tr. 535). For this argument, Respondent cited several points. They include: notification of the Agency by the company of the placing of Respondent's order and periodic notifications about its processing (1985 Tr. 213–18; Dec. Tr. 601–09), a letter from the Agency to the company thanking it for its assistance after the seizure of Respondent's attempted shipments (Dec. Tr. 556–58; Ex. U–1), and alleged notice by the Agency to the company that Respondent's license application would be denied (*id.* 563–73).

Agency. The Agency's rebuttal focused on Respondent's claim of unfair inducement or entrapment by the Agency. Essentially the Agency argued that its close following of Respondent's order was simply a normal exercise of the Agency's enforcement function. As the Agency explained, it encourages companies to apprise it of orders having certain characteristics, and it then observes the progress of these orders (Dec. Tr. 796–806; Agency's January 4, 1987 Post-Hearing Brief 18).

The Agency specifically denied communicating to the company with which Respondent had placed its order any advance information regarding the outcome of Respondent's export license application (1985 Tr. 230–31; Dec. Tr. 892–94). In addition to denying such communication, the Agency contended that it could not have known the outcome "with any degree of certainty," because the application was then still pending in another unit of the Commerce Department (Agency's January 4, 1988 Post-Hearing Brief 20; Dec. Tr. 892–94).

Discussion

Laser Exports

For the export of the laser system, the Agency's evidence sufficiently establishes both that Respondent was the exporter and that Respondent reasonably knew or should have known of the pertinent licensing requirements. The major question was whether Respondent or the manufacturer was the exporter. The Agency's evidence showed that Respondent placed the order with the manufacturer, that Respondent directed that the shipments include packing slips and invoices only from it and not from the manufacturer, and that the manufacturer itself dealt only with Respondent, not with the Italian company. Similarly, it was Respondent that made arrangements for the freight forwarder, and in that relationship Respondent approved a shipper's export declaration naming it as the exporter and the Italian company as the ultimate consignee.

Respondent's argument in opposition fails to overcome this body of evidence. The two manufacturer's invoices cited by Respondent were adequately explained by the Agency as relating only to the letter of credit arrangement for payment, not as indicating the manufacturer to be the exporter. The large weight of the evidence clearly establishes Respondent as the exporter of the laser system.

As the exporter, Respondent was responsible for obtaining any needed licenses. That Respondent knew or reasonably should have known of the licensing requirements is established by its prior export license applications and its president's receipt of a warning letter. Although the applications and the letter concerned matters back in 1966–71, they all involved exports by Respondent from the United States to this same Italian company. Respondent claimed also that it was misled by the manufacturer as to the pertinent licensing requirements. But no persuasive evidence suggests that any such misleading advice was transmitted orally, and copies of the manufacturer's invoices with their incorrect general license entry were sent to Respondent only after each shipment.

Semiconductor Equipment Exports

As to Respondent's explanation of how it came to its erroneous conclusion regarding the licensing requirements for its January 1983 attempted exports, the explanation has plausibility and is consistent with the evidence. Respondent's specific withholding of the computer from the shipments, for example, showed an effort at compliance.

As for Respondent's claim of unfair inducement or entrapment by the Agency, the evidence fails to support this claim. As described in detailed logical testimony by the responsible Agency official (Dec. Tr. 795–897), the Agency appears to have been simply doing its enforcement job when it encouraged companies to notify it of orders such as Respondent placed, and when it then followed Respondent's order after it was so notified. With respect to any objections that Respondent lodged as to the conduct of the company with which it placed its order, that company was not a party to this proceeding. Accordingly, no judgment can be made on that conduct, other than to say that the evidence regarding it does not exonerate Respondent from the violation of the Regulations that occurred in January 1983.

Findings

The record of this proceeding warrants the following findings. Respondent exported the components of a U.S.-origin laser system from the United States to Italy, on or about February 13 and March 23, 1982, without the validated export licenses that Respondent knew or had reason to know were required by the Regulations. Respondent attempted to export parts of U.S.-origin semiconductor manufacturing equipment from the United States to Italy, on or about January 21 and 24, 1983, without the validated export licenses that Respondent knew or had reason to know were required by the Regulations. The commodities involved in both these

1982 and 1983 transactions were controlled for national security reasons.

Conclusions

The record requires the following conclusions. Respondent violated Sections 387.4 and 387.6 of the Regulations in February and March 1982 by exporting components of a U.S.-origin laser system from the United States to Italy without the required export licenses. Respondent violated §§ 387.3 and 387.4 of the Regulations in January 1983 by attempting to export parts of semiconductor manufacturing equipment from the United States to Italy without the required export license.

Such violations, involving commodities controlled for national security reasons, are a serious matter. That a presumption of approval existed for license applications for these exports to appropriate Italian end users does not negate the significance of the violations. It is important that the licensing process be given the opportunity to review the details of such proposed exports, in order to check on matters like the nature of the end user.

For these unlicensed exports from the United States to Italy, nevertheless, the Agency's request of a 20-year denial period seems unduly severe. But a significant denial period is warranted. The warning letter sent Respondent's president for violations, though now a decade and a half old, focused on exports from the United States to this same Italian company and admonished that the fact of these violations would be considered in the event of future compliance actions. In light of this letter, Respondent might reasonably have been expected to expend extra efforts to assure its compliance with the Regulations. Instead, Respondent has now been found to have violated the Regulations on not just one, but on several, occasions in 1982–83.

In view of these circumstances, a 10-year denial period would be just. Further, it would be fair to Respondent and would achieve effective enforcement of the Act and the Regulations if the last five years of the denial period are suspended, provided that Respondent has complied with the Act and the Regulations during the first five years.

Order

I. For a period of 10 years from the date of the final Agency action, as modified during the second half of such period by the suspension set forth in Paragraph VI below, Respondent Buel Electronic Connectors, Inc., 770 Lexington Avenue, New York, NY 10021, and all successors, assignees, officers, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or that are otherwise subject to the Regulations.

II. Participation prohibited in any such transaction, either in the United States or abroad, shall include, but not be limited to participation:

(i) As a party or as a representative of a party to a validated export license application;

(ii) In preparing or filing any export license application or reexport authorization, or any document to be submitted therewith;

(iii) In obtaining or using any validated or general export license or other export control document;

(iv) In carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported; and

(v) In the financing, forwarding, transporting, or other servicing of such commodities or technical data.

Such denial of export privileges shall extend to matters which are subject to the Act and the Regulations.

III. After notice and opportuity for comment, such denial of export privileges may be made applicable to any person, firm, corporation, or business organization with which the Respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of export trade or related services.

IV. All outstanding individual validated export licenses in which Respondent appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of Respondent's privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, are hereby revoked.

V. No person, firm, corporation, partnership, or other business organization, whether in the United States or elsewhere, without prior disclosure and specified authorization from the Office of Export Licensing, shall, with respect to U.S-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or on any association with Respondent or any related person, or whereby Respondent or related person may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly:

(a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to, or for Respondent or related person denied export privileges, or

(b) Order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance or otherwise service or participate in any export, reexport, transshipment or diversion of any commodity or technical data exported or to be exported from the United States.

VI. Commencing five years from the date that this Order becomes effective, the denial of export privileges set forth in Paragraphs I–V above shall be suspended, in accordance with 388.16 of the Regulations, for the remainder of the 10-year period set forth in Paragraph I above, and shall be terminated at the end of such 10-year period, provided that Respondent has committed no further violations of the Act, the Regulations, or the final Order entered in this proceeding.

VII. This Order as affirmed or modified shall become effective upon entry of the Secretary's final action in this proceeding pursuant to the Act (50 U.S.C.A. app. 2412(c)(1)).

Date: February 1, 1988.

Thomas W. Hoya,

Administrative Law Judge.

[FR Doc. 88–5156 Filed 3–8–88; 8:45 am]

BILLING CODE 3510-DS-M

National Bureau of Standards

NBS/OSI Workshop for Implementators of OSI

AGENCY: National Bureau of Standards, Commerce.

ACTION: Notice.

SUMMARY: The Institute for Computer Sciences and Technology at the National Bureau of Standards (NBS) announces four (4) workshop sessions to discuss the continued development of international computer network protocols.

DATES: The following constitutes the schedule for the workshops for the year 1989. The dates are firm:

March 13–17, 1989
June 12–16, 1989
September 11–15, 1989
December 11–15, 1989

The meetings will be hosted by NBS and will be held at the National Bureau of Standards, Gaithersburg, Maryland.

ADDRESS: To register for the workshops, companies may contact: OSI Workshop Series, Attn: Lawrence Keys, National Bureau of Standards, Building 225, Room B–217, Gaithersburg, MD 20899. Telephone: (301) 975–3604.

The registration request must name the company representative(s) and specify the business address and telephone number for each participant. An NBS representative will confirm workshop registration reservations by telephone.

FOR FURTHER INFORMATION CONTACT: Robert Rosenthal (301) 975–3603.

SUPPLEMENTARY INFORMATION: The workshops will cover protocols in seven layers of the ISO Reference Model. Attendance at the workshops is limited due to space requirements and the size of the conference facility; therefore, registration is on a first come, first served basis with recommended limitations of two participants per company. A registration fee will be charged for attending the workshops. Participants are expected to make their own travel arrangements and accommodations. NBS reserves the right to cancel any part of the workshops.

Ernest Ambler,
Director.

Date: February 29, 1988.

[FR Doc. 88–5157 Filed 3–8–88; 8:45 am]

BILLING CODE 3510–CN–M

National Oceanic and Atmospheric Administration

Operational Guidelines for the Fishery Management Plan Process

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of availability of fishery management guidelines.

SUMMARY: The recently updated version of Phases II and IV of *Operational Guidelines—the Fishery Management Plan Process* is available. The purpose of the guidelines is to expedite the development, review, approval, and implementation of fishery management plans (FMPs).

ADDRESSES: Copies of the two revised chapters may be obtained from Richard H. Schaefer, Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service, Washington, DC 20235 or from any of NMFS' Regional Offices as follows:

Director, Northeast Region, NMFS, NOAA, 14 Elm Street, Federal Bldg., Gloucester, MA 01930
Director, Southeast Region, NMFS, NOAA, 9450 Koger Blvd., St. Petersburg, FL 33702
Director, Southwest Region, NMFS, NOAA, 300 S. Ferry Street, Terminal Island, CA 90731-7415
Director, Northwest Region, NMFS, NOAA, 7600 Sand Point Way, NE, BIN C15700, Seattle, WA 98115-0070
Director, Alaska Region, NMFS, NOAA, P.O. Box 21668, Juneau, AK 99802

FOR FURTHER INFORMATION CONTACT: Richard H. Schaefer, 202–673–5263.

SUPPLEMENTARY INFORMATION: NMFS announces that the final revised *Operational Guidelines—Fishery Management Plan Process:* Phase II—Development of Draft Documents, and Phase IV—Final FMP/Amendment Review and Approval, Proposed Regulations and Final Rulemaking, is available.

The Magnuson Fishery Conservation and Management Act, as amended (Pub. L. 99–659), establishes eight Regional Fishery Management Councils, whose primary function is to develop, monitor, evaluate, and amend FMPs for each fishery that requires conservation and management within its geographical area of authority. FMPs and amendments to FMPs must be submitted to the Secretary of Commerce for review, approval, and implementation. The *Operational Guidelines* are advisory, and are directed to the Councils and the NMFS offices servicing the Councils. They are designed to improve the quality of FMPs, to produce a clearer understanding of the laws affecting the FMP process, and to speed the Secretarial review, approval, and implementation process. They offer a basic reference checklist for the process, although the publication does not prescribe, in and of itself, legal or regulatory requirements except as provided for in the Magnuson Act and other applicable law.

Operational Guidelines was first issued in 1979, revised in 1983, and supplemented in 1985. On June 23, 1987, Phases II and IV were revised, pursuant to Pub. L. 99–659, and published for the interim use and comment of those using them. This revision now available reflects changes made as a result of experience gained during the six months of interim use and to accommodate comments received.

(16 U.S.C. 1801 *et seq.*)

Dated: March 3, 1988.

Richard H. Schaefer,
Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510–22–M

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Pacific Fishery Management Council's Groundfish Management Team will convene a public meeting, March 22–24, 1988, at the National Marine Fisheries Service, Northwest and Alaska Fisheries Center, Building 4, Room 2079, 7600 Sand Point Way NE., Seattle, WA, to discuss 1988 commercial groundfish catch projections, research needs, data reporting standards, a proposed trawl codend restriction, and technical revisions to the fishery management plan. Other issues related to management of the west coast groundfish fisheries may be discussed also.

For further information contact Lawrence D. Six, Executive Director, Pacific Fishery Management Council, Metro Center, Suite 420, 2000 S.W. First Avenue, Portland, OR 97201; telephone: (503) 221–6352

Date: March 3, 1988.

Richard H. Schaefer,
Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510–22–M

Proprietary Research Program; Implementation

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Announcement of implementation.

SUMMARY: This notice announces the implementation of the National Oceanic and Atmospheric Administration's (NOAA) Proprietary Research Program. The program offers designated NOAA facilities for proprietary research activities on a user fee basis. This notice prescribes the conditions for utilization and identifies the five initial facilities. It further lists the points of contact for each and for the overall program.

FOR FURTHER INFORMATION CONTACT: Julie Campbell, Constituent Affairs Staff, Room H5224, National Oceanic and Atmospheric Administration, 14th & Constitution Avenue, NW, Washington, DC 20230 (202) 377–4113.

SUPPLEMENTARY INFORMATION: This notice is issued pursuant to the authority of Department of Commerce Administrative Order 217–19.

William Matuszeski,
Director, Office of Private Sector Initiatives.

March 1, 1988.

NOAA announces the implementation of its Proprietary Research Program. This program authorizes the use of designated NOAA facilities by State and local governments, educational institutions and the private sector. Proprietary research activities encompass research, surveys, laboratory analyses, measuring and testing of specific materials, chemicals, or devices conducted by non-federal parties using Federal Government facilities, where the resulting data or other products are treated as confidential by the non-federal parties.

Utilization of these facilities will be performed under Memoranda of Agreement issued by the Facility Directors. These agreements are subject to the following conditions: (1) Use must be compatible with the design and purpose of the facility and the user must be technically competent; (2) use must be beneficial to the Government; (3) use must not interfere with the activities or mission of NOAA; (4) use must not be likely to result in misuse or damage to the facilities or injury.

Users will be charged on a full cost basis for facility use and any additional technical assistance, incidental services, or supplies furnished.

The five NOAA facilities available for proprietary research are:

1. Command and Data Acquisition Station, 1 Eisele Road, Fairbanks, AK 99712.

Manager: Gregory White.

Telephone: (907) 452–1155.

Purpose: Provides support for operational and experimental satellite data gathering by a full array of communications equipment including four antenna systems and two 26 meter satellite dishes.

2. Charleston, SC Laboratory c/o, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, FL 33702.

Acting Regional Director: Joseph Angelovic.

Telephone: (813) 893–3141.

Purpose: Processes fish with a variety of experimental techniques including preservation, processing and vaccum packaging.

3. Gloucester, MA Laboratory c/o, National Marine Fisheries Service, Federal Building, 14th Elm Street, Gloucester, MA 01930.

Regional Director: Robert Learson.

Telephone: (617) 281–3600 ext 237.

Purpose: Processes fish with radiation (gamma emitting Cobalt–60) to enhance shelf life, facilitate component marking and purify fishery products.

4. NOAA Undersea Research Program, 6010 Executive Boulevard, Room 805, Rockville, MD 20852

Director: David Duane.

Telephone: (301) 443–8391.

Purpose: Provides three submersible vehicles located in Honolulu, HI for research in areas of fisheries, pollution, sea floor properties, process and resources; and ocean technology and services.

5. Office of Marine Operations, 6001 Executive Boulevard, Rockville, MD 20852.

Contact: CPT James Midgley.

Telephone: (301) 443–8321.

Purpose: Provides four Class I Research Vessels—OCEANOGRAPHER, DISCOVERER and MALCOLM BALDRIGE in Seattle, WA and SURVEYOR in Miami, FL to support worldwide scientific research in oceanography, hydrology, biology and atmospheric research.

Parties interested in applying for use of a facility should contact the appropriate Director. For further information concerning the program and for a prospectus of the facilities contact Julie Campbell, Constituent Affairs Staff, at the address indicated above.

BILLING CODE 3510–12–M

COMMISSION OF FINE ARTS

Meeting

The Commission of Fine Arts' next scheduled meeting is Thursday, 17 March 1988 at 10:00 AM in the Commission's offices at 708 Jackson Place NW., Washington, DC 20006, to discuss various projects affecting the appearance of Washington, DC, including buildings, memorials, parks, etc.; also matters of design referred by other agencies of the government. Handicapped persons should call the offices (566–1066) for details concerning access to meetings.

Inquiries regarding the agenda and requests to submit written or oral statements should be addressed to Charles H. Atherton, Secretary, Commission of fine Arts, at the above address or call the above number.

Dated in Washington, DC 29 February 1988.

Charles H. Atherton,
Secretary.

BILLING CODE 6330–01–M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

Notice of Intent To Prepare a Draft Environmental Impact Statement (DEIS) for a Proposed Flood Control Project on Gills Creek in Richland County, SC

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent to prepare a draft environmental impact statement.

SUMMARY: The recommended plan would provide for an earth embankment detention structure across Gills Creek at Boyden Arbor Pond on Fort Jackson property. The spillway would be removed to elevation 912.00 so no excavation of a downstream channel would be needed for the tailwater depths required on the new dam. The low level outlet structure consists of a 6 foot diameter pipe quipped with a valve. The valve would be set to non-damaging flows for daily use and can be opened to drain the reservoir after high flood events have passed. The low level outlet will discharge into a preformed spilling

basin. The Gills Creek site would be cleared in the vicinity of the dam and spillway for construction access. Boyden Arbor road located on Fort Jackson above the proposed project would be flooded as a result of the construction of the dam; therefore, the road, as part of the selected plan, will be raised so that it will not be flooded as a result of the 100-year frequency storm.

In addition to the proposed action, the following alternatives have been identified:

1. No Action—The no action alternative represents no additional actions on the part of the Corps of Engineers.
2. Other dam sites were considered on each of the three main streams in the basin: Gills Creek, Jackson Creek, and Little Jackson Creek.
3. Three locations for the proposed Gills Creek Dam sites were analyzed.
4. Alternatives to supplement the reduction of flood flows by use of dams including levees, channelization, bridge removal or alteration and nonstructural solutions would be analyzed.

The DEIS will be distributed to all concerned Federal, State, and local agencies, plus private organizations and individuals. Anyone else who is interested in receiving this DEIS is invited to contact the Environmental Resources Section of the Charleston District, Corps of Engineers to assure that they are included on the mailing list.

Significant issues to be analyzed in the DEIS include:

1. An evaluation of the environmental impacts of the proposal plan.
2. A section 404(b) evaluation of the discharge into U.S. waters of dredged or fill material.
3. An assessment of the impacts on threatened or endangered species. This portion of the EIS supplement has been included to comply with section 7 of the Endangered Species Act.

Preparation of the DEIS will be conducted in accordance with the requirements set forth in the National Environmental Policy Act of 1969, Council on Environmental Quality Regulations and applicable Corps of Engineers regulations and guidance.

A scoping meeting will not be held for the preparation of this DEIS due to prior coordination efforts which identified the significant issues involving Federal, State, and local agencies; interested citizen's groups, and individual citizens.

We estimate that the DEIS will be available to the public during the third quarter of fiscal year 88 (April 1988–June 1988).

Questions concerning the proposal action can be directed to Mr. Larry Casbeer, Planning Branch, U.S. Army Engineer District Charleston, P.O.Box 919, Charleston, South Carolina. Questions concerning the DEIS can be directed to Mr. Jim Woody, Environmental Resources Section, U.S. Army Engineer District Charleston, P.O. Box 919, Charleston, South Carolina.

Date: March 1, 1988.

Stewart H. Bornhoft,

LTC, Corps of Engineers, District Engineer.

BILLING CODE 3710-CH-M

Prospective Exclusive License; Cor-A-Vent, Inc.

In accordance with 37 CFR 404.7(a)(1)(i) announcement is made of a prospective exclusive license of a Blister Pressure Relief Valve, invented by C.J. Korhonen and F.C. Gernhard (U.S. Patent Application Serial Number 014,574; Filing Date: February 13, 1987). Rights to this invention are owned by the United States Government as represented by the U.S. Army Cold Regions Research and Engineering Laboratory (USACRREL). Under the authority of section 11(a)(2) of the Federal Technology Transfer Act of 1986 (Pub. L. 99–502) and section 207 of Title 35, U.S.C., the Department of the Army as represented by USACRREL intends to grant an exclusive license on the Blister Pressure Relief Valve to Cor-A-Vent, Inc., 16250 Petro Drive, Mishawaka, Indiana 46544.

Pursuant to 37 CFR 404.7(a)(1)(i) any interested party may file written objections to this prospective exclusive license arrangement. Written objections should be directed to: CPT Charles W. Calkins, Office of the Chief Counsel, U.S. Army Corps of Engineers, ATTN: CECC–R, Washington, DC 20314-1000.

Written objections must be filed within 60 days from the date of the publication of this notice.

FOR FURTHER INFORMATION CONTACT: CPT Charles W. Calkins, Office of the Chief Counsel, U.S. Army Corps of Engineers, ATTN: CECC–R, Washington, DC 20314–1000 (202) 355–2160.

Kenneth L. Denton,

Certifying Officer for the Federal Register.

[FR Doc. 88–5073 Filed 3–8–88; 8:45 am]

BILLING CODE 3710-08-M

Department of the Navy

Intent To Prepare an Environmental Impact Statement for Proposed Commercial Use of a Portion of Naval Supply Center, Oakland, CA

Pursuant to regulations implementing the procedural provisions of the National Environmental Policy Act (NEPA) and the requirements of Executive Order 12372, Intergovernmental Review of Federal Programs, the Department of the Navy and the Port of Oakland, Oakland, California will prepare a joint Environmental Impact Statement/Environmental Impact Report (EIS/EIR) for the proposed lease of Navy land to the Port of Oakland for commercial and maritime industrial development. The Navy will be the Lead Agency under NEPA and the Port of Oakland will be the Lead Agency under the California Environmental Quality Act (CEQA).

Public Law 100–180 of December 4, 1987 authorizes the Secretary of the Navy to lease, at fair market rental value, to the Port of Oakland not more than 195 acres of real property, together with improvements thereon, at the Naval Supply Center, Oakland (NSCO), Alameda County, California.

The project proposes the lease of approximately 130 acres of land and existing facilities at NSCO to the Port of Oakland for long-term commercial uses and redevelopment for maritime and transportation-related facilities. The Port of Oakland proposes to establish maritime and transportation activities and to redevelop the site for port operations support to the Oakland Harbor area.

Redevelopment projects may include intermodal rail facilities, marine facilities, container facilities, and other maritime and transportation support facilities. The facility would be used as a transfer and staging area for container cargo being transferred between the intermodal rail system and inner and outer Port of Oakland harbors.

The 130 acres under consideration have been divided into two parcels for planning purposes. Development of Area A (82 acres) would include demolition of some existing facilities and construction of new intermodal rail and maritime facilities. Subarea A–1 would contain an intermodal rail facility with tracks and container storage area where container cargo is transferred between rail and ships. Area A could include a U.S. Customs Service office, gatehouse, and administration, operation, and maintenance facilities. Subarea A–2 would consist of an existing marginal wharf, now in disrepair. It is contemplated that, at some future time, the wharf would be rehabilitated for use as a general cargo terminal with transit shed and transit storage area, and/or tug operating facilities. Rehabilitation of this wharf for use by vessels larger than tugs may require some dredging in this area.

Development of Area B (48 acres) would include demolition of existing facilities and construction of new container facilities and an intermodal rail facility. Container facilities would include container transfer and storage areas. The intermodal rail facility would also include tracks and a container staging area. Area B could also include a U.S. Customs Service office, gatehouse, and administration, operation, and maintenance facilities.

The project would also include demolition and construction of Navy facilities to be displaced by the lease agreement. This construction will include recreational, administration and storage facilities. These facilities will be sited at various locations on the NSCO outside of the proposed lease area.

The alternatives to be evaluated will include:

1. The proposed project as discussed above.
2. Alternative configurations, land usage, and amount of property to be leased.
3. The No Action alternative.

We wish to learn the views of affected agencies and individuals regarding the scope and content of the environmental documentation to be prepared for the proposed action. Please respond with written comment within 30 days of the published date of this notice to Ms. Loretta Meyer, Environmental Division, Port of Oakland, 77 Jack London Square, Oakland, California 94607. Questions or comments to be directed to the Navy should be mailed to Mr. Thorn Johnston, Head, Planning Implementation Branch, Western Division Naval Facilities Engineering Command, P.O. Box 727, San Bruno, California, 94066.

Date: March 3, 1988.

William R. Babington, Jr.,

Commander, JAGC, U.S. Navy, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF EDUCATION

[CFDA No. 84.031G]

Invitation for Applications for New Awards Under the Endowment Challenge Grant Program for Fiscal Year 1988

Purpose: Provide grants to eligible institutions of higher education so that they can establish or increase their endowment funds.

Eligibility: Potential applicants, including current grantees under any of the Institutional Aid Programs authorized by Title III of the Higher Education Act, are advised that a notice was published in the **Federal Register** on December 14, 1987, 52 FR 47446–47447, informing interested parties how to be designated as eligible to receive Endowment Challenge Grant funds.

Deadline for Transmittal of Applications: June 9, 1988.

Applications Available: April 11, 1988.

Available Funds: $19.148 million.

Estimated Range of Awards:

Regular grants: $50,000–$500,000.

Large grants: Over $1,000,000.

Estimated Average Size of Awards: $500,000.

Estimated Number of Awards: 30 to 50.

Project Period: 240 months.

Applicable Regulations: The Endowment Challenge Grant Program Regulations, 34 CFR Part 628.

For Applications or Information Contact: Ms. Anne Price-Collins, Chief, Challenge Grant and Endowment Branch, U.S. Department of Education, 400 Maryland Avenue SW., Room 3042, ROB–3, Washington, DC 20202, Telephone: (202) 732–3335. Applications will be sent to those institutions designated as eligible under the Title III Programs.

Program Authority: 20 U.S.C. 1065a.

Dated: March 1, 1988.

C. Ronald Kimberling,

Assistant Secretary for Postsecondary Education.

[FR Doc. 88–5180 Filed 3–8–88; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

[DOE/EIS–0120]

Waste Management Activities for Groundwater Protection, Savannah River Plant, Aiken, SC; Record of Decision

The Department of Energy (DOE) prepared this Record of Decision pursuant to Regulations of the Council on Environmental Quality (40 CFR Part 1505) and Implementing Procedures of the Department of Energy (52 FR 47662, December 15, 1987). This Record of Decision is based on DOE's *Draft and Final Environmental Impact Statements, Waste Management Activities for Groundwater Protection, Savannah River Plant, Aiken, South Carolina* (DOE/EIS–0120), the public scoping meetings and review hearings on the Draft EIS, and the distribution of approximately 850 copies to Congress, state and Federal agencies, and concerned groups and individuals. DOE considered all public and regulatory comments received on the EIS in the preparation of this Record of Decision.

Decision

DOE has decided to modify hazardous, low-level radioactive, and mixed waste management activities at the Savannah River Plant (SRP) by implementing the Combination strategy discussed in DOE/EIS–0120. Specific project-level actions to be implemented are discussed in the EIS and include:

1. The closure of six inactive low-level radioactive waste sites in the SRP R-Area and one "mixed" waste site in the F–Area where waste constituent concentrations demonstrate a need for removal (even though total waste removal is impossible under any strategy)

These sites were selected for waste removal as a part of the Combination strategy because waste removal now would significantly reduce the extent of or eliminate the need for groundwater remedial actions after site closure. Additional sites may be selected in the future, based on further site-specific investigations and regulatory interactions.

2. The construction of a new "vault-design" low-level radioactive waste disposal facility adjacent to the existing low-level waste burial ground near the center of SRP at site "G"

Currently, the Department of Energy also plans to construct and operate new storage/disposal facilities for hazardous and/or mixed waste in accordance with the Resource Conservation and Recovery Act (RCRA), the Hazardous and Solid Waste Amendments of 1984 (HSWA), and/or the South Carolina Hazardous Waste Management Act (SCHWMA), as amended. The prime candidate sites for the disposal facilities (either a RCRA landfill, an aboveground or below ground vault, or a cement/flyash matrix vault) are at sites "L" and "B" as discussed in the EIS. Storage facilities will be sited, designed, and constructed in these or other areas based on operating considerations and in compliance with regulatory requirements. The site-specific, project-specific actions will be addressed in future planning and in response to regulatory permitting and decisionmaking processes.

3. Reactor disassembly-basin purge water discharges to active seepage and containment basins in the C-, K-, and P-Areas at SRP will continue

DOE will continue to evaluate the general applicability of tritiated-water discharge mitigation measures at SRP.

DOE's decision is based on the assessments and analyses in the EIS. Based on these assessments and analyses, DOE has concluded that implementation of the Combination waste management strategy at SRP will provide adequate environmental and human health protection in accordance with existing requirements.

Background

The Savannah River Plant is a major DOE installation that produces nuclear materials for national defense and research purposes and its operations generate hazardous, radioactive, and mixed (radioactive and hazardous) wastes. Previous acceptable waste disposal practices have included the use of seepage basins for liquids, disposal pits and waste piles for solids, and a burial ground for solid low-level radioactive wastes.

Groundwater contamination of water-table aquifers has occurred at some sites as a result of waste management practices at SRP. Detected contaminants include volatile organic compounds (degreasing solvents), heavy metals (lead, chromium, mercury, and cadmium), radionuclides (tritium, uranium, fission producers, and plutonium), and other chemicals (e.g., nitrates); measured levels of waste constituents have exceeded maximum contaminant levels (MCLs) and other regulatory standards or guideline concentrations.

As a result of legislative actions [Pub. L. 98–181; RCRA; the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA); and SCHWMA], their implementing regulations, and DOE Administrative Orders, as well as concerns to protect the environment, many remedial or corrective actions have been started at SRP. These actions include the removal and storage of buried wastes and contaminated soils; the design, construction, and operation of liquid effluent treatment facilities; the use of recovery wells and an air stripper to remove volatile organic compounds from groundwater; the design of a two-stage, rotary kiln incinerator to detoxify hazardous wastes; and waste disposal demonstration programs (e.g., the greater confinement disposal demonstration).

In addition, there are ongoing demonstration programs that affect waste management activities including a "beta-gamma" incinerator, and a box/drum compactor. DOE expects these and other programs to result in improved methods for treatment and disposal of mixed and low-level radioactive wastes or reduction in waste volumes to meet applicable regulations.

The terms "hazardous," "low-level radioactive," and "mixed" (i.e., hazardous and low-level radioactive) are used throughout the EIS as common use terms without specific regard to technical or regulatory definitions unless indicated. DOE does *not* intend this Record of Decision to be a permit application for existing SRP facilities or a vehicle to resolve the applicability of the requirements of RCRA, HSWA, CERCLA, the Superfund Amendments and Reauthorization Act (SARA), and counterpart State of South Caroline regulations to existing SRP facilities or waste sites. Ongoing regulatory interactions and the expanded SRP groundwater monitoring and characterization program will provide the bases for the application of specific regulations and/or permit requirements to existing facilities and waste sites following the publication of this Record of Decision.

Additional documentation in compliance with 40 CFR 1502.20 may be prepared if necessary to implement the project-specific actions discussed in and related to the modification of SRP waste management activities assessed in DOE/EIS-0120.

Description of Alternatives

DOE's proposed action is to modify waste management activities for hazardous, low-level radioactive, and mixed wastes at SRP to protect groundwater, human health, and the environment by implementation of a waste management strategy.

DOE considered Combination, Dedication, Elimination, and No Action waste management strategies for existing waste sites, new disposal facilities, and the discharge of disassembly-basin purge water. Table 1 illustrates the project-level actions which were combined to develop the overall strategies for analysis in the EIS.

As shown in Table 1, each strategy results in different combinations of project-specific actions. The number of waste sites from which waste is removed varies with each strategy. Waste removal subsequently determines the acreage which must be devoted to waste management purposes, affects monitoring costs, security concerns, etc. Similarly, selection of one of the alternative strategies will determine whether new disposal and/or storage facilities are constructed, whether discharges of disassembly-basin purge water to reactor area seepage basins will continue, and the costs and effects associated with the implementation of each strategy. The Combination strategy selected by DOE combines features of the Dedication and Elimination strategies in terms of project-specific actions.

No Action Strategy

No major onsite environmental benefits are expected from the No Action strategy; however, the offsite environment would be protected as a result of continuing waste management practices such as groundwater cleanup in the A/M-Areas. This strategy would result in the following:

Onsite groundwater impacts.

TABLE 1.—ALTERNATIVE WASTE MANAGEMENT STRATEGIES ANALYZED IN THE FEIS (DOE/EIS-0120)

Alternative strategy	Facility category		
	Existing waste sites	New disposal facilities	Disassembly-basin purge water discharge
No action; continue to ensure protection of offsite environment.	No waste removal and no remedial or closure actions.	No new disposal facilities	Continued discharge to seepage basins.
Compliance through Dedication of existing and new disposal areas.	No waste removal; remedial and closure actions as required.	Aboveground or belowground disposal	Continued discharge to seepage basins.
Compliance through Elimination of existing waste sites and storage of wastes.	Remove waste at all sites; remedial and closure actions as required.	Retrievable storage	Direct discharge to onsite streams or evaporation.
Compliance through a Combination of dedication and elimination of waste sites, and both storage and disposal of wastes.	Remove waste at selected sites; remedial and closure actions as required.	Aboveground or belowground disposal and retrievable storage.	Continued discharge to seepage basins and study of other mitigation measures.

Elevated concentrations of tritium, strontium–90, and nitrate in Four Mile Creek

Potential terrestrial impacts from open pits and basins

Accidental releases from stored wastes with possible impacts on aquatic and terrestrial ecology and socioeconomics

Continued minor habitat and wetlands impacts

Occupational exposures and risks of fires, spills, and leaks due to waste transportation and accidents

Dedication of 300 acres

Potential future exposures to persons occupying the Savannah River Plant

The estimated total capital cost to continue current practices is about $17 million. Total 20-year operating costs for the No Action strategy are estimated at about $86 million. Estimated lifetime maintenance and monitoring costs are about $51 million.

Dedication Strategy

The major environmental benefits predicted to occur from the implementation of the Dedication strategy include improvement of onsite groundwater quality from remedial and closure actions at existing waste sites; improvement of onsite surface water quality; reduction of potential public health effects; and reduction in atmospheric releases. A disadvantage would be the removal of some sites from public use through their dedication for waste management purposes; as much as 700 acres would be affected. Environmental impacts under this strategy could include the following:

Local and transitory onsite groundwater drawdown effects

Minor short-term terrestrial impacts due to the use of borrow pits for backfill

Impacts to wildlife habitat due to land clearing and development

The dedication of about 400 acres of land to new above and belowground disposal facilities

The dedication of about 300 acres at existing waste sites

Accidental and occupational risks

The total capital cost for implementation of this strategy ranges from about $281 million to $788 million. Total 20-year operating costs range from about $51 to $258 million. Estimated costs for closure range from about $19 to $31 million. Estimated post-closure maintenance and monitoring costs range from about $65 million to $119 million. The cost ranges are based on the types of facilities that would be selected.

Elimination Strategy

The environmental benefits expected from the implementation of the Elimination strategy include improvement to onsite groundwater and surface water quality from the removal and closure of all existing waste sites and remedial actions, as required; reduction of potential public health effects and atmospheric releases (except increased tritium air releases under the evaporation option); and no requirement for dedication of sites at the SRP. Disadvantages include higher occupational risks than with other strategies and the absence of assurance of the future availability of disposal sites in other areas. Environmental impacts that could occur under this strategy include:

Onsite groundwater drawdown effects (local and transitory)

Added tritium releases to surface streams from direct discharge or increased atmospheric (evaporation) releases

The highest occupational risks of all the strategies during waste removal, closure, and remedial actions

Terrestrial impacts at borrow pits that were greater than those for other strategies

Some loss of habitat (up to 400 acres) due to land clearing and development during the construction of the retrievable storage facilities

The greatest risk of spills, leaks, and fires, and the greatest worker exposures due to waste removal, transportation, treatment, and disposal.

The total capital cost for implementation of this strategy during the 20-year operational period would range between $2.0 billion and $4.8 billion. Total 20-year operating costs would range from about $370 million to $2.4 billion. Estimated post-closure maintenance and monitoring costs are about $37 million. The costs for the eventual treatment and disposal of stored waste are not included in these monitoring and maintenance estimates.

Combination Strategy

Major environmental benefits to be derived from implementation of the Combination strategy include secure, retrievable storage and disposal of wastes; improvement to onsite surface water and groundwater from removal of wastes at selected sites, closure of selected waste sites, and remedial actions, as required; reduction of potential public health effects; and reduction of atmospheric releases. The dedication of some sites for waste management purposes would be required. This strategy could cause the following impacts:

Local and transitory groundwater drawdown effects

Some habitat disruption on up to 400 acres of land required by new disposal facilities

Dedication of up to 400 acres of land for new storage/disposal facility(s)

The estimated total capital cost of implementation of the Combination strategy ranges from about $459 to $957 million. Total 20-year operating costs range from about $73 to $273 million. Closure costs range from about $37 to $48 million. Estimated post-closure maintenace and monitoring costs range from $90 to $105 million.

Environmentally Preferable Alternative

The Elimination strategy is the "environmentally preferable alternative" when long-term impacts are considered. In the short-term, however, implementation of the Elimination strategy results in increased occupational exposures. The Elimination strategy results in the removal of hazardous, low-level radioactive, and mixed wastes at existing waste sites; retrievable storage for wastes resulting from remedial actions and ongoing operations; and ultimately will result in the elimination of discharges of disassembly-basin purge water to reactor seepage and containment basins. Actual reductions in health effects associated with reduced environmental concentrations of waste constituents are, however, extremely limited. In some cases, health effects associated with the elimination strategy are actually higher than for other strategies, including the Combination strategy, because of occupational exposures resulting from waste removal actions and the re-suspension of waste particles during waste removal actions.

Basis for Decision

In compliance with the National Environmental Policy Act and its implementing regulations, DOE has analyzed the environmental impacts of the alternatives described in the EIS through extensive impact assessment, modeling, and human health and environmental risk assessment. Comments were received by DOE through the scoping process and as a result of distribution of the Draft EIS. DOE considered and responded to these comments as part of the preparation of the Final EIS. DOE's preferred alternative for modifying waste management activities at SRP is the Combination strategy. The Combination strategy was selected by DOE as the preferred alternative over the environmentally preferable alternative because it provides adequate human health and environmental protection, has lower occupational risk, the cost associated with closure actions and the construction of new retrievable storage facilities is significantly lower, and terrestrial ecological impacts are lower.

Considerations in the Implementation of the Decision

Implementation of the preferred waste management strategy will involve separate but related activities for regulatory compliance, Congressional funding authorization, and designs for new storage and disposal facilities.

Conclusion

DOE has considered all environmental factors, benefits and costs, institutional and programmatic needs, and schedules, and has concluded that it will implement the Combination strategy discussed in DOE/EIS-0120. DOE will continue its interactions with regulatory agencies to ensure that actions implemented in accordance with this Record of Decision comply with applicable regulatory requirements. DOE will proceed with implementation of this waste management strategy subject to the authorization and appropriation of funds by Congress.

Dated: March 2, 1988.

Troy E. Wade II,

Acting Assistant Secretary for Defense Programs.

BILLING CODE 6450-01-M

Economic Regulatory Admnistration

[ERA Docket No. 87-43-NG]

Entrade Energy Corp.; Order Granting Blanket Authorization To Import Natural Gas

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of order granting blanket authorization to import natural gas.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice that it has issued an order granting EnTrade Corporation (EnTrade) blanket authorization to import Canadian natural gas for sale in the domestic spot market. The order issued in ERA Docket No. 87-43-NG authorizes EnTrade to import up to 175 Bcf of gas over a two-year period beginning on the date of first delivery.

A copy of this order is available for inspection and copying in the Natural Gas Division Docket Room, GA-076, Forrestal Building, 1000 Independence Avenue SW., Washington, DC, 20585, (202) 586-9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, March 3, 1988.

Constance L. Buckley,

Director, Natural Gas Division Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 88-5196 Filed 3-8-88; 8:45 am]

BILLING CODE 6450-01-M

Office of Energy Research

Basic Energy Sciences Advisory Committee; Open Meeting

Pursuant to the provision of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Basic Energy Sciences Advisory Committee (BESAC), Energy.

Date and Time: April 6, 1988, 9:00 a.m.-5:00 p.m.; April 7, 1988, 9:00 a.m.-4:00 p.m.

Place: U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, Room 5E-069.

Contact: Louis C. Ianniello, Department of Energy, Office of Basic Energy Sciences (ER-11), Office of Energy Research, Washington, DC 20545, Telephone: 301-353-3081.

Purpose of the Committee: To provide advice on a continuing basis to the Secretary of the Department of Energy (DOE), through the Director of Energy Research, on the many complex scientific and technical issues that arise in the development and implementation of the Basic Energy Sciences (BES) program.

Tentative agenda: Briefings and discussions of:

April 6, 1988

- BES FY 1988/FY 1989 Budget
- Status of BES Programs
- Review of BESAC Reports
- Public Comment (10 Minute Rule)

April 7, 1988

- Committee Agenda for 1988
- Committee Structure
- Geosciences, Engineering, Energy Biosciences
- Public Comment (10 Minute Rule)

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact: Louis C. Ianniello at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: The transcript of the meeting will be available for public review and copying at the Freedom of Information Public Reading Room, 1E-190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between 9:00 a.m., and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on March 4, 1988.

J. Robert Franklin,

Deputy Advisory Committee Management Officer.

[FR Doc. 88-5198 Filed 3-8-88; 8:45 am]

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Issuance of Proposed Decision and Order; Period of December 21, 1987 Through January 29, 1988

During the period of December 21, 1987 through January 29, 1988, the proposed decision and order summarized below was issued by the Office of Hearings and Appeals of the Department of Energy with regard to an application for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of

objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of this proposed decision and order are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays.

March 1, 1988.

George B. Breznay,

Director, Office of Hearings and Appeals.

Belcher Oil Co. Inc., Murray, Kentucky

KXE-0158; Reporting Req 'MTS

Belcher Oil Co., Inc. filed an Application for Exception from the requirement to complete and file Form EIA-782B, entitled "Reseller/Retailers' Monthly Petroleum Product Sales Report." On January 29, 1988, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER88-299-000, et al.]

Public Service Co. of New Mexico, et al.; Electric Rate and Corporate Regulation Filings

Take notice that the following filings have been made with the Commission:

1. Public Service Company of New Mexico

[Docket No. ER88-269-000]

March 3, 1988.

Take notice that on February 26, 1988, Public Service Company of New Mexico (PNM) tendered for filing Amendment No. 6 to Contract for Electric Service (CES) between PNM and Texas-New Mexico Power Company (TNP). Amendment No. 6 allows TNP to reduce the amount of power for which TNP must pay and provides for a reduction in the energy rate charged for energy taken during offpeak periods. Amendment No. 6 is intended to be effective from January 1, 1988 through April 30, 1988, according to its terms; PNM accordingly requests a waiver of the Commission's notice requirements.

Copies of the filing have been served upon TNP and the New Mexico Public Service Commission.

Comment date: March 17, 1988, in accordance with Standard Paragraph E at the end of this notice.

2. James E. O'Neil, Attorney General of the State of Rhode Island and the Rhode Island Division of Public Utilities & Carriers v. Montaup Electric Co.

[Docket No. EL88-14-000]

March 2, 1988.

Take notice that on February 17, 1988, James E. O'Neil, Attorney General of the State of Rhode Island, for himself and the Rhode Island Division of Public Utilities & Carriers (Rhode Island) tendered for filing a Petition for Investigation and Complaint against Montaup Electric Company concerning CWIP-related Seabrook Unit 1 charges and return on equity pursuant to Rule 206 of the Federal Energy Regulatory Commission's Rules of Practice and Procedure, 18 CFR 385.206, and sections 205, 206, 306 and 307 of the Federal Power Act.

Comment date: April 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

3. James E. O'Neil, Attorney General of the State of Rhode Island and the Rhode Island Division of Public Utilities & Carriers v. New England Power Co.

[Docket No. EL88-12-000]

March 2, 1988.

Take notice that on February 17, 1988, James E. O'Neil, Attorney General of the State of Rhode Island, for himself and the Rhode Island Division of Public Utilities & Carriers (Rhode Island) tendered for filing a Petition for Investigation and Complaint against New England Power Company related to an asserted violation of fuel clause regulations pursuant to Rule 206 of the Federal Energy Regulatory Commission's Rules of Practice and Procedure, 18 CFR 385.206, and sections 205, 206, 306 and 307 of the Federal Power Act.

Comment date: April 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

4. James E. O'Neil, Attorney General of the State of Rhode Island and the Rhode Island Division of Public Utilities & Carriers v. New England Power Co.

[Docket No. EL88-13-000]

March 2, 1988.

Take notice that on February 17, 1988, James E. O'Neil, Attorney General of the State of Rhode Island, for himself and the Rhode Island Division of Public Utilities & Carriers (Rhode Island) tendered for filing a Petition for Investigation and Complaint against New England Power Company concerning CWIP-related Seabrook Unit 1 charges, return on equity, and the *Sunray* decision pursuant to Rule 206 of the Federal Energy Regulatory Commission's Rules of Practice and Procedure, 18 CFR 385.206, and sections 205, 206, 306 and 307 of the Federal Power Act.

Comment date: April 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

5. Puget Sound Power & Light Co.

[Docket No. ER88-270-000]

March 3, 1988.

Take notice that on February 26, 1988, Puget Sound Power & Light Company (Puget) tendered for filing a revised Appendix 1 of Puget's Residential Purchase and Sale Agreement, Contract DE-MS79-81BP-90604. Puget states that this filing is made pursuant to the revised Average System Cost (ASC) methodology approved by the Federal Energy Regulatory Commission effective October 1, 1984. Puget also states that procedures under the revised methodology require that a utility file a revised Appendix 1 with the Bonneville Power Administration within twenty (20) days following the commencement date of the new exchange period.

Comment date: March 17, 1988, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5137 Filed 3-8-88; 8:45am]

BILLING CODE 6717-01-M

[Project Nos. 6802-003 and 8958-000]

D.J. Pitman International Corp; Hydroelectric Development Inc.; Availability of Environmental Assessment and Request for Comments

March 7, 1988.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR Part 380 (Order No. 486, 52 F.R. 47897), the Office of Hydropower Licensing has reviewed the competing applications for minor license for the proposed Macallen Dam Hydroelectric Project on the Lamprey River in Rockingham and Strafford Counties, New Hampshire, and has prepared an Environmental Assessment (EA) for the propsed project. In the EA, the Commission's staff has determined the potential adverse impacts of the proposed project. The staff is requesting comments on the EA and any additional information on the expected impacts of the project.

Interested persons and agencies are invited to identify and submit substantive evidence regarding study results, natural resource management policies, and reports from state and local resource agencies. The evidence should be limited to the Macallen Dam Hydroelectric Project and its expected environmental effects.

After evaluating the comments, the staff will determine if preparation of an Environmental Impact Statement is necessary.

Copies of the EA are available for review in the Public Reference Branch, Room 1000, of the Commission's offices at 825 North Capitol Street NE., Washington, DC 20426.

Comments should be filed by the close of business, April 15, 1988, and should be addressed to Lois D. Cashell, Acting Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. Please affix Project No. 6802-003 or Project No. 8958-000, as appropriate, to all comments.

For further information please contact Dianne Rodman, Environmental Assessment Coordinator, at (202) 376-9045.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5162 Filed 3-8-88; 8:45 am]

BILLING CODE 6717-01-M

Determinations Under the Natural Gas Policy Act for OCS Leases Issued on or After April 20, 1977

Issued March 3, 1988.

On September 27, 1983, the Federal Energy Regulatory Commission (Commission) issued Order No. 336 under Docket Nos. RM83-3 and RM81-12 (48 FR 44,508 September 29, 1983). In that order, the Commission amended its regulations relating to filing requirements for well category applications under the Natural Gas Policy Act of 1978 (NGPA). The determination process for natural gas produced from a new lease, i.e., a lease entered into on or after April 20, 1977, on the Outer Continental Shelf (OCS), and qualifying as new natural gas under section 102 of the NGPA, was amended in two respects. First, the Commission eliminated the requirement that a determination be made for each well producing gas from a new OCS lease. Second, in lieu of filing an application for each well, the Commission now permits the grant of a new OCS lease to constitute the requisite jurisdictional agency determination that the gas is produced from a new OCS lease.

Under the revised procedures, the U.S. Department of Interior, Minerals Management Service (MMS), must file within 60 days of the grant of the lease a notice of determination which includes the lease number, the area and block number, and the date on which the OCS lease was issued by the Secretary of the Interior. The determination is subject to Commission review in the same manner as other jurisdictional agency determinations.

On February 2, 1988, the Commission received notice from MMS, Gulf of Mexico OCS Region, that 347 leases were issued as a result of OCS Sale 112 for the Western Gulf of Mexico on August 12, 1987. Gas produced from the following leases has been determined to be gas produced from a new OCS lease under NGPA Section 102:

Lease No. OCS-G	Area	Block	Effective date

The complete list of OCS leases submitted by the MMS for this sale, with area and block descriptions, is available for inspection at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, DC. Persons objecting to any of these determinations may, in accodance with 18 CFR 275.203 and 275.204, file a protest with the Commission within twenty days after this notice is issued by the Commission.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5138 Filed 3-8-88; 8:45 am]

BILLING CODE 6717-01-M

Determinations Under the Natural Gas Policy Act for OCS Leases Issued on or After April 20, 1977

Issued March 3, 1988.

On September 27, 1983, the Federal Energy Regulatory Commission (Commission) issued Order No. 336 under Docket Nos. RM83-3 and RM81-12 (48 FR 44,506 September 29, 1983). In that order, the Commission amended its regulations relating to filing requirements for well category applications under the Natural Gas Policy Act of 1978 (NGPA). The determination process for natural gas produced from a new lease, i.e., a lease entered into on or after April 20, 1977, on the Outer Continental Shelf (OCS), and qualifying as new natural gas under section 102 of the NGPA, was amended in two respects. First, the Commission eliminated the requirement that a determination be made for each well producing gas from a new OCS lease. Second, in lieu of filing an application for each well, the Commission now permits the grant of a new OCS lease to constitute the requisite jurisdictional agency determination that the gas is produced from a new OCS lease.

Under the revised procedures, the U.S. Department of Interior, Minerals Management Service (MMS), must file within 60 days of the grant of the lease a notice of determination which includes the lease number, the area and block number, and the date on which the OCS lease was issued by the Secretary of the Interior. The determination is subject to Commission review in the same manner as other jurisdictional agency determinations.

On September 2, 1986, the Commission received notice from MMS, Gulf of Mexico OCS Region, that 30 leases were issued as a result of OCS Sale 94 for the Eastern Gulf of Mexico on December 18, 1985. Notice of these determinations was issued by the Commission on September 12, 1986. On February 2, 1988, MMS notified the Commission that 25 additional leases have been granted under this same sale. Gas produced from the following leases has been determined to be gas produced from a new OCS lease under NGPA Section 102:

Lease No. OCS-G	Area	Block	Effective date
8308	PE	904	Mar. 1, 1987.

BILLING CODE 6717-01-M

[Docket Nos. CI88-311-000 et al.]

Energy Development Corporation, et al.; Natural Gas Certificate Filings

March 2, 1988.

Take notice that the following filings have been made with the Commission:

1. Energy Development Corporation

[Docket No. CI88-311-000]

Take notice that on February 19, 1988, Energy Development Corporation (Applicant), P.O. Box 570, Newark, New Jersey 07101, filed an application pursuant to section 7 of the Natural Gas Act for (1) blanket limited-term authorization to abandon certificated sales of natural gas released by interstate pipelines: and (2) blanket pregranted abandonment authority for subsequent sales of such released gas made under Applicant's small producer certificate for a period of one year, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Comment date: March 18, 1988, in accordance with Standard Paragraph J at the end of the notice.

2. Sun Exploration and Production Company

[Docket No. CI86-675-001]

Take notice that on February 22, 1988, Sun Exploration and Production Company (Sun), P.O. Box 2880, Dallas, Texas 75221, filed an application pursuant to Sections 4 and 7 of the Natural Gas Act and Parts 154 and 157 of the Federal Energy Regulatory Commission's (Commission) regulations under the Natural Gas Act requesting that the Commission modify paragraph (B) of its May 1, 1987, Order Granting Limited-Term Blanket Certificate with Pregranted Abandonment by extending the term from one year to a three year term expiring May 1, 1981. Sun seeks authorization to continue to make sales for resale in interstate commerce of uncommitteed natural gas to be produced from its 15% working interest in High Island 310, Offshore Texas, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Comment date: March 18, 1988, in accordance with Standard Paragraph J at the end of the notice.

Standard Paragraph

J. Any person desiring to be heard or make any protest with reference to said filings should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426 a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-581 Filed 3-8-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. QF88-252-000 et al.]

Riverhead Cogeneration Corp., et al.; Small Power Production and Cogeneration Facilities; Qualifying Status; Certificate Applications, Etc.

DATE: *Comment date:* April 8, 1988, in accordance with Standard Paragraph E at the end of this notice.

Take notice that the following filings have been made with the Commission.

1. Riverhead Cogeneration Corp.; Riverhead Energy Center

[Docket No. QF88-252-000]

March 1, 1988.

On February 10, 1988, Riverhead Cogeneration Corporation of 420 Lexington Avenue, Suite 440, New York, New York 10170, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The proposed topping-cycle cogeneration facility will be located in Riverhead, Suffolk County, New York. The facility when completed will incorporate up to three separate generating modules. Each module will consist of combustion turbines in a combined cycle configuration with heat recovery steam generators and a steam turbine generator. Thermal energy recovered from the facility will be for space heating and cooling, and process uses. The net electric power production capacity of the facility will be approximately 79.9 MW with one module, 135 MW with two modules, and 190.1 MW with three modules. The primary energy source of the facility will be natural gas, backed up with No. 2 distillate fuel or propane.

2. Occidental Chemical Corp.

[Docket No. QF82-83-001]

March 3, 1988.

On February 22, 1988, Occidental Chemical Corporation (Applicant), of 5005 LBJ Freeway, Dallas, Texas 75244, submitted for filing an application for recertification of a facility as a qualifying cogneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility is located at Applicant's existing chemical manufacturing plant in Niagara Falls, New York. The facility consists of two incinerator boilers, two steam turbine generators, a combustion turbine generator and a waste heat recovery steam generator. Extraction steam from the steam turbines is used in Applicant's chemical plant for heating and a variety of process applications. The maximum power production capacity of the facility is 79 MW. The primary energy source is biomass in the form of municipal solid waste with natural gas as a secondary fuel source.

3. Ogden Martin Systems of Bushkill Township, Inc.

[Docket No. QF88-235-000]

March 3, 1988.

On February 3, 1988, Ogden Martin Systems of Bushkill Township, Inc. (Applicant), of 40 Lane Road, CN 2615, Fairfield, New Jersey 07007-2615 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The facility will be located in Northampton County, Pennsylvania. The facility will consist of two (2) mass-burn steam generators and a single steam turbine generator. The net electric power production capacity will be 26.5 megawatts. The primary energy source will be biomass in the form of municipal solid waste. Natural gas will be used for flame stabilization, start-up, and shut-down, however, such fossil fuel usage will not exceed 25% of the total energy input to the facility during any calendar year period. Construction of the facility is expected to begin on or about May 1989.

4. Waste Energy Recovery Systems of Alpena

[Docket No. QF88-226-000]

March 3, 1988.

On February 1, 1988, Waste Energy Recovery Systems of Alpena (Applicant), of 1000 John R. Rd., Suite 210, Troy, Michigan 48083 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Alpena, Michigan. The facility will consist of a fluidized bed boiler and a steam turbine generator. The electric power production capacity will be 16 megawatts. The primary energy source will be biomass in the form of wood-waste, sawdust, bark and wood chips. Fuel oil will be used for start-up purposes only.

5. Woodpower Corporation of Edwards

[Docket No. QF88-238-000]

March 3, 1988.

On February 5, 1988, Woodpower Corporation of Edwards, c/o Long Lake Energy Corporation, 420 Lexington Avenue, New York City, New York 10170 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Lawrence County, New York. The facility will consist of a biomass-fired steam generator, and a steam turbine coupled to an electric generator. The net electric power production capacity will be 18 megawatts. The primary energy source will be biomass in the form of waste-wood. Oil will be used for start-up and pilot light operations, however, such fossil fuel usage will not exceed 5% of the total energy input to the facility during any calendar year period.

6. Woodpower Corporation of Malone

[Docket No. QF88-237-000]

March 3, 1988.

On February 5, 1988, Woodpower Corporation of Malone, c/o Long Lake Energy Corporation, 420 Lexington Avenue, New York, New York 10170 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Franklin County, Town of Malone, New York. The facility will consist of a biomass-fired steam generator, and a steam turbine generator. The maximum net electric power production capacity will be 18 megawatts. The primary energy source will be biomass in the form of waste-wood. Fuel oil will be used for start-up and pilot light operations, however, such fossil fuel usage will not exceed 5% of the total energy input to the facility during any calendar year period.

7. Woodpower Corporation of Tupper Lake

[Docket No. QF88-236-000]

March 3, 1988.

On February 5, 1988, Woodpower Corporation of Tupper Lake, c/o Long Lake Energy Corporation, 420 Lexington Avenue, New York, New York 10170 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Franklin County, in the Village of Tupper Lake, New York. The facility will consist of a biomass-fired steam generator, and a steam turbine generator. The maximum net electric power production capacity will be 18 megawatts. The primary energy source will be biomass in the form of wood-waste. Oil will be used for start-up and pilot light operations, such fossil fuel usage will not exceed 5% of the total energy input to the facility during any calendar year period.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5140 Filed 3-8-88; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 6344-003]

Delta Canal Co. et al.; Surrender of Exemption

March 3, 1988.

Take notice that Delta Canal Company et al., exemptee for the proposed Leamington Canyon Project No. 6344, has requested that its exemption be terminated. The exemption was issued January 28, 1983. The project would have been located on the Central Utah Canal on the Sevier River, in Juab and Millard counties, Utah. The project would have consisted of a diversion structure, a penstock, a powerhouse with a total rated capacity of 1,800 kW, a tailrace, and a transmission line. Construction of the project has not commenced.

The exemptee filed the request on February 17, 1988, and the exemption for Project No. 6344 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007, in which case the exemption shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5141 Filed 3-8-88; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 6345-003]

Delta Canal Company et al.; Surrender of Exemption

March 3, 1988.

Take notice that Delta Canal Company et al., exemptee for the proposed Sevier Bridge Reservoir Project No. 6345, has requested that its exemption be terminated. The exemption was issued November 17, 1982. The project would have been located on the Sevier River, in Juab County, Utah. The project would have consisted of an existing Bureau of Land Management dam, a penstock, a powerhouse with a total rated capacity of 1,800 kW, and a transmission line. Construction of the project has not commenced.

The exemptee filed the request on February 17, 1988, and the exemption for Project No. 6345 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007, in which case the exemption shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5142 Filed 3-8-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP88-62-000]

Equitable Gas Co., a Division of Equitable Resources, Inc.; Proposed Change in FERC Gas Tariff

March 3, 1988.

Take notice that Equitable Gas Company (Equitable) on February 26, 1988, tendered for filing with the Federal Energy Regulatory Commission (Commission) its Substitute Tenth Revised Sheet No. 6f and its Substitute Eleventh Revised Sheet No. 6f to its FERC Gas Tariff, First Revised Volume No. 1, to become effective March 1, 1988 and September 1, 1987, respectively.

Substitute Tenth Revised Sheet No. 6f
Substitute Eleventh Revised Sheet No. 6f.

Equitable states the filing is made pursuant to Ordering Paragraph M of the Commissions Order dated January 20, 1988, in Docket No. CP86-676-00, in which Equitrans Inc. (Equitable) was instructed to file a restatement of the base tariff rate under Rate Schedule GS-1, as required by § 154.38 of the Commission's Regulations.

Equitable states that the cost-of-service study supports an increase in rates for Rate Schedule GS-1, but Equitable does not propose an increase in base rates at this time.

Equitable further states that a copy of its filing has been served upon its purchasers and interested state commissions and upon each party to these proceedings.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before March 10, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5143 Filed 3-8-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP86-676-002 and RP88-64-000]

Equitrans, Inc.; Compliance

March 3, 1988.

Take notice that on February 26, 1988, Equitrans, Inc. ("Equitrans") tendered for filing the following FERC Gas Tariff in compliance with the Commission's Order issuing Certificate and Approving Abandonment, issued January 20, 1988, in this docket.

Docket Volume No. 1
Original Sheets 1 through 182.
Docket Volume No. 2
Original Sheets 1 through 147
Docket Volume No. 3
Original Sheets 1 through 39.

Equitrans, formerly Equitable Transmission Company, succeeded to the FERC jurisdictional interests of Equitable Gas Company, a division of Equitable Resources, Inc., as a result of the above-referenced Commission Order.

Equitrans states that copies of this filing have been served on all its jursidictional customers and affected state regulatory commissions. Equitrans requests waiver of all Commission rules and regulations as may be necessary to permit the tendered tariff sheets to become effective April 1, 1988.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before March 10, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5144 Filed 3-8-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA88-1-27-000]

North Penn Gas Co.; Proposed Changes in FERC Gas Tariff

March 3, 1988

Take notice that North Penn Gas Company (North Penn) on February 26, 1988, tendered for filing 87th Revised Sheet No. PGA-1, 3rd Revised Sheet No. 156, and 3rd Revised Sheet No. 15G (1) to its FERC Gas Tariff, First Revised Volume No. 1 pursuant to its PGA Clause to be effective March 1, 1988. Specifically, North Penn states that it included in its semiannual PGA the following:

1. A change in rates (Appendix A) to reflect changes in Cost of Gas Purchased.

2. A surcharge credit of 48.809¢ per Mcf (Appendix B) resulting from amounts accumulated in the Unrecovered Purchased Gas Cost Account for the period July, 1987 through December 31, 1987; the jurisdictional portion of supplier refunds received by North Penn for the same six-month period; carrying charges computed in accordance with the regulations of the Federal Energy Regulatory Commission (Commission); a carry-over balance from the surcharge credit effective for the period March 1, 1987 through August 31, 1987; and a credit to reflect the average pipeline commodity cost of gas for the period March, 1987 to August, 1987 pursuant to Article XIII of the Stipulation and Agreement in Docket No. RP85-193.

3. A TOP surcharge credit of 1.466¢ (Appendix C) to repay customers of North Penn for the overrecovery of Take-or-Pay payments made to Tennessee Gas Pipeline Company under the procedures approved by the Commission in Docket No. RP83-8 et al., issued April 16, 1985.

North Penn states that it eliminated § 15 of the General Terms and Conditions of its Tariff to remove all references to incremental pricing. FERC Order No. 478 issued July 27, 1987 in Docket No. RM87-28-000 et al., requires the removal of all references to incremental pricing in the first PGA filing made in 1988. North Penn is therefore filing Third Revised Sheet No. 15G and Third Revised Sheet No. 15G(1) and has eliminated Sheet No. 15H of the General Terms and Conditions.

North Penn respectfully requests waiver of the Commission's Rules and Regulations pertaining to the thirty (30) day notice requirement, stating that a late notice of rate change from one of its pipeline suppliers for effectiveness March 1, 1988 and several other pressing regulatory matters before the FERC and its State Commission prevented the Company from making a timely filing.

While North Penn believes that no other waivers are necessary in order to permit this filing to become effective March 1, 1988, as proposed, North Penn respectfully requests waiver of any of the Commission's Rules and Regulations as may be required to permit this filing to become effective March 1, 1988, as proposed.

Copies of this filing are being mailed to each of North Penn's jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motion or protests should be filed on or before March 10, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5145 Filed 3-8-88; 8:45 am]

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-400012; FRL-3335-6]

Emergency Planning and Community Right-To-Know; Toxic Chemical Release Reporting; Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: A public meeting is scheduled to present the EPA planned approach for making a toxic chemical release inventory publicly available on a computer data base. The inventory and

public access to it on a computer are required under section 313(j) of the Emergency Planning and Community Right-to-Know Act of 1986.

DATE: The meeting will be held on Wednesday, March 30, 1988, from 1 p.m. to 4 p.m..

ADDRESS: The meeting will be held at: Environmental Protection Agency, North Conference Room 3, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Janet Bearden, Emergency Planning and Community Right-to-Know Hotline (WH-562A), 401 M Street SW., Washington, DC 20460, Telephone: (800) 535-0202, in Washington, DC and Alaska: (202) 479-2449.

SUPPLEMENTARY INFORMATION: A public meeting is scheduled to present the EPA planned approach for making a toxic chemical release inventory publicly available on a computer data base as mandated under section 313(j) of the Emergency Planning and Community Right-to-Know Act.

The Emergency Planning and Community Right-to-Know Act contains chemical information-gathering provisions of widespread interest to the public, the industry, and to State and local governments. The EPA Office of Toxic Substances (OTS) is specifically responsible for implementing section 313. Under section 313, owners and operators of certain industrial facilities which manufacture, process, or otherwise use any of more than 300 listed toxic chemicals must report annually their releases of such chemicals to all environmental media. The first reports are due by July 1, 1988, for calendar year 1987 data, and annually thereafter on July 1, for the previous calendar year.

Under section 313(j) the public must have access to the toxic chemical release inventory information through computer telecommunications. EPA investigated, in detail, four possible options suggested and discussed at a public meeting on April 20, 1987.

The four options for making the section 313 toxic chemical release inventory available to the public are: (1) An EPA clearinghouse with direct access to an EPA data base; (2) a commercial computer data base vendor; (3) another government agency with an established computer data base network; and (4) a non-profit university data base information provider. The public would access the information using the search, retrieval and display features provided by the computer system of the selected option. Section 313 data on magnetic tape will also be available through the National Technical Information Service (NTIS).

The EPA planned approach for making section 313 toxic release inventory available to the public is option three (interagency agreement with another government agency). The selection of this approach is based on a comparison of (1) system features based on potential user requirements; (2) cost to the user; (3) cost to EPA; and (4) timeliness of implementation and long-term availability of all four options. EPA believes that option three best meets the criteria at the basic level of required system features, while offering the availability of extensive complementary health and environmental effects files. Potential data base users identified such files as a desirable system feature.

A public meeting is scheduled on March 30, 1988 to discuss the four options for making the section 313 toxic chemical inventory publicly available on a computer database, the EPA planned approach, and the process by which EPA arrived at the planned approach. A document entitled "Options for Making the Toxic Release Inventory (TRI) Data Base Accessible to the Public" is available to assist the public in providing written and/or oral comment. EPA encourages anyone interested in attending the public meeting to review the document. Persons wishing to attend this meeting and/or interested in obtaining a copy of the document should call the Emergency Planning and Community Right-to-Know Information Hotline at the telephone number listed under **FOR FURTHER INFORMATION CONTACT.**

Written comments are invited in advance, by March 23, 1988, and should be submitted to: Linda A. Travers, Director, Information Management Division, Office of Toxic Substances (TS-793), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Written comments are also welcome at the meeting.

Persons wishing to present oral comments at the meeting are urged to contact the telephone number listed under **FOR FURTHER INFORMATION CONTACT** as soon as possible. Time slots of approximately 10 minutes each will be allocated on a first come, first served basis for oral comments.

Dated: March 3, 1988.

Linda Travers,

Director, Inventory Management Division, Office of Toxic Substances.

[FR Doc. 88-5153 Filed 3-8-88; 8:45 am]

BILLING CODE 6560-50-M

[OPP-180761; FRL-3336-8]

Receipt of an Application for a Specific Exemption To Use Avermectin B_1; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the Oregon Department of Agriculture (hereafter referred to as the "Applicant") for use of avermectin B_1 (Agrimec 0.15 EC Miticide/Insecticide™) to control two-spotted spider mites (*Tetranychus urticae*); yellow spider mites (*Eotetranychus carpini*); and McDaniel spider mites (*Tetranychus mcdanieli*) on 18,000 acres of pears in Oregon. Avermectin B_1 (CAS 63AB) contains a mixture of avermectins containing > 80% avermectin B_{1a} (5-0-demethyl avermectin A_{1a}) and ≦20% avermectin B_{1b} (5-0-demethyl-25-de(1-methylpropyl-25-(1-methylethyl) avermectin A_{1a}). In accordance with 40 CFR 166.24, EPA is soliciting comment before making the decision whether or not to grant this specific exemption request.

DATE: Comments must be received on or before March 24, 1988.

ADDRESS: Three copies of written comments, bearing the identification notation "OPP-180761 "should be submitted by mail to:

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

In person, bring comments to: Rm. 246, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information (CBI)." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for inspection in Rm. 246 at the address given above from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail:

Libby Pemberton, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Office location and telephone number: Rm. 716, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-1806).

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any provisions of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue a specific exemption for the use of avermectin B_1, manufactured as Agrimec 0.15 EC Miticide/Insecticide™, by MSD AGVET, a division of Merck & Co., Inc., on pears in Oregon. No tolerances have been established for avermectin B_1 on any raw agricultural commodities.

Information in accordance with 40 CFR Part 166 was submitted as part of this request. The Applicant proposes ground applications applied at a rate of 10 to 20 ounces of product per acre per application. A maximum of two applications will be made but no more than 20 ounces product may be applied per acre per crop season. Treatment would not be allowed 7 days prior to harvest. Applications would be made from April 20, 1988 through September 1, 1988.

The Applicant indicates that during the past three years there has been an increasing and alarming mite resistance to registered miticides. Growers have been making four and five applications (either individual or combinations of pesticides using cyhexation, hexakis, oxamyl, amitraz, dicofol, formetanate, chinomethionat, ethion and/or parathion.

The Applicant indicates that without adequate control of the mites economic losses expected would primarily come in the form of loss of fruit size, set, and quality. Losses in fruit size and lower fruit quality, without the requested acaricide this year, could total over $4.5 million.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require that the Agency publish notice in the **Federal Register** and solicit public comment on an application involving the first food use of a pesticide. Accordingly, interested persons may submit written views on this subject to the Program Management and Support Division at the address above.

The Agency, accordingly, will review and consider all comments received during the comment period.

Dated: February 17, 1988.

Edwin F. Tinsworth,

Director, Registration Division, Office of Pesticide Programs.

[PF-492; FRL-33369]

Pesticide Tolerance Petitions; Initial Filings and Amendment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the filing of pesticide petitions proposing the establishment of tolerances and/or regulations for residues of certain pesticide chemicals in or on certain agricultural commodities and one amended petition.

ADDRESS: By mail, submit written comments to:

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Registration Division (TS-767C), Attn: Product Manager (PM) named in the petition, Environmental Protection Agency, Office of Pesticide Programs, 401 M Street SW., Washington, DC 20460.

In person, contact the PM named in each petition at the following office location/telephone number:

Production manager	Office location/ telephone number	Address
Richard Mountfort (PM 23).	Rm. 237, CM #2, 703-557-1830.	EPA, 1921 Jefferson Davis Highway, Arlington, VA 22202.
Robert Taylor (PM 25).	Rm. 245, CM #2, 703-557-1800.	Do.
Jeff Kempter (PM 32).	Rm. 711, CM #2, 703-557-7471.	Do.

SUPPLEMENTARY INFORMATION: EPA has received pesticide (PP) and/or food and feed additive (FAP) petitions as follows, proposing the establishment and or amendment of tolerances or regulations for residues of certain pesticide chemicals in or on certain agricultural commodities.

Initial Filings

1. *PP 8F3599.* Hoechst Celanese Corp., Route 202-206, Somerville, NJ 08876, proposes amending 40 CFR 180.430 by establishing a regulation to permit the residues of the herbicide fenoxaprop-ethyl ((±)-ethyl 2-[4-[(6-chloro-2-benzoxazolyl)oxy]phenoxy]propanoate) and its metabolites, 2-[4-[(6-chloro-2-benzoxazolyl)oxy]phenoxy]propanoic acid and 6-chloro-2,3-dihydro-benzoxazol-2-one, in or on cottonseed, wheat grain, peanuts, and peanut hulls at 0.05 ppm. The proposed analytical method for determining residues in gas chromatograph. (PM 23).

2. *PP 8F3600.* Dow Chemical U.S.A., P.O. Box 1706, Midland, MI 48641-1706, proposes amending 40 CFR 180.431 by establishing a regulation to permit the residues of the herbicide clopyralid (3, 6-dichloro-2-pyridinecarboxylic acid) in or on sugar beet roots and tops at 0.5 ppm. The proposed analytical method for determining residues is gas chromatography. (PM 23).

3. *FAP 8H5551.* Dow Chemical U.S.A., P.O. Box 1706, Midland, MI 48641-1706, proposes amending 21 CFR 561.439 by establishing a regulation to permit the residues of the herbicide clopyralid (3, 6-dichloro-2-pyridinecarboxylic acid) in or on sugar beet molasses at 7.0 ppm. (PM 23).

4. *PP 8F3601.* Bionox Corp., 6890 E. Loma del Bribon, Tucson, AZ 85715, proposes amending 40 CFR Part 180 by establishing an exemption from the

requirement of a tolerance for the pesticide chemical sodium hypochlorite in or on soybean, alfalfa, clover, vetch, cabbage, lupine, barley, oats, wheat, rice, corn, rye, cotton, peanuts, pine, pea, sunflower, safflower, celery, asparagus, eggplant, cauliflower, cucumber, pepper, sugar beet, tomato, watermelon, popcorn, carrot, sorghum, and tobacco seed. (PM 32).

5. *PP 8F3603*. Gilmore, Inc., 1755 N. Kirby Parkway, Suite 300, Memphis, TN 38199–4367, proposes amending 40 CFR Part 180 by establishing a regulation to permit the residues of the herbicide pyridate [o-(6–choloro–3–phenyl–4–pyridazinyl)–S–octyl–carbonothioate], its main metabolite CL–9673 [6–chloro–3–phenyl–pyridazine–4–ol] and conjugates of CL–9673 in or on alfalfa (forage, seed, and hay), broccoli, cabbage (with or without wrapper leaves), corn (grain, forage, silage, and fodder), onion (bulb), peanut (nutmeat, vines, and hulls), sorghum (grain, forage, fodder, silage, and hay), and tomato fruit at 0.03 ppm and peanut hay at 0.10 ppm. The proposed analytical method for determining residues is gas liquid chromatography. (PM–25)

6. *FAP 8H5552*. Dow Chemical U.S.A., Agricultural Products Department, P.O. Box 1706, Midland, MI 48640, proposes amending 21 CFR Part 561 by establishing a regulation to permit the residues of the herbicide methyl 2–(4–((3–chloro–5(trifluoro–methyl)–2–pyridinyl)oxy)phenoxy) propanoate (haloxyfop–methyl) and its metabolite, 2–(4–((3–chloro–5–(trifluoro–methyl) pyridingyl)oxy)phenoxy) propanoic acid (haloxyfop), free and conjugated, all expressed as haloxyfop, in or on soybean hulls at 2.0 ppm, soybean meal at 4.0 ppm, soybean oil at 8.0 ppm, and soybean soapstock at 2.0 ppm. (PM 23).

Amended Petition

PP 6F3431. In the **Federal Register** of October 8, 1986 (51 FR 36063), EPA issued a notice announcing that E.I. du Pont de Nemours & Co., Walkers Mill Bldg., Barley Mill Plaza, Wilmington, DE 19898, had filed pesticide petition 6F3431 proposing to amend 40 CFR Part 180 by establishing tolerances for residues of the herbicide methyl 3–[[[[(4–methoxy–6–methyl–1,3,5–triazin–2–yl)–amino]carbonyl]amino]sulfonyl]–2–thiophenecarboxylate in or on the commodities barley grain and wheat grain at 0.05 ppm. The company is amending its petition to include wheat straw and barley straw at 0.1 ppm.

Authority: 21 U.S.C. 346a.

Dated: February 17, 1988.

Edwin F. Tinsworth,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[OPP–180762; FRL–3336–7]

Receipt of Application for an Emergency Exemption From Mississippi To Use Tricyclazole; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the Mississippi Department of Agriculture (hereafter referred to as "Applicant") to use the fungicide tricyclazole (CAS 41814 78 2) to treat 60,000 acreas of rice for control of blast fungus, *Pyricularia oryzae*. EPA, in accordance with 40 CFR 166.24, is required to issue a notice of receipt and solicit public comment before making the decision whether to grant the exemption.

DATE: Comments should be received on or before March 24, 1988.

ADDRESS: Three copies of written comments, bearing the identification notation "OPP–180762," should be submitted by mail to:

Information Services Section, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

In person, bring comments to: Rm. 246, Crystal Mall 2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed pursuant to this notice will be available for public inspection in Rm. 246, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail:

Jim Tompkins, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Office location and telephone number: Rm. 716D, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA (7093–557–1806).

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue a specific exemption for the use of tricyclazole, 5-Methyl-1,2,4-triazolo (3,4-b) benzothiazole, for control of blast fungus on rice.

Information in accordance with 40 CFR Part 166 was submitted as part of this request. Tricyclazole is not currently registered in the United States. Tricyclazole is applied to rice in many areas of the world where rice blast is a commercial problem.

According to the Applicant, blast surfaced as a major problem in Mississippi over the last two years causing a loss of approximately 20 bushels per acre over 45 percent of the acres planted in rice in Mississippi. The problem with blast is a result of a build up of races IC 17 and IB 49 of *Pyricularia oryzae* and the widespread planting of susceptible varieties of rice. Mississippi states that due to its high yield potential of high quality rice, the Newbonnet variety has become one of the mostly commonly planted varieties in Arkansas and Mississippi since its introduction several years ago. The Newbonnet variety is somewhat resistant to sheath blight caused by the fungus *Rhizoctonia solani* but is susceptible to blast. Sheath blight has been the cause of a majority of the loss in rice yield in recent years according to the Applicant. Varieties of rice such as Lemont that have some resistance to blast are highly susceptible to sheath blight. Plant breeders indicate that by 1990 a rice variety with good agronomic characteristics will be available which has excellent resistance to blast; thus rice growers will need a fungicide to control rice blast probably through the 1988 and 1989 growing seasons. Mississippi indicates that without the availability of a more effective fungicide for blast control, rice producers may avoid the planting of Newbonnet which will force them into planting much of the rice acreage to Lemont leading to the potential for widespread damage from a varietal monoculture.

According to the Applicant, currently registered fungicides do not provide adequate control of blast. Tilt and Rovral which suppress the development of sheath blight have little or no activity on blast. Benlate only suppresses blast development and under optimum conditions for blast occurrence even with proper timing of Benelate applications, losses from blast can be as much as 25 percent. Whereas Benelate only suppresses blast development, Beam (tricyclazole) manufactured by Elanco Inc. provides as much as 90 percent control.

The Applicant proposes to make two split applications of tricyclazole at a maximum rate of 0.5 lb. a.i./acre (2/3 lb. of Beam 75W) followed by a second application, ten to fourteen days later, at a rate of a 0.5 lb. a.i./acre. Applications would be made in five to ten gallons of water by air and ten to twenty gallons of water by ground equipment.

This notice does not constitute a decision by EPA on this application. The regulations governing section 18 require publication of a notice in the **Federal Register** of receipt of an application for a specific exemption proposing use of a new chemical (i.e. an active ingredient not contained in any currently registered pesticide). The regulations also provide for the opportunity for public comment.

Accordingly, interested persons may submit written views on this subject to the Program Management and Support Division at the address given above.

The Agency will review and consider all comments received during the comment period in determining whether to issue this emergency exemption request.

Dated: February 17, 1988.

Edwin F. Tinsworth,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE [illegible]

[OPP–50676; FRL–3337–4]

Issuance of Experimental Use Permits; E.I. du Pont de Nemours and Co., Inc. et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted experimental use permits to the following applicants. These permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

FOR FURTHER INFORMATION CONTACT: By Mail: Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460

In person or by telephone: Contact the product manager at the following address at the office location or telephone number cited in each experimental use permit: 1921 Jefferson Davis Highway, Arlington, VA.

SUPPLEMENTARY INFORMATION: EPA has issued the following experimental use permits:

352–EUP–129. Extension E.I. du Pont deNemours & Company, Inc., Agricultural Chemicals Department, Walker's Mill Building, Barley Mill Plaza, Wilmington, DE 19898. This experimental use permit allows the use of 231.25 pounds of the herbicide methyl 2-[((((4,6-dimethoxy pyrmidin-2-yl)-amino)carbonyl)amino)sulfonyl)methyl]benzoate ona total of 3,700 acres of rice to evalute the control of various weeds. The program is authorized only in the States of Arkansas, California, Louisiana, Mississippi, Missouri, and Texas. The experimental use permit is effective from January 21, 1988 to February 1, 1989. A temporary tolerance for residues of the active ingredient in or on rice has been established. (Richard Mountfort, PM 23, Rm. 237, CM #2, (703–557–1830))

8340–EUP–10. Extension. Hoechst Celanese Corporation, Route 202–206 North, Somerville, NJ 08876. This experimental use permit allows the use of 1,371 pounds of the herbicide monoammonium 2-amino-4-(hydroxymethylphosphinyl) butanoate on a total 914 acres of citrus, pome fruit, stone fruit, soybeans, vine crops, and non-crop areas to evaluate the control of weeds. The program is authorized in the States of Alabama, Arizona, Arkansas, California, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Tennessee, Virginia, Washington, and West Virginia. The experimental use permit is effective from January 12, 1988 to January 12, 1989. A temporary tolerance for residues of the active ingredient in or on citrus, grapes, pome fruit, stone fruit, and soybean seed has been established. (Richard Mountfort, PM 23, Rm. 237, CM#2, (703–557–1830))

50658-EUP-2. Renewal. Merck Sharp and Dohme Research Laboratory, Hillsborough Road, Three Bridges, NJ 08887. This experimental use permit allows the use of 161.25 pounds of the miticide avermectin and its delta 8,9-geometric isomer on a total of 4,700 acres of cotton to evaluate the control of various cotton insects. The program is authorized only in the States of Alabama, Arizona, Arkansas, California, Florida, Georgia, Louisiana, Mississippi, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas. The experimental use permit was previously effective from November 15, 1986 to November 15, 1987; the permit is not effective from January 21, 1988 to January 21, 1989. A temporary tolerance for residues of the active ingredient in or on cottonseed has been established. (George LaRocca, PM 15, Rm. 204, CM#2, (703–557–2400))

53219-EUP-1. Renewal. Mycogen Corporation, c/o W.R. Landis Associates, Inc., P.O. Box 5126, Valdosta, GA 31603–5126. This experimental use permit allows the use of 150 pounds of the fungicide *alternaria cassiae* on a total of 455 acres of cotton, peanuts, and soybeans to evaluate the control of coffee senna and sicklepod. The program is authorized only in the States of Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, and North Carolina. The experimental use permit was previously effective from May 10, 1985 to May 10, 1986; the permit is now effective from January 13, 1988 to January 12, 1989. A temporary exemption from the requirement of a tolerance for residues of the active ingredient in or on cotton, peanuts, and soybeans has been established. (Richard Mountfort, PM 23, Rm. 237, CM#2, (703–557–1830))

Persons wishing to review these experimental use permits are referred to the designated product managers. Inquiries concerning these permits should be directed to the persons cited above. It is suggested that interested persons call before visiting the EPA office, so that the appropriate file may be made available for inspection purposes from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

Authority: 7 U.S.C. 136c.

Dated: February 23, 1988.

BILLING CODE [illegible]

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No: 224–200092

Title: Port of New Orleans Lease Agreement.

Parties:

Board of Commissioners of the Port of New Orleans
H.N.V. Central River Front Corporation (H.N.V.)

Synopsis: The proposed agreement sets forth the terms and conditions for a public export warehouse (H.N.V.) to handle grain and rice for the U.S. Department of Agriculture and private exporters.

Agreement No: 224–200093

Title: Port of New Orleans Terminal Agreement.

Parties:

Port of New Orleans
Asland Cement Corporations (Asland)

Synopsis: The proposed agreement provides for the lease of a portion of the Perry Street Wharf on the Mississippi River to be used by Asland for the loading/unloading and storage of cement, cement products, ceramic products and other associated materials.

Agreement No: 224–200094

Title: Port of Tampa Lease Agreement.

Parties:

Tampa Port Authority
Louisville Scrap Material Co., Inc. (Louisville)

Synopsis: The proposed agreement provides for the lease of approximately 11.45 acres of land in Hillsborough County, Florida, by Louisville. The term of the lease is for three years, with two five-year options for renewal.

Agreement No: 224–200095

Title: Ponce Terminal Agreement.

Parties:

Administrative Board of the Municipal Piers of Ponce
Ponce Port Administrative Corporation (PPAC)

Synopsis: The proposed agreement provides for the 18 years lease of terminal facilities at Ponce Harbor, Puerto Rico, to be operated by PPAC to dock vessels and load/unload, marshal and warehouse cargo.

Agreement No: 224–200091

Title: Port of Houston Authority Terminal Agreement.

Parties:

Port of Houston Authority of Harris County, Texas
Port Houston Terminals, Inc.

Synopsis: The proposed agreement assigns the Port Houston Terminals, Inc. to perform or have performed public freight handling services at the Port's Wharves and Transit Sheds Number 16 through 18. The freight handling services include the loading of cargo onto, or unloading cargo from, land carriers at the facility subject to charges, rates and rules in the Port's Tariff No. 8.

By Order of the Federal Maritime Commission.

Dates: March 3, 1988.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 203–011184–001

Title: U.S./Middle East Discussion Agreement.

Parties:

The "8900" Lines
Jugolinija

Synopsis: The proposed amendment would delete ports and points in Canada from the geographic scope of the agreement. The parties have requested a shortened review period.

Agreement No.: 207–011174

Title: Transnave-Navconsa Joint Service Agreement.

Parties:

Transportes Navieros Ecuatorianos
Naviera Consolidada, S.A.

Synopsis: The proposed agreement would establish a joint service between the parties in the trade between U.S. Gulf and Florida ports, and inland points via such ports, and ports and points in Mexico, Costa Rica, Panama and Ecuador. The service would operate under the trade name of Gran Golfo Express.

Agreement No.: 232–011175

Title: American Transport Line, Ltd.,/Senator Linie GmbH & Co., KG, (Senator) Space Charter Agreement.

Parties:

American Transport Line, Ltd.
Senator Linie GmbH & Co., KG, (Senator)

Synopsis: The proposed agreement would permit the parties to charter space on one another's vessels, to rationalize sailings and to interchange equipment in the trade between U.S. East Coast ports and ports in North Europe. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

[Docket No. 88–4]

Delhi Petroleum Pty. Limited v. U.S. Atlantic & Gulf/Australia-New Zealand Conference and Columbus Line, Inc.; Filing of Complaint and Assignment

Notice is given that a complaint filed by Delhi Petroleum Pty. Limited ("Complainant") against U.S. Atlantic and Gulf/Australia-New Zealand Conference and Columbus Line, Inc. ("Respondents") was served March 3, 1988.

Complainant alleges that Respondents have violated sections 10(b)(1), 10(b)(6)(A), 10(b)(6)(E) and 10(b)(12), Shipping Act of 1984, 46 U.S.C. app. § 1709(b)(1), (b)(6)(A), (b)(6)(E) and (b)(12), and sections 14 and 15, Shipping Act, 1916, 46 U.S.C. app. sections 812 and 814 through the assessment of freight charges in excess of those lawfully applicable on a shipment of oilwell equipment and supplies moving from the Port of Houston, Texas U.S.A. to the Port of Brisbane, Australia.

This proceeding has been assigned to Administrative Law Judge Norman D. Kline ("Presiding Officer"). Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the Presiding Officer in this proceeding shall be issued by March 3, 1989, and the final decision of the Commission shall be issued by July 3, 1989.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

March 2, 1988.

Background

Notice is hereby given of final approval of proposed information collection(s) by the Board of Governors of the Federal Reserve System (Board) under OMB delegated authority, as per 5 CFR 1320.9 (OMB Regulation on Controlling Paperwork Burdens on the Public).

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Nancy Steele—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202–452–3822)
OMB Desk Officer—Robert Fishman—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3228, Washington, DC 20503 (202–395–7340)

Proposal to approve under OMB delegated authority the extension, without revision, of the following report:

Report title: Ongoing Intermittent Survey of Households.

Agency form number: FR 3016.

OMB Docket Number: 7100–0150.

Frequency: Monthly if needed.

Reporters: Households and individuals.

Annual reporting hours: 156.

Small businesses are affected.

General description of report: This information collection is voluntary [12 U.S.C. 225a, 263, 1828(c), 1842, 1843, 4008, and 15 U.S.C. 1693b(a)]. No issues arise either under the Freedom of Information Act (FOIA) or under the Privacy Act.

The survey provides the Federal Reserve with considerable flexibility in obtaining household-based information specifically tailored to the Federal Reserve's policy and regulatory and operational responsibilities.

Board of Governors of the Federal Reserve System, March 2, 1988.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

Change in Bank Control Notice; Acquisition of Shares of Banks or Bank Holding Companies

The notification listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Bank's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than March 24, 1988.

A. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Senior Vice President), 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Michael W. Cahoone* or Sharon L. Cahoone, Cottonwood Falls, Kansas; to acquire an additional 38.38 percent of the voting shares of Elmdale Bancshares, Inc., Elmdale, Kansas, and thereby indirectly acquire The Peoples Exchange Bank, Elmdale, Kansas.

Board of Governors of the Federal Reserve System, March 3, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Farmers National Bancorp et al.; Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 255.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence on or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than March 30, 1988.

A. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Farmers National Bancorp*, Annapolis, Maryland; to engage *de novo* through its subsidiary Farmers National Mortgage Corporation, Annapolis, Maryland, in making residential mortgages and packaging them for resale in the secondary mortgage market, while retaining service processing rights pursuant to § 225.25(b)(1)(iii) of the Board's Regulation Y.

B. **Federal Reserve Bank of Chicago** (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Midwest Financial Group, Inc.*, Peoria, Illinois; to engage *de novo* through its subsidiary, Midwest Financial Mortgage Banking Company, Peoria, Illinois, in marketing and servicing loans secured by mortgages or real estate pursuant to § 225.25(b)(1) of the Board's Regulation Y.

C. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Independence Financial Corporation*, Bellvue, Nebraska; to engage *de novo* in mortgage banking activities through a subsidiary to be known as Standard State Mortgage Company, Independence, Missouri, pursuant to § 225.25(b)(1) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, March 3, 1988.

James McAffee.

Associate Secretary of the Board.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than March 30, 1988.

A. **Federal Reserve Bank of Philadelphia** (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *Guaranty Bancshares Corporation*, Shamokin, Pennsylvania; to acquire Brant Leasing, Inc., Trevosc, Pennsylvania, and thereby engage in the leasing of personal property to commercial enterprises pursuant to § 225.25(b)(5) of the Board's Regulation Y. These activities will be conducted in the State of Pennsylvania.

Board of Governors of the Federal Reserve System, March 3, 1988.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 88–5068 Filed 3–8–88; 8:45 am]

BILLING CODE 6210–01–M

The Royal Bank of Canada Montreal, Canada; Application To Engage in Various Securities Activities

The Royal Bank of Canada, Montreal, Canada ("Applicant"), has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) ("BHC Act") and § 225.23(a)(2) and (3) of the Board's Regulation Y (12 CFR 225.23(a) (2) and (3)), to acquire Dominion Securities Corporation, New York, New York, and thereby engage in:

(1) Providing brokerage and investment advisory services to institutional customers and Company's affiliates on a combined basis;

(2) Providing advice in connection with mergers and acquisitions, divestitures, loan syndications, interest rate swaps, interest rate caps and similar transactions to unaffiliated financial and nonfinancial institutions; and

(3) Providing financial advice to the Canadian federal, provincial and municipal governments, such as with respect to the issuance of their securities in the U.S.

Applicant has also applied to engage in providing discount brokerage services to non-institutional customers together with related securities credit services pursuant to the Board's Regulation T (12 CFR Part 221) and incidental activities such as securities borrowing and lending; furnishing general economic information and advice, general economic statistical forecasting services and industry studies to institutional customers and Company's affiliates; providing portfolio investment advice and research to institutional customers and Company's affiliates; and underwriting and dealing in obligations of the United States, general obligations of states and their political subdivisions, and other obligations that state member banks are authorized to underwrite and deal in under 12 U.S.C. 24 and 335. The Board has previously found these latter activities to be generally permissible for bank holding companies. 12 CFR 225.25(b)(15), (4)(iv), 4(iii) and (16) respectively.

The Board previously has determined that the combined offering of investment advice with securities brokerage services to institutional customers from the same bank holding company subsidiary is a permissible nonbanking activity and does not violate the Glass-Steagall Act. *National Westminster Bank PLC*, 72 Federal Reserve Bulletin 584 (1986) ("*NatWest*"); *Manufacturers Hanover Corporation*, 73 Federal Reserve Bulletin 930 (1987) ("*Manufacturers Hanover*"). That position has been upheld by the U.S. Court of Appeals for the District of Columbia Circuit in its affirmance of the Board's *NatWest* Order. *Securities Industry Ass'n v. Board of Governors*, 821 F.2d 810 (D.C. Cir. 1987), *cert. denied*, 56 U.S.L.W 3451 (U.S. Jan. 11, 1988) (No. 87–562). Applicant has proposed to conduct its brokerage activity in accordance with the limitations approved by the Board in *Manufacturers Hanover* except that, in this case, Applicant does not propose to have any officer or director interlocks with Company.

Applicant has also proposed to engage in providing advice in connection with financing transactions for unaffiliated financial and nonfinancial institutions, as previously approved by the Board in *Signet Banking Corpration*, 73 Federal Reserve Bulletin 59 (1987).

With regard to Applicant's proposed activity of providing financial advice to Canadian federal, provincial and municipal governments, the Board has previously approved providing financial advice to the Canadian federal and provincial governments. *Bank of Nova Scotia*, 74 Federal Reserve Bulletin _____ (Order dated February 12, 1988). Applicant contends that the proposed activity is virtually indistinguisable from the activities that the Board has previously approved. Moreover, Applicant states that Company has long-standing relationships with Canadian federal, provincial and municipal governments and has developed special expertise in advising such entities.

Any views or requests for hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than March 25, 1988. Any request for a hearing must, as required by § 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)), be accompanied by a statement in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of New York.

Board of Governors of the Federal Reserve System, March 2, 1988.

James McAfee,

Associate Secretary of the Board.

Food and Drug Administration

[Docket Nos. 87P–0214/CP through 87P–0214/CP0013]

Magnetic Resonance Diagnostic Device; Panel Recommendation and Report on Petitions for MR Reclassification

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment the recommendation of the Radiologic Devices Panel (the Panel) that FDA reclassify the magnetic resonance diagnostic device from class III (premarket approval) into class II (performance standards). The Panel made this recommendation after review of reclassification petitions filed by 13 manufacturers. FDA is also issuing for public comment its tentative findings on the recommendation. After reviewing any public comment on the recommendation and FDA's tentative findings, FDA will approve or deny the reclassification petitions by order in the form of a letter to each petitioner. FDA's decision on these reclassification petitions will be announced in the **Federal Register**

DATE: Comments by May 9, 1988.

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Joseph M. Sheehan, Center for Devices and Radiological Health (HFZ–84), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4874.

SUPPLEMENTARY INFORMATION: On June 18, 1987, FDA filed reclassification petitions submitted by the 13 manufacturers below. Twelve manufacturers requested reclassification of the magnetic resonance diagnostic device from class III into class II and one requested reclassification into class I. The petitions were submitted under section 513(f) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360c(f) and 21 CFR 860.120).

Petitioner	Model
Advanced NMR Systems, Inc.	Instascan.
Bruker Medical Instruments.	Tomikon BMT-1100.
Diasonics MRI Division	Diasonics MT/S.
Fonar Corp.	Beta-3000, Beta-3000M.
General Electric Co	Signa.
Instrumentarium	ULF MR Imaging System.
NMR Imaging, Inc	PermaScan.
Philips Medical Systems	Gyroscan R, Gyroscan S5, Gyroscan S15, Gyroscan S20.
Picker International, Inc.	Vista MR 1100, Vista MR 2055, Vista MR 2055 HP.
Resonex, Inc.	Rx–4000.
Siemens Medical Systems, Inc.	Magnetom M, Magnetom H.
Stuart Medical, Inc.	MD800–1A.
Thomson-CGR Medical Corp.	Magniscan 5000.

The versions of the generic type of device (magnetic resonance diagnostic device) listed above are automatically classified into class III under section 513(f)(1) of the act because they are not preamendments devices (i.e., devices which were in commercial distribution before May 28, 1976), and they are neither substantially equivalent to a preamendments device, nor substantially equivalent to any postamendments device (i.e., a device that has been placed in commercial distribution since May 28, 1976) which subsequently has been reclassified to class II or class I.

Section 513(f)(2) of the act provides that the manufacturer or importer of a device classified into class III under section 513(f)(1) of the act may file a petition for reclassification of the device into class I or class II. FDA's regulations in 21 CFR 860.134 set forth the procedures for filing and review of a petition for reclassification of such class III devices. For the purpose of reclassification of the magnetic resonance diagnostic device, it is necessary to show that the proposed new class has sufficient controls to provide reasonable assurance of the safety and effectiveness of the device.

Consistent with the act and the regulations, the agency referred the reclassification petitions to the Panel and on July 27, 1987, during an open public meeting, the Panel recommended that FDA reclassify the magnetic resonance diagnostic device from class III into class II, and that it be assigned a low priority for the establishment of a performance standard for the device. The Panel's recommendation appears as part II below.

I. Device History and Description

Laboratory magnetic resonance instruments have been routinely used since the early 1950's by chemists and physicists to study the molecular structure and dynamics of small homogeneous specimens (Ref. 1). The basic scientific principles of nuclear magnetic resonance were scientifically established well before devices using these same principles were developed for use on humans to obtain medical diagnostic information.

The fundamental scientific technology of magnetic resonance diagnostic devices is the phenomenom of magnetic resonance whereby certain nuclei when placed in a magnetic field experience a resonance condition and can absorb and emit energy at well-defined frequencies. In 1946, Felix Block and Edward Purcell first demonstrated the nuclear magnetic resonance principle, and they jointly received the Nobel Prize for Physics in 1952 for their discoveries. In 1971 Raymond Damadian of the State University of New York, Brooklyn, proposed use of measured magnetic relaxation times to discriminate between malignant tumors and normal tissue. In 1973, Paul Lauterbur of the State University of New York, Stony Brook, proposed using the basic principles of tomography to form a two- or three-dimensional magnetic resonance image. Since that time, a variety of other imaging and spectroscopic techniques have been used with the device.

As described by the Panel (part II, below), the magnetic resonance diagnostic device presents images or nuclear magnetic resonance parameters of the human body such as density or flow of resonant nuclei, relaxation times T1 and T2, and chemical shift. Electromagnetic signals are acquired from the body using nuclear magnetic resonance phenomena with a static magnetic field, gradient magnetic fields,and radiofrequency magnetic fields. Computers process this information and present an image, a spectrum, or localized nuclear magnetic resonance parameter data. Various imaging techniques and spectroscopy acquisition protocols are used.

The device consists of a main magnet system, magnetic gradient coil assemblies, radio frequency coil assemblies, associated power supplies, filters, amplifiers, signal analysis, display, recording, storage, and communication equipment, patient support and positioning equipment, as well as physiological motion gating and compensating devices and accessories. The main (static) magnetic field is generated by either a permanent magnet, a resistive magnet, or superconducting magnet. The systems subject to the petitions may include radiofrequency coils for use on the whole body, head, and various surfaces.

II. Recommendation of the Panel

At its meeting on July 27, 1987, the Panel considered petitions submitted by the following 13 manufacturers of magnetic resonance diagnostic devices: Advanced NMR Systems, Inc., Bruker Medical Instruments, Diasonics MRI Division, Fonar Corp., General Electric Co., Instrumentarium, NMR Imaging, Inc., Philips Medical Systems, Picker International, Inc., Resonex, Inc., Siemens Medical Systems, Inc., Stuart Medical, Inc., and Thomson-CGR Medical Corp.

Twelve of the petitioners requested reclassification of the magnetic resonance diagnostic device from class III into class II, and one requested reclassification into class I. The Panel was asked to: (1) Identify risks to health posed by the devices, (2) determine which class could reduce these risks, (3) decide whether or not to recommend reclassification, and (4) if reclassification to class II is recommended, recommend the priority for development of a performance standard. After considering the petitions and answering the questions posed to it, the Panel recommends that the magnetic resonance diagnostic device be reclassified from class III to class II and that FDA assign a low priority to development of a performance standard for the device.

III. Scope of the Panel's Recommendation

The reclassification covers the 20 petitioned models of the device and all devices substantially equivalent to them.

The magnetic resonance diagnostic device presents images which reflect the spatial distribution, and magnetic resonance spectra which reflect the frequency distribution, of nuclei exhibiting nuclear magnetic resonance. Other physical parameters derived from the images and spectra may also be produced. The functions of the device for which reclassification is requested include hydrogen-1 (proton) imaging, sodium-23 imaging, hydrogen-1 spectroscopy, phosphorus-31 spectroscopy, and chemical shift imaging (preserving simultaneous frequency and spatial information).

The magnetic resonance diagnostic devices for which reclassification is recommended meet the following exposure characteristics: (1) The head or trunk of a patient is exposed to static magnetic fields insufficient to produce significant adverse effect; (2) the patient is exposed to time-varying magnetic fields insufficient to produce peripheral nerve stimulation or other adverse effects; (3) the patient is exposed to radiofrequency magnetic fields insufficient to produce a core temperature increase in excess of 1°C and localized heating to greater than 38°C in the head, 39°C in the trunk, and 40°C in the extremities, or other adverse effect. A device which meets these characteristics and is accompanied by adequate labeling (Ref. 2) is expected to be safe and effective.

IV. Summary of the Panel's Reasons for the Recommendation

The panel recommends reclassification from class III into class II of the magnetic resonance diagnostic device for the following reasons:

1. General controls by themselves are insufficient to provide reasonable assurance of the safety and effectiveness of the device.

2. There is sufficient publicly available information to demonstrate that the risks to health have been determined for the magnetic resonance diagnostic devices for which reclassification has been requested. The relationships between the device's safety and performance parameters and risks have been established by valid scientific evidence, and there is sufficient publicly available information to establish a performance standard to control the device's safety and effectiveness.

The Panel recommended that FDA assign a low priority to the establishment of a performance standard for the generic type of device under section 514 of the act (21 U.S.C. 360(d)). The Panel believes the quality of the data in the petitions was sufficiently strong in describing the safety and effectiveness of the devices subject to the petitions, so that assigning a low priority for standards development is appropriate. All currently marketed magnetic resonance diagnostic devices have undergone premarket approval, and as a result there is a reasonable assurance of the device's safety and effectiveness. Additionally, devices subject to the petitions but not currently marketed are supported by substantial amounts of valid scientific evidence describing device safety and effectiveness.

The Panel based its recommendation for reclassification of the generic type of device on data in the petitions (Refs. 3 to 15) and additional valid scientific data presented to the Panel during its open meeting held on July 27, 1987 (Refs. 16 and 17). In sum, the Panel believes that premarket approval of the generic type of device is unnecessary to provide reasonable assurance of the device's safety and effectiveness, and that lesser controls can be expected to assure safety and effectiveness of the device.

V. The Panel's View of Device Related Risks and Benefits

A. Risks to Health

Risks to health identified in the petitions include: (1) Adverse effects of whole or partial body exposure to the static magnetic field, (2) adverse effects of exposure to time-varying magnetic fields, (3) adverse effects of absorption of energy from radiofrequency magnetic fields, (4) hazards from high acoustic noise levels, (5) hazards from laser beams, (6) electrical and mechanical hazards, (7) insufficient image or spectral quality resulting in reduced clinical utility, and (8) other potential hazards addressed by labeling.

Sufficient publicly available information exists to write a performance standard for the magnetic resonance diagnostic device to obviate these concerns.

B. Benefits

In the past few years, magnetic resonance imaging of hydrogen protons has become a well-established diagnostic technique. Its clinical uses are particularly numerous for the diagnostic evaluation of disorders of the head, spine, and central nervous system (Ref. 18). Because of the abundance of hydrogen protons in water throughout the body, the technique is useful for imaging all major organ systems and tissues (Ref. 19). Since sodium is one of the more abundant elements in the body, it is used to image many different anatomical sites. Sodium imaging is of clinical relevance due to the correlation of relative sodium concentrations in extra- and intracellular space as a function of disease or trauma (Ref. 20). Hydrogen proton spectroscopy is used in detection of ischemia, investigating metabolic pathways and kinetics, and cancer detection (Ref. 21). Phosphorus-31 spectroscopy is used to study normal energy metabolism in tissue, to describe diseased tissue energy metabolism, and to better understand and diagnose diseases (Ref. 22). In sum, use of the magnetic reasonance diagnostic device allows, with minimal risk, access to diagnostic information not available by any imaging techniques.

VI. Summary of Data Upon Which the Panel Recommendation is Based

The Panel considered a number of potential concerns regarding the safe and effective operation of a magnetic resonance diagnostic device. The following identifies the Panel's concerns and its determination, based on data, that a standard and general controls can provide a reasonable assurance of safety and effectiveness:

1. The static magnetic field produced by the main magnet determines the resonant radiofrequency of the nuclei of interest. Available literature indicates a consensus that no adverse effects are expected from whole body exposure or exposure of the head to magnetic fields with strength of 2 tesla or less for a period of 1 hour or less (Ref. 16). Many thousands of patients have been exposed to 2 tesla or less static magnetic fields with no adverse effects. A standard could be written to limit the static field to a level less than that which would produce significant biological hazard.

2. Time-varying magnetic fields (dB/dt) occur during switching of the magnetic gradients used for spatial localization of the acquired NMR signal. Circulating currents in biological systems may be induced, causing peripheral nerve stimulation. This risk can be reduced by limiting patient exposure to time-varying magnetic fields with strengths significantly less than those required to produce peripheral nerve stimulation (Refs. 3–18). Many thousands of patients have been exposed to such limited strength time-varying magnetic fields without exhibiting deleterious effects attributable to these fields. A standard could be written to limit the time-varying magnetic fields to levels less than those that would produce significant biological hazard.

3. Radiofrequency magnetic fields occur at the resonant frequency of the nuclei of interest. Radiofrequency energy absorption in the patient may cause systemic thermal overload and local thermal injury. Limiting that thermal increase to a rise in a patient's core body temperature of less than 1 °C controls this risk (Ref. 16). Standards could be written to adequately address this risk. In addition, radiofrequency power deposition may cause heating around metallic implants, tattoos, or permanent eyeliner. These risks can be controlled by placing appropriate warnings in the labeling.

4. High acoustic noise levels may be generated upon pulsing of the electrical current energizing the gradient coils.

Acoustic noise may be annoying, cause discomfort, or beyond certain levels be hazardous (Ref. 23). These risks can be reduced by following a standard which limits acoustic noise to levels below the occupational limits recommended by the American Conference of Governmental Industrial Hygienists for exposures of up to 1 hour per day (Ref. 24), or below the permissible time-averaged and peak noise exposure given by the Occupational Safety and Health Association (Ref. 23).

5. A laser system may be used in patient positioning. A laser has the potential for causing permanent eye injury, although no such injury has been reported. The lasers, which are considered electronic products capable of producing a beam of low power visible light radiation, meet power output limits of the Federal performance standard for class II laser products under the Radiation Control for Health and Safety Act of 1968.

6. Potential electrical and mechanical hazards can be controlled by a standard that requires that devices have adequate design specifications and adherence to good design practices.

7. Reduced clinical utility may result from insufficient image or spectral quality. Sufficient information, included in the petitions (refs. 3–15), exists to write a performance standard for image quality and spectroscopy performance measures. Indeed, the petitions referenced draft standards developed by the National Electrical Manufacturers Association that specifically address image quality measures, including signal-to-noise ratio, geometric distortion, uniformity, and slice thickness and spacing (Ref. 25), and spectroscopy performance measures, including spectral resolution, spectral calibration and labeling, and localization (Ref. 26), which could be used in writing a performance standard.

8. Concerns addressed by labeling (Ref. 2):

a. The field near the magnet, that is, the fringe field, may be strong enough to attract ferromagnetic objects such as tools with great force, causing a collision. This potentially hazardous situation can be controlled by placing warning statements in the labeling, such as warnings to restrict access to only authorized personnel, and requiring in-place procedures for emergency services of patients in areas where the fringe field is weaker. The field in or near the magnet may fatally interfere with the operation of devices such as cardiac pacemakers. This risk can be controlled by placing contraindications in the labeling prohibiting use of the magnetic resonance diagnostic device on patients with these devices. The static magnetic field may move or dislodge ferromagnetic materials within the patient's body, such as interacranial aneurysm clips, shrapnel fragments, and prostheses constructed of ferromagnetic material, which could cause life-threatening situations. The risk can be controlled by placing contraindications in the labeling against scanning patients with intracranial aneurysm clips or warning of the risk of scanning patients with other implanted ferromagnetic material.

b. Special concerns arise when scanning fetuses or infants who are particularly susceptible to thermal overload and require careful monitoring for signs of cardiocirculatory and respiratory distress. The risk can be controlled by placing appropriate warnings in the labeling.

c. Liquid helium and nitrogen cryogens are used to cool the superconducting wire in a superconducting magnet. Some boiloff of the gases occurs during normal operation. If the magnet quenches, the boiloff rate of the cryogens will increase, and gas could suddenly be released into the room causing asphyxiation of site personnel or patients. Labeling can describe proper venting of the system to ensure safety should this problem occur.

d. Due to the configuration of the system and the length of the exam, some patients become claustrophobic. Labeling to include a precautions section addressing the scanning of patients who are likely to develop claustrophobic reactions controls this risk.

e. Operator quality assurance tests and routine preventive maintenance procedures are required in the device labeling. These routine checks and maintenance procedures assist in optimizing image or spectral quality.

FDA's Tentative Findings

FDA tentatively agrees with the Panel's recommendation that the magnetic resonance diagnostic device described in the petitions be reclassified from class III into class II and that it be assigned a low priority for the establishment of a performance standard for the device.

Economic Considerations

After considering the economic consequences of approving this reclassification, FDA certifies that this notice requires neither a regulatory impact analysis, as specified in Executive Order 12291, nor a regulatory flexibility analysis, as defined in the Regulatory Flexibility Act (Pub. L. 96–354). Approval of this petition would not have a significant economic impact on a substantial number of small entities. However, it may permit small potential competitors to enter the marketplace by lowering the barriers to entry. The petitioners and all future manufacturers of the reclassified magnetic resonance diagnostic devices would be relieved of the costs of complying with the premarket approval requirements in section 515 of the act (21 U.S.C. 360(e)). There are no offsetting costs that the petitioners would incur from reclassification into class II other than those associated with meeting a standard once established. The actual cost of complying with a standard cannot be determined until the standard is developed. The magnitude of the economic savings from approval of this petition depends on the extent of the studies that the petitioners would have conducted in support of new premarket approval applications or supplements to existing premarket approval applications, and the number of future competitors satisfying the requirements of premarket approval. None of these parameters can be reliably calculated to permit quantification of the economic savings. Because of statutory deadlines (section 513(f)(2) of the act) and requirements in the regulations (21 CFR 860.134(b)(5), FDA is required to publish this notice in the **Federal Register** as soon as practicable. As authorized by section 8(a)(2) of Executive Order 12291, FDA is publishing in the **Federal Register** this notice without clearance of the Director, Office of Management and Budget. FDA will notify that office of the publication of this notice.

Interested persons may, on or before May 9, 1988, submit to the Dockets Management Branch (address above) written comments on this recommendation. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the name of the device and the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated February 27, 1988.

Frank E. Young,

Commissioner of Food and Drugs.

BILLING CODE 4160-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Receipt of Application for Permit; Texas A&M University et al.

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

[PRT–725379]

Applicant: Texas A & M University, College Station, TX

The applicant requests a permit to import 150 blood samples collected from captive Kemp's (=Atlantic) Ridley sea turtles (*Lepidochelys kempii*) at the Cayman Turtle Farm Ltd., Grand Caymen Islands, British West Indies for the purpose of continuing ongoing reproductive physiology and behavior studies.

[PRT–725518]

Applicant: Ralph V. Smith, Calimesa, CA

The applicant requests a permit to import eight pairs of scarlet-chested (splendid) parakeets (*Neophema splendida*) and eight pairs of turquoise parakeets (*Neophema pulchella*) from Mr. L. Lemmens, Putte, Belgium, for the purpose of enhancement of propagation of the species.

[PRT–725432]

Applicant: Rare Feline Breeding Center, Center Hill, FL

The applicant request a permit to export one male and one female captive born clouded leopard (*Neofelis nebulosa*) to the Zurich Zoo, Zurich, Switzerland for the purposes of propagation of the species and exhibition.

[PRT–724393]

Applicant: Circo Tihany San Angel, Mexico

The applicant requests a permit to impurt and reexport one pair of tigers (*Panthera tigris*), one male leopard (*P. pardus*), two male and one female chimpanzees (*Pan troglodytes*) and one pair of orangutans (*Pong pygmaeus*) for exhibition in the United States. All of the animals were born in captivity in Mexico. Conservation education will be provided for each of the above-listed species when they are on display in the U.S.

[PRT–725825]

Applicant: Ringling Brothers-Barum Bailey Circus, Washington, DC

The applicant requests a permit to import three male tigers, one female tiger (*Panthera tigris*) and two female leopards (*Panthera pardus*) born in captivity in Switzerland for Switzerland for the purpose of exhibition in a manner designed to educate the public about the ecological role and conservation needs of the species.

Documents and other information submitted with these applications are availble to the public during normal business hours (7:45 am to 4:15 pm) Room 400, 1375 K Street, NW., Washington, DC 20005, or by writing to the Director, U.S. Fish and Wildlife Service, Office of Mangement Authority, P.O. Box 27329, Washington, DC 20038–7329.

Interested persons may comment on any of these applications within 30 days of the date of this publication by sumbitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate applicant and PRT number when submitting comments.

Date: March 4, 1988.

Larry LaRochelle,

Acting Chief, Branch of Permits, Office of Management Authority.

BILLING CODE 4310-AN-M

Bureau of Land Management

[CO-942-08-4520-12]

Colorado; Filing of Plats of Survey

March 1, 1988.

The plat of survey of the following described lands will be officially filed in the Colorado State Office, Bureau of Land Management, Lakewood, Colorado, effective 10:00 a.m. April 15, 1988.

The plat representing the dependent resurvey of a portion of the Tenth Standard Parallel North (south boundary, T. 41 N., R. 12 W.), the survey of Private Land Claims, and a Public Land Tract, and the independent resurvey of the east boundary, T. 40 N., R. 12 W., New Mexico Principal

Meridian, Colorado, Group No. 738, was accepted June 20, 1988.

These surveys were expected to meet certain administrative needs of the U.S. Forest Service.

The protraction diagram of the following described townships will be filed in the Colorado State Office, Bureau of Land Management, Lakewood, Colorado effective 10:00 a.m. April 15, 1988.

Protraction Diagram No. 47, prepared to delineate the remaining unsurveyed public lands in T. 40 N., R. 11 W., T. 39 N., R. 12 W., and T. 40 N., R. 12 W., New Mexico Principal Meridian, Colorado was approved August 20, 1986.

This diagram was prepared to meet certain administrative needs of this Bureau.

All inquiries about this land should be sent to the Colorado State Office, Bureau of Land Management, 2850 Youngfield Street, Lakewood, Colorado, 80215.

Jack A. Eaves,

Chief, Cadastral Surveyor for Colorado.

BILLING CODE 4310-JB-M

National Park Service

Revision of Park Boundary; Allegheny Portage Railroad National Historic Site

AGENCY: National Park Service, Allegheny Portage Railroad National Historic Site.

ACTION: Notice of revision of park boundary.

Pursuant to section 307(a) of the Act of November 10, 1978 (92 Stat. 3467), the Park boundary was designated by publication of a Notice in the **Federal Register**, Vol. 45, No. 189, Friday, September 26, 1980 to include the lands depicted on boundary map numbered 423/80,008A dated July 1980.

Public Law 95-42 (91 Stat. 211) dated June 10, 1977 provides that the Secretary may make boundary changes to an area whenever he determines that to do so will contribute to, and is necessary for, the proper preservation, protection, interpretation, or management of such an area.

SUMMARY: Pursuant to Pub. L. 95-42, 16 U.S.C. section 460l-9(c), notice is given that the boundary of Allegheny Portage Railroad National Historic Site has been revised in the areas of Incline No. 8, Incline No. 9 and Incline No. 10 to include an addition of approximately 130 acres of abandoned railroad right-of-way. This area contains significant physical remains original to the Portage Railroad which were mentioned in the enabling legislation for the park.

SUPPLEMENTARY INFORMATION: Boundary Map numbered 423/80,008A dated July 1980, as above, attempted to portray the boundaries of all the separate units comprising Allegheny Portage Railroad National Historic Site. This map was too imprecise to correctly define these areas.

Therefore, notice is hereby given that the boundary of the Allegeny Portage Railroad National Historic Site has been revised in the areas as above, pursuant to Pub. L. 95-42, and to clarify the area of the Staple Bend Tunnel Area to contain the lands as depicted on boundary map numbered 423/80,010 dated September 1986.

The map is on file and available for inspection in the administrative office of the Allegheny Portage Railroad National Historic Site, P.O. Box 247, Cresson, Pennsylvania, 16630; in the office of the Mid-Atlantic Region, Land Resources Division, Custom House, Room 502, Second and Chestnut Streets, Philadelphia, Pennsylvania, 19106; and in the office of the National Park Service, Department of the Interior, 18th and C Streets, Washington, DC 20240.

Dated: December 31, 1986.

James W. Coleman, Jr.,

Regional Director, Mid-Atlcnic Region.

EDITORIAL NOTE: This document was received at the Office of the Federal Register March 4, 1988.

BILLING CODE 4310-70-M

National Capital Region; Potomac Greens Development; Intent To Prepare an Environmental Impact Statement

The National Park Service, by legislative mandate, intends to prepare and transmit to the Congress by March 5, 1989, an Environmental Impact Statement which shall review the traffic impact of only the proposed 38-acre Potomac Greens development opposite Daingerfield Island west of the George Washington Memorial Parkway, provided further that the National Park Service shall also review the impact of the development on the visual, recreational and historical integrity of the Parkway.

The Environmental Impact Statement shall also provide an evaluation of alternative acquisition strategies to include but not be limited to appraisal estimates for the access rights, the entire 38-acre parcel, that portion of the 38-acre parcel as defined approximately by the historic district boundary line, and any other recommendations by the National Park Service to mitigate the Parkway degradation effects of the proposed development so as to adequately protect and preserve the Parkway.

In order to provide the opportunity for public participation, a public meeting will be held on Wednesday, March 30, at the Potomac Landing Restaurant, Daingerfield Island, Alexandria, at 7:00 p.m., at which time public comments on the scope of the Environmental Impact Statement will be solicited.

Any questions on this matter may be addressed to Mr. Albert J. Benjamin, Office of Land Use Coordination, National Park Service, National Capital Region, 100 Ohio Drive SW., Washington, DC 20242, telephone: 202/426-6715.

Date: March 3, 1988.

Manus J. Fish, Jr.,

Regional Director, National Capital Region.

Subsistence Resource Commission of the Gates of the Arctic National Park; Meeting

AGENCY: National Park Service, Interior.

ACTION: Subsistence Resource Commission meeting.

SUMMARY: The National Park Service announces an upcoming meeting of the Subsistence Resource Commission of the Gates of the Arctic National Park. The following items will be discussed:

(1) Review of minutes from last meeting.

(2) Review of status of subsistence hunting plan.

(3) Review of Anaktuvuk Pass/National Park Service land exchange proposal.

(4) Review of 1988 park plans and activities.

(5) Any new business.

DATES:

March 17, 1988 (Thursday) 9 a.m. to 5 p.m.

March 18, 1988 (Friday) 9 a.m. to 1 p.m. or until adjournment.

Public comment March 17, 4 p.m. to adjournment.

ADDRESS: Meetings will be held at the Polaris Hotel, 427 First Avenue, Fairbanks, Alaska.

FOR FURTHER INFORMATION CONTACT: Roger J. Siglin, Superintendent, P.O. Box 74680, Fairbanks, Alaska 99707, telephone (907) 456-0350 in Fairbanks or (907) 692-5494 in Bettles, Alaska.

SUPPLEMENTARY INFORMATION: The Subsistence Resource Commissions are authorized by § 808 of the Alaska National Interest Lands Conservation Act (Pub. L. 96-487), and operate in accordance with the provisions of the Federal Advisory Committee Act.

Richard J. Stenmark,

Acting Regional Director.

INTERNATIONAL TRADE COMMISSION

3.5 Inch Microdisks and Media Therefor From Japan

AGENCY: United States International Trade Commission.

ACTION: Institution of a preliminary antidumping investigation and scheduling of a conference to be held in connection with the investigation.

SUMMARY: The Commission hereby gives notice of the institution of preliminary antidumping investigation No. 731-TA-389 (Preliminary) under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Japan of unrecorded flexible magnetic disk recording media, with or without protective covering, for ultimate use in recording and storing data with a 3.5" floppy disk drive, provided for in item 724.45 of the Tariff Schedules of the United States, that are alleged to be sold in the United States at less than fair value. As provided in section 733(a), the Commission must complete preliminary antidumping investigations in 45 days or in this case by April 11, 1988.

For further information concerning the conduct of this investigation and rules of general application, consult the Commission's Rules of Practice and Procedure, Part 207, Subparts A and B (19 CFR Part 207), and Part 201, Subparts A through E (19 CFR Part 201).

EFFECTIVE DATE: February 26, 1988.

FOR FURTHER INFORMATION CONTACT: Jennifer Hinshaw (202-252-1179), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-252-1809. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contract the Office of the Secretary at 202-252-1000.

SUPPLEMENTARY INFORMATION:

Background

This investigation is being instituted in response to a petition filed on February 26, 1988, by Verbatim Corp., Charlotte, North Carolina.

Participation in the Investigation

Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in §201.11 of the Commission's rules (19 CFR 201.11), not later than seven (7) days after publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who will determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Service List

Pursuant to §201.11(d) of the Commission's rules (19 CFR 201.11(d)), the Secretary will prepare a service list containing the names and addresses of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance. In accordance with §§ 201.16(c) and 207.3 of the rules (19 CFR 201.16(c) and 207.3), each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service.

Conference

The Director of Operations of the Commission has scheduled a conference in connection with this investigation for 9:30 a.m. on March 21, 1988, at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. Parties wishing to participate in the conference should contract Jennifer Hinshaw (202-252-1179) not later than March 15, 1988, to arrange for their appearance. Parties in support of the imposition of antidumping duties in this investigation and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference.

Written Submissions

Any person may submit to the Commission on or before March 23, 1988, a written statement of information pertinent to the subject of the investigation, as provided in § 207.15 of the Commission's rules (19 CFR 207.15). A signed original and fourteen (14) copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the rules (19 CFR 201.8). All written submissions except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired must be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of §201.6 of the Commission's rules (19 CFR 201.6).

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.12 of the Commission's rules (19 CFR 207.12).

By order of the Commission.

Kenneth R. Mason

Secretary.

Issued: March 2, 1988.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-276]

Certain Programmable Digital Clock Thermostats; Commission Decision Not To Review Initial Determination Terminating Investigation as to One Respondent on the Basis of a Settlement Agreement

AGENCY: U.S. International Trade Commission.

ACTION: Termination of respondent Hunter-Melnor, Inc. on the basis of a settlement agreement.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (ID) (Order No. 4) issued by the presiding administrative law judge (ALJ) terminating respondent Hunter-Melnor, Inc. from the above-captioned investigation on the basis of a settlement agreement.

FOR FURTHER INFORMATION CONTACT: George W. Thompson, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 252-1090.

SUPPLEMENTARY INFORMATION: On February 4, 1988, the presiding ALJ issued an ID terminating the investigation with respect to Hunter-Melnor, Inc. The ID granted the joint motion of complainant Emerson Electric Co. and Hunter-Melnor, Inc. to terminate the investigation with respect to Hunter-Melnor on the basis of a settlement agreement. No petitions for review of the ID or government agency or public comments were received.

This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and 19 CFR 210.53(h).

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202–252–1000.

Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–252–1810.

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: March 2, 1988.

BILLING CODE 7020-02-M

[Investigation No. 337–TA–274]

Certain Toggle Clamps for Clamping, Fixturing, Processing, and Original Equipment Manufacturing; Commission Decision Not To Review Initial Determination Terminating the Investigation as to all Respondents and Termination of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Nonreview of initial determination terminating the above-captioned investigation as to all respondents; termination of investigation.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (ID) granting motions to terminate the investigation as to all respondents on the basis of settlement agreements.

FOR FURTHER INFORMATION CONTACT: Mitchell Dale, Esq., Office of General Counsel, U.S. International Trade Commission, telephone 202–252–1087.

SUPPLEMENTARY INFORMATION: On August 10, 1987, the Commission instituted the instant investigation on the basis of a complaint filed by DE–STA–CO Division, Dover Corporation ("DE–STA–CO") alleging a violation of section 337(a) (19 U.S.C. 1337(a)) in the importation and sale of certain toggle clamps for clamping, fixturing, processing, and original equipment manufacturing by reason of (1) infringement of complainant's federally registered trademarks; (2) common law passing off; (3) infringement of common law trademark; (4) failure to design the country of origin; and (5) misappropriation of trade dress. 52 FR 31097 (Aug. 19, 1987). An investigation was instituted naming as respondents Tai-Wu Industry Co., Ltd. ("Tau-Wu"), Good Hand Enterprises Co. ("Good Hand"), All American Products Co. ("All American"), and Material Supply International, Inc. ("MSI").

On January 19, 1988, complainant filed a motion (Motion No. 274–11) to terminate the investigation as to Tai-Wu on the basis of a settlement agreement. On January 21, 1988, complainant and respondents Good Hand and MSI filed a joint motion (Motion No. 274–13) to terminate the investigation as to Good Hand and MSI on the basis of a settlement agreement. On January 25, 1988, complainant and All American filed a joint motion (Motion No. 274–14) to terminate the investigation as to All American on the basis of a settlement agreement. The Commission investigative attorney filed public interest statements supporting said motions to terminate the investigation.

On February 5, 1988, the presiding administrative law judge issue an initial determination (ID) (Order No. 6) granting the motions to terminate the investigation as to all respondents on the basis of the settlement agreements. No petitions for review or public or government agency comments were received.

This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.A. 1337) and Commission Rule 210.53 (19 CFR 210.53).

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202–252–1000. Hearing-impaired persons are advised that information on the matter can be obtained by contacting the Commission's TDD terminal on 202–252–1810.

By order of the Commission.

BILLING CODE 7020-02-M

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act; Air Products and Chemicals et al.

In accordance with Department policy, 28 CFR 50.7, and section 122(i) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), notice is hereby given that on February 24, 1988, a proposed consent decree in *United States* v. *Air Products and Chemicals, et al.*, Civil Action No. JH–88–365 was lodged with the United States District Court for the District of Maryland.

The proposed consent decree requires the defendants to implement the first phase of remedial action selected by the Environmental Protection Agency (EPA) to address the imminent and substantial endangerment to human health and the environment posed by the release or threat of release of hazardous substances at the Maryland Sand, Gravel and Stone Site, Cecil County, Maryland. The first phase of the remedy, to be conducted by the defendants, will focus on site security, drum removal, and shallow groundwater contamination. The decree also requires defendants to pay a small portion of the past costs incurred by EPA in connection with the site. The parties to the consent decree are the United States and all defendants named in *United States* v. *Air Products and Chemicals, Inc., et al.*, Civil Action No. JH–88–365, filed on February 24, 1988 in the United States District Court for the District of Maryland.

The Department of Justice will receive comments relating to the proposed consent decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 2050, and should refer to *United States* v. *Air Products and Chemicals, et al.*, DJ Ref. 90–11–2–225.

The proposed consent decree may be examined at the Office of the United States Attorney, District of Maryland, 8th Floor, U.S. Courthouse, 101 W. Lombard Street, Baltimore, Maryland 21201 and at the Region III office of the Environmental Protection Agency, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. Copies of the consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the Consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice. In requesting a copy, please enclose a check in the amount of $5.80 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Advisory Committee on Standards and Regulations for Diesel-Powered Equipment in Underground Coal Mines; Meeting

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of Advisory Committee meeting.

SUMMARY: This notice provides the date, time, place and agenda summary for the third meeting of the Mine Safety and Health Administration Advisory Committee on Standards and Regulations for Diesel-Powered Equipment in Underground Coal Mines.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances, Mine Safety and Health Administration, Room 631, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, Virginia 22203; phone (703) 235–1910.

SUPPLEMENTARY INFORMATION: Pursuant to the authority contained in sections 101 and 102(c) of the Federal Mine Safety and Health Act of 1977, a public meeting of the Advisory Committee on Standards and Regulations for Diesel-Powered Equipment in Underground Coal Mines will be held between the hours of 8:30 a.m. and 5:00 p.m. on March 24 and 25, 1988 at the Holiday Inn Westport, 1973 Craigshire, St. Louis, Missouri 63146; phone (314) 434–0100.

This nine-member advisory committee was formed to advise and make recommendations to the Secretary of Labor on safety and health standards and regulations related to the use of diesels in underground coal mines.

The agenda for this meeting will include presentations by a group of health researchers. These presentations will examine the results of the studies on the chemical and physical nature of diesel emissions, health effects of diesel emissions in laboratory animals, and the potential risk from human exposure to diesel emissions. At this meeting, the Committee will begin to discuss the potential health effects of diesel emissions on underground coal miners, and how diesel emissions may be monitored and controlled in the underground coal mining environment.

Official records of the meeting will be available for public inspection at the Office of Technical Support, Mine Safety and Health Administration, 4015 Wilson Boulevard, Room 913A, Arlington, Virginia 22203; phone (703) 235–1570.

Signed at Arlington, Virginia this 4th day of March 1988.

David C. O'Neal,

Deputy Assistant Secretary for Mine Safety and Health.

BILLING CODE 4510-43-M

NATIONAL COMMUNICATIONS SYSTEM

High Frequency Radio Automatic Link Establishment Subcommittee; Meeting

AGENCY: Office of Technology and Standards, National Communications System.

ACTION: Notice of meeting.

FOR FURTHER INFORMATION CONTACT: Mr. Robert T. Adair, U.S. Dept of Commerce, NTIA/ITS Mail Drop ITS.N1, 325 Broadway, Boulder, CO 80303 (303) 497–3723.

High Frequency (HF) Radio Automatic Link Establishment Committee, Federal Telecommunications Standards Committee; Open Meeting.

A meeting of the HF Radio Automatic Link Establishment (ALE) Subcommittee will be held April 15, 1988, 9:30 AM to 3:30 PM, Mitre Corp., Hayes Building, Conference Rooms A and B, 7525 Colshire Drive, McLean, VA. The HF Radio Automatic Link Establishment Subcommittee was formed to develop a proposed Federal Standard (pFS 1045) defining the technical requirements for design of adaptive high frequency (HF) radios which employ ALE techniques.

Agenda

1. Opening remarks by the Chairman.
2. Presentation of the Statement of Requirements.
3. Presentation of comments by organizations represented.

This meeting will be for the benefit of those who are interested in the development of this standard. A statement of requirements (SOR), drafted by the SOR Working Group will be presented at this meeting. A copy of the SOR is available upon request. Those wishing to attend must call the Chairman, Robert T. Adair, by April 8, 1988, for authorization to attend. Each organization will be allowed 20 minutes to present pertinent information to the subcommittee. Attendance will be limited to two (2) representatives per organization. Written statements and comments may be submitted before or after the meeting.

For further information, or copies of the minutes of this meeting, please call: Robert T. Adair, U.S. Dept of Commerce, NTIA/ITS Mail Drop ITS.N1, 325 Broadway, Boulder, CO 80303 (303) 497–3723.

Dennis Bodson,

Assistant Manager, NCS Office of Technology & Standards.

BILLING CODE 3610-05-M

NUCLEAR REGULATORY COMMISSION

Biweekly Notice Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (Pub. L.) 97–415, the Nuclear Regulatory Commission (the Commission) is publishing this regular biweekly notice. Pub. L. 97–415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from February 16, 1988 through February 26, 1988. The last biweekly notice was published on February 24, 1988 (53 FR 5484).

BEST COPY AVAILABLE

NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment requests is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Comission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration and Resource Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 4000, Maryland National Bank Building, 7735 Old Georgetown Road, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Copies of written comments received may be examined at the NRC Public Document Room, 1717 H Street NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By April 8, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene if filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions whch are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which statisfies these requirements with respect to a least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place before the issuance of any amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to *(Project Director)*: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel-White Flint, U.S. Nuclear Regulatory Commission, Washington, DC. 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and at the local public document room for the particular facility involved.

Arizona Public Service Company, et al., Docket No. STN 50-528, Palo Verde Nuclear Generating Station (PVNGS), Unit 1, Maricopa County, Arizona

Date of amendment request: January 21, 1988.

Description of amendment request: The proposed amendment would revise Technical Specification 3.4.8.3, relating to the operability of the Overpressure Protection Systems. This Specification requires that the overpressure protection system for the reactor coolant system (RCS) be operable whenever the RCS is cooling down and is below 255°F, or is heating up and is below 295°F, to assure that the pressure-temperature (P–T) limits of the reactor vessel are not exceeded. The proposed change would add a footnote to the heatup portion of the specification which would allow a heatup rate of 10°F/hour or less without overpressure protection provided that the RCS temperature is between 255°F and 295°F.

Basis for Proposed No Significant Hazards Consideration Determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in a margin of safety.

A discussion of the proposed change, as it related to these standards is presented below.

Standard 1—Involve a Significant Increase in the Probability or Consequences of an Accident Previously Evaluated

Figure 3.4–2 in Technical Specification 3/4.4.8 provides pressure-temperature (P–T) limit curves for various heatup rates of the RCS. The proposed change to Technical Specification 3.4.8.3, to permit a heatup rate of 10°F/hour for RCS temperatures between 255°F and 295°F, is within the acceptable range of Figure 3.4–2. Therefore, the proposed change does not increase the probability or consequences of any accident previously considered.

Standard 2—Create the Possibility of a New or Different Kind of Accident From Any Accident Previously Evaluated

The proposed change only affects the need to have the overpressure protection system operable during heatup of the RCS when the temperature is between 255°F and 295°F. The proposed change is in conformance with the acceptable P–T limits and allowable heatup rates currently in Figure 3.4–2 of the Technical Specifications. Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

Standard 3—Involve a Significant Reduction in a Margin of Safety

The proposed change does not involve a significant reduction in a margin of safety since the change is in conformance with the current P–T limits of Figure 3.4–2 in the Technical Specifications.

Accordingly, the Commission has proposed to determine that the above change does not involve a significant hazards consideration.

Local Public Document Room location: Phoenix Public Library, Business and Science Division, 12 East McDowell Road, Phoenix, Arizona 85004.

Attorney for licensees: Mr. Arthur C. Gehr, Snell & Wilmer, 3100 Valley Center, Phoenix, Arizona 85007.

NRC Project Director: George W. Knighton.

Arizona Public Service Company, et al., Docket No. STN 50-528, Palo Verde Nuclear Generating Station (PVNGS), Unit 1, Maricopa County, Arizona

Date of amendment request: February 2, 1988.

Description of amendment request: The proposed amendment would clarify the surveillance requirements for the waste gas holdup system in Technical Specification 3.11.2.5 to be consistent with the operability requirements specified for that system in Technical Specification 3.3.3.8. The proposed change would also make Specification 3.11.2.5 consistent with Technical Specification 3.11.2.5 previously approved by the staff for Palo Verde Units 2 and 3.

Basis for Proposed No Significant Hazards Consideration Determination: The Commission has provided guidance for determining whether a proposed amendment to an operating license for a facility involves a significant hazards consideration and has provided examples of amendments that are not likely to involve a significant hazards consideration (51 FR 7751). Example (i) in 51 FR 7751 is as follows: (i) A purely administrative change to technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error or a change in nomenclature.

The staff considers the proposed amendment to be similar to example (i) since it involves a clarification to achieve consistency in the Technical Specifications.

Accordingly, the Commission has proposed to determine that the above change does not involve a significant hazards consideration.

Local Public Document Room location: Phoenix Public Library, Business and Science Division, 12 East McDowell Road, Phoenix, Arizona 85004.

Attorney for licensees: Mr. Arthur C. Gehr, Snell & Wilmer, 3100 Valley Center, Phoenix, Arizona 85007.

NRC Project Director: George W. Knighton.

Carolina Power & Light Company, et al., Docket No. 50-324, Brunswick Steam Electric Plant, Unit 2, Brunswick County, North Carolina

Description of amendment request: The proposed amendment would change Sections 2.1.2, 3.1.4.3 and 3.2.3.1 and Table 3.2.3.2–1 of the Brunswick Steam Electric Plant (BSEP), Unit 2 Technical Specifications (TS). The purpose of this amendment is to incorporate revised Minimum Critical Power Ratio (MCPR) fuel cladding integrity safety limit and associated operating limit MCPR values for the operation of BSEP, Unit 2 during Fuel Cycle 8.

Proposed Change 1:

Currently, BSEP, Unit 2 TS 2.1.2 and 3.1.4.3 reference the use of a safety limit MCPR value of 1.07. The proposed amendment would change the safety limit MCPR value from 1.07 to 1.04.

Proposed Change 2:

Currently, BSEP, Unit 2 TS 3/4.2.3 and TS Table 3.2.3.2–1 specify operating limit MCPR values based on the safety limit MCPR limit of 1.07. The proposed amendment would adjust the MCPR operating limits to be consistent with the revised MCPR value of 1.04.

Safety limits are established to protect the integrity of the fuel cladding during normal operations and anticipated plant transients. The fuel cladding integrity safety limit is defined as the critical power ratio in the limiting fuel assembly for which more than 99.9% of the fuel rods in the core are expected to avoid boiling transition, considering the power distribution within the core and all uncertainties. This limit is set such that no fuel damage is calculated to occur if the limit is not violated. The operating limit MCPR values are established for each cycle, based on the safety limit MCPR and the changes in critical power ratio projected to occur during anticipated transients, using approved methodologies. The transients which produce the largest reduction in the critical power ratio are considered to be the most limiting and therefore require the greatest margin between the safety limit MCPR and the operating limit MCPR values.

The current MCPR fuel cladding integrity safety limit of 1.07 for reload cores was established in 1978. This safety limit was designed to provide a level of conservatism for establishing operating limit MCPR values, based on fuel design characteristics typical of those utilized at that time. The level of conservatism built into the safety limit provides adequate margin to assure that more than 99.9% of the fuel rods in the core are expected to avoid boiling transition. Because of current fuel designs, this level of conservatism has been recognized to have shown a marked increase. This increase in conservatism was part of the rationale used in developing the upgraded MCPR safety limit of 1.04, specified in Amendment 14 to NEDE–24011–P–A, "General Electric Standard Application for Reactor Fuel" (GESTAR II). This document has been reviewed by the NRC and found to be acceptable for D-lattice plants, when applied to the second successive reload cores of P8X8R, BP8X8R, GE8X8E or GE8X8EB fuel types with high bundle R-factor fuel designs. The Brunswick Plant, Unit 2 is such a D-lattice plant, with Cycle 8 being the third successive reload core with high bundle R-factor fuel designs. The proposed change reflects the upgrade in the safety limit MCPR approved in Amendment 14 to NEDE–24011–P–A. The NRC-accepted methodology utilized by General Electric to derive the upgraded safety limit MCPR value of 1.04 was the same methodology used to derive the original safety limit MCPR value to 1.07. Because of the new fuel design characteristics of the reload cores, the safety limit MCPR value of 1.04 derived by this methodology meets the same criteria as the original safety limit MCPR value of 1.07. Since the safety limit MCPR is used to determine the operating limit MCPR values for applying the margin of protection to plant operations, the operating limit MCPR values are being adjusted to be consistent with the upgraded safety limit MCPR. These adjustments are being made in accordance with guidelines provided by General Electric. The guidelines simply reduce the original operating limit MCPR values, originally identified in the Supplemental Reload Licensing Report (submitted by the licensee's letter dated September 4, 1987), by 0.03. This approach results in a slightly greater and more conservative margin between the adjusted operating limit MCPR values and the safety limit MCPR of 1.04 than the margin which existed for previous cores.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards in 10 CFR 50.92(c) for determining whether or not a no significant hazards consideration exists. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. Carolina Power & Light Company (the licensee, CP&L) has reviewed the proposed TS changes and has determined that their adoption would not involve a significant hazards consideration. The licensee's findings are summarized below:

Proposed Change 1:

The proposed amendment changes the MCPR safety limit, specified in the BSEP–2, TS, from 1.07 to 1.04.

The changes does not involve a significant hazards consideration for the following reasons:

1. The accidents analyzed in Chapter 15 of the Updated FSAR are not affected by the change in the safety limit MCPR. The safety limit MCPR is designed to limit the consequences of operational transients previously evaluated, but has no effect on the probability of those transients. the NRC-accepted methodology, used to derive the original safety limit MCPR value of 1.04, applied the same acceptance criteria as that used to derive the original safety limit MCPR value of 1.07 and thus assures that equivalent fuel cladding protection is maintained. Based on this reasoning, CP&L has determined that the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Adoption of an upgraded safety limit does not change or alter the function of any component or system, including the method of evaluating the MCPR for given operational conditions. As stated previously, the safety limit MCPR is designed to limit the consequences of those operational transients previously evaluated. The safety limit MCPR merely set the bounds for acceptable consequences of these operational transients. Therefore, CP&L has determined that the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. As stated previously, the NRC-accepted methodology utilized to derive the upgraded safety limit MCPR value of 1.04 provides the equivalent protection of the fuel cladding as the original safety limit MCPR value of 1.07. Based on this reasoning, CP&L has determined that the proposed change does not involve a significant reduction in the margin of safety.

Proposed Change 2:

The proposed amendment revises the operating limit MCPR values, specified in TS 3/4.2.3, to be consistent with the upgraded safety limit MCPR value of 1.04.

The change does not involve a significant hazards consideration for the following reasons:

1. The accidents analyzed in Chapter 15 of the Updated FSAR are not affected by the change in the operating limit MCPR values. Operating limit MCPR values are designed to limit the consequences of operational transients previously evaluated, but have no effect on the probability of these transients. Equivalent protection is assured in the upgraded operating limit MCPR values since they were adjusted to be consistent with the upgraded safety limit MCPR. The guidance provided by General Electric to adjust the operating limit MCPR values (originally based on the safety limit MCPR value of 1.07) adds slightly to the conservatism established within these operating limits. Based on this reasoning, CP&L has determined that the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Adjustment of the operating limit MCPR values to be consistent with the upgraded safety limit MCPR does not affect the function of any component or system. The adjusted operating limit MCPR values will continue to provide an adequate margin to assure that the safety limit MCPR is not exceeded for even the most limiting operational transient. Therefore, CP&L has determined that the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. As stated previously, the NRC-accepted methodology utilized to derive the upgraded safety limit MCPR value of 1.04 provides the equivalent fuel cladding protection as the original safety limit MCPR value of 1.07. This equivalent protection has also been applied to the operating limit MCPR values since they were adjusted to be consistent with the upgraded safety limit MCPR in accordance with the guidance provided by General Electric. This guidance adds slightly to the conservatism established within the adjusted operating limits which were originally based on the safety limit MCPR value of 1.07. Based this reasoning, CP&L has determined that the proposed change does not involve a significant reduction in the margin of safety.

Based on the above reasoning, the licensee has determined that the proposed changes involve no significant hazards considerations. The NRC staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Accordingly, the Commission proposes to determine that the requested amendment does not involve a significant hazards consideration.

Local Public Document Room location: University of North Carolina at Wilmington, William Madison Randall Library, 601 S. College Road, Wilmington, North Carolina 28403–3297.

NRC Project Director: Elinor G. Adensam.

Carolina Power & Light Company, North Carolina Eastern Municipal Power Agency, Docket No. 50–400, Shearon Harris Nuclear Power Plant (SHNPP), Unit 1, Wake and Chatham Counties, North Carolina

Date of amendment request: January 4, 1988.

Description of amendment request: The proposed change revises Technical Specification 6.2.2.e, which currently requires that the Manager-Operations hold a Senior Reactor Operator (SRO) license. The proposed TS revision is such that the Manager-Operations must: (1) Hold an SRO license; (2) have at one time held an SRO license; or (3) meet the qualifications for plant managers specified in Section 4.2.1 of the September 1979 draft of the American Nuclear Society Standard 3.1 (ANS 3.1).

Basis for proposed no significant hazards consideration determination: The Commission has provided standards in 10 CFR 50.92(c) for determining whether or not a no significant hazards consideration exists. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. The licensee has evaluated the proposed amendment against the standards in 10 CFR Part 50.92 and had determined:

1. The proposed change to the qualification requirements for the Manager-Operations does not involve a significant increase in the probability or consequences of any accident previously evaluated because the change does not physically alter the facility in any manner and, as such, does not affect the means in which any safety-related system performs its intended safety function.

2. The proposed change to the qualification requirements for the Manager Operations does not create the possibility of a new or different kind of accident from any accident previously evaluated. As stated in Item 1, there is no physical change to the plant resulting from the proposed amendment and, therefore, no possibility of creating a new accident.

3. The proposed change to the qualification requirements for the Manager-Operations does not involve a significant reduction in a margin of safety. Two major benefits are derived from the proposed change.

Alleviating the time which the Manager-Operations is currently required to spend in classroom and simulator requalification and preparation for NRC testing required to maintain an SRO license allows him to dedicate that time to the performance of his intended duties. Requiring the Manager-Operations to: (1) Hold an SRO license; (2) have at one time held an SRO license; or (3) meet the qualifications for plant managers specified in Section 4.2.1 of the September 1979 draft of ANS 3.1 ensures that candidates for the position have the background and knowledge of nuclear plant operations necessary to perform these duties.

Removing the requirement for the Manager-Operations to have a valid SRO license would allow CP&L Management additional flexibility when choosing an individual to fill the Manager-Operations position. This ensures that the best available candidate can be chosen for a vacant Manager-Operations position. A major factor in such a decision must currently be the status of the candidates' SRO licenses. Those individuals, whose SRO license is not current, require approximately 78 weeks of training to receive a valid SRO license. As such, it is conceivable that a more qualified person would be overlooked due to the need for filling a vacant Manager-Operations position.

The Operations Supervisor will continue to hold an SRO license. The combination of the Manager-Operations and the Operations Supervisor positions at SHNPP fulfill the guidance of the September 1979 draft of ANS 3.1 for the Operations Manager's position. The benefits derived from the proposed change, as discussed above, serve to enhance overall nuclear safety and, therefore, increase the margin of safety.

Based on the above, the licensee has determined that the proposed amendment does not involve a significant hazards consideration. The NRC staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Accordingly, the Commission proposes to determine that the requested amendment does not involve a significant hazards consideration.

Local Public Document Room location: Richard B. Harrison Library, 1313 New Bern Avenue, Raleigh, North Carolina 27610.

Attorney for licensees: R.E. Jones, General Counsel, Carolina Power & Light Company, P.O. Box 1551, Raleigh, North Carolina 27602.

NRC Project Director: Elinor G. Adensam.

Commonwealth Edison Company, Docket Nos. STN 50–454 and STN 50–455, Byron Station, Unit Nos. 1 and 2, Ogle County, Illinois; and Docket Nos. STN 50–456 and STN 50–457, Braidwood Station, Unit Nos. 1 and 2, Will County, Illinois

Date of application for amendments: January 12, 1988.

Description of amendments request: The amendments would revise Technical Specifications to allow more accurate measurement of lower effluent discharge flow rates by installing a three-inch diameter bypass around the existing six-inch diameter line.

Basis for proposed no significant hazards consideration determination: The staff has evaluated this proposed amendment and has determined that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

The physical changes to the plant involve the installation of a 3" diameter bypass around the existing 67" diameter liquid radwaste effluent discharge line flow rate element and flow control/isolation valves. The bypass includes a new flow rate element and flow control/isolation valves, and is fabricated of the same quality group materials as the original. The purpose of the new bypass is to provide the capability to measure lower flow rates (0 to 150 gpm) than is possible with the existing system (180 to 550 gpm). The existing radiation monitor will not be bypassed, and will have the capability to provide an isolation signal to the isolation valves in both loops. Controlled key (only one key issued at a time) locks on the valve operator switches will assure that only one loop may be used at a time.

The new bypass will perform the same function as the existing liquid radwaste the effluent discharge lines. The addition of the new flow rate element to the Technical Specifications will system operability and controlled keylocks will assure that only one loop may be used at a time. Therefore, this added bypass does not increase the probability of an accident previously evaluated.

The consequences of previously evaluated accident would not be significantly increased because the operability of the required radwaste system train will not be decreased.

The operability of the flow rate elements will continue to be verified by performing the related Technical Specification required surveillances. Because the added bypass loop performs the same function and is constructed of the same quality group materials as the existing loop, the possibility of a new or different kind of accident from any accident previously evaluated is not created.

The added bypass flow element performs the same function as the original monitor, but at a lower flow rate. The same radiation monitor provides isolation signal on high radiation levels on both the original and the new bypass line isolation valves. Therefore, there is not a significant reduction in the margin of safety.

Therefore, based upon the previous analysis, the staff concludes that the proposed amendment to the Technical Specifications does not involve significant hazards considerations.

Local Public Document Room location: For Byron Station the Rockford Public Library, 215 N. Wyman Street, Rockford, Illinois 61101; for Braidwood Station the Wilmington Township Public Library, 201 S. Kankakee Street, Wilmington, Illinois 60481.

NRC Project Director: Daniel R. Muller.

Commonwealth Edison Company, Docket Nos. STN 50–454 and STN 50–455, Byron Station, Unit Nos. 1 and 2, Ogle County, Illinois; and Docket Nos. STN 50–456 and STN 50–457, Braidwood Station, Unit Nos. 1 and 2, Will County, Illinois

Date of application for amendments: January 12, 1988.

Description of amendments requests: The amendments would revise Technical Specifications to separate the Gaseous Waste Management System Oxygen Analyzer into two analyzers based on their application.

Basis for proposed no significant hazards consideration determination: The staff has evaluated this proposed amendment and has determined that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

This change separates the Gaseous Waste Managment System oxygen analyzers into two analyzers based upon their application. One analyzer (OAT–GW8003) is capable of continuously analyzing oxygen concentration from the various source tanks and any one of the Gas Decay Tanks. The other analyzer (OAIT–GW004) requires the Waste Gas Compressor to be in operation for it to function. The proposed change clarifies the functional requirements and revises the Action Statement to reflect this change.

The changes to Table 3.3–13 made to separate the two oxygen analyzers into individual monitors, based on their separate application in the system, do not impact the Accident Analysis of the Byron/Braidwood FSAR. Rather it more cleraly defines the application and function of the two oxygen analyzers. As a result, the changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

No physical change or modification to the Gaseous Waste Management System is being made, and its intended operation as described in the FSAR will remain unchanged. The application of the two oxygen analyzers will be more clearly defined by these changes. As such, the changes do not create the possibility of a new or different kind of accident from any previously analyzed.

Since the Gaseous Waste Management System operation is not affected by this change, which is being made to more clearly define the application of the two oxygen analyzers, this change does not affect the margin of safety.

Therefore, based upon the previous analysis, the staff concludes that the proposed amendment to the Technical Specifications does not involve significant hazards considerations.

Local Public Document Room location: For Byron Station the Rockford Public Library, 215 N. Wyman Street, Rockford, Illinois 61101; for Braidwood Station the Wilmington Township Public Library, 201 S. Kankakee Street, Wilmington, Illinois 60481.

NRC Project Director: Daniel R. Muller.

Commonwealth Edison Company, Docket Nos. 50–254 and 50–265, Quad Cities Nuclear Power Station, Units 1 and 2, Rock Island County, Illinois

Date of amendment request: January 29, 1988.

Description of amendment request: The proposed amendment would revise Technical Specifications to delete the upper tolerance bound requirements of the Reactor Low-Low Water Level setpoint, and correct certain typographical errors in the bases.

There are two types of changes accociated with this proposed amendment request: the first change deletes the +4/−0 inch tolerance for the Reactor Low Low Level Trip Setpoint while the second change corrects a wording error in the Limiting Condition for Operation basis of Section 3.2 of the Technical Specifications. A review of the Technical Specification Bases has shown that the upper limit has no safety significance. Deleting the upper tolerance will also help facilitate calibration of the Reactor Low Low Water Level instrumentation.

The second change interchanges the words "high" and "low" in a sentence that explains the setting of the Reactor Low Low Water Level Trip. This change is administrative in nature and is being sought to insure that the Bases are consistent with the information pertaining to the setpoint in the Technical Specifications.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. Pursuant to 10 CFR 50.91(a), the licensee provided the following analysis of their amendment request which addresses those three standards.

CECo has evaluated the proposed amendment in accordance with the criteria of 10 CFR 50.92(c) and determined it does not involve significant hazards consideration. Consequently, the licensee maintains that operation of Quad Cities Nuclear Power Station in accordance with the proposed amendment would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated because the actual setpoint for the Reactor Low Low Level is not being changed.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated because the upper bound of the tolerence range associated with the Reactor Low Low Water Level Trip Setpoint serves no safety function and the conservatism associated with the actual setpoint is not being reduced. The actual setpoint which would have been used in accident evaluation is unchanged. Hence, the proposed amendment does not create the possibility of a new or different kind of accident than which was previously evaluated.

(3) Involve a significant reduction in the margin of safety because the proposed amendment does not change the actual trip setpoint but merely reflects a change to the tolerence. As a result, the margin of safety has not been decreased as a result of this proposed amendment.

The NRC staff has reviewed the licensee's amendment request and concurs with the significant hazards consideration analysis detailed above. Furthermore, correcting typographical errors in the TS is considered an administrative change. The Commission's guidance (51 FR 7751) clearly establishes that a purely administrative change to technical specifications "is an example of an amendment not likely to involve significant hazards considerations." Therefore, the NRC staff proposes to determine that this application for amendment does not involve a significant hazards consideration.

Consumers Power Company, Docket No. 50–155, Big Rock Point Plant, Charlevoix County, Michigan

Date of amendment request: December 14, 1987.

Description of amendment request: The proposed amendment would allow inclusion of all reloads of the "I" fuel design in the Big Rock Point Plant Technical Specifications. Past practice has been to identify each cycle reload individually and routinely change the Technical Specifications even though fuel design is not being altered. This change will permit future reloads of "I" fuel to be performed by the licensee under 10 CFR 50.59. Any future reloads containing fuel with a different design other than the "I" fuel would require a Technical Specification amendment.

Basis for proposed no significant hazards consideration determination: In accordance with 10 CFR 50.91, the licensee has provided an analysis on the issue of no significant hazards consideration using the standards of 10 CFR 50.92 as follows:

> The mechanical, thermal hydraulic, and neutronic analysis for all Big Rock Point "I" fuel is the same as that for Reloads I–1 and I–2. The design report previously issued for Big Rock Point Reload I–1 (Exxon Nuclear Company (ENC) Report XN–NF–85–38(P), Rev. O) entitled, "Design Report for Big Rock Point I–1" is applicable for all Reloads of "I" fuel.
>
> This change does not involve a significant increase in the probability or consequence of an accident previously evaluated because the limits are derived in a manner identical to that described in Exxon Nuclear Corporation (ENC) Report XN–NF–79–21, Revision 1, Big Rock Point LOCA Analysis using the ENC WREM NJP–BWR ECCS Evaluation Model–MAPLHGR Analysis. This report has previously been reviewed and accepted by the NRC and has been used as a basis for issuing previous reload amendments.
>
> This change does not create the possibility of a new or different kind of accident from any previously evaluated because the XN–NF–79–21 report covers the required spectrum of break locations and configurations for the Big Rock Point Plant. This change does not involve a significant reduction in the margin of safety because, as stated in the XN–NF–79–21 report, reactor operation within the NRC approved limits assure conformance with 10 CFR 50.46 criteria for maximum cladding temperature, metal-water reaction and hydrogen release.

The Commission's staff concurs in the licensee's analysis. The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (51 FR 7751). One of the examples (Example (iii)) of actions involving no significant hazards considerations relates to reload amendments involving no fuel assemblies significantly different from those found previously acceptable to the NRC for a previous core at the facility in question. This assumes that no significant changes are made to the acceptance criteria for the Technical Specifications, that the analytical methods used to demonstrate conformance with the Technical Specifications and regulations are not significantly changed, and that NRC has previously found such methods acceptable.

As shown in the above discussion, the proposed amendent is similar to this example and is supported by the licensee's analysis. Therefore, the Commission proposes to determine that the proposed amendment does not involve a significant hazards consideration.

Local Public Document Room location: North Central Michigan College, 1515 Howard Street, Petoskey, Michigan 49770.

Attorney for licensee: Judd L. Bacon, Esquire, Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

NRC Project Director: Martin J. Virgilio.

Detroit Edison Company, Docket No. 50–341, Fermi-2, Monroe County, Michigan

Date of amendment request: November 19, 1987 (Letter NRC–87–0201).

Description of amendment request: The proposed amendment would correct errors in Section 3/4.8.4.5, Standby Liquid Control System Associated Isolation Devices, by deleting from Table 3.8.4.5–1 the specification of Motor Control Center (MCC) 72B–4C, Position 1A circuit, breaker, and MCC 72E–5B, Position 1C circuit breaker, for required periodic testing. The circuit breakers have been found not to exist in the plant, and as such, the proposed amendment would correct the Technical Specification to be consistent with the as-built plant design. The breakers that perform the isolation function are still in the Table.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has determined, and the Commission agrees, that the proposed change to Technical Specification Table 3.8.4.5–1:

(1) Does not involve a significant increase in the probability or consequences of an accident previously evaluated. The change corrects errors in the Technical Specifications by deleting the specification of MCC circuit breakers which do not exist in the Standby Liquid Control System (SLCS) Associated Isolation Devices circuit, thereby revising Technical Specification Table 3.8.4.5–1 to be consistent with the as-built plant. The proposed change would not result in any modification to the plant or system operations, and no safety-related equipment or function would be altered.

(2) Does not create the possibility of a new or different kind of accident from any accident previously evaluated. As is stated in (1) above, the proposed change would correct errors in the Technical Specifications making them consistent with the as-built plant, would not result in any modification to plant systems and equipment or the operations and functions, and thus would not create any new accident mode.

(3) Does not involve a significant reduction in a margin of safety. As is stated in (1) and (2) above, the proposed change would revise Table 3.8.4.5–1 of the Technical Specifications to be consistent with the as-built plant, and does not involve any modifications to the plant which would result in a significant reduction in a margin of safety.

Local Public Document Room location: Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161.

Attorney for licensee: John Flynn, Esq., Detroit Edison Company, 2000 Second Avenue, Detroit, Michigan 48226.

NRC Project Director: Martin J. Virgilio.

Duke Power Company, et al., Docket Nos. 50–413 and 50–414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of amendment request: December 2, 1986, and October 6, 1987.

Description of amendment request: In accordance with the requirements of 10 CFR 73.55, the licensee submitted an amendment to the Physical Security Plan for the Catawba Nuclear Station to reflect recent changes to that regulation. The proposed amendments would modify paragraphs 2.E. of Facility Operating Licenses Nos. NPF–35 and NPF–52 to require compliance with the revised Plan.

Basis for proposed no significant hazards consideration determination: On August 4, 1986 (51 FR 27817 and 27822), the Nuclear Regulatory Commission amended Part 73 of its regulations, "Physical Protection of Plants and Materials," to clarify plant security requirements to afford an increased assurance of plant safety. The amended regulations required that each nuclear power reactor licensee submit proposed amendments to its security plan to implement the revised provisions of 10 CFR 73.55. The licensee submitted its revised plan on December 2, 1986, and October 6, 1987, to satisfy the requirements of the amended regulations. The Commission proposes to amend the license to reference the revised plan.

In the Supplementary Materials accompanying the amended regulations, the Commission indicated that it was amending its regulations "to provide a more safety conscious safeguards system while maintaining the current levels of protection" and that the "Commission believes that the clarification and refinement of requirements as reflected in these amendments is appropriate because they afford an increased assurance of plant safety."

The Commission has provided guidance concerning the application of the criteria for determining whether a significant hazards consideration exists by providing certain examples of actions involving no significant hazards considerations and examples of actions involving significant hazards consideration (51 FR 7750). One of these examples of actions involving no significant hazards considerations is example (vii) "a change to conform a license to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations." The changes in this case fall within the scope of the example. For the foregoing reasons, the Commission proposes to determine that the amendment involves no significant hazards consideration.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730.

Attorney for licensee: Mr. Albert Carr, Duke Power Company, 422 South Church Street, Charlotte, North Carolina 28242.

NRC Project Director: Darl Hood, Acting Director.

Duke Power Company, Docket Nos. 50–369 and 50–370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of amendment request: February 5, 1988.

Description of amendment request: The proposed amendments would increase the minimum volumes of borated water required by McGuire Technical Specifications (TS) 3.1.2.5 and 3.1.2.6 to be maintained in the Boric Acid Storage System during shutdown and operating modes, respectively.

Basis for proposed no significant hazards consideration determination: The Boric Acid Storage system provides the borated water needed to ensure that negative reactivity control is available during each mode of facility operation. To ensure sufficient boration capability to provide shutdown margin from operating conditions through cooldown and shutdown, a certain minimum contained borated water volume is specified as a limiting condition for operation by TS 3.1.2.5 for Modes 5 and 6, and by TS 3.1.2.6 for Modes 1, 2, 3 and 4.

The licensee has reevaluated the System and finds that the unusable volume of borated water is greater than initially calculated because of piping configuration. Accordingly, the minimum volumes of borated water presently required by TS 3.1.2.5 and 3.1.2.6 are not sufficently conservative and should be increased. The proposed amendments would correct the non-conservative values by specifying more restrictive (i.e., increased) borated water volumes.

The Commission has provided certain examples (51 FR 7750) of actions likely to involve no sigificant hazards considerations. The request involved in this case does not match any of those examples. However, the staff has reviewed the licensee's request for amendments and has determined that should this request be implemented, it would not: (1) Involve a significant increase in the probability or

consequences of an accident previously evaluated or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. This conclusion is reached because the borated water sources are designed to mitigate the consequences of accidents and have no effect or causal mechanisms. The change is more restrictive and of a corrective nature because the sole effect is to restore the boration capability to that which will satsify the originally intended shutdown margins. Therefore, the change enhances safety by restoring the intended safety margins.

Local Public Document Room location: Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223.

Attorney for licensee: Mr. Albert Carr, Duke Power Company, P.O. Box 33189, 422 South Church Street, Charlotte, North Carolina, 28242.

NRC Project Director: Darl Hood, Acting.

Florida Power and Light Company, Docket No. 50–335, St. Lucie Plant, Unit No. 1, St. Lucie County, Florida

Date of amendment request: January 22, 1988.

Description of amendment request: The proposed amendment would make changes to the technical specifications associated with the boric acid makeup (BAMU) system. Specifically, the required boron concentration requirements would be reduced, the borated water volume would be increased, and the requirement to heat trace the BAMU system would be deleted. Commensurate with the boron concentration reduction, the sodium hydroxide concentration would be slightly lowered to maintain pH requirements.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee addressed the above three standards in the amendment application. In regard to the first standard, the licensee provided the following analysis:

> Operation of the facility in accordance with the proposed amendment would not involve a significant increase in the probability or consequences of an accident previously evaluated.
>
> Credit is not taken for boron addition to the reactor coolant system from the boric acid makeup tanks (BAMTs) for the purpose of reactivity control in the accidents analyzed in Chapter 15 of the St. Lucie Unit 1 Final Safety Analysis Report (FSAR). Response to events such as steam line break, overcooling, boron dilution, etc., will not be affected by a reduction in the BAMT boron concentration. The ACTION Statements from Technical Specification 3.1.1.2 require that boration be commenced at greater than 40 gallons per minute using a solution of at least 1720 ppm boron in the event that shutdown margin is lost. The BAMT boron concentration after the proposed reduction will remain greater than or equal to 1720 ppm. The reduction in boron concentration is accounted for by increasing the volume of boric acid solution that must be contained in the tanks (and by also crediting borated water from the Refueling Water Tank (RWT)).
>
> Since the components (or their function) necessary to perform a safe shutdown have not been changed or modified, this change does not significantly increase the probability or consequences of any accident previously evaluated. In addition, administrative controls on the BAMT temperature and boron concentration ensure that the lack of heat tracing does not result in precipitation of the boron.
>
> The proposed change also reduces the concentration of caustic available in the Chemical Storage Tank in order to maintain the containment sump and containment spray nozzle pH within the design limits of 8.5 to 11.0. No change is made to the design bases of the Iodine Removal System or its subsystems, the Chemical Storage Tank and the caustic addition system. The reduction in boric acid concentration in the BAMTs [would cause] a corresponding reduction in the post-LOCA containment sump minimum boron concentration. A reanalysis of the sump pH and containment spray system pH has been performed. An adjustment to the rate of sodium hydroxide addition has been made to maintain the original equipment Environmental Qualification pH band of 8.5 to 11.0.
>
> An evaluation of the general corrosion rate of metallic materials and the effects on non-metallic materials has been performed. It has been determined that there is no adverse [effect] on in-containment materials if the pH level is maintained in the original pH band. With the sodium hydroxide concentration reduction and reduction in the final boron concentration, the harsh environment Equipment Qualification of the in-containment equipment will be unaffected as will the post-LOCA containment sump pH. Therefore, there is no impact on the equipment in the post-LOCA scenario nor a reduction in the post-LOCA containment iodine removal capability.

In connection with the second standard, the licensee stated:

> Operation of the facility in accordance with the proposed amendment would not create the possibility of a new or different kind of accident from any accident previously evaluated.
>
> The ACTION statements from Technical Specification 3.1.1.2 require that boration be commenced at greater than 40 gallons per minute using a solution of at least 1720 ppm boron in the event that shutdown margin is lost. The BAMT boron concentration after the proposed reduction will remain greater than or equal to 1720 ppm. The reduction in boron concentration is accounted for by increasing the volume of boric acid solution that must be contained in the tanks (and by also crediting borated water from the Refueling Water Tank (RWT). The reason for requiring a heat tracing circuit was to ensure that the dissolved boric acid remained in solution and available for injection into the RCS to adjust core reactivity throughout core life. By lowering the boron concentration to a maximum of 3.5 weight percent, chemical analyses have shown there is no possibility of the boron precipitating out of solution as long as the temperature of the boric acid remains above 50°F, thus, there is no longer a need for heat tracing. Since the boron will remain in solution when the BAMT flowpaths are credited for reactivity control during a safe shutdown scenario, heat tracing is no longer required to maintain the Boric Acid Makeup (BAMU) system operable. Therefore, this change does not create the possibility of a new or different kind of accident from those previously evaluated.
>
> The reduction in caustic concentration available in the chemical storage tank does not alter the design function of the Iodine Removal System. The Iodine Removal System will operate with slightly reduced NaOH [concentration] in response to reduced boric acid in the BAMTs.

With regard to the third standard, the licensee provided the following rationale:

> Use of the modified specification would not involve a significant reduction in a margin of safety.
>
> The intent of the Boration Systems and Borated Water Sources Technical Specifications is to ensure that there are two redundant flowpaths from the borated water sources to the RCS to allow control of core reactivity throughout core life. This requires that sufficient quantities of boron be stored in the BAMTs and that this borated water can be delivered to the RCS in the event of a single active failure of a system component or a seismic event. Reducing the maximum boric acid concentration to less than 3.5 weight percent has been compensated for by increasing the required minimum volumes of borated water. In addition, reducing the maximum boron concentration allows a deletion of the requirement to heat trace the BAMU system since chemical analyses have shown that a 3.5 weight percent solution of boric acid will remain in solution at temperatures above 50°F. Administrative controls on the boric acid makeup tank temperature and boron concentration ensure that a lack of heat tracing does not result in

> precipitation of the boron. Therefore, the reduction of boric acid concentration and the deletion of heat tracing in the BAMU system does not cause a significant reduction in the margin of safety.
>
> Also, the margin of safety as defined by the Technical Specifications has not been significantly reduced due to the reduction in NaOH [concentration] since the change does not alter the effectiveness of the caustic addition subsystem. That is, the NaOH reduction change is equally balanced by the reduction of boric acid in the boric acid makeup tanks.

The staff has reviewed the licensee's no significant hazards consideration determination analysis. Based upon this review, the staff believes that the licensee has met the three standards. The licensee proposes increases to the borated water volume contained in the BAMTs to offset the boren concentration reduction. Since the boren concentration is significantly reduced, there appears to be no need for heat tracing. The NaOH slight concentration reduction is needed to maintain proper pH range.

Based upon the above discussion, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 33450.

Attorney for licensee: Harold F. Reis, Esquire, Newman and Holtzinger, 1615 L Street NW., Washington, DC 20036.

NRC Project Director: Herbert N. Berkow.

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket No. 50–321, Edwin I. Hatch Nuclear Plant, Unit 1, Appling County, Georgia

Date of amendment request: December 21, 1987.

Description of amendment request: This amendment would modify the Technical Specifications for Hatch Unit 1 as follows: Specification 4.7.D.1 would be modified to require full-stroke testing of the main steam isolation valves (MSIVs) in accordance with the ASME Code, Section XI.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR Part 50.29(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee, in its December 21, 1987 submittal, provided the following evaluation of the proposed change with regard to these three standards:

> The proposed change is an administrative change and will make the Unite 1 specification regarding full-stroke testing of the MSIVs more similar to the specifications currently in the Unit 2 Technical Specifications and the Standard Technical Specification (STS). Incorporation of this change will not involve a significant hazards consideration, because:
>
> 1. The probability of occurrence or the consequences of an accident or malfunction of equipment important to safety are not increased above those previously evaluated, because the operation of the MSIVs will remain the same. The MSIVs will continue to isolate automatically upon raceipt of the current isolation signals, and the required isolation (stroke) time will remain unchanged. Surveillance requirements will remain unchanged.
>
> 2. The possibility of a different kind of accident from any analyzed previously is not created by this change, because the MSIVs will continue to operate and respond as they did prior to the change. No new modes of valve operation are introduced by this change.
>
> 3. Margins of safety are not significantly reduced by this charge, because it is an administrative change to revise the wording of the specification so that it is similar to the wording of the Unit 2 Technical Specifications and the STS.

The staff has considered the proposed amendment and agrees with the licensee's evaluation with respect to the three standards.

On this basis, the Commission has concluded that the requested change meets the three standards and, therefore, has made a proposed determination that the amendment application does not involve a significant hazards consideration.

Local Public Document Room location: Applying County Public Library, 301 City Hall Drive, Baxley, Georgia 31513.

Attorney for licensee: Bruce W. Churchill, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037.

NRC Project Director: Darl S. Hood, Acting Director.

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket No. 50–424, Vogtle Electric Generating Plant, Unit 1, Burke County, Georgia

Date of amendment request: December 28, 1987.

Description of amendment request: The proposed amendment would change the title of the Manager-Nuclear Performance and Analysis to Manager-Nuclear Performance and Radiological Safety on Technical Specification (TS) Figure 6.2–I, "Off-Site Organization," and TS Figure 6.6. The proposed amendment would revise TS Figure 6.2.2, "Plant Organization" as follows.

On TS Figure 6.2.2 add the new position of Outages and Planning Manager reporting to the Plant Support Manager. Delete the Unit 1 Planning, Scheduling, and Work Control Methods Superintendent. Change the title for the Maintenance Superintendent III position to Manager Maintenance. Add the new position of Manager Health Physics and Chemistry, who has authority over the Health Physics Superintendent, the Chemistry Superintendent, and the new position of Technical Support Health Physics/Chemistry Superintendent.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR Part 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previosuly evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The staff has reviewed the licensee's request and has determined that should this request be implemented, it would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed changes maintain program responsibility aligned to appropriate organizations, and is similar to another NRC approved plant organization.

Also, the licensee's proposed changes would not (2) create the possibility of a new or different kind of accident from any accident previously evaluated because the physical plant design is not being changed. Finally, the licensee's

proposed changes would not (3) involve a significant reduction in a margin of safety because no operating parameters or setpoints are changed.

Accordingly, the Commission proposes to determine that the proposed change involves no significant hazards consideration.

Local Public Document Room location: Burke County Public Library, 4th Street, Waynesboro, Georgia 30830.

Attorney for licensee: Mr. Arthur H. Domby, Troutman, Sanders, Lockerman and Ashmore, Chandler Building, Suite 1400, 127 Peachtree Street, N.E., Atlanta, Georgia 30043.

NRC Project Director: Darl Hood, Acting.

GPU Nuclear Corporation, Docket No. 50–219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of amendment request: January 29, 1988 (TSCR 163).

Description of amendment request: The proposed amendment would revise Technical Specifications 5.3 and the corresponding bases allowing fuel with higher enrichments to be stored in the fuel storage facilities onsite.

Basis for proposed no significant hazards consideration determinatoin:

The licensee proposed Technical Specification Change Request (TSCR) No. 163 to allow fuel with higher enrichments to be stored in the fuel storage facilities onsite. The licensee has evaluated TSCR 163 to determine if a significant hazards consideration exists. The results of this evaluation are given below in terms of the criteria in 10 CFR 50.92(c):

The proposed change is based upon a re-evaluation of the High Density Poison Racks (HDPRs) summarized in the report, entitled "Criticality Safety Analysis Oyster Creek High Density Poison Racks With Increased Enrichment Fuel." The re-evaluation performed on the HDPR included several enrichment levels taking credit for gadolinium burnable poison. The HDPRs were analyzed for criticality safety with fuel of uniform average enrichments ranging up to 3.8% assuming 3 weight percent gadolinium oxide in seven (7) fuel rods of each assembly. The analysis confirms that the multiplication factors K_{eff} is within the limit of 0.95, in conformance with NRC Regulatory Guide 1.13.

The proposed change to the Technical Specification relates only to the new fuel storage vault and the HDPR. No other plant system or component is affected.

The licensee states:

> Based upon the preceding discussion, we [the licensee] have evaluated that this change request involves no significant hazards considerations. In summary, we have determined that the proposed amendment would not:
>
> A. Involve a significant increase in the probability or consequences of an accident previously evaluated;
>
> The original enrichment requirement of 3.01% U–235 was based upon the initial criticality analysis which did not take the allowed credit for burnable poisons. A re-evaluation of the criticality analysis was performed taking credit for burnable poisons as allowed in NRC Regulatory Guide 1.13. The results indicate that fuel with an average planar enrichment of 3.8% can safely be stored in the HDPR.
>
> The only type of accident potentially affected by this proposed Technical Specification amendment is an inadvertant criticality. Since the requirement to maintain K_{eff} less than or equal to 0.95, will be retained, and the potential effects of this change are already bounded by a previous analysis, this proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.
>
> B. Create the possibility of a new or different kind of accident from any accident previously evaluated:
>
> The criteria for K_{eff} to be less than or equal to 0.95 will be retained. However, the limitation on enrichment will be deleted and the requirement for K_{eff} less than or equal to 0.95 will be ensured using a newly established check list.
>
> The spent fuel storage pool is designed to withstand the design earthquake acceleration, to prevent inadvertent criticality, and to provide efficient shelding and cooling. The only aspect of the design to be considered for this proposed charge is the prevention of inadvertent criticality. Since the criterial for K_{eff} to be less than or equal to 0.95 will be retained under the proposed change, and the potential effects of this change are already bounded by a previous analysis, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.
>
> C. Involve a significant reduction in the margin of safety;
>
> The only type of accident potentially affected by this proposed Technical Specification amendment is an inadvertent criticality. Since the requirement to maintain K_{eff} less than or equal to 0.95, will be retained, and the potential effects of this change are already bounded by a previous analysis, this proposed change does not involve a significant reduction in the margin of safety.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's evaluation. Therefore, the staff proposes to determine that the licensee's application does not involve a significant hazards consideration.

Local Public Document Room location: Ocean County Library, Reference Department, 101 Washington Street, Toms River, New Jersey 08753.

Attorney for licensee: Ernest L. Blake, Jr., Esquire, Shaw, Pittman, Potts, and Trowbridge, 2300 N Street, NW, Washington, D.C. 20037.

NRC Project Director: John F. Stolz.

GPU Nuclear Corporation, et al., Docket No. 50–289, Three Mile Island Nuclear Station, Unit No. I, Dauphin County, Pennsylvania

Date of amendment request: January 29, 1988.

Description of amendment request: The January 29, 1988 request, identified as TSCR No. 177 by the licensee, would revise various sections in Chapter 6 of the Technical Specifications (Administrative Controls) for clarity and consistency with the Standard Technical Specifications. These sections deal with GPU procedural controls over the review process for procedures, modifications to structures, systems and components, and proposed tests and experiments. This change would also add a definition of substantive changes as related to these activities.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident form any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The change proposed by TSCR No. 177 is an administrative change to achieve terminology more consistent with the terminology of the Babcock and Wilcox Standard Technical Specifications, NUREG–0113 Rev. 4, and to provide clarification of previously existing requirements for technical and safety review. The proposed revised Technical Specifications would not involve significant hazards considerations for reasons as follows (see criteria in 10 CFR 50.92 above):

(1) The probability of occurrence or the consequences of previously evaluated accidents are not affected by this change since the change is administrative in nature, and provides clarification and consistency. The technical and safety review requirements for substantive changes in

the existing Technical Specifications are not changed.

(2) The possibility of a new or different kind of accident from any accident previously evaluated is not created by this change, since the change is administrative in nature, and provides clarification and consistency. The technical and safety review requirements for substantive changes in the existing Technical Specifications are not changed.

(3) This change does not reduce the margin of saftey, since the change is administrative in nature, and is provided for clarification and consistency. The technical and safety review requirements for substantive changes in the existing Technical Specifications are not changed.

Based on the above discussion, the staff proposes to determine that the requested amendment does not involve a significant hazards consideration.

Local Public Document Room location: Government Publications Section, State Library of Pennsylvania, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105.

Attorney for licensee: Ernest L. Blake, Jr., Esquire, Shaw, Pittman, Potts, & Trowbridge, 2300 N Street, NW, Washington, D.C. 20037.

NRC Project Director: John F. Stolz.

Mississippi Power & Light Company, System Energy Resources, Inc., South Mississippi Electric Power Association, Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Dates of application for amendment: November 24, 1986, and September 1, 1987.

Brief description of amendment: In accordance with the requirements of 10 CFR 73.55, the licensee has submitted a proposed amendment to the Physical Security Plan for the Grand Gulf Nuclear Station, Units 1 and 2, to reflect recent changes to that regulation. The proposed amendment would modify paragraph 2.E. of Facility Operating License No. NPF-29 to require compliance with the revised plan.

Basis for proposed no significant hazards consideration determination: On August 4, 1986 (51 FR 27817 and 27822), the Nuclear Regulatory Commission amended Part 73 of its regulations, "Physical Protection of Plants and Materials," to clarify plant security requirements to afford an increased assurance of plant safety. The amended regulations required that each nuclear power reactor licensee submit proposed amendments to its security plan to implement the revised provisions of 10 CFR 73.55. The licensee submitted its revised plan on November 24, 1986, and September 1, 1987, to satisfy the requirements of the amended regulations. The Commission proposes to amend the license to reference the revised plan.

In the supplementary materials accompanying the amended regulations, the Commission indicated that it was amending its regulations "to provide a more safety conscious safeguards system while maintaining the current levels of protection" and that the "Commission believes that the clarification and refinement of requirements as reflected in these amendments is [sic] appropriate because they afford an increased assurance of plant safety."

The Commission has provided guidance concerning the application of the criteria for determining whether or not a no significant hazards consideration exists by providing certain examples of actions not likely to involve significant hazards considerations and examples of actions likely to involve significant hazards considerations (51 FR 7750). One of the examples of actions not likely to involve significant hazards considerations is example (vii) "a change to conform a license to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations." The changes in this case fall within the scope of the example. For the foregoing reasons, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Hinds Junior College, McLendon Library, Raymond, Mississippi 39154

NRC Project Director: Elinor G. Adensam

Nebraska Public Power District, Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: February 2, 1988.

Description of amendment request: The amendments would modify the Technical Specifications to: (1) change the instrument identification numbers (Tables 3.2.B ands 4.2.B) for reactor pressure switches which provide closing signals to the reactor recirculation system discharge valves and permissive input signals to the core spray and low pressure coolant injection systems, (2) change the instrument identification number (Table 3.2.B) for the residual heat removal system crosstie valve position indicator switch, (3) change the instrument identification numbers (Tables 3.2B and 4.2.B) for drywell pressure instruments associated with the high pressure coolant injection (HPCI) system, and (4) modify the "Reactor Water Level Indication Correlation" drawing (Figure 2.1.1) to reflect modifications extending the range of reactor vessel water level instrumentation.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance for the application of criteria for no significant hazards consideration determination by providing examples of amendments that are considered not likely to involve significant hazards considerations (51 FR 7751). These examples include: (i) a purely administrative change to Technical Specifications: for example, a change to achieve consistency throughout the Technical Specifications, correction of an error, or a change in nomenclature; and (ii) a change that constitutes an additional limitation, restriction, or control not presently included in the Technical Specifications: for example a more stringent surveillance requirement.

Change (1) would reflect a plant modification in which two duplex pressure switches (NBI-PS-52A, and 52C) for which spares are no longer readily available, will be replaced by four single pressure switches (NBI-PS-52A1, A2, C1, and C2). The replacement switches will be seismically and environmentally qualified and will serve the same function as those being replaced.

Change (2) would correct an editorial error. The crosstie valve position indicator switch is identified as "RHR-LMS-2" in the Technical Specifications but as "RHR-LMS-8" in the facility design drawings. The proposed amendment would revise the Technical Specifications identification number to be consistent with the drawings. No change would be made to the actual instrument.

Charge (3) would revise the HPCI instrument identification numbers to be consistent with the identification numbers used for the same instruments elsewhere in the Technical Specifications. This change is thus being made for consistency only. No changes are being made to the actual instruments.

Change (4) would reflect modifications to be made to extend the range of water level instruments in accordance with the licensee's commitments to provide improved capability to monitor reactor vessel water level. The modifications extend the range of water level monitoring down to 6 inches below the bottom of active fuel and up to the top of the steam separator in accordance with Regulatory Guide 1.97 recommendations.

Changes (1), (2), and (3) are simple changes in nomenclature to either correct errors or inconsistencies, or reflect the replacement of existing components with new components with similar design and function. These changes will have no effect on safety, involve no changes to limiting conditions for operation or surveillance requirements, and are within the scope of example (i). Change (4) reflects new requirements imposed by the NRC and it is within the scope of example (ii).

Since the application for amendment involves proposed changes that are encompassed by the criteria or an example for which no significant hazards consideration exists, the staff has made a proposed determination that the application involves no significant hazards consideration.

Local Public Document Room location: Auburn Public Library, 118 15th Street, Auburn, Nebraska 68305.

Attorney for licensee: Mr. G.D. Watson, Nebraska Public Power District, Post Office Box 499, Columbus, Nebraska 68601.

NRC Project Director: Jose A. Calvo.

Niagara Mohawk Power Corporation, Docket No. 50-220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of amendment request: January 29, 1988.

Description of amendment request: The proposed amendment would revise Technical Specifications 3.2.6 and 4.2.6 for Nine Mile Point Nuclear Station Unit 1. The revisions to Technical Specifications 3.2.6 and 4.2.6 would move the references concerning the Inservice Inspection (ISI) and Inservice Testing (IST) Programs in effect from the limiting condition for operation and surveillance requirement sections of the Technical Specifications to the Bases section.

The proposed amendment would also revise Technical Specification 4.2.6.a.2 to delete the list of systems containing non-conforming components. The systems containing non-conforming components are identified in the augmented ISI program.

The proposed amendment is in accordance with the licensee's application of January 29, 1988.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

The proposed changes will not (1) Involve a significant increase in the probability or consequences of an accident, (2) create the possibility of a new or different kind of an accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety for the following reasons:

> The first change concerns the reference regarding the ISI and IST programs in effect from the Technical Specifications to the Bases. This change is an administrative change. 10 CFR 50.55a requires the ISI and IST programs to be updated to the latest ASME Code approved by the Nuclear Regulatory Commission every ten years. This regulation further requires that relief from or alternative requirements to the ASME Code in effect must be authorized by the NRC. The revised Technical Specifications will also require the licensee to meet these requirements. The proposed amendment would allow the licensee to update the ISI and IST programs in accordance with these requirements without submitting an amendment request.
>
> The second change involves deleting the lsit of systems containing non-conforming components from section 4.2.6.a.2 of the Technical Specifications. This list will still be included in the ISI program. This change will also allow the ISI program to be updated in accordance with the regulations without requiring a Technical Specification amendment and is also administrative.
>
> As these changes are administrative and will not affect the ISI and IST programs, they will not (1) involve a significant increase in the probability or consequences of an accident, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

Based upon the above consideration, the staff proposes to determine that the proposed charges do not constitute a significant hazards consideration.

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner & Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue NW., Washington, DC 20006.

NRC Project Director: Robert A. Capra, Director.

Niagara Mohawk Power Corporation, Docket No. 50-410, Nine Mile Point Nuclear Station, Unit No. 2, Scriba, New York

Date of amendment request: February 3, 1988.

Description of amendment request: The proposed amendment would revise Technical specification 3/4.8.2.1.b.2, "D.C. Sources-Operating". The proposed change would allow an alternate method of determining battery operability when visible corrosion appears at either terminals or connectors. The proposed amendment is in accordance with the licensee's application of February 3, 1988.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

1. The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not involve a significant increase in the probability or consequences of an accident previously evaluated for the following reasons:

> The proposed amendment establishes an alternative method of verifying the integrity of battery connections. The amendment does not adversely affect the function or design of the safety-related DC power systems. Further, the proposed change does not adversely affect the environmental qualification of the batteries or their associated chargers. The performance and reliability of the DC power sources will not be affected, thus assuring there will still be power available to supply the safety-related equipment required for (1) the safe shutdown of the facility and (2) the mitigation and control of accident conditions within the facility. Therefore, the proposed amendment will not involve a significant increase in the probability of an accident previously evaluated.

2. The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not create the

possibility of a new of different kind of accident from any previously evaluated for the following reasons:

Verification of resistance is a positive method of establishing the reliability of station batteries. Reg. Guide 1.129, Rev. 1 endorses IEEE Standard 450–1975 with comments. IEEE Standard 450–1975 recognizes resistance values of 120% of initial installation values or less as acceptable. The licensee has reviewed the as-installed resistance values and has determined that a 20% increase in the measured resistance of the batteries will have no effect on the ability of the batteries to carry the rated load. This assures that the design capabilities of the IE AC and DC systems and components are not challenged in a manner not previously assessed so as to create the possibility of a new or different kind of accident from any previously assessed.

3. The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not involve a significant reduction in a margin of safety for the following reasons:

The Technical Specification bases recognize that verifying connection resistance values, in conjunction with the other tests and inspections required by the surveillances, assures the effectiveness of the charging system and the ability of the batteries to handle high discharge rates. The resistance measurement will provide a positive indication of battery operability in the event visual inspection indicates corrosion. As discussed above, a 20% increase in the measured resistance of the batteries will have no effect or the ability of the batteries to carry their rated load. Therefore, the proposed amendment will not involve a significant reduction in a margin of safety.

Based upon the above considerations, the staff proposes to determine that the proposed changes do not constitute a significant hazards consideration.

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Attorney for licensee: Mark Wetterhahn, Esq., Conner & Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue, NW., Washington, DC 20006.

NRC Project Director: Robert A. Capra, Director

Niagara Mohawk Power Corporation, Docket No. 50–410, Nine Mile Point Nuclear Station, Unit No. 2, Scriba, New York

Date of amendment request: February 3, 1988.

Description of amendment request: The proposed amendment would revise the allowable value and isolation trip setpoint for the residual heat removal (RHR)/reactor core isolation cooling(RCIC) steam flow-high. As noted in the Technical Specifications, the existing values are preliminary with the actual values to be determined during the startup test program. The proposed changes are based on system testing during the startup test program. The proposed amendment is in accordance with the licensee's application of February 3, 1988.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident prevously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed changes will not involve a significant increase in the probability or consequences of an accident previously evaluated for the following reasons:

The RHR/RCIC Steam Line break analysis assumes system isolation when steam flow reaches 125% of rated steam flow. This is in accordance with the leadk detection and isolation reqirements of GDC 54. This proposed change to the Technical Specification would assure that the as-built plant is in agreement with the design basis. Revising the setpoint to the as-built conditions equivalent to the 125% rated flow value assures that a RHR/RCIC steam line break will be detected and isolated as designed without impacting the qualification or operation of other safety systems or safe shutdown of the plant. The new values are conservative relative to the old values. In summary, this change will not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes will not create the possibility of a new or different kind of accident previously evaluated for the following reasons:

The reactor building response to previously evaluated accidents remains within previously assessed limits of temperature and pressure. Further, all safety-related systems and components remain within their applicable design limits. Thus, system and components remain within their applicable design limits. Thus, system and component performance is not adversely affected by this change, thereby assuring that the design capabilities of those systems and components are not challenged in a manner not previously assessed so as to create the possibility of a new or different kind of accident.

In addition, since the design basis for RHR/RCIC steam line system isolation has not changed, the environmental qualification of plant equipment is not adversely affected by this proposed amendment, further assuring that components are not challenged in a manner not previously assessed. In summary, the proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

The proposed changes will not involve a significant reduction in a margin of safety for the following reasons:

The proposed change will not cause existing Technical specification operational limits or system performance criteria to be exceeded. The proposed change ensures that the design requirements are met. allowances for instrument drift, instrument accuracy, and calibration capability have been maintained in accordance with Bases Section B3/4.3.2. of the Technical Specifications. Therefore, the proposed change does not result in a significant reduction in a margin of safety.

Based upon the above considerations, the staff proposed to determine that the proposed changes do not constitute a significant hazards consideration.

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Attorney for licensee: Mark Wetterhahn, Esq., Conner & Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue NW., Washington, DC 20006.

NRC Project Director: Robert A. Capra, Director.

Northeast Nuclear Energy Company, et al., Docket No. 50–423, Millstone Nuclear Power Station, Unit No., 3, New London County, Connecticut

Date of amendment request: February 5, 1988.

Description of amendment request: The amendment would revise Millstone Unit No. 3 Technical Specification Section 3/4.4.6 Reactor Coolant System Leakage to allow continued plant operation for 30 days with both the Containment Atmosphere Gaseous Radioactivity Monitoring System (CAGRMS) and the Containment Atmosphere Particulate Radioactivity Monitoring System (CAPRMS) inoperable. The existing Technical Specification requires plant shutdown within 6 hours for this condition. The compensatory measures would be improved by increasing the frequency of analyzing the containment atmosphere for radioactivity via grab samples from once per 24 hours to once per 12 hours.

Basis for proposed no significant hazards consideration determination: The license has reviewed the proposed charges in accordance with 10 CFR 50.92 and has concluded that they do not involve a significant hazards consideration in that these changes would not:

1. Involve a significant increase in the probability of occurrence or consequences of an accident previously analyzed. The proposed changes do not affect the probability of occurrence or the consequences of the design basis accidents. Therefore, previously analyzed accidents are not affected.

2. Create the possibility of a new or different kind of accident from any previously analyzed. There are no changes in the way the plant is operated, and no new failure modes are introduced; therefore, the possibility of an unanalyzed accident is not created.

3. Involve a significant reduction in a margin of safety. The proposed changes do not have any impact on the containment integrity and do not affect the consequences of any accident previously analyzed, therefore, there is no reduction in the margin of safety.

The staff has reviewed the licensee's submittal and agrees with its no significant hazards determination.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry & Howard, One City Place, Hartford, Connecticut 06103–3499.

NRC Project Director: John F. Stolz.

Pacific Gas and Electric Company, Docket Nos. 50–275 and 50–323, Diablo Canyon Nuclear Power Plant, Unit Nos. 1 and 2, San Luis Obispo County, California

Date of amendment request: January 22, 1988 (LAR 88–01)

Description of amendment request: The proposed amendments would change the Diablo Canyon Nuclear Power Plant (DCPP) combined Technical Specifications for Units 1 and 2 to allow reduced Residual Heat Removal (RHR) flow during Mode 6 operation. Specifically, the proposed change would amend Technical Specification (TS) 4.9.8.1, "Residual Heat Removal and Coolant Circulation High Water Level," and TS 4.9.8. 2, "Residual Heat Removal and Coolant Circulation Low Water Level," to revise the currently required minimum residual heat removal (RHR) system flowrate on 3000 gpm during Mode 6 (Refueling). TS 4.9.8.1 and 4.9.8.2 are proposed to require verification of an RHR flowrate of 3000 gpm once per 12 hours when the reactor has been subcritical less than 57 hours and to require verification of an RHR flowrate of 1300 gpm per 12 hours when the reactor has been subcritical greater than 57 hours. Bases 3/4.9.8 is proposed to be revised to indicate that a reduced RHR flow can provide adequate decay heat removal and also additional margin to vortexing in the RHR system. TS 3.4.1.4.2, "Cold Shutdown—Loops Not Filled," which is applicable to Mode 5 partial drain operating, allows the operation RHR pump to be deenergized for one hour. TS 3.4.1.4.2 is proposed to be amended to not allow deenergization of the RHR pump unless reactor vessel water level is above the vessel flange.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident previously evaluated: or (3) involve a significant reduction in a margin of safety.

The licensee has determined that the proposed changes will not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated because the Westinghouse evaluation provided in WCAP–11688 for DCPP Units 1 and 2 demonstrates that throttling of the RHR system flowrate to between 1300 and 3000 gpm depending on Reactor Coolant System (RCS) water level and time after shutdown does not increase the probability or consequences of the accidents analyzed in Chapter 15 of the FSAR. The boron dilution accident evaluation results concluded that there is a reduction in time to criticality during RCS partial drain operation; however, this reduction in time is independent of the RHR flowrate. The reduction in RHR system flowrate during RCS partial drain operation reduces the probability of a loss of decay heat removal due to vortexing and cavitation, while the probabilities of accidents analyze in the FSAR are unaffected. The added restriction to the TS 3.4.1.4.2 footnote will prohibit intentional deenergization of the RHR pump when vessel water is below the reactor vessel flange. This added restriction will not increase the probability or consequences of any accident previously evaluated. Therefore, this proposed license amendment request does not involve a significant increase in the probability or consequences of an accident previously evaluated; (2) Create the possibilty of a new or different kind of accident from any accident previously evaluated because implementation of the proposed reduction in RHR system flowrate during RCS partial drain operation does not introduce significant changes to the plant design basis. Throttling RHR system flow in manually controlled from the main control board and does not involve hardware modifications or irreversible actions when in effect. The added restriction to the TS 3.4.1.4.2 footnote to not allow deenergization of the operating RHR pump will enhance safety during operation with the RCS water level below the reactor vessel flange. Therefore, the proposed license amendment request does not create the possibility of a new or different kind of accident from any accident previously evaluated; (3) Involve a significant reduction in the margin of safety because the Westinghouse evaluation provided in WCAP–11688 shows that an RHR flowrate reduced to 1300 gpm will meet the decay heat removal requirements when the reactor is subcritical for greater than 57 hours. An RHR flowrate of 1300 gpm during Modes 5 and 6 does not impact the FSAR analyses for the boron dilution accident and promotes sufficient reactor coolant mixing so that boron stratification is not a concern. The probability of a loss of RHR flow initiated by RHR system vortexing will be reduced, increasing the RHR system reliability. The added restriction to not allow deenergization of the operating RHR pump for one hour will enhance safety by requiring continuous RHR flow when reactor vessel water level is below the vessel flange. Therefore, the changes do not involve a significant reduction in the margin of safety.

Accordingly, the licensee has determined that the proposed changes to the Technical Specifications involve no significant hazards consideration.

The NRC staff has reviewed the proposed amendments and the licensee's determination and find them acceptable. Therefore, the staff proposes to determine that the amendment requests do not involve a significant hazard.

Local Public Document Room location: California Polytechnic State University Library, Government Documents and Maps Department, San Luis Obispo, California 93407.

Attorneys for licensee: Richard R. Locke, Esq., Pacific Gas and Electric Company, P.O. Box 7442, San Francisco, California 94120 and Bruce Norton, Esq., c/o Pacific Gas and Electric Company, P.O. Box 7442, San Francisco, California 94120.

NRC Project Director: George W. Knighton.

Portland General Electric Company et al., Docket No. 50–344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: October 28, 1986.

Description of amendment request: The amendment would revise Sections 2.2 and 3.3 of the Trojan Technical Specifications regarding setpoints and allowable values for the steam generator (SG) low-low water level reactor trip and pressurizer low-pressure safety injection. These values will be revised so that the initiation of reactor protection system operation will occur at a time sooner than that which corresponds to the current Technical Specification values.

The Trojan Updated Final Safety Analysis Report (UFSAR) and Technical Specifications (TS) reflect steam generator low-low level reactor trip and pressurizer low-pressure safety injection setpoints established by the original plant design. However, administrative interim setpoints conservatively higher than the TS allowables have been in use for several years to account for additional instrument inaccuracies that became known subsequent to plant startup. Reference leg heating effects and Barton transmitter defect notifications were major contributors to these increased inaccuracies.

Subsequent improvements to Barton Transmitters, plus installation of reference legs on the steam generator level instruments, have resulted in reduced inaccuracies. Thus, the proposed amendment would reduce the setpoints and allowable values from the "interim" setpoints used by the licensee, to lower values which would still be conservative as compared to the original TS setpoints and allowables. The proposed TS limits would ensure that the original allowables assumed in the UFSAR will not be exceeded when considering existing instrumentation inaccuracies.

The SG low-low level reactor trip setpoint and allowable as provided by the current TS are: greater than or equal to 5% and 4%, respectively. The interim value used by the licensee for both setpoint and allowable is: greater than or equal to 20%. The proposed setpoint and allowable are: greater than or equal to 11% and 10%, respectively.

The current pressurizer low pressure safety injection setpoint and allowable are: greater than or equal to 1765 psig and 1755 psig, respectively. The interim value used by the licensee for both setpoint and allowable is: greater than or equal to 1831 psig. The proposed setpoint and allowable are: greater than or equal to 1766 psig and 1759 psig, respectively.

Basis for proposed no significant hazards consideration determination: 10 CFR 50.92 states that a proposed amendment will not involve a significant hazards consideration if the proposed amendment does not: (i) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (ii) Create the possibility of a new or different kind of

The only change to the plant or its operation is in the setpoints themselves. The Barton transmitters were placed with functionally equivalent components with less susceptibility to environmental conditions. The adjustment of the setpoints to more restrictive limits results in the same level of protection that the TS provide and thus does not create the possibility of a new or different kind of accident, or significantly reduce a margin of safety.

The staff concurs with the conclusions of the licensee's no signficant hazards analysis, and as such, proposes to determine that the requested change does not involve a significant hazards consideration.

Local Public Document Room location: Portland State University Library, 731 S. W. Harrison St., Portland, Oregon 97207.

Attorney for licensee: Leonard A. Girard, Esq., Portland.

General Electric Company, 121 S. W. Salmon Street, Portland, Oregon 97204.

NRC Project Director: George W. Knighton.

Portland General Electric Company et al., Docket No. 50–344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: January 15, 1988, as revised February 15, 1988.

Description of amendment request: This amendment request would revise Trojan Technical Specifications (TS) Section 6.2, "Organization." More specifically, Figure 6.2–1, "Offsite Organization" would be revised by:

(a) deleting from the Figure, those positions which do not directly or indirectly, report to the President;

(b) Moving those positions which are part of the Facility Organization from Figure 6.2–1 to Figure 6.2–2, "Facility Organization;"

(c) Indicating that the General Manager of Corporate Security will report to the Vice President, Nuclear;

(d) Deleting the Position of Vice President, Operating Services, and Manager, Control Systems; and

(e) Implementing various changes to titles and reporting structure for those positions outside the responsibility of the Vice President, Nuclear.

Figure 6.2–2, "Facility Organization" would be revised by:

(a) Adding the positions of Vice President, Nuclear, and General Manager, Technical Functions to the Figure to illustrate the interface of the Offsite Organization with the Facility Organization;

(b) Deleting staff level positions (with the exception of Operations) from the Figure so that only the supervisory positions are shown;

(c) Illustrating the newly created positions of Manager, Personnel Protection, System Engineering Branch Manager, Surveillance and Test Engineering Branch Manager, Procurement Supervisor, Quality Assurance Operations Branch Manager, and Quality Control Supervisor;

(d) Illustrating the creation of the Performance Monitoring/Events Assessment group;

(e) Indicating title changes to numerous existing positions (eg., Branch Manager instead of Supervisor);

(f) Changing the line of reporting for the Manager, Plant Modifications from the Plant General Manger to General Manager, Technical Functions;

(g) Changing the line of reporting for the Shift Technical Advisor from the Reactor Engineer to the Manager, Technical Services;

(h) Changing the lines of reporting for the Chemistry Supervisor and Radiation Supervisor from the Manager, Technical Services to the newly created Manager, Personnel Protection; and

(i) Illustrating an existing position (Plant Safety Coordinatory) on the Figure, and indicating the line of reporting for that position.

Basis for proposed no significant hazards consideration determination: 10 CFR 50.92 states that a proposed amendment will not involve a significant hazards consideration if the proposed amendment does not: (i) Involve a significant increase in the probability or consequences of an accident previous evaluated; or (ii) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (iii) Involved a significant reduction in a margin of safety.

The proposed changes regarding the deletion of positions that do not report directly or indirectly to the President and the deletion of nonsupervisory positions under the responsibility of the Vice President, Nuclear eliminates extraneous information and clarifies the Figures.

The proposed changes to lines of reporting, and the creation of new positions and organizations are designed to enhance the efficiency and the effectiveness of the Nuclear Divsion to ensure safe plant operation.

The proposed changes to position titles are administrative changes which do not alter the basic duties, functions, and requirements of those positions.

No changes are being proposed to any of the approved programs, nor the physical configuration of the plant. All limiting conditions for operation and safety system settings will continue to be imposed.

Based on the above, the proposed organization changes do not (i) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (ii) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (iii) Involve a significant reduction in a margin of safety. As such, the staff proposes to determine that the requested changes do not involve a significant hazards consideration.

Local Public Document Room location: Portland State University Library, 731 S.W. Harrison Street, Portland, Oregon 97207.

Attorney for licensee: Leonard A. Girard, Esq., Portland General Electric Company, 121 S.W. Salmon Street, Portland, Oregon 97204.

NRC Project Director: George W. Knighton.

Power Authority of The State of New York, Docket No. 50–286, Indian Point Nuclear Generating Unit No. 3, Westchester County, New York

Date of amendment request: October 13, 1987.

Description of amendment request: The license provided, in part, the following description:

This application seeks to amend Tables 3.6–1 and 4.4–1 of the Technical Specification to reflect modifications to certian containment isolation valves.

Table 3.6–1 has been revised to reflect the following:

1. addition of containment isolation valves CH–MOV–441 thru 444.
2. deletion of valves 1890 A thru H, J.
3. deletion of valves 241 A thru D.
4. deletion of valves 580 A, B.

Table 4.4–1 has been revised to reflect the following:

1. addition of containment isolation valves SP–SOV–506 thru 516.
2. addition of containment isolation valves CH–MOV–441 thru 444.
3. deletion of valves 1890 A thru H, J.
4. deletion of valves 241 A thru D.
5. deletion of valves 580 A, B.

Additionally, the appropriate valve identification prefix and suffix have been added to those valves listed in Tables 3.6–1 and 4.4–1.

Sections 3.3 and 4.4 have been revised to reflect an increase in the calculated peak containment LOCA pressure. This increased calculated pressure has necessitated a revision to the minimum pressure at which the leakage rate tests are performed. The increased calculated peak containment pressure resulted from increasing the assumed ambient containment temperature from 120°F to 130°F. The change from 120°F to 130°F was previously noticed on April 22, 1987 (52 FR 13346).

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in a margin of safety.

The licensee provided the following bases to meet the three standards:

The proposed amendment, in part, reflects the installation and removal of certain containment isolation valves. The completion of the modifications did not violate any design criteria for the containment isolation system.

The proposed amendment reflects the containment isolation system as described in the FSAR. The containment isolation criteria of at least two barriers for redundancy against leakage of readioactive fluids to the environment in the event of a Loss of Coolant Accident was not violated by the completion of the modifications. The addition of the appropriate prefix and suffix to the listed valves is a purely administrative change.

The proposed amendment, in part, revises the minimum lead-rate test pressures to reflect an increase in the calculated peak containment accident pressure. The increased calculated pressure of 41.2 psig is attributable to an increased containment ambient temperature of 130°F. The minimum test pressure, as provided in table 4.4–1, has been increased from 41 psig to 42 psig. Section 4.4 has been revised to require that the leak rate tests be performed at a minimum pressure of 41.2, the peak accident pressure. However, per procedure, the leak-rate tests have been performed at 50 psig. Therefore, the revision to table 4.4–1 will not change the manner in which the leak-rate tests are performed.

This proposed amendment, in part, revises the minimum pressurization of the weld channel and penetration pressurization system (WCPPS) to reflect an increase in the calculated peak containment accident pressure. Section 3.3 has been revised to require that the WCPPS be continuously pressurized above 42 psig before bringing the reactor above the cold shutdown condition. The WCPPS is supplied with a regulated supply of 100 psig compressed air from the instrument air system. Therefore, the revisions to Section 3.4 will not change the operations of the WCPPS.

The licensee concluded that the change does not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident previously evaluated and (3) involve a significant reduction in a margin of safety.

Based on the above, we propose to determine that this proposed change does not involve a significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10601.

Attorney for licensee: Mr. Charles M. Pratt, 10 Columbus Circle, New York, New York 10019.

NRC Project Director: Robert A. Capra, Director.

Power Authority of The State of New York, Docket No. 50–286, Indian Point Nuclear Generating Unit No. 3, Westchester County, New York

Date of amendment request: February 5, 1988.

Description of amendment request: The licensee has provided the following description of the changes to the Technical Specifications:

A. Proposed Changes to Figure 6.2–1:

> As a result of a recent Authority reorganization, staff engineering and construction management functions will be merged into existing operations departments, and the number of management levels will be reduced. The proposed changes to Figure 6.2–1 of the Indian Point 3 Technical Specifications illustrate the following changes in responsibility and management reorganization.
>
> 1. The Engineering and Design Department has been eliminated and its personnel reassigned to the Nuclear Generation and System Operations Departments.

Accordingly, the position of Executive Vice President and Chief Engineer–Engineering and Design has been eliminated.

2. The position of First Executive Vice President Operations has been eliminated.

B. Proposed Changes to Figure 6.2–2:

The proposed change to Figure 6.2–2 reflects the title change of Security Supervisor to Security Manager. This is not related to the recent reorganization.

C. Proposed Changes to Section 6.5.2.2:

As a result of the elimination of the Engineering and Design Department, the position of Vice President–Design and Analysis has been eliminated. Consequently, the Vice President–Design and Analysis will no longer be a member of the Safety Review Committee (SRC).

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed a amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in a margin of safety.

The licensee made the following analysis, in part, of these changes:

1. Does the proposed license amendment involve a significant increase in the probability or consequence of an accident previously evaluated? The proposed changes do not involve a significant increase in the probability or the consequences of an accident previously evaluated. The chain of command has been streamlined, enhancing the organization's effectiveness and efficiency without compromising functions required for the continued operation of the plant. The reorganization of the Authority and the title change discussed above are purely administrative changes which do not involve hardware or procedural changes to the facility. The changes will not adversely impact previously evaluated accidents.

2. Does the proposed license amendment create the possibility of a new or different kind of accident from any accident previously evaluated? These changes do not create the possibility of a new or different kind of accident from any accident previously evaluated since the reorganization and title change are designed to enhance the manegement and efficiency of the Authority. The changes do not involve hardware or procedural changes to the facility and cannot create the possibility of a new or different kind of accident.

3. Does the proposed amendment involve a significant reduction in a margin of safety? The responsibilities formerly associated with the positions eliminated have been assumed by others within the management hierarchy. The individuals in the existing management hierarchy who have assumed these responsibilities, satisfy the educational and experience levels described in the FSAR for the positions previously having these responsibilities. Hence, the proposed changes do not involve a reduction in a margin of safety.

Based on the above, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10601.

Attorney for licensee: Mr. Charles M. Pratt, 10 Columbus Circle, New York, New York 10019.

NRC Project Director: Robert A. Capra, Director.

Public Service Electric & Gas Company, Docket Nos. 50–272 and 50–311, Salem Nuclear Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey

Date of amendment request: December 2, 1986 and September 4, 1987.

Description of amendment request: In accordance with the requirements of 10 CFR 73.55, the licensees submitted an amendment to the Physical Security Plan for the Salem Nuclear Generating Station to reflect recent changes to that regulation. The proposed amendment would modify paragraph 2.E of Facility Operating Licenses Nos. DPR–70 and DPR–75 to require compliance with the revised Plan.

Basis for proposed no significant hazards consideration determination: On August 4, 1986 (51 FR 27817 and 27822), the Nuclear Regulatory Commission amended Part 73 of its regulations, "Physical Protection of Plants and Materials," to clarify plant security requirements to afford an increased assurance of plant safety. The amended regulations required that each nuclear power reactor licensee submit proposed amendments to its security plan to implement the revised provisions of 10 CFR 73.55. The licensee submitted its revised plan on December 2, 1986, and September 4, 1987, to satisfy the requirements of the amended regulations. The Commission proposes to amend the license to reference the revised plan.

In the Supplementary Materials accompanying the amended regulations, the Commission indicated that it was amending its regulations "to provide a more safety conscious safeguards system while maintaining the current levels of protection" and that the "Commission believed that the clarification and refinement of requirements as reflected in these amendments is appropriate because they afford an increased assurance of plant safety."

The Commission has provided guidance concerning the application of the criteria for determining whether a significant hazards consideration exists by providing certain examples of actions involving no significant hazards considerations (51 FR 7750). One of these examples of actions involving no significant hazards considerations is example (vii) "a change to conform a license to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations." The changes in this case fall within the scope of the example. For the foregoing reasons, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Salem Free Public Library, 112 West Broadway, Salem, New Jersey 08079.

Attorney for licensee: Mark J. Wetterhahn, Esquire, Conner and Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue NW., Washington, DC 20006.

NRC Project Director: Walter R. Butler.

Rochester Gas and Electric Corporation, Docket No. 50–244 R.E. Ginna Nuclear Power Plant, Wayne County, New York

Date of amendment requests: September 23, 1987 and September 24, 1987.

Description of amendment requests: (a) To Change Reporting Requirements and (b) Revise Accident Monitoring Instrument Tables. Rochester Gas and Electric Corporation proposes to (a) change the reporting requirements of iodine spiking and eliminate the 800 hour shutdown requirement and (b) incorporate the requirements of the reactor vessel level indicator system.

With respect to item (a) the proposed changes to reporting requirements would conform to the NRC Generic Letter 85–19 which permits the reporting of primary coolant iodine spikes in an annual report rather than on a more frequent basis. Also the NRC Generic Letter eliminated the requirement to shutdown if the coolant iodine activity limits are exceeded for 800 hours in a 12-month period.

For item (b) the proposed technical specification changes are related to the reactor vessel level indication system. The revision satisfies the requirement of NUREG–0737 and is identical to model specifications that are approved except for some changes to fit the Ginna technical specification format on the Accident Monitoring Instrumentation Table.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazard consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from an accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

For item (a) the reporting requirement is an administrative change to conform with an NRC Generic Letter. No physical plant changes are involved. The quality of the nuclear fuel has greatly improved with the result that normal iodine levels in the primary coolant are well below the limits and spiking need not be reported soon after an occurrence. Furthermore, the 800 hour shutdown requirement is unnecessary since appropriate actions would have been initiated long before accumulating 800 hours above the iodine activity limit. For item (b) the proposed revision is to modify the monitor instumentation tables in the technical specifications to show the total number of instrument channels and minimum channels operable for the reactor vessel level indicator system. This instrument system involves only small connections and no automatic actuation of control functions. This system increases the safety margins by providing additional information to plant operators for responding to transient incidents. The proposed changes for items (a) & (b) do not involve a significant increase in the probability or consequences of an accident previously evaluated; or create the possibility of a new or different kind of accident from any accident previously involved. As a consequence of the above, the staff has made a proposed determination that the applications for amendments involve no significant hazards consideration.

Local Public Document Room location: Rochester Public Library, 115 South Avenue, Rochester, New York 14610.

Attorney for licensee: Harry Voigt, Le Boeuf, Lamb, Leiby and McRae, Suite 1100, 1133 New Hampshire Avenue NW., Washington, DC 20036.

NRC Project Director: Richard H. Wessman.

Rochester Gas and Electric Corporation, Docket No. 50–244 R.E. Ginna Nuclear Power Plant, Wayne County, New York

Date of amendment request: December 12, 1987.

Description of Amendment: To remove Organization Charts From Technical Specifications. The proposed changes involve the deletion of the organization charts from the technical specifications. The specific organization charts will be incorporated in Chapter 13 of the Final Safety Analysis Report and in the Ginna Quality Assurance Manual. The NRC will be informed of changes through the annual updates as required by 10 CFR 50.71.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance for the application standards for determining if a no significant hazards consideration exists by providing examples of amendments that are considered not likely to involve significant hazards consideration (51ER7751). One of these examples (1) is a purely administrative change to technical specifications. The proposed changes consist of deleting the organization charts from the technical specifications and incorporating them in a more appropriate set of documents. These changes are administrative in nature because they do not change the physical aspect of the plant or equipment. These changes do not alter the licensee's commitment to maintain a management structure that contributes to the safe operation and maintenance of the plant.

The changes do not involve a significant increase in the probability or consequences of an accident previously evaluated; or create the possibility of a new or different kind of accident from an accident previously evaluated. As a consequence of the above, the staff has made a proposed determination that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: Rochester Public Library , 115 South Avenue, Rochester, New York 14610.

Attorney for licensee: Harry Voigt, Le Boeuf, Lamb, Leiby and McRae, Suite 1100, 1133 New Hampshire Avenue NW., Washington, DC 20036.

NRC Project Director: Richard H. Wessman.

Southern California Edison Company, et al., Docket Nos., 50–361 and 50–362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California.

Date of amendment request: November 4, 1987 (Reference PCN–239).

Description of amendment request: The proposed change would revise Technical Specification (TS) 3/4.2., "Engineered Safety Feature Actuation System Instrumentation" (ESFAS). TS 3/4.3.2 specifies the number of channels and type of instrumentation required to be operable, response times and periodic surveillance tests to verify operability, and actions to be taken when the minimum requirements are not met. The ESFAS instrumentation operability requirements include a response time for the Main Steam Line Isolation Valves (MSIV) which is specified in Table 3.3–5 "Engineered Safety Features Response Times". The MSIV response time is specified in two locations in Table 3.3–5, one associated with the Main Steam Isolation Signal (MSIS), the other associated with the Containment Isolation Actuation Signal (CIAS). When the San Onofre 2 & 3 Technical Specifications were originally issued, the MSIV response time was 5.0 seconds and was identified only with the MSIS entry on Table 3.3–5. Proposed Charge No. PCN–96 was submitted on November 30, 1984. PCN–96 increased the MSIV response time from 5.0 to 6.0 seconds and also added a response time of 6.0 seconds for the MSIV's under CIAS in Table 3.3–5. Prior to approval of PCN–96, SCE submitted PCN–207 which increased the MSIV response times to 8.0 seconds. Because PCN–96 had not yet been approved, PCN–207 did not request that the CIAS entry response time in Table 3.3–5 be increased to 8.0 seconds. PCN–96, which instituted a CIAS MSIV response time of 6.0 seconds, was approved by the Commission in Amendments 46 and 35 to Facility Operating Licenses NPF–10 and NPF–15 for San Onofre Units 2 & 3, respectively, on May 16, 1986. Subsequently when PCN–207 was approved by Amendments 60 and 49 on August 14, 1987, an editorial discrepancy between the MSIV response times listed in Table 3.3–5 under MSIS and CIAS was created. The proposed change would correct this editorial discrepancy by increasing the CIAS MSIV response time to 8.0 seconds. Note that Table 3.3–5 includes a 0.9 second allowance for instrumentation propagation delay; thus, the actual table entry is increased from 6.9 to 8.9 seconds.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance for determining whether a proposed amendment involves a significant hazards consideration by providing certain examples (51 FR 7751) of amendments that are considered not likely to involve significant hazards considerations. Example (i) is a purely administrative change to the technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error or a change in nomenclature.

This proposed change would correct an editorial error to make the technical specifications internally consistent. Therefore, we propose to determine that the proposed change does not involve a significant hazards consideration.

Local Public Document Room location: General Library, University of California at Irvine, Irvine, California 92713.

Attorneys of licensee: Charles R. Kocher, Esq., Southern, California Edison Company, 2244 Walnut Grove Avenue, P.O. Box 800, Rosemead, California 91770 and Orrick, Herrington & Sutcliffe, Attn: David R. Pigott, Esq., 600 Montgomery Street, San Francisco, California 94111.

NRC Project Director: George W. Knighton.

Southern California Edison Company, et al., Docket Nos. 50–361 and 50–362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California

Date of amendment request: December 14, 1987 (Reference PCN–224).

Description of amendment request: Proposed Change No NPF–10/15–224 would replace in its entirety, Technical Specification (TS) 3/4.7.1.5, "Main Steam Line Isolation Valves (MSIV's)," with a new Technical Specification 3/4.7.1.5, "Main Steam and Feedwater Isolation Valves." The proposed change would also revise Technical Specification 3/4.7.1.2, "Auxiliary Feedwater System," to explicitly define operability requirements for the auxiliary feedwater isolation and control valves. Technical Specification 3/4.7.1.5 currently defines operability requirements for MSIV's and actions to be taken when one or both MSIV's are inoperable. The operability requirements for the MSIV's ensure that no more than one steam generator will blow down in the event of a main steam line rupture assuming a single failure. Ensuring that only one steam generator blows down prevents the containment design pressure from being exceeded and limits positive reactivity addition due to cooldown of the reactor coolant system. Equally important in mitigating the consequences of these events are the main feedwater isolation valves and other secondary system valves, such as those associated with the auxiliary feedwater system, which are actuated by a main steam isolation signal (MSIS) and/or a containment isolation actuation signal (CIAS).

Technical Specification 3/4.7.1.2 defines operability requirements for the auxiliary feedwater system to ensure that emergency feedwater would be delivered to the steam generators for events requiring the initiation of emergency feedwater for continued secondary heat removal. TS 3/4.7.1.2 currently does not address the function of certain auxiliary feedwater isolation and control valves to close on an MSIS to prevent feeding the affected steam generator during a postulated steam generator rupture, and thereby limiting containment peak pressure and RCS cooldown.

Response times for the above mentioned valves are included as part of overall engineered features actuation system response times in Table 3.3–5, "Engineered Safety Features (ESF) Response times," of Technical Specification 3/4.3.2, "Engineered Safety Feature Actuation System." However, the TS 3/4.3.2 actions address only instrumentation inoperability and provide no specific actions when actuated components are inoperable. In most cases other technical specifications limiting conditions for operation (LCO's) address actuated components and provide appropriate action statements. This is currently not the case for the above mentioned valves associated with the secondary system, with the exception of the MSIV's.

The proposed change would add LCO's, surveillance requirements to verify operability, and appropriate actions to be taken which are currently not included in technical specifications for these additional valves. Specifically, the proposed change would revise Technical Specification 3/4.7.1.5 to include operability requirements for the main feedwater isolation valves (MFIV), main feedwater backup isolation valves (MFBIV) (consisting of one main feedwater regulating valve block valve and one associated regulator valve bypass valve for each steam generator), steam generator sample isolation valve (SGSIV) and blowdown isolation valve (BIV) along with the main steam isolation valves, which are currently addressed by Technical Specification 3/4.7.1.5.

The TS 3/4.7.1.5 action statement would be revised to define specific actions to be taken to address various aspects of inoperability of these valves and recognize inherent redundancy incorporated in the design of the MSIV's and MFIV's.

Surveillance Requirement 4.7.1.5 currently requires that the MSIV's be verified operable in accordance with the In Service Inspection (ISI) program with closure times as specified. The proposed change would expand the applicability of the surveillance to all of the newly added valves. Response times for the valves are included in Table 3.3–5, "ESFAS Response Times," and will no longer be repeated in TS 3/4.7.1.5. Additionally, the proposed change would require that the closure of the MFIV's and MSIV's will be verified using one of the two independent dump circuits alternately. The proposed surveillance would also require that each valve is actuated to close on its appropriate actuation signal at least once per eighteen months.

Technical Specification 3/4.7.1.2, "Auxiliary Feedwater System," requires that two motor drive and one steam driven auxiliary feedwater pump be operable along with associated flow paths. The proposed change would more explicitly define the flow path requirements and recognize the dual function of some auxiliary feedwater system valves in either isolating or providing a flow path to a steam generator depending on the situation.

The proposed change would ensure the capability to isolate the auxiliary feedwater system on a MSIS test signal to prevent feeding of the affected steam generator during postulate secondary system rupture events and will continue to ensure the capability to provide emergency feedwater to the appropriate steam generator(s) for secondary heat removal during postulated events where a loss of main feedwater is assumed.

The proposed change would revise the TS 3/4.7.1.2 action statements to clarify that the action statement explicitly applies to flow paths as well as auxiliary feedwater pumps.

The proposed change would modify Surveillance Requirement 4.7.1.2.1.b.2 to clarify that only the motor driven AFW pumps start automatically upon receipt of an EFAS test signal. The steam driven turbine pump is routinely tested in accordance with Surveillance Requirement 4.7.1.2.1.a.1 and the inlet valve to this pump is verified to open upon receipt of an EFAS test signal per Surveillance Requirement 4.7.1.2.1.b.1. A new Surveillance Requirement 4.7.1.2.1.b(3) would be added to demonstrate operability by verifying that each automatic valve in the flow path must be in its isolation postion on a MSIS test signal except HV–8200 and HV–8201. In addition, operability of all of these valves will be required to be demonstrated at least once per 18 months.

The proposed change would also revise the Bases to Technical Specification 3/4.7.1.5 to cover both the MSIV's and the MFIV's instead of just MSIV's. Specifically, the Bases 3/4.7.1.5. would clarify the functions of the MSIV's and the MFIV's in the event of a main steam or feedwater line rupture. The term "actuation signals" would also be added along with main steam and feedwater isolation system value closure times specified by the Surveillance Requirements to achieve consistency with the assumptions used in the accident analysis.

Basis for proposed non significant hazards consideration determination: The NRC staff proposes to determine that the proposed amendment does not involve a significant hazards consideration because, as required by the criteria of 10 CFR 50.92(c), operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The proposed change would define the required LCO's and action statements for the main steam and feedwater isolation valves which currently exist only for the MSIV's. The proposed change would also incorporate the required action statements for the auxiliary feedwater isolation and control valves in Technical Specification 3/4.7.1.2. Thus, these changes would more clearly define plant operation to be consistent with the assumptions of the accident analyses, thereby avoiding any potentially unacceptable consequences for design basis steam or feedwater line breaks. Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change does not alter the configuration of the plant or its operation. Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed change does not reduce the effectiveness of the main steam and feedwater isolation valves or the auxiliary feedwater system. Therefore, the proposed change will not involve a significant reduction in a margin of safety.

Local Public Document Room location: General Library, University of California at Irvine, Irvine, California 92713.

Attorneys for licensee: Charles P. Kocher, Esq., Southern California Edison Company, 2244 Walnut Grove Avenue, P.O. Box 800, Rosemead, California 91770 and Orrick, Herrington & Sutcliffe, Attr: David R. Pigott, Esq., 600 Montgomery Street, San Francisco, California 94111.

NRC Project Director: George W. Knighton.

Southern California Edison Company, et al., Docket Nos. 50–361 and 50–362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California

Date of amendment request: December 22, 1987 (Reference PCN–238).

Description of amendment request: the proposed change would revise the applicability of Limiting Conditions for Operation (LCO) and Surveillance Requirements, Technical Specification 3.0.4 and Surveillance Requirements 4.0.3 and 4.0.4, on the basis of Generic Letter 87–09 entitled "Sections 3.0 and 4.0 of the Standard Technical Specifications (STS) on the Applicability of Limiting Conditions for Operation and Surveillance Requirements." The proposed change would incorporate a provision in Technical Specification 3.0.4 allowing entry into an operational mode or specified condition in accordance with Action requirements when conformance to them would permit continued operation for an unlimited period of time. It would add a provision in Surveillance Requirement 4.0.3 allowing a delay for up to 24 hours to permit the completion of the surveillance when the allowable outage time limits of some applicable Action requirements are less than 24 hours. It would also revise Surveillance Requirement 4.0.4 to include a provison that would not prevent passage through or to Operational Modes as required to comply with Action requirements. The proposed revision to the Bases for all specifications in Sections 3.0 and 4.0 would provide a better justification supporting their applicability. The licensee expects to avoid inconsistent application of exceptions to Specification 3.0.4 affecting twenty-five (25) existing Technical Specifications with the proposed provision of Specification 3.0.4.

Basis for proposed no significant hazards consideration determination: The NRC staff proposes to determine that the proposed amendment does not involve a significant hazards consideration because, as required by the criteria of 10 CFR 50.92(c), operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The changes proposed by this amendment have been reviewed by the staff and documented in Generic Letter 87–09. The change to Technical Specification 3.0.4 would clarify the requirements regarding mode changes when the plant has entered an action statement; it would not change those requirements. The change to Technical Specification 4.0.3 would allow time to complete a missed surveillance test prior to commencing a power reduction. Since the majority of surveillances are completed successfully, This would avoid a potentially unnecessary transient and would therefore reduce the potential for plant upset and challenges to safety systems. The change to Technical Specification 4.0.4 would resolve potential conflicts between Specifications 4.0.3 and 4.0.4 relating to mode changes; it would not change the intent of the specifications in any way. For these reasons, the staff proposes to determine that the requested amendments would not involve a significant hazards consideration.

Local Public Document Room location: General Library, University of California at Irvine, Irvine, California 92713.

Attorneys for licensee: Charles R. Kocher, Esq., Southern California Edison Company, 2244 Walnut Grove Avenue, P.O. Box 800, Rosemead, California 91770 and Orrick, Herrington & Sutcliffe, Attn: David R. Pigott, Esq., 600 Montgomery Street, San Francisco, California 84111.

BEST COPY AVAILABLE

The Cleveland Electric Illuminating Company, Duquesne Light Company, Ohio Edison Company, Pennsylvania Power Company, Toledo Edison Company, Docket No. 50–440, Perry Nuclear Power Plant, Unit No. 1, Lake County, Ohio

Date of amendment request: October 2, 1987.

Description of amendment request: The proposed amendment would modify the Corbicula Monitoring Program required by Appendix B of the Perry Nuclear Power Plant license as defined in the licensees' October 2, 1987 letter.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

The Perry Nuclear Power Plant Final Safety Analysis Report (FSAR) Section 9.2.1.4 states that monitoring for possible flow blockage in the Emergency Service Water System resulting from sources such as Asiatic Clams, will be accomplished through a program of lake water sampling, surveillance testing, and maintenance inspections. The licensees have revised the Corbicula Monitoring Program to incorporate new technology in this area. On this basis, the licensees assert that the proposed change would not involve a significant increase in the probability or consequences of an accident previously evaluated.

The licensees also state that the monitoring program would not create the possibility of a new or different kind of accident from any accident previously evaluated because the purpose of the monitoring program is to detect the presence of Corbicula which, by virtue of the monitoring procedures, does not have the potential to introduce new or different kinds of accidents.

Further, the licensees have stated that the proposed monitoring program represents an improvement over that which exists and therefore, could not result in a reduction in a margin of safety. The staff has reviewed the licensee's determination and concurs that the proposed amendment would not involve a significant increase in the probability or consequences of an accident previously evaluated, create the possibility of a new or different kind of accident from any accident previously evaluated, or involve a significant reduction in a margin of safety.

Therefore, the staff proposes to determine that the proposed amendment would involve no significant hazards considerations.

Local Public Document Room location: Perry Public Library, 3753 Main Street, Perry, Ohio 44081.

Attorneys for licensee: Jay Silberg, Esq., Shaw, Pittman, Potts & Trowbridge, 2300 N Street, NW., Washington, D.C. 20037.

NRC Project Director: Kenneth E. Perkins.

Virginia Electric and Power Company, Docket Nos. 50–338 and 50–339, North Anna Power Station, Units No. 1 and No. 2, Louisa County, Virginia

Date of amendment request: April 1, 1987.

Description of amendment request: The proposed change would modify the North Anna Units 1 and 2 (NA–1&2) Technical Specification (TS) Section ¾.9.10 to be consistent with the Standard TS for Westinghouse Pressurized Water Reactors, NUREG–0452, Revision 3. The change would enhance operating flexibility while in Mode 6 (Refueling) and thereby reduce the time required for refueling operations.

The present NA–1&2 TS 3.9.10 requires that "At least 23 feet of water shall be maintained over the top of the reactor pressure vessel flange." The APPLICABILITY statement for the present NA–1&2 TS 3.9.10 states, "During core alterations while in Mode 6." The proposed change would modify the APPLICABILITY statement to specify "During movement of fuel assemblies or control rods within the reactor pressure vessel while in Mode 6," which is consistent with NUREG–0452, Revision 3.

This change would allow the removal of vessel internal assemblies with less than the specified water level, but would still require 23 feet of water above the vessel flange whenever fuel assemblies or control rods are to be moved. This is consistent with the Standard TS (NUREG–0452, Rev. 3) and the NA–1&2 Accident Analysis.

The bases for the North Anna TS and the Standard Technical Specification state, "The restrictions on minimum water level ensure that sufficient water depth is available to remove 99% of the assumed 10% iodine gap activity released from the rupture of an irradiated fuel assembly. The minimum water depth is consistent with the assumptions of the accident analysis."

The NA–1&2 Updated Final Safety Analysis Report (UFSAR) Accident Analysis lists the "Fuel-Handling Accident Inside Containment" as ". . . a fuel assembly is assumed to drop, underwater, and rupture the cladding of all rods in that bundle." The analysis shows that the postulated release of radioactivity to the environment to be well below 10 CFR Part 100 limits.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed changes in the plant TS in accordance with the standards of 10 CFR 50.92(c) and has determined that operation of NA–1&2 in accordance with these changes would not:

1. involve a significant increase in the probability of consequences of an accident previously evaluated. This change does not alter the conditions or assumptions of the accident analysis or the basis of the current TS. Fuel handling operations during refueling are unchanged and the refueling water level requirement remains consistent with the accident analysis assumptions in the UFSAR concerning the minimum required water level. Therefore, the probability or consequence of the fuel handling accident are not increased.

2. create the possibility or a new or different kind of accident from any accident previously identified. This change does not alter the conditions or assumptions of the accident analysis or the basis of the current TS. Fuel handling operations during refueling are unchanged and therefore the fuel handling accident evaluated in the UFSAR remains bounding in terms of the type of accidents that may occur and a new and different kind of accident is not created.

3. involve a significant reduction in a margin of safety. This change does not alter the conditions or assumptions of the accident analysis or the bases of the current TS. Fuel handling operations during refueling are unchanged and the refueling water level requirement remains consistent with the assumptions of the accident analysis. Consequently, the margin to 10 CFR Part 100 dose limits is not reduced.

The NRC staff agrees that the proposed changes to the Technical Specifications meet the criteria specified in 10 CFR Part 50.92(c) and, hence, proposes to determine that they involve no significant hazards considerations.

Local Public Document Room location: Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia 23093 and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Attorney for licensee: Michael W. Maupin, Esq., Hunton, Williams, Gay and Gibson, P.O. Box 1535, Richmond, Virginia 23212.

NRC Project Director: Herbert N. Berkow.

Wisconsin Electric Power Company, Docket Nos. 50–266 and 50–301, Point Beach Nuclear Plant, Unit Nos. 1 and 2, Town of Two Creeks, Manitowoc County, Wisconsin

Date of amendments request: October 13, 1987.

Description of Amendments request: Technical specifications (TS) Table 15.4.1–1, "Minimum Frequencies for Checks, Calibrations and Test of Instrument Channels," Item 25, "Steam Generator Pressure," identifies the surveillance requirements for the checking, calibrating and testing of steam generator pressure channels. Currently, TS Table 15.4.1–1, Item 25, requires in part;

(1) that all three steam generator pressure channels be checked on a shift basis, except during periods of refueling shutdown if the steam generator vessel temperature is greater than 70°F; and

(2) that a steam generator pressure channel test be performed on a monthly basis, except during periods of refueling shutdown if the steam generator vessel temperature is greater than 70°F.

In its October 13, 1987 letter, the licensee proposed revising these requirements, respectively, to require:

(1) that all three steam generator pressure channels be checked on a shift basis, except during cold shutdown or refueling shutdown, when a check of one pressure channel per steam generator is required when the steam generator could be pressurized, and

(2) that a steam generator pressure charrel test be performed on a monthly basis, except during periods of refueling shutdown; however, the test must be performed prior to startup if it has not been performed during the previous surveillance period.

The proposed TS change only affects channel checks and tests during refueling or cold shutdowns. The proposed TS does not change the current required "at-power" steam generator pressure channel checks or tests.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a no significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated. The net effect of the proposed changes is to modify the surveillance requirements of the steam generator pressure channels when the plant is in cold shutdown or refueling shutdown. The surveillance requirements are unchanged for power operations; therefore, the probability or consequences of an accident previously evaluated are unchanged.

The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated. The steam generator pressure channels cannot initiate accidents, but are installed to send a safety injection actuation signal in response to low steam generator pressure, which may be a result of abnormal primary-side conditions. The steam generator pressure channels themselves do not cause accidents; therefore, the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed changes do not involve a significant reduction in a margin of safety. The proposed changes do not change the at-power steam generator pressure channel surveillance; therefore, the margin of safety is unchanged.

Local Public Document Room location: Joseph P. Mann Library, 1516 Sixteenth Street, Two Rivers, Wisconsin.

Attorney for licensee: Gerald Charnoff, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037.

NRC Project Director: Kenneth E. Perkins.

Yankee Atomic Electric Company, Docket No. 50–029, Yankee Nuclear Power Station, Franklin County, Massachusetts

Date of amendment request: January 5, 1988.

Description of amendment request: The proposed amendment would put into effect the following three administrative changes:

1. The Plant Operations Manager would not be required to maintain a Senior Reactor Operator's license.

2. The Security Organization would report to a Security Manager who in turn would report to the Administrative Services Manager.

3. The Reactor Engineering Manager would report to the Assistant Technical Director.

All of these changes would be reflected in the Facility Organization Chart, Figure 6.2.2 of the Technical Specifications.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee's analyses contained in the January 5, 1988, letter states the following:

> This proposed change is administrative in nature. It has been evaluated and determined to involve no significant hazards consideration. As such, this proposed change would not:
>
> 1. Involve a significant increase in the probability or consequences of an accident previously evaluated.
>
> 2. Create the possibility of a new or different kind of accident from any previously analyzed.
>
> 3. Involve a significant reduction in a margin of safety.
>
> Based on the considerations contained herein, it is concluded that there is reasonable assurance that operation of the Yankee plant, consistent with the proposed Technical Specifications, will not endanger the health and safety of the public. This

proposed change has been reviewed by the Nuclear Safety Audit and Review Committee.

The staff has reviewed the licensee's analysis and agreed with it. Therefore, we conclude that the amendment satisfies the three criteria listed in 10 CFR 50.92. Based on that conclusion the staff proposes to make no significant hazards consideration determination.

PREVIOUSLY PUBLISHED NOTICES OF CONSIDERATION OF ISSUANCE OF AMENDMENTS TO OPERATING LICENSES AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices either because time did not allow the Commission to wait for this biweekly notice or because the action involved exigent circumstances. They are repeated here because the biweekly notice lists all amendments issued or proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and page cited. This notice does not extend the notice period of the original notice.

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of amendment request: February 10, 1988.

Brief description of amendment: The proposed amendment would reduce the required Reactor Coolant System total flow from 396,100 gpm to 387,600 gpm.

Date of publication of individual notice in **Federal Register**: February 17, 1988 (53FR4793).

Expiration date of individual notice: March 18, 1988.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730.

Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County California

Date of amendment request: December 30, 1987.

Brief description of amendments: The proposed amendments would authorize each facility to possess byproduct and special nuclear materials produced by operation of San Onofre Nuclear Generating Station, Unit 1.

Date of publication of individual notice in **Federal Register**: February 12, 1988 (53 FR 4247).

Expiration date of individual notice: March 14, 1988.

Local Public Document Room location: General Library, University of California, P.O. Box 19557, Irvine, California 92713.

Wisconsin Public Service Corporation, Docket No. 50-305, Kewaunee Nuclear Power Plant, Kewaunee County, Wisconsin

Date of amendment request: February 5, 1988.

Description of amendment request: The amendment would add a license condition to allow a plant modification to the steam generator upper lateral support snubbers by reducing the number of snubbers from four to one based or application of "leak-before-break" technology as permitted by revised General Design Criterion 4.

Date of publication of individual notice in **Federal Register**: February 16, 1988 (53 FR 4479).

Expiration date of individual notice: March 17, 1988.

Local Public Document Room location: University of Wisconsin Library Learning Center, 2420 Nicolet Drive, Green Bay, Wisconsin 54301.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the **Federal Register** as indicated. No requested for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmetnal assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

Arizona Public Service Company, et al., Docket Nos. STN 50-528, STN 50-529 and STN 50-530, Palo Verde Nuclear Generating Station, Units 1, 2 and 3, Maricopa County, Arizona

Date of application for amendments: November 20, 1987.

Brief description of amendments: The amendments revise Table 3.3-6 in Technical Specification 3.3.3.1, "Radiation Monitoring Instrumentation," by changing the detectable range of the main steam line effluent monitors from 10^{-3}-10^{4} per hour to 10^{0}-10^{5} mR per hour.

Date of Issuance: February 26, 1988.

Effective date: February 26, 1988.

Amendment Nos.: 26, 15 and 3.

Facility Operating License Nos. NPF-41, NPF-51 and NPF-74: Amendments change the Technical Specifications.

Date of initial notice in **Federal Register**: December 30, 1987 (52 FR 49220).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated Friday 26, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Phoenix Public Library, Business and Science Division, 12 East McDowell Road, Phoenix, Arizona 85004.

Carolina Power & Light Company, et al., Docket Nos. 50-325 and 50-324, Brunswick Steam Electric Plant, Units 1 and 2, Brunswick County, North Carolina

Date of application for amendments: August 5, 1987.

Description of amendments: The amendments change the Technical Specification Surveillance Requirement 4.61.2 to allow use of the mass-point method for calculating containment leakage rate.

Date of issuance: February 17, 1988.

Effective data: February 17, 1988.

Amendments Nos.: 116 and 144.

Facility Operating License Nos. DPR-71 and DPR-62. Amendments revise the Technical Specifications.

Date of initial notice in **Federal Register**: December 16, 1987 (52 FR 47776)

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 17, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: University of North Carolina at Wilmington, William Madison Randall Library, 601 S. College Road, Wilmington, North Carolina 28403-3297.

Carolina Power & Light Company, et al., Docket No. 50-400, Shearon Harris Nuclear Power Plant, Unit 1, Wake and Chatham Counties, North Carolina

Date of application for amendment: November 23, 1987.

Brief description of amendment: The amendment deletes Surveillance Requirement 4.4.11.1, which requires quarterly testing of the reactor coolant system (RCS) vent path block valves and modifies Surveillance Requirement 4.4.11.2.b to include the testing of the above cited block valves at least once every 18 month interval.

Date of issuance: February 12, 1988.

Effective date: February 12, 1988.

Amendment No.: 4.

Facility Operating License No. NPF-63. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register**: December 16, 1987 (52 FR 47780).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 12, 1988.

No significant hazards consideration comments received: No.

Attorney for the Licensee: R. E. Jones, General Counsel, Carolina Power & Light Company, P.O. Box 1551, Raleigh, North Carolina 27602.

Local Public Document Room location: Richard B. Harrison Library, 1313 New Bern Avenue, Raleigh, North Carolina 27610.

Common Wealth Edison Company, Docket Nos. 50-237, 50-249, Dresden Nuclear Power Station, Unit Nos. 2 and 3, Grundy County, Illinois

Date of application for amendments: August 28, 1986.

Brief description of amendments: The proposed amendment deletes certain diesel generator testing requirements to eliminate unnecessary and excessive testing. In addition, a one and one-half hour maintenance period is allowed without requiring low pressure core cooling surveillance.

Date of issuance: February 19, 1988.

Effective date: February 19, 1988.

Amendment Nos: 98 and 93.

Provisional Operating License No. DPR-19 and Facility Operating License. No. DPR-25. The amendments revise the Technical Specifications.

Date of initial notice in **Federal Register**: March 25, 1987 (52 FR 9562).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 19, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Morris Public Library, 604 Liberty Street, Morris, Illinois 60450.

Commonwealth Edison Company, Docket Nos. 50-254 and 50-265, Quad Cities Nuclear Power Station, Units 1 and 2, Rock Island County, Illinois

Date of application for amendments: October 16, 1987.

Description of amendment requests: The range of Drywell Pressure specified in Technical Specifications Table 3.2-4, for Units 1 and 2, were expanded from "0 to 75 psig" to "-10 inches Hg to 70 psig". Additionally, a typographical error on Table 3.2-4, for Unit 2, was corrected where reference was made to Unit 1 instrumentation rather than Unit 2.

Date of issuance: February 17, 1988.

Effective date: February 17, 1988.

Amendment Nos: 105 and 101.

Facility Operating License Nos. DPR-29 and DPR-30. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: November 4, 1987 (52 FR 42359). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 17, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Dixon Public Library, 221 Hennephin Avenue, Dixon, Illinois 61021.

Connecticut Yankee Atomic Power Company, Docket No. 50-213, Haddam Neck Plant Middlesex County, Connecticut; Northeast Nuclear Energy Company, et al.; Docket Nos. 50-245, 50-336, and 50-423, Millstone Nuclear Power Station, Unit Nos. 1, 2, and 3, New London County, Connecticut

Date of application for amendment: September 24, 1987 and November 2, 1987 (Millstone Unit 2 only).

Brief description of amendment: The change modifies the Technical Specifications as follows: (1) TS 6.5.3.9.b (TS 6.5.2.9.b for Haddam Neck), "Records" is modified to identify the Nuclear Review Board (NRB) minutes as an acceptable means to forward certain reports to the Senior Vice President, Nuclear Engineering and Operations, (2) a maximum of 12 hours of continuous, planned inoperability for liquid and gaseous effluent monitoring instrumentation is permitted (Millstone Unit 2 only), (3) inoperability of liquid and gaseous effluent monitoring instruments for the purpose of obtaining samples, is permitted (Millstone Unit 2 only), (4) a period of 12 hours within which auxiliary sampling of radioactive gaseous effluent must be initiated if the established minimum number of effluent monitoring channels become inoperable, is established (Millstone Unit 2 only).

Date of issuance: February 23, 1988.

Effective date: February 23, 1988.

Amendment Nos.: 100, 14, 125, 15.

Facility Operating License Nos. DPR-61, DPR-21, DPR-65 and NPF-49. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register**: October 21, 1987 (52 FR 39298) for the September 24, 1987 application and December 16, 1987 (52 FR 47789) for the November 2, 1987 application.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 23, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Russell Library, 123 Broad Street, Middletown, Connecticut 06103 and Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of application for amendments: November 13, 1987, as supplemented December 11, 1987 and January 15 and 20, 1988.

Brief description of amendments: The amendments modified the Technical Specifications to ensure that plant operation is consistent with the design and safety evaluation conclusions of the Unit 2 cyle 2 reload safety evaluation, and to reflect the addition to the Boron Dilution Mitigation System for Unit 2.

Date of issuance: January 19, 1988.

Effective date: January 19, 1988.

Amendment Nos.: 38 and 30.

Facility Operating License Nos. NPF-35 and NPF-52. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 30, 1987 (52 FR 49225).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated January 19, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: York County Library, 138 East Black.

Duke Power Company, et al., Docket No. 50-414, Catawba Nuclear Station, Unit 2, York County, South Carolina

Date of application for amendment: December 4, 1987.

Brief description of amendment: The amendment revised license condition 2.C.(8)(b) to allow an extension of time for resolution of the Safety Parameter Display System issue.

Date of issuance: February 16, 1988.

Effective date: February 16, 1988.

Amendment No.: 32.

Facility Operating License No. NPF-52. Amendment revised the Operating License.

Date of initial notice in **Federal Register:** December 30, 1987 (52 FR 49224).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 16, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730.

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of application for amendments: July 22, 1987, as supplemented May 26, August 31, October 1, October 30, November 19, and December 14, 1987.

Brief description of amendments: The amendments modified the Technical Specifications to accommodate removal of the resistance temperature detector (RTD) bypass manifold systems and the installation of in-line RTDs.

Date of issuance: February 17, 1988.

Effective date: February 17, 1988.

Amendment Nos.: 40 and 33.

Facility Operating License Nos. NPF-35 and NPF-52. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 2, 1987 (52 FR 45685).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 17, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Florida Power Corporation, et al., Docket No. 50-302, Crystal River Unit No. 3 Nuclear Generating Plant, Citrus County, Florida

Date of application for amendment: October 26, 1987, as supplemented October 29, November 16, November 20 and November 25, 1987, December 16, 1987, January 7 and February 1, 1988.

Brief description of amendment: This amendment changes the surveillance requirement for the emergency diesel generator loading to reflect the diesel generator ratings and the present total load they would be expected to carry. The requirement for verifying the auto-connected loads has also been updated to reflect the present loads.

Date of issuance: February 19, 1988.

Effective date: February 19, 1988.

Amendment No.: 104.

Facility Operating License No. DPR-72. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** November 27, 1987 (52 FR 45413).

The initial notice was published under exigent circumstances allowing the public 15 days to comment and until December 14, 1987 to file a petition for leave to intervene. A correction to the initial notice was published in the **Federal Register** on December 14, 1987 (52 FR 47466) allowing the public until December 28, 1987 to file a petition for leave to intervene.

In response to the staff's request, the licensee's November 25 and December 16, 1987, and January 7 and February 1, 1988 letters provided additional information which did not change the initial determination as published in the **Federal Register.**

The Commission's related evaluation of the amendment is contained in an Environmental Assessment dated December 15, 1987 (52 FR 48357), an Exemption dated December 23, 1987 (52 FR 48537) and in a Safety Evaluation dated February 19, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Crystal River Public Library, 668 N.W. First Avenue, Crystal River, Florida 32629.

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket No. 50-321, Edwin I. Hatch Nuclear Plant, Unit 1, Appling County, Georgia

Date of application for amendment: July 13, 1987.

Brief description of amendments: The amendment modified the definition of surveillance frequency in Section 1.II of the Technical Specifications to provide for an 18-month operating cycle instead of the 15 months specified previously.

Date of issuance: February 16, 1988.

Effective date: February 16, 1988.

Amendment No.: 152.

Facility Operating License No. DPR-57. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 13, 1988 (53 FR 827).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 16, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Appling County Public Library, 301 City Hall Drive, Baxley, Georgia 31513.

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket No. 50-366, Edwin I. Hatch Nuclear Plant, Unit 2, Appling County, Georgia

Date of application for amendment: September 22, 1987.

Brief description of amendment: The amendment revised the Technical Specifications related to the sodium pentaborate solution in the Standby Liquid Control System.

Date of issuance: February 3, 1988.

Effective date: February 3, 1988.

Amendment No.: 90.

Facility Operating License No. NPF-5: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** November 18, 1987 (52 FR 44244).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 3, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Appling County Public Library, 301 City Hall Drive, Baxley, Georgia 31513.

Gulf States Utilities Company, Docket No. 50-458, River Bend Station, Unit 1, West Feliciana Parish, Louisiana

Date of amendment request: August 5, 1987 as supplemented November 23, 1987.

Brief description of amendment: The amendment revised the total predicted structural settlement for Settlement Marker Nos. 28 and 34.

Date of issuance: February 11, 1988.

Effective date: February 11, 1988.

Amendment No.: 18.

Facility Operating License No. NPF-47. The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** September 9, 1987 (52 FR 34009).

The licensee's November 23, 1987 submittal provided clarifying information on the differential settlement calculations and did not alter the NRC staff's determination of no significant hazards as published in the **Federal Register.**

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 11, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803.

Iowa Electric Light and Power Company, Docket No. 50-331, Duane Arnold Energy Center, Linn County, Iowa

Date of application for amendment: August 31, 1987.

Brief description of amendment: This amendment revises the Duane Arnold Energy Center Technical Specifications to revise the requirement from one year to once per operating cycle for emergency diesel generator inspections. Other changes requested by the August 31, 1987, application are being handled separately.

Date of issuance: February 23, 1988.

Effective date: February 23, 1988.

Amendment No.: 149.

Facility Operating License No. DPR-49. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 30, 1987 (52 FR 49228).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 23, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Cedar Rapids Public Library, 500 First Street, SE, Cedar Rapids, Iowa 52401.

Louisiana Power and Light Company, Docket No. 50-382, Waterford Steam Electric Station, Unit 3, St. Charles Parish, Louisiana

Date of amendment request: October 27, 1987.

Brief description of amendment: The amendment revised the Technical Specifications by changing the inspection interval for low pressure turbine heavy disc rotors from 40 to 60 months.

Date of issuance: February 23, 1988.

Effective date: February 23, 1988,

Amendment No.: 30.

Facility Operating License No. NPF-38. Amendment revised the Technical Specification.

Date of intitial notice in **Federal Register:** December 16, 1987 (52 FR 47788).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 23, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: University of New Orleans Library, Louisiana Collection, Lakefront, New Orleans, Louisiana 70122.

Nebraska Public Power District, Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: December 1, 1987.

Brief description of amendment: The amendment changed the Technical Specifications to (1) revise the Source Range Monitor and Intermediate Range Monitor operability requirements to clarify that negative power supply voltage is required for operability, (2) delete operability and surveillance requirements for certain post-accident monitoring instrumentation during shutdown and refueling conditions, and (3) revise an incorrect statement regarding the main steam line high flow isolation instrumentation setpoint.

Date of issuance: February 11, 1988.

Effective date: The changes related to SRM/IRM power supply become effective 12 months from this date. The remaining changes are effective immediately.

Amendment No.: 115.

Facility Operating License No. DPR-46. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 30, 1987 (52 FR 49228).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 11, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Auburn Public Library, 118 15th Street, Auburn, Nebraska 68305.

Nebraska Public Power District, Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: October 20, 1987.

Brief description of amendment: The amendment changes the Technical Specifications to revise the interval for performing the diesel generator periodic inspection from annually to 18 months.

Date of issuance: February 17, 1988.

Effective date: February 17, 1988.

Amendment No.: 116.

Facility Operating License No. DPR-46. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register**November 18, 1987 (52 FR 44246).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 17, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Auburn Public Library, 118 15th Street, Auburn, Nebraska 68305.

Nebraska Public Power District, Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: December 22, 1987.

Brief description of amendment: The amendment changed the Technical Specifications to modify the operability requirements for the Rod Sequence Control system and Rod Worth

Minimizer to allow the Banked Position Withdrawal System to be used for rod pattern control between 100% and 50% rod density.

Date of issuance: February 23, 1988.

Effective date; February 23, 1988.

Amendment No.: 117.

Facility Operating License No. DPR-46. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:**ecember 30, 1987 (52 FR 49229).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 23, 1988.

No significant hazards considered comments received: No.

Local Public Document Room location: Auburn Public Library, 118 15th Street, Auburn, Nebraska 68305.

Niagara Mohawk Power Corporation, Docket No. 50–220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of application for amendment: February 17, 1987 (corrected editorially by letter dated July 27, 1987) and July 31, 1987 (corrected editorially by letter dated September 11, 1987).

Brief description of amendment: Changes to the Radiological Effluent Technical Specifications that correct typographical errors, clarify some statements, delete inapplicable sections, and make these Technical Specifications consistent with those of Nine Mile Point Unit 2.

Date of issuance: February 8, 1988.

Effective date: February 8, 1988.

Amendment No.: 94.

Facility Operating License No. DPR-63: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** September 23, 1987 (52 FR 35799) and September 9, 1987 (52 FR 34015).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 8, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: State University of New York, Penfield Library, Reference and Documents Department, Oswego, New York 13126.

Northeast Nuclear Energy Company, et al., Docket No. 50–423, Millstone Nuclear Power Station, Unit No. 3, Town of Waterford Connecticut

Date of application for amendment: September 9, 1987 and supplemented September 9, 1987, September 30, 1987, November 10, 1987, November 25, 1987, December 23, 1987, and January 7, 1988.

Brief description of amendment: The amendment revised several Technical Specification Sections as required by the Cycle 2 reload. These changes will allow a positive moderator temperature coefficient (PMTC) at reactor power levels less than 100%. In addition, some changes are required as a result of the replacement of the resistance temperature detector (RTD) bypass system with thermowell-mounted RTDs in the reactor coolant system. The changes are:

A. Technical Specification Changes due to Cycle 2 Reload:

1. *Section 3.1.1.3*—The change would allow a +5 pcm/°F MTC below 70 percent of rated power, ramping down to 0 pcm/°F at 100 percent power.

2. *Section 3.1.2.5, 3.1.2.6 and 3.5.4*—The change will increase the range of acceptable boron concentration in the Refueling Water Storage Tank (RWST) to 2300–2600 ppm from the previous range of 2000–2200 ppm.

3. *Section 3.5.1*—The change will increase the range of acceptable boron concentration in the Accumulators to 2200–2600 ppm from the previous range of 1900–2200 ppm.

4. *Section 3.6.2.3*—The change will increase the range of acceptable sodium hydroxide concentrations in the chemical addition tank (CAT) to 2.41–3.10% from the previous range of 1.35–2.00%. The volume (level) in the CAT is reduced to a range of 18000–19000 from the previous range of 19100–20100 gallons.

5. *Section 3.9.1*—The change will increase the boron concentration in the filled portion of the reactor coolant system (RCS) and refueling canal during Mode 6 to correspond with the new minimum RWST boron concentration.

B. Techical Specification Changes due to the Elimination of the RTD Bypass System.

1. *Table 2.2-1*—The change will revise the values of 'Z' and Sensor Error(s) for the overtemperature delta–T and overpower delta–T trips. In addition, the change will revise the value of 'Z,' the sensor error(s) and the allowable value for the reactor coolant flow-low trip. In the Table notations for Table 2.2–1 changes are proposed to note #1 to specify how delta–T is to be measured, and to change the lead-lag compensator time constant tau–1. Notes #2 and #4 are to be revised to change the amount by which a channel maximum trip setpoint may exceed its computed trip setpoint.

2. *Sections 3.2.3.1 and 3.2.3.2*—The change will revise the minimum RCS flow rates for both four and three-loop operations. The uncertainty values for flow measurement specified in Sections 3.2.3.1 and 3.2.3.2 are also to be changed.

3. *Table 3.2–1*—The change will revise the values specified for RCS Tave and Pressurizer Pressure which are the limits assumed in the safety analysis.

4. *Table 3.2–2*—The change will revise the response time for the overtemperature delta-T and overpower delta-T trip functions.

5. *Table 4.3–1*—The change will delete the reference to footnote #12 in Table 4.3–1, since it is no longer relevant once the RDT bypass system is removed.

6. *Table 3.3–4*—The change will revise the allowable values for functional Unit 5.d.1 and 5.d.2, "Tave low coincident with reactor trip (P–4)" and Functional Unit 9.b, "ESFAS Interlocks—Low Low Tave (P–12)."

7. *Table 3.3–5*—The change will revise the response time for feedwater isolation on Tave low coincident with reactor trip (P–4).

C. Other Technical Specification Changes:

1. Section 3.4.1.6—The existing specification would require that the boron centration of an isolated loop be greater than 2300 ppm prior to bringing it back into service if necessary to match the boron concentrations of the operating loops. The change will require a boron concentration of at most 2300 ppm.

Date of issuance: January 20, 1988.

Effective date: January 20, 1988.

Amendment No.: 12.

Facility Operating License No. NPF-49. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** November 4, 1987 (52 FR 42367).

The November 10 and 25, 1987, and December 23, 1987 and January 7, 1988 submittals provided additional clarifying information and did not change the finding of the initial notice.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated January 20, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Northeast Nuclear Energy Company, et al., Docket No. 50–423, Millstone Nuclear Power Station Unit No. 3, Town of Waterford, Connecticut

Date of application for amendment: December 4, 1987.

Brief description of amendment: The amendment revised the Technical Specification Section 3/4.3.2 to delete the chlorine detection system.

Date of issuance: February 16, 1988.

Effective date: February 16, 1988.

Amendment No.: 14.

Facility Operating License No. NPF-49. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 13, 1988 (53 FR 830).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 16, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, Docket Nos. 50–277 and 50–278, Peach Bottom Atomic Power Station, Unit Nos. 2 and 3, York County, Pennsylvania

Date of application for amendments: August 6, 1981 as supplemented on April 2, 1984, December 2, 1985, October 29, 1986 and July 7, 1987.

Brief description of amendment: The amendments changed the methods of verifying containment drywell-suppression chamber vacuum breaker closure and made several administrative changes to correct errors, to establish consistency and for editorial clarity.

Date of issuance: February 18, 1988.

Effective date: With 60 days of its date of issuance to accommodate the writing and approval of implementing procedures.

Amendment Nos.: 127 and 130.

Facility Operating License Nos. DPR–44 and DPR–56: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 20, 1984 (49 FR 25369) and January 29, 1986 (51 FR 3716).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 18, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126.

Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, Docket Nos. 50–277 and 50–278, Peach Bottom Atomic Power Station, Unit Nos. 2 and 3, York County, Pennsylvania

Date of application for amendments: October 24, 1986, as supplemented on January 22, 1988.

Brief description of amendments: These amendments changed the range specified for the drywell temperature indicator and recorder, provided clarifications for Technical Specification Table 3.2.F and corrected an error in Table 3.2.F.

Date of issuance: February 22, 1988.

Effective date: On completion of modifications to each device and prior to initiation of fuel cycle nine for Unit 2 and fuel cycle eight for Unit 3.

Amendment Nos.: 128 and 131.

Facility Operating License Nos. DPR–44 and DPR–56: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** February 11, 1987 (52 FR 4416).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 22, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126.

Power Authority of the State of New York, Docket No. 50–333, James A. Fitzpatrick Nuclear Power Plant, Oswego County, New York

Date of application for amendment: April 15, 1986.

Brief description of amendment: The amendment would add to the Technical Specifications a requirement that a capacity test for the main control room emergency ventilation air supply system be performed every 18 months.

Date of issuance: February 17, 1988.

Effective date: February 17, 1988.

Amendment No.: 114.

Facility Operating License No. DPR-59: Amendment revised the Technical Specification.

Date of initial notice in **Federal Register:** June 18, 1986 (52 FR 2224).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 17, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Penfield Library, State University College Of Oswego, Oswego, New York.

Rochester Gas and Electric Corporation, Docket No. 50–244, R.E. Ginna Nuclear Power Plant, Wayne County, New York

Date of application for amendment: October 27, 1987, as supplemented by letter dated January 11, 1988.

Brief Description of amendment: This amendment changes the requirements of the Technical Specifications related to steam generator tube plugging at 15 percent level.

Date of issuance: February 23, 1988.

Effective date: February 23, 1988.

Amendment No.: 25.

Facility Operating License No. DPR-35: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 2, 1987 (52 FR 45889).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 23, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Rochester Public Library, 115 South Avenue, Rochester, New York 14610.

NRC Project Director: Richard H. Wessman, Director.

Sacramento Municipal Utility District, Docket No. 50–312, Rancho Seco Nuclear Generating Station, Sacramento County, California

Date of application for amendment: May 14, 1987, as supplemented September 25 and October 29, 1987.

Brief description of amendment: The amendment revised the Technical Specifications to reflect hardware modifications associated with reactor building combustible gas control. The hydrogen purge system was replaced with an inconsistent hydrogen recombiner system.

Date of issuance: February 12, 1988.

Effective date: February 12, 1988.

Amendment No.: 95.

Facility Operating License No. DPR-54: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** August 26, 1987 (52 FR 32210).

The September 25 and October 29, 1987 submittals do not change the substance of the amendment as previously noticed.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 12, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Sacramento City-County Library, 828 I Street, Sacramento, California 95814.

Sacramento Municipal Utility District, Docket No. 50–312, Rancho Seco Nuclear Generating Station, Sacramento County, California

Date of application for amendment: September 16, 1987, as supplemented November 2, and 25, 1987.

Brief description of amendment: The amendment revised Section 6 (and related pages of the Table of Contents) of the Technical Specifications to reflect changes in the plant management and organization.

Date of issuance: February 19, 1988.

Effective date: February 19, 1988.

Amendment No.: 96.

Facility Operating License No. DPR–54: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register**: December 16, 1987 (52 FR 47792).

The November 25, 1987 submittal consists of changes to the nuclear security reporting requirements. The submittal does not change the substance of the amendment as previously noticed.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 19, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Sacramento City-County Library, 828 I Street, Sacramento, California 95814.

Tennessee Valley Authority, Dockets Nos. 50–259, 50–260 and 50–296, Browns Ferry Nuclear Plant, Units 1, 2 and 3, Limestone County, Alabama

Date of application for amendments: June 4, 1987 (TS 233).

Brief description of amendments: The amendments impose a limit on reactor operation when nitrogen is not being used to supply the pneumatic control system inside containment. The amendment request is in response to Generic Letter 84–09, Hydrogen Recombiner Capability. The amendments also delete an obsolete reference to the fire-related startup retesting program.

Date of issuance: February 12, 1988.

Effective date: February 12, 1988, and shall be implemented within 60 days.

Amendments Nos.: 142, 138, 113.

Facility Operating Licenses Nos. DPR–33, DPR–52 and DPR–68: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: December 30, 1987 (52 FR 49232).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 12, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Athens Public Library, South Street, Athens, Alabama 35611.

Tennessee Valley Authority, Dockets Nos. 50–259, 50–260 and 50–296, Browns Ferry Nuclear Plant, Units 1, 2 and 3, Limestone County, Alabama

Date of application for amendments: February 11, 1987 (TS 227).

Brief description of amendments: The proposed amendment would revise the limiting conditions for operation for the Standby Gas Treatment System, the Control Room Ventilation System and the Primary Containment Purge System. In each case, the modification was to replace ANSI N510–1975, which was referred to for radioactive methyl iodine removal effectiveness test of the charcoal filter sample with ASTM D3803. ASTM D3803–79 is referred to in ANSI N510–1980 as the proper test to use for measuring methyl iodine removal effectiveness.

Date of issuance: February 12, 1988.

Effective date: February 12, 1988, and shall be implemented within 60 days.

Amendments Nos.: 143, 139, 114.

Facility Operating Licenses Nos. DPR–33, DPR–52 and DPR–68: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: April 8, 1987 (52 FR 11372).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 12, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Athens Public Library, South Street, Athens, Alabama 35611.

Tennessee Valley Authority, Dockets Nos. 50–259, 50–260 and 50–296, Browns Ferry Nuclear Plant, Units 1, 2 and 3, Limestone County, Alabama

Date of application for amendments: August 28, 1985, as supplemented April 7, 1986 (TS 212).

Brief description of amendments: The amendments revise functional test frequencies listed in Table 4.2.B. The changes replace functional test frequencies for core spray logic, RCIC (Initiating and Isolation) logic, HPCI (Initiating and Isolation) logic, ADS logic, LPCI (Initiating and Isolation) logic, containment spray logic, core spray auto initiation inhibit, and HPCI auto initiation inhibit from once per 6 months to once per 18 months.

Date of issuance: February 12, 1988.

Effective date: February 12, 1988, and shall be implemented within 60 days.

Amendment Nos.: 144, 140, 115.

Facility Operating Licenses Nos. DPR–33, DPR–52 and DPR–68: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: November 6, 1985 (50 FR 46218); July 2, 1986 (51 FR 24263).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 12, 1988.

No significant hazards consideration comments received: No.

Tennessee Valley Authority, Docket Nos. 50–327 and 50–328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee

Date of application for amendments: January 11, 1988 (87–47).

Brief description of amendments: The amendments modify the Technical Specification surveillance requirement for the maximum allowable percentage of fresh air intake upon actuation of the control room emergency ventilation system. The proposed amendments were noticed in the Federal Register on Friday, January 15, 1988 (53 F.R. 1082). In this notice, the staff stated that the licensee requested that the amendment be acted on an emergency basis because it could potentially impact the heatup of Unit 2. The staff stated in the notice that there was sufficient justification for consideration of these amendments on an exigent basis in accordance with 10 CFR Part 50.91. Since the notice was published in the Federal Register, it has been determined that the proposed amendments would not impact the heatup of Unit 2 and, therefore, issuance of the amendments on the exigent basis was not justified. These amendments were not issued on an exigent or an emergency basis.

Date of issuance: February 17, 1988.

Effective date: February 17, 1988,

Amendment Nos.: 68, 60.

Facility Operating Licenses Nos. DPR–77 and DPR–79. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: January 15, 1988 (53 F.R. 1082).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 17, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Chattanooga-Hamilton County Library, 1001 Broad Street, Chattanooga, Tennessee 37402.

Union Electric Company, Docket No. 50–483, Callaway Plant, Unit 1, Callaway County, Missouri

Date of application for amendment: September 11, 1987.

Brief description of amendment: The amendment increased the maximum isolation time for the containment mini-purge isolation valves, given in Technical Specification Table 3.6–1, from 3 seconds to 5 seconds.

Date of issuance: February 12, 1988.

Effective date: February 12, 1988.

Amendment No.: 33.

Facility Operating License No. NPF–30. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register**: December 16, 1987 (52 FR 47795).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 12, 1988.

No significant hazards consideration comments received: No.

Virginia Electric and Power Company, Docket Nos. 50–280 and 50–281, Surry Power Station, Unit Nos. 1 and 2, Surry County, Virginia

Date of applications for amendments: October 31, 1985, as superseded September 25, 1986 and May 22, 1987; the application dated April 12, 1985, as revised September 9, 1985 and October 7, 1985, and superseded by September 25, 1986, and May 22, 1987 and as supplemented October 23, 1987.

Brief description of amendments: The amendments changed Section 3.7, "Instrumentation System," and Section 4.1, "Operational Safety Review," of the Technical Specifications (TS) for Surry Units 1 and 2, to bring the TS into closer agreement with the Westinghouse Standard Technical Specifications, as well as to conform with the guidance provided by the staff.

Date of issuance: February 17, 1988.

Effective date: February 17, 1988.

Amendment Nos. 117 and 117.

Facility Operating License Nos. DPR–32 and DPR–37: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register**: September 23, 1987 (52 FR 35810).

The October 23, 1987 submittal contained clarified action statements and did not change the substance of the amendment request.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 17, 1988.

No significant hazards consideration comments received: No.

Local Public Room location: Swem Library, College of William and Mary, Williamsburg, Virginia 23185.

Wolf Creek Nuclear Operating Corporation, Kansas Gas and Electric Company Kansas City Power & Light Company, Kansas Electric Power Cooperative, Inc., Docket No. 50–482, Wolf Creek Generating Station, Coffey County, Kansas

Date of amendment request: March 2, 1987, as supplemented April 17 and October 30, 1987 and January 8, 1988.

Brief description of amendment: The amendment revised the License and Technical Specifications in order to remove certain fire protection requirements from the Technical Specifications and place them in plant procedures under the control of the plant's on-site review committee, and place them in the Final Safety Analysis Report.

Date of issuance: February 24, 1988.

Effective date: Upon issuance and shall be implemented upon the licensee's completion of the necessary procedural changes.

Amendment No.: 15.

Facility Operating License No. NPF–42. Amendment revised the Technical Specifications and License.

Date of initial notice in **Federal Register**: March 25, 1987 (52 FR 9583).

The April 17 and October 30, 1987 and January 8, 1988 submittals provided additional clarify information and did not change the finding of the initial notice.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 24, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Emporia State University, William Allen White Library, 1200 Commercial Street, Emporia, Kansas 66801 and Washburn University School of Law Library, Topeka Kansas.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND FINAL DETERMINATION OF NO SIGNIFICANT HAZARDS CONSIDERATION AND OPPORTUNITY FOR HEARING (EXIGENT OR EMERGENCY CIRCUMSTANCES)

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual 30-day Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for a Hearing. For exigent circumstances, the Commission has either issued a **Federal Register** notice providing opportunity for public comment or has used local media to provide notice to the public in the area surrounding a licensee's facility of the licensee's application and of the Commission's proposed determination of no significant hazards consideration. The Commission has provided a reasonable opportunity for the public to comment, using its best efforts to make available to the public means of communication for the public to respond quickly, and in the case of telephone comments, the comments have been recorded or transcribed as appropriate and the licensee has been informed of the public comments.

In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant or in prevention of either resumption of operating or of increase in power output up to the plant's licensed power level, the Commission may not have had an opportunity to provide for public comment on its no significant hazards determination. In such case, the license amendment has been issued without opporutnity for comment. If there has been some time for public comment but less than 30 days, the Commission may provide an opportunity for public comment. If comments have been requested, it is so stated. In either event, the State has been consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standard's of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see: (1) The application for amendment, (2) the amendment to Facility Operating License, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and at the local public document room for the particular facility involved.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendments. By April 8, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

Since the Commission has made a final determination that the amendment involves no significant hazards consideration, if a hearing is requested, it will not stay the effectiveness of the amendment. Any hearing held would take place while the amendment is in effect.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to *(Project Director)*: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel-White Flint, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

Maine Yankee Atomic Power Company, Docket No. 50-309, Maine Yankee Atomic Power Station, Lincoln County, Maine

Date of application for amendment: January 6, 1988.

Brief description of amendment: This amendment modifies the Maine Yankee Technical Specifications to update figures 5.2-1 and 5.2-2 in Technical Specifications 5.2-1 "Organization" depicting the Maine Yankee Atomic Power Company offsite and facility organization.

Date of issuance: February 17, 1988.

Effective date: Immediately.

Amendment No.: 103.

Facility Operating License No. DPR-36: Amendment revised the Technical Specifications.

Public comments received regarding to proposed no significant hazards consideration: Yes. A Legal Notice requesting public comments by February 16, 1988 was published in the Portland Press Herald, Portland, Maine on February 13, 1988.

Comments received: No.

The Commission's related evaluation of the amendment and final no significant hazards consideration are contained in a Safety Evaluation, dated February 17, 1988.

Attorney for licensee: J. A. Ritscher, Esq., Ropes and Gray, 225 Franklin Street, Boston, Massachusetts 02210.

Local Public Document Room Location: Wiscasset Public Library, High Street, P.O. Box 367, Wiscasset, Maine 04578.

NRC Project Director: Richard H. Wessman, Acting Director.

Northeast Nuclear Energy Company, et al., Docket No. 50-336, Millstone Nuclear Power Station Unit No. 2, New London County, Connecticut

Date of application for amendment: February 9, 1988.

Brief description of amendment: The amendment revised the Technical Specification 4.7.6.13.e.3, which requires periodic verification of control room air inleakage and deletes the requirement that such leakage be measured at a pressure differential of 1/16" water guage.

Date of issuance: February 12, 1988.

Effective date: February 12, 1988.

Amendment No.: 125.

Facility Operating License No. DPR-65: Amendment revised the Technical Specifications.

Public comments requested as to proposed no significant hazards consideration: No.

The Commission's related evaluation of the amendment, finding of emergency circumstances, and final determination of no significant hazards consideration are contained in a Safety Evaluation dated February 12, 1988.

Local Public Document Room Location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Washington Public Power Supply System, Docket No. 50-397, Washington Nuclear Project No. 2, Benton County, Washington

Date of application for amendment: February 18, 1988, as revised February 19, 22, and 23, 1988.

Brief description of amendment: The amendment revised Technical Specification 3.9.7, "Crane Travel-Spent Fuel Storage Pool," by waiving the weight limits in order to repair damage to the reactor building roof which occurred on February 14, 1988.

Date of issuance: February 23, 1988.

Effective date: February 23, 1988.

Amendment No.: 50.

Facilities Operating License No. NPF-21.: Amendment revised the Technical Specifications.

Public comments requested as to proposed no significant hazards consideration: No.

The Commission's related evaluation of the amendment, finding of emergency circumstances, and final determination of no significant hazards consideration are contained in a Safety Evaluation dated February 23, 1988.

Attorney for licensee: Nicholas Reynolds, Esquire, Bishop, Cook, Purcell and Reynolds, 1200 Seventh Street NW., Washington, DC 20036.

Local Public Document Room Location: Richland Public Library, Swift and Northgate Streets, Richland, Washington, 99352.

NRC Project Director: George W. Knighton.

Dated at Rockville, Maryland, this 3rd day of March, 1988.

[Docket Nos. 50-440 and 50-441]

Cleveland Electric Illuminating Co., et al. (Perry Nuclear Power Plant, Units 1 and 2); Receipt of Petition for Director's Decision Under 10 CFR 2.206

Notice is hereby given that, by a Petition pursuant to 10 CFR 2.206 dated January 22, 1988, Ohio Citizens for Responsible Energy, Inc. (Petitioner) requested a variety of relief including that the construction permit and operating license for the Perry Nuclear Power Plant, Units 1 and 2 of the Cleveland Electric Illuminating Company, et al. (licensees) be immediately suspended for alleged deficiencies in seismic design. The Petition's allegations are based largely upon an analysis of data and evaluations which had been performed in response to the January 31, 1986 earthquake which occurred near the Perry facility.

The Petition is being treated pursuant to 10 CFR 2.206 of the Commission's regulations, and, accordingly, appropriate action will be taken on the request within a reasonable time. A copy of the Petition is available for inspection in the Commission's Public Document Room, 1717 H Street, NW., Washington, DC 20555 and at the local Public Document Room for the Perry facility located at the Perry Public Library, 3753 Main Street, Perry, Ohio 44081.

For the Nuclear Regulatory Commission.

Thomas E. Murley,

Director, Office of Nuclear Reactor Regulation.

Dated at Rockville, Maryland this 2nd day of March 1988.

PRESIDENTIAL COMMISSION ON THE HUMAN IMMUNODEFICIENCY VIRUS EPIDEMIC

Public Meeting

Notice is hereby given, pursuant to Pub. L. 92-463, that the Presidential Commission on the Human Immunodeficiency Virus Epidemic will hold a public meeting at the San Francisco Department of Public Health located at 101 Grove Street, Room 300, San Francisco, CA, from 9:00 a.m. to 5:30 p.m. on Thursday, March 24, and from 9:00 a.m. to 1:00 p.m. on Friday, March 25.

During this two-day hearing, the Commission will hear testimony from individuals representing States, cities, corporations and community-based organizations that have responded to the AIDS epidemic.

Records shall be kept of all Commission proceedings and shall be available for public inspection at 655-15th street NW., Suite 901, Washington, DC 20005.

Polly L. Gault,

Executive Director.

BILLING CODE 4100-15-M

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Midwest Stock Exchange, Inc.

March 3, 1988.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

New America High Income
  Common Stock, $.01 Par Value (File No. 7-3005)
Owens & Minor Inc.
  Common Stock, $2.00 Par Value (File No. 7-3006)
Symbol Technologies, Inc.
  Common Stock, $.01 Par Value (File No. 7-3007)
Crystal Oil Company
  Common Stock, $.01 Par Value (File No. 7-3009)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before March 24, 1988, written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-25415; File No. SR-OCC-87-20]

Self-Regulatory Organization; Proposed Rule Change By The Options Clearing Corp. Relating to Investment in a Wholly-Owned Subsidiary

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on November 19, 1987, The Options Clearing Corporation filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Options Clearing Corporation ("OCC") proposes to invest its funds in a wholly-owned subsidiary to provide data-processing and other support services to clearing houses or banking entities organized to process, clear and settle transactions in foreign and United States currencies.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for the Proposed Rule Change

The purpose of this proposed change is to permit The Options Clearing Corporation ("OCC") to invest excess funds in a wholly-owned subsidiary, currently named International Clearing Systems, Inc. ("ICSI"). Initially, ICSI will contract with consultants and system designers to develop data processing and communications systems adequate to process trade data, settlement data and related clearing information respecting foreign currency forward and spot exchange contracts among financial institutions. Once the systems are developed, ICSI intends to establish long-term contracts with foreign exchange clearing houses to process data and provide related support services respecting foreign currency exchange transactions and resulting collateral and settlement obligations.[1]

ICSI will provide ministerial support services—services in the nature of facilities management—only. It will play no discretionary role in policy formulation or governance decisions with or for any foreign exchange clearing house. In addition, to preserve its legal independence, ICSI will maintain all its books, records and funds separate from the records and funds of

---

[1] A number of industry initiatives are under development both in the United States and abroad to create trade-match, trade netting and currency exchange settlement services. In connection with OCC's investment in ICSI, OCC is exploring alternative approaches to developing a series of foreign exchange clearing houses in which OCC may have ownership interests. OCC's preferred approach involves working with banks and bank regulatory authorities to establish foreign exchange clearing houses organized both in the United States and abroad, each of which would provide trade-matching, multilateral obligations netting, and settlement services to entities engaged in foreign currency exchange trading.

any contracting clearing house and OCC.

ICSI anticipates that its data processing and other required support services will provide benefits to foreign currency exchange markets and market participants by extending OCC's demonstrated expertise in clearance and settlement systems to the development of needed support services in markets not currently served by OCC. In particular, ICSI's development of new data processing and communication techniques will reduce unnecessary costs entailed in foreign currency exchange trade processing, and will extend efficient, effective and safe clearance methods to inter-bank foreign currency exchange operations. Moreover, given the multi-national elements of inter-bank foreign currency exchange activities, OCC anticipates that centralized servicing by ICSI will promote safety and efficiency in foreign currency exchange markets and banking markets generally, in harmony with the standards developed by the Securities and Exchange Commission and registered securities clearing agencies under section 17A of the Securities Exchange Act of 1934 ("the Act"). Accordingly, OCC believes that its investment in ICSI pursuant to this proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder.

B. Self-Regulatory Organization's Statement on Burden on Competion

OCC does not believe that the proposed rule change would impose any burden on competion.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members Participants or Others

Comments were not and are not intended to be solicited with respect to the proposed rule change and none was received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or,

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the Submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to SR-OCC-87-20 and should be submitted by March 30, 1988.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 2, 1988.

Jonathan G. Katz

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-25416; File No. SR-Phlx-88-3]

Self-Regulatory Organizations; Proposed Rule Change by the Philadelphia Stock Exchange, Inc. Relating to Amendments to the Exchange's Margin Rule, Rule 722

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on January 28, 1988, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Phlx, pursuant to Rule 19b-4, hereby proposes a rule change to revise its margin rule, Rule 722, to conform to Regulation T of the Board of Governors of the Federal Reserve System and to coordinate with the recently approved New York Stock Exchange ("NYSE") margin rule, NYSE Rule 431. A summary of the major changes to the rule is included in part IIA below.

II. Self-Regulatory Organization's Statement Regarding the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change, and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to make a comprehensive revision to the Exchange's margin rule, Rule 722 so that it better reflects the credit/risk concerns of the marketplace. Also the revisions are designed to conform the rule to Regulation T of the Board of Governors of the Federal Reserve System ("Regulation T"). In light of the recent revision by the New York Stock Exchange of its margin requirements, the PHLX determined to update its own margin rules in a coordinated fashion. Specifically, the changes to the PHLX rule generally track those recently approved by the Commission with regard to NYSE Rule 431 (Release No. 34-22875).

The major changes to the rule are the following:

(a.) *U.S. Government Securities* [Section (b)2a]—Currently the maintenance margin required is 5% of the principal amount of the obligation. The proposed amendment would replace that requirement with a sliding scale of 1% to 6% of the current market value of the obligation based on maturity date. This new rule will set margin on the basis of length of time to maturity. The proposed change would lower margin requirements for shorter term U.S. Government securities while increasing

VOL 53
ISS 46
MR 9
1988
UMI

the requirements for longer term U.S. Government Securities. This new scale recognizes that risk diminishes as securities near maturity and that securities with longer terms have greater risk.

Additionally, zero coupon bonds with 5 years or more to maturity would have a minimum requirement of 3% of the principal amount.

(b.) *Municipal Securities* [Section (b)2b]—The minimum margin required is currently the lower of 25% of the market value or 15% of the principal amount. The amendment would change the requirement to the greater of 15% of the current market value or 7% of the principal amount. Margin requirements generally would be unchanged for municipal securities purchased at par, but lower for those purchased below par and higher for those purchased above par. This change will recognize the greater risks associated with higher priced municipal securities which are most reactive to current market conditions.

(c.) *Non-Convertible Corporate Debt Securities* [Section (b)2c]—The amendment would reduce the requirements for non-convertible corporate debt securities eligible for "good faith" margin under Regulation T from 25% of market value to the greater of 7% of the principal amount or 20% of the current market value. This new minimum margin requirement will ensure margin sufficiency and also prevent over-speculation in lower priced non-convertible corporate debt securities.

(d.) **Guaranteed accounts** [Section (c)4]—A capital charge will now be imposed when one or more accounts is guaranteed by another account and the margin deficiencies guaranteed are in excess of 10% of a member organization's excess net capital.

(e.) **Maintenance Margin Time Period** [Section (c)6]—The time period in which the amount of maintenance margin must be obtained has been changed from "within a reasonable time" to within 15 business days of the date of deficiency. This new finite time period should eliminate any uncertainty over what length of time is reasonable.

(f.) **Definitions** [Section (d)]—The language of the rule has generally been revised to read more concisely with specific terms defined at the end of the rule rather than within the text itself.

(g.) Finally, the rule has been reworded where appropriate to conform to the current Regulation T (*See e.g.*, Section (c)7).

Because most of the significant changes relate to margin on debt securities, the amendments do not strongly impact products traded on the PHLX. The change should, therefore, not impose any significant effect on members at this time. Nevertheless, the Exchange will allow lead time after approval by the Commission to allow the members to adapt their practices to the new rules. Voluntary compliance will be permitted 3 months after Commission approval of the rule change and compliance will be mandatory 6 months after such approval.

The proposed rule change is consistent with the requirements of section 6(b)(5) of the Act in that it is designed to protect investors and the public interest by ensuring that the Exchange's margin requirements adequately reflect current regulatory and credit/risk concerns. In addition, the change is consistent with Section 7(a) of the Act and the rules and regulations of the Board of Governors of the Federal Reserve System enacted pursuant to that provision, in that it is designed for the purpose of preventing the excessive use of credit for the purchase or carrying of securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The PHLX does not believe that the proposed rule change will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No comments on this proposed rule change will be solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the PHLX consents, the Commission will: (A) By order approve such proposed rule change, or, (B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by March 30, 1988.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: March 8, 1988.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

SBA Form 1086; Secondary Participation Guaranty and Certification Agreement

AGENCY: Small Business Administration.

ACTION: Request for public comments.

SUMMARY: The Small Business Administration is publishing a proposed revision of SBA Form 1086, Secondary Participation Guaranty and Certification Agreement. The public is asked to provide comments and make suggestions on this proposed change.

DATE: Comments should be received by April 8, 1988. Send comments to: Associate Administrator for Finance and Investment, Small Business Administration, Room 800, 1441 L Street NW., Washington, DC 20416.

FOR ADDITIONAL INFORMATION CONTACT: James W. Hammersley (202-653-5954) or Allan S. Mandel (202-653-6696), Room 800, Small Business Administration, 1441 L Street NW., Washington, DC 20416.

SUPPLEMENTARY INFORMATION: The Small Business Administration has prepared a proposed revision of the document used to execute a sale of the guaranteed interest portion of a 7(a) loan into the secondary market. The revision reflects proposed changes based on the experience SBA has gathered in administering the secondary market since the President signed into law the Small Business Secondary

Market Improvements Act in 1984 (Pub. L. 98-352; 98 Stat. 329). It incorporates several changes that have been suggested by lenders, investors and broker/dealers.

The major changes are these:

1. A servicing fee of no less than 2.0 percent per annum will be required on any guaranteed interest sold at a price greater than par (paragraph 6(e)). Federal Reserve Board data show the average servicing cost of commercial loans to be about two percent of loan volume, depending upon the size of the bank (*Functional Cost Analysis: 1986 Average Banks*, page 40). In fiscal year 1987 the average servicing fee retained by lenders on Guaranteed Interests sold into the SBA secondary market was 1.2 percent. Twenty-eight percent of the loans carried a servicing fee of 0.5 percent or less. SBA and the bank regulatory agencies are concerned about the substitution of up-front premium income for on-going servicing fee income that continues over the life of a loan. SBA believes the secondary market should be structured so that lenders have both the income and the incentive to service loans properly and keep them on their books. Many lenders are already selling their guranteed interests with sufficient servicing fees and as such will be unaffected by this change.

2. The secondary market is a closely connected system that functions best if the interests of each of the major participants—the small business borrower, the lender, the broker/dealer and the investor—are properly balanced. In order to provide a better balance, a new authority for emergency repurchase by the lender is being proposed (paragraph 20). SBA is confronted with the need to establish a policy for the situation in which a borrower's business will probably fail unless a modification, such as a rate reduction, is granted. Every year a few such cases arise in which the lender is willing to grant a rate reduction or other modification but cannot do so because either the investor is not willing or the loan is in a pool, in which case it is infeasible to request investor approval because of multiple investors. SBA proposes to permit a lender to repurchase if the SBA field office, after careful analysis, concludes that an emergency exists in which the borrower's business will probably fail if the change is not approved and will probably survive if the change is approved. SBA intends that this authority be used only in carefully selected, applicable cases. This is not to be construed as general or wholesale authority for unilateral repurchase by lenders. Such an interpretation would be extremely damaging to the secondary market.

3. Timely action is essential to an efficient secondary market. SBA is providing a more precise definition of the time parameters of secondary market operations, particularly with regard to such time-sensitive activities as remittance by lender of borrower payment, the furnishing by lender of transcripts on loans that are in default and must be purchased, and the required advance notice from Lender to the fiscal and transfer agent (FTA) of Borrower's intent to prepay (paragraphs 6, 10, 11, 12, 13, 15, 16 and 19). Payment and remittance information (SBA Form 1502) shall be due at the FTA on the third of every month.. SBA shall levy a late payment penalty of 5% of the amount remitted or $100, whichever is greater, (subject to a maximum of $5,000) on any payment and remittance not received by the fiscal and transfer agent by the fifth of the month. Lender's or FTA's failure to comply with a request for transcript within ten business days shall result in a $100 penalty payable to the SBA. Lender's failure to provide to FTA the required ten days advance notice of Borrower's intent to prepay will result in a $100 penalty.

The vast majority of Lenders already act in a timely manner and will be unaffected by this proposal.

4. If the Borrower fails to make the first three payments due after the loan is sold into the secondary market, SBA proposes that the Lender be required to repurchase from the Registered Holder the Guaranteed Interest at a price equal to the sum of the outstanding balance, accrued interest and premium, if any, received by the Lender (paragraph 3). The Lender has always been required to certify that it has no knowledge of any likely default or prepayment by Borrower. However, some cases have occurred in which the loan defaults or prepays immediately upon sale. SBA is proposing this change in order to provide increased investor protection in such cases.

5. SBA is proposing to modify its procedures in order to encourage more timely action by SBA and Lender when a borrower encounters problems that threaten the repayment of the loan (paragraphs 10 and 11). The goal is to encourage proper servicing action as soon as possible. The FTA will provide to each SBA field office a monthly list of its loans that appear to be in default. The field office will contact the Lender to determine the status of the loan. The Lender will verify whether (1) the interest-paid-to date is more than sixty days in arrears or (2) default by borrower has continued uncured for more than 60 days in making payment, when due, of any installment of principal or interest due on the note. If the loan is in either category, SBA, after consultation with the Lender, will within ten days determine whether SBA or the Lender is to purchase the Guaranteed Interest or decide upon appropriate remedial servicing action. Such servicing action may include one three month deferment of payments without obtaining prior permission from the Registered Holder, as is currently authorized. The Lender would continue to be responsible for notifying the FTA and SBA of any deferment.

SBA LOAN NUMBER————————

Secondary Participation Guaranty and Certification Agreement

Important Information

This form is to be used for the initial transfer only. All subsequent transfers must use the reverse of the certificate or detached assignment form. Loans sold using SBA form 1084 must be certificated prior to resale: Use SBA Form 1085.

A. *Lender Certifications*. By signing this document, *LENDER CERTIFIES*, among other items, that (see paragraph 3 of the Terms and Conditions herein):

(1) Lender, including its officers, directors, and employees, has no knowledge of a default by the Borrower and has no knowledge or information that would indicate the likehood of default. (2) Lender has paid the SBA guaranty fee. (3) The loan is fully disbursed. (4) Lender acknowledges that it has no authority to unilaterally repurchase the Guaranteed Interest from Registered Holder without written permission from the SBA.

B. *Borrower Payments. Lender shall send to the FTA the FTA share of all Borrower payments received after settlement of the loan sale. DO NOT SEND ANY PAYMENTS DIRECTLY TO THE INVESTOR OR THE BROKER/DEALER.* Retain a copy of this form. The wire transfer receipt from settlement through the FTA will be Lender's notification that the sale is complete. Lender will not receive a return copy of this form.

C. *Lender Payment and Late Payment Penalty*. Lender payment and remittance information (SBA Form 1502) shall be due at the FTA on the third of every month or the next business day thereafter if the third is not a business day. SBA shall levy a late payment penalty of 5% of the amount remitted or $100, whichever is greater, (subject to a maximum of $5,000) on any payment and lender remittance statement (Form 1502) not received in the offices of the FTA by the fifth of the month or next business day thereater if the fifth is not a business day. This penalty will be paid through the FTA along with the late penalty identified in paragraph 6(c) due to the FTA (see paragraph 6 for specific details.)

D. *Payment Modification.* Lender may approve one deferral of payment for up to three monthly payments without obtaining prior permission from the Registered Holder. Lender shall immediately notify the FTA and SBA. Any other payment modification must receive prior approval by the Registered Holder. Requests for payment modification must be forwarded to the FTA who will forward the proposed modification to the Registered Holder or provide the name of such Registered Holder (at Registered Holder's discretion) to the Lender for direct negotiation (see paragraph 2 of the Terms and Conditions).

E. *Borrower Prepayments.* For loans approved by or on behalf of SBA after February 15, 1985, Lender must give 10 days advance notice to the FTA in order to give the FTA time to request that the Registered Holder return the certificate. On the date of prepayment, Lender will wire funds consisting of principal and accrued interest to the date of the wire plus any penalty or fees to the FTA (see paragraph 15 of the Terms and Conditions).

SBA FORM 1086 ( ) Previous editions are obsolete.

The Small Business Administration, an Agency of the United States Government ("SBA") and the Lender named below ("Lender") entered into a guaranty agreement on SBA Form 750 ("750 Agreement") applicable to a loan ("Loan") made by Lender in participation with SBA to the Borrower ("Borrower") named below evidenced by Borrower's Note and any modifications thereto ("Note") a copy of which is attached hereto and incorporated by reference. Lender is the beneficiary under the 750 Agreement of SBA's guarantee of the specified percentage of the outstanding balance of the Loan ("Guaranteed Interest").

Registered Holder's Tax Identification Number__________

If a tax identification number is not provided, interest earned will be subject to withholding.

Registered Holder requests SBA to issue through the Fiscal and Transfer Agent (FTA) a Guaranteed Interest Certificate ("Certificate") evidencing ownership of the Guaranteed Interest in the name of Registered Holder (such person or entity, or any subsequent transferee, during its respective period of ownership of the Certificate, to be called "Registered Holder"). SBA, Lender and Registered Holder (for itself and each subsequent Registered Holder) agree to the appointment by SBA of FTA to serve as the agent to transfer Certificates and to receive from Lender loan repayments made by Borrower and to transmit such payments to Registered Holder.

A written notification to or demand upon SBA pursuant to this Agreement shall be made through the FTA to:

SBA Servicing Office ______________________

Zip ______________________

Terms and Conditions

1. *Lender's Sale of Guaranteed Interest.* Lender has sold the Guaranteed Interest and acknowledges that it has received value for the Guaranteed Interest. Lender has given notice and acknowledgment of the transfer of the Guaranteed Interest by completing the following legend on the Note:

The guaranteed portion of this Note has been transferred to a Registered Holder for value.

Dated: ______________________
— (Lender) ______________________

Lender has delivered or hereby delivers to the FTA, a photocopy of the Note and any modifications thereto with the legend, and such photocopy shall be incorporated into this Ageement. This legend shall also serve as notification for any future transfer of the Guaranteed Interest.

2. *Loan Servicing.* Lender shall remain obligated under the terms and conditions of the 750 Agreement, and shall continue to service the Loan in the manner set forth in the 750 Agreement.

Modifications in the 750 Agreement or to the Note not affecting repayment terms of the Note may be effected by Lender or SBA without the consent of Registered Holder (for itself and each subsequent Registered Holder). To aid the orderly repayment of Borrower's indebtedness, Lender, at the request of the Borrower, may grant one deferment of Borrower's scheduled payments for a continuous period not to exceed three (3) months of past or future installments. Lender shall immediately notify FTA and the relevant SBA field office in writing of any deferment approval, the GP number, the borrower's name, the term of such deferment, the date Borrower is to resume repayment of its obligation, and reconfirmation of the basis of the interest calculation (e.g. 30/360, etc.). Interest is not waived, but deferred. The first interest installment made by the borrower shall pay accrued interest from the date interest stopped accruing (paid-to date) before deferment was granted. Registered Holder may not demand repurchase of the Guaranteed Interest during the deferment period, or before borrower's failure to pay the first scheduled installment following the deferment period. Lender shall not authorize any additional deferment or an extension of Loan maturity without the prior written consent of the Registered Holder. No change in the terms and conditions of repayment of the Note other than the deferment authorized in this paragraph shall be made by Lender or SBA without the prior written consent of Registered Holder.

3. *Representations and Acknowledgment of Lender.* Lender hereby certifies that the Loan has been made and fully disbursed and that the full amount of the guaranty fee has been paid to SBA. The outstanding principal amount of the Guarenteed Interest and date to which interest is paid as certified by Lender are accepted by SBA and have been warranted by SBA to the Registered Holder as of the SBA Warranty Date (date this Agreement is executed and settled by the FTA); provided, however, that Lender shall be liable to SBA for any damage to SBA resulting from any error in the certified principal amount, percentage of the Guaranteed Interest, or date to which interest is paid. Lender represents that as of the Warranty Date neither it nor any of its directors, officers, employees, or agents has or should have, through the exercise of reasonable diligence, any acutal or constructive knowledge of any default by Borrower or has any information indicating the likelihood of a default by Borrower or the likelihood of prepayment of the Loan (by refinancing or otherwise). If the borrower fails to make the first three payments in full due after the Warranty Date, the Registered Holder may make written demand of Lender through the FTA that Lender purchase the Guaranteed Interest from the Registered Holder at a price equal to the outstanding balance plus accrued interest plus the premium, if any, received by the Lender. Lender agrees to honor this demand. In the event Lender does not purchase pursuant to such request, SBA shall purchase the Guaranteed Interest, without being liable, however, for any premium. Lender's failure to so purchase may, as determined by SBA, constitute a significant violation of the Rules and Regulations of the Secondary Market. If Borrower subsequently makes installment payments in full for a period of six consecutive months, Lender may re-sell the Guaranteed Interest it has so re-purchased. Lender hereby acknowledges that it has no authority pursuant to this Agreement to unilaterally repurchase the Guaranteed Interest from Registered Holder without written permission from the SBA.

4. *Obligations and Representations of Registered Holder.* Pursuant to this Agreement, SBA shall purchase the Guaranteed Interest from Registered Holder regardless of whether SBA has any knowledge of possible negligence, fraud or misrepresentation by the Lender or Borrower, provided neither Registered Holder nor any person or entity having the beneficial interest in the Guaranteed Interest participated in, or at the time it purchased the Guaranteed Interest had knowledge of, such negligence, fraud or misrepresentation. Subject to the provisions of 18 U.S.C. § 1001 (relating, among other things, to false claims), Registered Holder and any person or entity having the beneficial interest therein hereby warrants that it was not the Borrower, Lender, or an "Associate" of the Lender (as defined in Title 13, Code of Federal Regulations, Part 120), and anyone standing in the same relationship to the Borrower, and had neither participated in nor been aware of any negligence, fraud or misrepresentation by Lender or Borrower with respect to the underlying Note or related Loan documentation. Neither execution hereof by SBA, or purchase by SBA from Registered Holder shall constitute any waiver by SBA of any right of recovery against Lender, Registered Holder or any other person or entity. Registered Holder (for itself and each subsequent Registered Holder) hereby acknowledges that the Loan may be terminated on a date other than its maturity date, in which case the Certificate will be called for redemption at par and will cease to accrue interest as of the date of such termination.

5. *Issuance of Guaranteed Interest Certificates.* SBA, Lender, and Registered Holder (for itself and each subsequent Registered Holder) agree that ownership of the Guaranteed Interest shall be evidenced by a Certificate to be issued by SBA. SBA shall issue such Certificate, either through its own facilities or by designating and authorizing such issuance by FTA.

FTA shall be the custodian of the executed original of this Agreement. The Agreement shall be delivered to FTA immediately after execution by the Lender and the Registered Holder. Each Registered Holder shall receive the Certificate described herein. Upon request therefor and payment of a reproduction fee, a Registered Holder may obtain from FTA a copy of the executed SBA Form 1086 pertaining to the Guaranteed Interest represented by the Certificate.

Upon completion of execution of this Agreement, SBA, through FTA, shall issue to Registered Holder (or, if FTA is timely so notified in writing by Registered Holder, to Registered Holder's assignee) a Certificate evidencing the ownership of the Guaranteed Interest of the Loan. If Registered Holder is not the person or entity having the beneficial interest in the Certificate, Registered Holder hereby represents that it has obtained from the person or entity having the benefiical interst in the Certificate, authorization appointing Registered Holder as the agent of such person or entity with respect to all transactions arising out of the performance of their respective obligations under SBA Form 1086. The Certificate shall identify the Loan and shall state, among other things: (i) the name of the Registered Holder, (ii) the Principal Amount of Guaranteed Interest as of the SBA Warranty Date, (iii) the Certificate Interest Rate, and (iv) the Borrower's Payment Date. Transfer of the Guaranteed Interest by Registered Holder may be effected by the transferee (i) obtaining from the transferor the execution of the assignment form and the sale information requested on the reverse of the Certificate or, alternatively, in a form of detached assignment approved by SBA, (ii) presenting the Certificate and assignment to FTA for registration of transfer and issuance of a new

Certificate to the transferee, (iii) paying to FTA a Certificate issuance fee to be set from time to time by SBA, and (iv) presenting the following information: Certificate number; original principal amount of the Certificate; exact spelling of the name in which the new Certificate is to be issued; complete address and tax identification number of the new Registered Holder; name and telephone number of the person handling the transfer; and complete instruction for the delivery of the new Certificate.

6. *Obligation of Lender.*

(a) FTA must receive from Lender by the third day of every month or the next business day thereafter if the third is not a business day, the FTA's share of all sums which Lender received from Borrower as regularly scheduled payments during the preceding month. By the same date, Lender shall provide the following information on SBA form 1502 (or an exact facsimile format) with respect to each Loan with the Lender has sold and which is registered with the FTA regardless of whether the borrower made a payment in the preceding month:

See Payment Calculation Example Attached to this Document

1. The SBA loan number.
2. The alpha abbreviation for the originating SBA field office.
3. The Note interest rate or rates if the interest rate on a variable rate loan changed during the payment period.
4. The interest amount due the FTA.
5. The principal amount due the FTA.
6. The total amount due the FTA for the particular loan.
7. The time period covered by the interest rate(s) listed in item 3.
8. The number of days in the interest period.
9. The calendar basis (30/60 or actual days/365 only).
10. The closing principal balance for the loan.
11. A grand total figure for items 4, 5, and 6.
12. A late payment penalty (if applicable).

(b) With the exception of borrower prepayments or payoffs (see paragraph 15), payments received other than as regularly scheduled in the previous month, must be remitted to the FTA within two business days of receipt of collected funds and shall include the information described in items 1–12 above.

(c) Lender remittance is due at the office of the FTA by the third of the month following a regularly scheduled payment. If Lender remittance, including complete payment information, is not received by the fifth of the month or the next business day thereafter if the fifth is not a business day, Lender shall pay to SBA a late penalty of the greater of $100.00 or 5% of the payment amount remitted (subject to a $5,000 maximum) plus a penalty to the FTA equal to the interest on the unremitted amount at the rate provided in the Note (less the rate of the Lender's servicing fee), plus a late penalty charge calculated at a rate of 12% per annum on the unremitted amount. See example of late payment calculation attached to this document. The total amount, including any penalties, will be paid to the FTA when the late payment is remitted. If these penalties are not included in the remittance, FTA and SBA reserve the right to withhold these penalties from the settlement of any future guaranteed interest sale or payment on any defaulted guarantee loan in the Lender's portfolio. The FTA will forward any penalties due SBA at the end of each month.

(d) Lender agrees to work with the SBA and/or the FTA to reconcile immediately any loan in which the paid to date on the Lender's books differs from the books of the FTA. Lender agrees to provide a transcript within 10 business days of receipt of a request from the SBA or the FTA. Failure to provide a transcript after a request from the FTA shall cause the Lender to be fined $100 by the SBA.

(e) Lender's servicing fee as computed on the unpaid principal amount of the Guaranteed Interest for the period of actual services performed by Lender shall be no less than 2.0 per cent per annum on any Guaranteed Interest sold at a price greater than par.

7. *Obligations of FTA.*

(a) FTA shall have the obligation, with respect to payments received from Lender pursuant to Paragraph 6 above, to remit to Registered Holder any such payment (less applicable fees, and any late payment charges due FTA or SBA if such charge has been collected from Lender) as follows:

(i) Any payment (other than a prepayment of principal) received by FTA before the thirteenth day of the month following Borrower's scheduled payment month will be remitted to Registered Holder on the fifteenth day of such following month. Any additional interest and late payment charge paid by Lender pursuant to paragraph 6 hereof shall be retained by and shall become the property of FTA.

(ii) Any payment (other than a prepayment of principal) received by FTA on or after the thirteenth day of the month following Borrower's scheduled payment month will be remitted to Registered Holder within two (2) business days of receipt of immediately available funds by FTA. In such case, any interest received by FTA pursuant to paragraph 6 hereof and allocated to the period after the fifteenth day of such following month shall be remitted to Registered Holder along with any late payment charge received by FTA. The balance of any such additional interest received by FTA shall be retained by and shall become the property of FTA.

(iii) Other amounts received by FTA from Lender which are not prepayments subject to Paragraph 15, may be held by FTA and applied as required herein.

(b) Upon presentation by Registered Holder of the Certificate, amounts received by FTA from Lender or SBA which would constitute a full redemption of the Certificate, or a prepayment subject to Paragraph 15, shall be remitted by FTA to Registered Holder by wire transfer within two (2) business days of receipt of immediately available funds by the FTA in accordance with Registered Holder's instructions. FTA shall retain a final transfer fee equal to a regular transfer fee.

(c) Each remittance by FTA to Registered Holder shall be accompanied by a statement of the amount allocable to interest, the amount allocable to principal, and the remaining principal balance as of the date on which such allocations were calculated.

(d) If FTA fails to make timely remittance to Registered Holder in accordance with the above provisions, FTA shall pay to Registered Holder (i) interest on the unremitted amount at the rate provided in the Note less the rate of Lender's servicing fee and any other applicable fees, plus (ii) a late payment penalty calculated at a rate of 12 percent per annum on the amount of such payment.

(e) FTA agrees to identify monthly to lenders any loan in which the paid to date on its books differs by three days or more from the paid to date on the books of the Lender, provided that this data is submitted to the FTA via SBA form 1502. Such identified differences will be reconciled on a timely basis.

(f) FTA agrees to issue certificates within two business days of settlement or acceptable written notification of transfer.

(g) FTA agrees to acknowledge any investor request for late payment claims within ten days of receipt.

(h) FTA agrees to forward to investor within five business days of receipt any servicing request requiring concurrence of the investor. Furthermore, FTA agrees to forward to Lender within five business days of receipt any investor response.

8. *Transferability of Guaranteed Interest.* Each Registered Holder maintains under this Agreement the right to assign the Guaranteed Interest. Each Registered Holder of the Guaranteed Interest shall be deemed to have represented that, to the best of its knowledge, it has, and so long as it is a Registered Holder it will have no interest in the Borrower, in the Note, or in the collateral hypothecated to the Loan, other than the Guranteed Interest held under this Agreement, and that it will not service or attempt to service the Loan or secure or attempt to secure additional collateral from Borrower. Registered Holder, without the prior consent of SBA, Lender or FTA, may transfer the ownership of the Guaranteed Interest to a subsequent transferee, (other than Borrower, or Lender, or an "Associate" of the Lender as defined in Title 13, Code of Federal Regulations, Part 120 or anyone standing in the same relationship to the Borrower). The effective date of any such transfer of the Guaranteed Interest shall be the date on which such transfer is registered on the books of FTA. If Lender, FTA or SBA shall have made any payment to, or taken any action with respect to, the transferor Registered Holder prior to the effective date of the transfer of the Guaranteed Interest, such payment or action shall be final and fully effective. Neither SBA, FTA nor Lender shall have any further obligation to the transferee Registered Holder with respect to such payment or action; and any adjustment between the transferor and the transferee resulting from any such payment or action by Lender, SBA or FTA shall be the responsibility and obligation solely of the transferor and the transferee. On payment date, FTA will remit payments to the person or entity which, on the books of FTA, is the Registered Holder as of the close of business on the record date, which is the last day of the prior month. Any other adjustment by and between the transferor and transferee shall be solely their responsibility and obligation. At any given time there shall be only one Registered Holder entitled to the benefits of ownership of the Guaranteed Interest, and each transferor, upon the transfer of the Guaranteed Interest, shall cease to have any right in the Guaranteed Interest or any obligation or commitment under this Agreement, except as to any appropriate adjustment of funds between the transferor and the transferee. FTA shall serve as the central registry of Certificate ownership.

9. *Certificates Lost, Destroyed, Stolen, Mutilated or Defaced.* Procedures for claim on account of loss, theft, destruction, mutilation or defacement of a Certificate are found in Title 13, Code of Federal Regulations, Part 120. The FTA, upon written request, shall provide procedures.

10. *Repurchase by Lender.*

(a) As directed by the SBA, the FTA will provide to each SBA field office a monthly list of its loans that are in default or that are 60 days in arrears according to the records of the FTA. The field office will contact the Lender to determine the status of the loan. If the Lender's records indicate that the interest-paid-to date is more than sixty days in arrears or default by borrower has continued uncured for more than 60 days in making payment, when due, of any installment of principal or interest due on the note, SBA, after consultation with the Lender, will within ten business days determine which entity—SBA or the Lender—is to purchase the Guaranteed Interest or decide upon appropriate remedial servicing action. SBA field offices will transmit the decision in writting to the FTA within five days of the decision. Lender agrees to provide a transcript of account to the SBA or the FTA within 10 business days of the request for the transcript. Lender's failure to comply with a request for transcript shall result in a $100 penalty payable to the SBA. If Lender is to purchase, the FTA and the Lender will reconcile the transcripts. If Lender and FTA cannot agree on the balance and paid-to-date within twenty-five business days from SBA's notification to FTA, the FTA will send the Lender's and the FTA's transcripts to the appropriate SBA field office for reconciliation by SBA. Lender shall immediately (within 5 business days from the date the transcripts are reconciled) provide 10 days advance written notice of the date of purchase to the FTA. Upon such notification, FTA shall within two business days notify the Registered Holder of the pending repurchase and request that the Registered Holder forward the certificate to the FTA. On the purchase date, Lender will (without additional notification from FTA) forward by wire transfer a payment to the FTA which includes the principal balance outstanding plus interest through and including the date of the wire transfer of funds.

(b) Written demand by FTA upon SBA for the purchase of the Guaranteed Interest shall be made not later than one hundred fifty (150) calendar days after the first date of an uncured default by Borrower on any Guaranteed Interest which for any reason was not purchased under Sections 10(a) or 11. If FTA does not make such demand by such 150th day, FTA shall be responsible for the interest beginning on the 151st day and ending 30 days after the appropriate SBA field office receives the purchase documentation. For the purposes of this subparagraph, the written demand shall include a transcript and final statement of account of the Guaranteed Interest satisfactory to SBA.

(c) Upon receipt of the purchase amount from Lender or SBA, FTA shall remit in accordance with paragraph 7 to Registered Holder such amount less applicable fees owed by the Registered Holder to the FTA or SBA on this Guaranteed Interest, and any additional interest or late payment charges due FTA pursuant to Paragraphs 6 or 7 hereof. FTA may also deduct from such amount a final transfer charge for the final transfer and redemption of the Certificate, the amount of such final transfer charge not to exceed the normal transfer charge. Upon repurchase of the Guaranteed Interest by Lender, the rights and obligations of Lender, FTA and SBA shall be governed by the 750 Agreement and any continuing provisions of this Agreement (as applicable).

11. *Purchase by SBA.* If SBA is to purchase the Guaranteed Interest under the procedure described in paragraph 10(a) hereof, the Lender and the FTA will transmit to SBA a transcript and final statement of account of the Guaranteed Interest satisfactory to SBA within five business days of the request, and SBA will reconcile the transcripts. Lender's or FTA's failure to comply with a request for transcript within ten business days shall result in a $100 penalty payable by the party failing to comply to the SBA. SBA shall within five business days of reconciliation provide at least ten days written notice of the date of purchase to the FTA. Upon such notification, FTA shall within two business days notify the investor of the pending repurchase and request that the Registered Holder foward the certifcate to the FTA. The SBA field office will arrange to have funds wired to the FTA. The FTA shall forward such funds to the Registered Holder within two business days of receipt. The payment of accrued interest to the date of purchase on a fixed rate note shall be at the rate provided in the Note less the Lender's servicing fee. On those loans with a fluctuating interest rate, SBA's payment of accured interest shall be at that rate in effect on the date of the earliest uncured borrower default if the loan is in default or at that rate in effect at the

BEST COPY AVAILABLE

time of purchase if the loan is not in default, less the Lender's servicing fee. If Lender fails to furnish a current transcript statement as required by paragraph 13(i)-(iii) within ten business days after SBA's request therefor, then SBA may rely on the certified statement of account, with supporting documentation, from FTA. If any such information shall be inaccurate, whether inadvertently or otherwise, an appropriate adjustment in settlement will be made as expeditiously as possible. Under no circumstances shall SBA be liable for any amount attributable to any late payment charges which may be due FTA or Registered Holder. Upon written demand by SBA, Lender shall immediately repay to SBA the amount, if any, by which the amount paid by SBA exceeds the amount of SBA's obligation to Lender under the 750 Agreement, and the amount paid by SBA for any payments by Borrower which were not remitted by Lender to FTA (including accrued interest thereon), plus accrued interest (at the interest rate provided in the Note) computed on the unpaid balance of the Guaranteed Interest from the date of said purchase by SBA to the date of repayment by Lender. Upon purchase of the Guaranteed Interest by SBA, the rights and obligations of Lender and SBA shall be governed by the 750 Agreement and any continuing provisions of this Agreement, and SBA shall be deemed a transferee of the Guaranteed Interest and the final Registered Holder thereof with all the rights and privileges of such Registered Holder under this Agreement.

12. *Default by Lender.* In the event Lender shall fail for any reason to remit to FTA the pro rata share with respect to the Guaranteed Interest of any payment made by Borrower, pursuant to Paragraph 6 hereof, for a period of seventy-five (75) calendar days or more from the date such payment was due at the FTA, SBA, within thirty (30) business days or as soon thereafter as possible after receipt by SBA of written notice from FTA of Lender's failure to forward payments as provided in Paragraph 6, may purchase (through FTA) the Guaranteed Interest from Registered Holder pursuant to Paragraph 11 hereof, provided however, that under no circumstances shall SBA be liable for any amount attributable to any late payment charge. If SBA purchases from Registered Holder pursuant to this Paragraph, and if Borrower has not been in uncured default on any payment due under the Note for more than sixty (60) calendar days, SBA shall have the option (i) to require Lender to purchase the Guaranteed Interest from SBA for an amount equal to the amount paid by SBA to Registered Holder plus accrued interest (at the interest rate provided in the Note) from the date of the SBA purchase to the date of Lender's repurchase plus a penalty equal to 20% of the amount paid by SBA; or (ii) to require Lender to pay to SBA a penalty equal to 20% of the amount paid by SBA to Registered Holder. If, on the date SBA purchases the Guaranteed Interest from Registered Holder pursuant to this Paragraph, Borrower shall be in uncured default on any payment due on the Note for more than sixty (60)calendar days, then the provisions of Paragraph 11 hereof shall become applicable, including the obligation of Lender to repay to SBA (i) the amounts paid by SBA to Registered Holder in excess of the amount of SBA's obligation to Lender under the 750 Agreement, and (ii) any payments by Borrower which were not remitted by Lender to FTA, plus accrued interest (at the interest rate provided in the Note) computed on the unpaid balance of the Guaranteed. Interest plus the 20% penalty described above. If Lender fails to furnish a current transcript statement as required by Paragraph 13(i)–(iii) within ten business days after SBA's request therefor, then SBA may rely on the certified statement of account, with supporting documentation, from FTA. If any such information shall be inaccurate, whether inadvertently or otherwise, an appropriate adjustment and settlement will be made as expeditiously as possible.

13. *Other Obligations of Lender.* Lender hereby consents to the purchase of the Guaranteed Interest by SBA in accordance with Paragraphs 11 and 12 hereof, and shall, within ten business days of a request therefor and without charge, furnish to SBA and to FTA (i) a transcript of account, (ii) a current certified statement of the unpaid principal and interest then owed by Borrower on the Note, and (iii) a statement covering any payments by Borrower not remitted by Lender to FTA. Upon request by FTA at any time, Lender shall issue at no charge a certified statement of the outstanding principal amount of the Guaranteed Interest and the effective interest rate on the Note as of the date of such certified statement. Failure to provide such information shall result in a $100 penalty payable to SBA. Lender agrees that purchase of the Guaranteed Interest by SBA does not release or otherwise modify any of Lender's obligations to SBA arising from the Loan or the 750 Agreement, and that such purchase does not waive any of SBA's rights against Lender. Lender also agrees that SBA, as the final owner of the Guaranteed Interest under this Agreement, in addition to all its rights under the 750 Agreement with Lender, shall also have the right to set-off against Lender all rights inuring to SBA under this Agreement against SBA's obligation to Lender under the 750 Agreement. After any purchase of the Guaranteed Interest by SBA, Lender shall assign, transfer and deliver the Note and related loan documents to SBA upon the written request of SBA.

14. *Default by Fiscal and Transfer Agent.* In the event FTA receives any payment from Lender or SBA which FTA fails to remit to Registered Holder pursuant to this Agreement, Registered Holder shall have the right to make written demand upon FTA for any payment unremitted by FTA. If FTA fails to remit any such payment within ten (10) business days of such demand, Registered Holder shall have the right to make written demand upon SBA therefor. SBA shall make such payment to Registered Holder within thirty (30) business days or as soon thereafter as possible of receipt of such written demand, provided SBA can verify the non-payment by FTA. SBA shall make such payment directly to Registered Holder in the amount of the unremitted payment plus interest at the Certificate rate to the date of payment by SBA. FTA shall repay SBA for such payment by SBA to Registered Holder within ten (10) business days after receipt of written demand by SBA in an amount equal to the payment by SBA to Registered Holder plus interest (at the interest rate provided in the Certificate) computed on the unpaid balance of the Guaranteed Interest, from the date of SBA's payment to Registered Holder to the date of FTA's repayment to SBA. Such payment will not affect FTA's liability for a late payment charge under paragraph 7(d).

15. *Prepayment or Refinancing by Borrower.* For loans approved by or on behalf of SBA on or after February 15, 1985, Lender shall transmit written notice to FTA of Borrower's intent to make (by refinancing or otherwise and pursuant to the terms of the Note) a partial prepayment of principal subject to this paragraph, or a total prepayment of principal. Such written notice shall be received by FTA at least ten (10) business days prior to prepayment date. The "prepayment date" is the date prior to maturity that Lender has established with the FTA on which immediately available funds shall be delivered to the FTA. Lender's notice to FTA shall contain the following: (a) the prepayment date, (b) the principal amount being prepaid, (c) the accrued interest due the FTA as of prepayment date, (interest shall accrue through and including the calendar day immediately prior to the date funds are wired to the FTA), and (d) a certification by Lender that to the best of its knowledge and belief the prepayment funds are either Borrower's own funds, or funds borrowed by Borrower (whether or not guaranteed by SBA) pursuant to a separate transaction, and the prepayment is in accordance with the terms of this paragraph and the Note, and applicable law. This certification is intended to guard against Lender's unilateral repurchase of the Guaranteed Interest from the Registered Holder without prior written permission from SBA. Lender's failure to provide such timely certification shall result in a $100 penalty against lender payable to the SBA through the FTA. Lender is obligated to wire payment on the 10th day without notification from the FTA. If the FTA is not paid by the 10th day, interest continues to accrue to the date payment is received by the FTA.

A partial prepayment of principal subject to this Paragraph is any payment which is greater than 20% of the principal balance outstanding at the time of prepayment. FTA is not required to accept any prepayment except as described herein. FTA shall upon receipt of notice pursuant to this Paragraph advise Lender of the outstanding principal amount and the accrued interest due FTA as of prepayment date, plus any additional interest and late payment charges pursuant to paragraph 6 or 7 hereof. On prepayment date, Lender shall remit to FTA the total amount to be paid to FTA by wire transfer. For loans approved prior to February 15, 1985, Lendre shall forward any prepayment to the FTA by wire transfer within three business days of receipt of the prepayment from the Borrower.

16. *Option to Purchase by SBA.* Pursuant to the 750 Agreement, SBA shall at any time have the option to purchase the outstanding balance of the Guaranteed Interest plus interest at the Note rate less the Lender's servicing fee. Failure by Registered Holder to submit the Certificate to FTA for redemption by the date specified by SBA or FTA will not entitle Registered Holder to accrued interest beyond such date.

17. *Separate or Side Agreements.* Separate or side agreements between Lender and Registered Holder, between a Registered Holder and a subsequent transferee, betweeen FTA and Lender, or between FTA and any Registered Holder, shall not in any way obligate SBA to make any payment except as provided herein, nor shall it modify the nature or extent of SBA's rights or obligations under the terms of this Agreement or of the 750 Agreement. Furthermore, any such side agreement which has the effect of distorting the information supplied to SBA is prohibited.

18. *Indemnity and Force Majeure.* Each party to this Agreement (including FTA), for itself and its successors and assigns, agrees to indemnify and hold harmless any other party (including FTA) against any liability or expense arising under this Agreement which is due to its negligence and/or breach of contractual obligation, except that no party hereto (including FTA) shall be liable to any other party or to Registered Holder for any action it takes, suffers or omits that is (i) authorized by this Agreement or (ii) pursuant to a communication received by such party (including FTA) from any other party or from Registered Holder which is not contrary to this Agreement and which a prudent person in like circumstances would reasonably believe to be genuine, lawful and duly authorized by the sender. If any party hereto (including FTA) is in doubt as to the applicability of this Agreement to a communication it has received, it may refer the matter to SBA for an opinion as to whether it may take, suffer or omit any action pursuant to such communication. Under no circumstances, however, shall any party hereto (including FTA) be held liable to any person or entity for special or consequential damages or for attorneys' fees or expenses in connection with its performance under this Agreement. If any party hereto (including FTA) shall be delayed in its performance hereunder or prevented entirely or in part from completing such performance due to causes or events beyond its control (including and without limitation, Act of God; postal malfunction or delay; interruption of power or other utility, transportation or communication services; act of civil or military authority; sabotage; national emergency; war; explosion, flood, accident, earthquake or other catastrophe; fire; strike or other labor problem; legal action; present or future law, governmental order, rule or regulation; or shortage of suitable parts, materials, labor or transportation) such delay or non-performance shall be excused and the reasonable time for performance in connection with this Agreement shall be extended to include the period of such delay or non-performance.

19. *Fees and Penalties.* Lender and Registered Holder shall be responsible for payment of fees and penalties required of them by this agreement which are in effect on the date of this transaction and as published from time to time in the Federal Register. The FTA will forward any penalties due SBA at the end of each month.

20. *Emergency Repurchase Authority by Lender.* In a critical situation in which the Borrower's ability to remain in business is directly dependent upon a change in the provisions relating to Borrower's installment payments, SBA may permit Lender to repurchase the Guaranteed Interest from the Registered Holder if all the following conditions exist: (i) Lender has submitted a written request to the relevant SBA field office servicing the loan, which includes current financial statements from the Borrower, and either a written decline to a specific request for a change in the terms and conditions from the Registered Holder either directly or through the FTA, or a written statement from the FTA that the Registered Holder did not respond to a servicing request or that the loan is part of a pool; (ii) the proposed change in the terms and conditions is solely to the benefit of the Borrower; (iii) the Lender has certified that it will make the requested change in the terms and conditions if repurchase is approved by SBA; and (iv) the SBA field office has reviewed the financial statements of the Borrower and whatever additional information is necessary, and has concluded that an emergency exists in which the Borrower's business will probably fail if the change is not approved and that the business will probably survive if the change is approved.

If all conditions are met, the field office may approve the purchase by the Lender of the Guaranteed Interest. Guaranteed Interests purchased using this procedure may not be resold until the Borrower has made all payments as scheduled on the Note for a period of twelve consecutive months.

21. *Inconsistent Provisions and Caption Headings.* Any inconsistency between this Agreement and the 750 Agreement shall be resolved in favor of this Agreement. Any inconsistency between this Agreement and Title 13, Code of Federal Regulations, shall be resolved in favor of Title 13. The provisions of the Secondary Market Regulations (Title 13, Code of Federal Regulations, Part 120) in effect on the date of this transaction and as may be amended from time to time in the

Federal Register, apply to this agreement unless explicitly stated to be inapplicable. The caption headings for the various paragraphs herein are for ease of reference only and are not to be deemed part of these Terms and Conditions.

In consideration of the mutual promises herein contained, the parties agree to all the provisions of this Agreement. In witness whereof, the parties have executed this multi-page Agreement this ——— day of ———, 19——, (SBA Warranty Date, supplied by SBA) in New York State.

DEPARTMENT OF STATE

[Public Notice 1053]

Public Information Collection Requirements Submitted to OMB for Review

AGENCY: Department of State.

ACTION: The Department of State has submitted the following public information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96–511.

SUMMARY: No citizen of the United States shall depart from or enter into any part of the U.S. unless he/she possesses a valid passport. Exceptions are made in individual cases specifically authorized by the Secretary of State. The following summarizes the information collection proposal submitted to OMB.

Type of request—Existing collection.
Originating office—Bureau of Consular Affairs.
Title of information collection—Request by United States National for and Report of Exception to § 53.1, Title 22 of the Code of Federal Regulations.
Form number—DS–1423.
Frequency—On occasion.
Respondents—U.S. citizens.
Estimated number of responses—2,500.
Estimated total number of hours needed to respond—625.

Section 3504(h) of Pub. L. 96–511 does not apply.

Additional Information or Comments: Copies of the proposed forms and supporting documents may be obtained from Gail J. Cook (202) 647–3538. Comments and questions should be directed to (OMB) Francine Picoult (202) 395–7340.

Dated: February 5, 1988.

Richard C. Faulk,

Acting Assistant Secretary for Administration.

[FR Doc. 88–5075 Filed 3–8–88; 8:45 am]

BILLING CODE 4710-24-M

[CM–8/1173]

Shipping Coordinating Committee, Subcommittee on Safety of Navigation; Meeting

The Working Group on Safety of Navigation of the Subcommittee on Safety of Life at Sea (SOLAS) will hold an open meeting at 9:30 a.m. on Tuesday, March 29, 1988, in room 6103 at Coast Guard Headquarters, 2100 Second Street SW., Washington, DC.

The purpose of the meeting is to report on the outcome of the 34th session of the Subcommittee on Safety of Navigation of the International Maritime Organization held in London, February 8–12, 1988 and to begin to prepare U.S. positions for the 35th session, tentatively scheduled for January 23–27, 1989. Items of principal interest on the agenda are:

Decisions of other IMO bodies
Routing of Ships
Problems related to deep-draft vessels
Removal of disused offshore platforms
Infringement of safety zones around offshore structures
Amendment of (SOLAS) regulations V/12(f)
World-wide navigation system
Electronic chart display systems
Navigational aids and related equipment
Ship reporting systems and reporting requirements
Work programme
Any other business

Members of the general public may attend up to the seating capacity of the room.

For further information contact Mr. Edward J. LaRue, Jr., U.S. Coast Guard (G–NSS), Washington, DC 20593–0001, telephone: (202) 267–0416.

Date: February 25, 1988.

Peter R. Keller,

Executive Secretary, Shipping Coordinating Committee.

BILLING CODE 4710-07-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement; Town of Garner, Wake County, NC

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in the Town of Garner, North Carolina.

FOR FURTHER INFORMATION CONTACT: Roy C. Shelton, District Engineer, Federal Highway Administration, 310 New Bern Avenue, P.O. Box 26806, Raleigh, North Carolina 27611, Telephone (919) 856–4330.

SUPPLEMENTARY INFORMATION: The FHWA in cooperation with the North Carolina Department of Transportation (NCDOT) will prepare an environmental impact statement (EIS) on a proposed Timber Drive in the Town of Garner, Wake County. The proposed action would be the construction of a two lane roadway on multilane right of way part on new location from Grovemont Road to NC–50. The proposed action is a part of a circumferential route to serve developed areas in southwest Garner and is a major part of the Town's thoroughfare plan for a bypass.

Alternatives under consideration include (1) the "no-build," (2) improving the existing facilities, and (3) a multilane highway part on new location.

Letters describing the proposed action and soliciting comments are being sent to appropriate Federal, State and local agencies. A public meeting and a meeting with local officials and neighborhood groups will be held in the study area. A public hearing will also be held. Information on the time and place on the public hearing will be provided in the local news media. The draft EIS will be available for public and agency

review and comment at the time of the hearing. No formal scoping meeting is planned at this time.

To ensure that the full range of issues relating to the proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments and questions concerning the proposed action should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Issued on: February 29, 1988.

Roy C. Shelton,

District Engineer, FHWA, Raleigh, North Carolina.

BILLING CODE 4910-22-M

Federal Railroad Administration

[FRA General Docket No. H–87–2]

Petition for Exemption or Waiver for Test Program; National Railroad Passenger Corp.

In accordance with 49 CFR 211.9 and 211.41 notice is hereby given that the National Railroad Passenger Corporation (AMTRAK) has submitted a request, dated February 23, 1988, for a temporary waiver of 49 CFR 213.57(b) in order to conduct a test program, the primary purpose of which will be the evaluation of curving performance of trainset equipment described below.

The petitioner recognizes a need to improve trip times for rail passenger service between Boston, Massachusetts and New York City. One way to reduce trip time between this city pair would be the negotiation of curved track by certain types of trains at speeds exceeding the values specified in § 213.57(b) of the Track Safety Standards. The restrictions contained in this section are based on a limiting unbalance of track superelevation, often called "cant deficiency", of three inches. It is the petitioner's objective to explore the ramifications of operating selected types of trainsets at up to nine inches of cant deficiency. FRA has the responsibility, should this petition be approved, to assure that the test program is carried out safely.

Note: The concept of cant deficiency was discussed in an earlier FRA Notice appearing on pages 38035 and following of the **Federal Register** Volume 52, Number 197, October 13, 1987.

Amtrak desires to investigate the response to elevated curving speeds of at least five trainset types within the period for which the waiver of § 213.54(b) was requested. These trainsets are identified as:

RTG Tuboliner train;
RTL Turboliner train;
Talgo passive tilt-coach train;
LRC active tilt-coach train;
Amfleet/F–40/AEM–7 conventional passenger train.

This list item is included to establish baseline performance data against which the performance of the other units can be compared. The first four each exhibit lower centers of gravity than does the conventional Amfleet equipment. All of this equipment has been operated in previous tests at nine or more inches of cant deficiency without incident. During the proposed test series, the equipment specified will be operated through a test zone which, in effect, comprises the tracks over which a future revenue service, based on one or more types, could be run.

If the petition is approved, Amtrak expects to schedule the Amfleet equipment test and that of the Talgo cars in late spring, 1988. No definite date has been set yet for the evaluation of the balance of the units. It should be noted that an RTG Tuboliner was approved by FRA for test operation between Boston and New Haven at curving speeds resulting in up to six inches of cant deficiency and that this test was, in fact, conducted successfully on October 9, 1987.

Amtrak's original petition to waive compliance with 49 CFR 213.57(b) for test purposes was conditionally approved by FRA on October 5, 1987, and this waiver expired on October 31, 1987. Now, the most recent Amtrak petition requests extension of the period of test from October 31, 1987 to October 31, 1988.

In the current petition, the test zone is defined as Boston, Massachusetts to New Haven, Connecticut and, in New York, from New Rochelle (milepost 18.7) to Market (milepost 10). The track segment, New Haven (milepost 22.8) to New Rochelle is owned by Metro North Commuter Railroad Company. This railroad may petition FRA for a waiver of 49 CFR 213.57(b) in order to permit Amtrak to carryout continuous testing, Boston to Market. If such a request is submitted, FRA will review it in accordance with the same criteria applied to the study of the Amtrak petition. If a Metro North petition of this sort is approved, Amtrak will be authorized by FRA to conduct tests subject to all of the appropriate conditions assigned to testing on Amtrak's own tracks and such other constraints as may be necessary because of features, if any, that are unique to the Metro North track. Should Metro North not elect to petition FRA in this matter, the test zone will be as described in the Amtrak petition.

FRA's role in these proceedings is to prescribe the conditions under which the test series will be carried out so that the risk of accident to the specimen equipment and hazard to the abutting community is minimal. In general, the approach to accomplishing this is to require that sufficient instrumentation be installed on each trainset to be able to relate test behavior to previously tested equipment known to be safe. FRA would require that attainment of maximum target curving speeds be in increments permitting a step-by-step analysis of applied forces and dynamic responses during and at the conclusion of each test run. The decision to proceed to the next level of cant deficiency would be based on this analysis process. In the cases of the Amfleet/F–40/AEM–7 and LRC trainsets, extensive instrumentation is not needed because this equipment was exhaustively examined in 1980 and its behavioral characteristics are known even to cant deficiencies well beyond eight inches. All that has to be generated now is sufficient data to establish correlation between the current and earlier versions. This is also true for the LRC trainset. The Talgo trainset resides in a different category; its design is unique and there is no other domestic rolling stock to which its performance can be compared.

If the Amtrak petition is approved, the solution to the Talgo train singularity problem will take the following form. Not considering vehicle structural failure, a relatively rare occurrence, there are three ways in which rolling stock can derail during curve negotiation. Excessive wheel loads can cause track failure, a wheel can climb over the rail or the equipment can overturn. Fortunately, there are measurement techniques and mathematical processes that allow calculation of wheel-rail forces while a vehicle is moving and the amount of force required to cause track failure can be predicted. Similarly, the buildup of forces leading to vehicle overturning can be observed during a test for comparison with a predetermined safe test cutoff criterion. One of the novel characteristics of the Talgo equipment is automatically steerable wheel sets, a factor that greatly diminishes the possibility of wheel climb. As a test condition, should FRA grant this waiver. Amtrak wil be required to instrument the Talgo trainset to the extent necessary to allow continuous monitoring of vehicle behavior in the derailment modes. Further, another test requirement would be cessation of testing at elevated cant deficiency speeds while traffic passes on adjacent tracks. Doubtless, the practical way to comply with this condition would be to operate test equipment during the early morning hours.

FRA is seeking information and comments on this proposed test program from interested parties. FRA will take these comments into account in arriving at a final specification of conditions governing test conduct. Such comments may also have value in supporting FRA's response to future requests for approval to operate trains through curves at speeds producing more than the current standard of three inches of underbalance. All interested parties are invited to participate in this proceeding through written submissions. FRA does not anticipate scheduling an opportunity for oral comment because the facts do not appear to warrant it. An opportunity to present oral comments will be provided, however, if, by April 8, 1988, the party submits a written request for hearing that demonstrates that his or her position cannot be properly presented by written statements.

All written communications concerning this petition should reference "FRA General Docket No. H-87-2" and should be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, FRA, 400 7th Street SW., Washington, DC 20590.

Comments received by April 8, 1988, will be considered in this proceeding and in evaluating any future proposals by Amtrak or other railroad entity for similar test programs. All comments received will be available for examination by interested persons at any time during regular working hours (9 a.m.-5 p.m.) in Room 8201, Nassif Building, 400 7th Street SW., Washington, DC 20590.

Issued in Washington, DC on March 3, 1988.

J.W. Walsh,

Associate Administrator for Safety.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: March 3, 1988.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: New.

Form Number: None.

Type of Review: New.

Title: Physician Statement of Clearance for an Exercise Program.

Description: This consent form is necessary so that all IRS employees can be considered medically safe and cleared by their personal physician for the Health Improvement Program. The form will remain in each employees private fitness file, in locked file cabinets. Only physicians can fill it out and thereby be affected by this form.

Respondents: Small businesses or organizations.

Estimated Burden: 2,000 hours.

Clearance Officer: Garrick Shear (202) 535-4297, Internal Revenue Service, Room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf (202) 395-6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Dale A. Morgan,

Departmental Reports Management Officer.

Internal Revenue Service

Art Advisory Panel of the Commissioner of Internal Revenue; Availability of Report of Closed Meetings

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of availability of report on closed meetings of the Art Advisory Panel.

SUMMARY: The Report is now available.

Pursuant to 5 U.S.C. app. I section 10(d), of the Federal Advisory Committee Act; and 5 U.S.C. section 552b, the Government in the Sunshine Act; and Treasury Directive 21-03 section 8 (1-29-87): A report summarizing the closed meeting activities of the Art Advisory Panel during 1987, has been prepared. A copy of this report has been filed with the Assistant Secretary of the Treasury for Management and is now available for public inspection at: Internal Revenue Service, Freedom of Information Reading Room, Room 1565, 1111 Constitution Avenue NW., Washington, DC 20224.

Requests for copies, at $2.70 each, should be addressed to: Director, Disclosure Operations Division, Attn: FOI Reading Room, Box 388, Benjamin Franklin Station, Washington, DC 20044 Telephone (202) 566-3770 (Not a toll free telephone number).

The Commissioner of Internal Revenue has determined that this document is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required. Neither does this document constitute a rule subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

For further information contact: Karen Carolan, CC:AP:V:4, 1111 Constitution Avenue NW., Room, 2575, Washington, DC 20224 Telephone (202) 566-9250 (Not a toll free telephone number).

Lawrence B. Gibbs,

Commissioner.

BILLING CODE 4830-01-M

Sunshine Act Meetings

Federal Register
Vol. 53, No. 46
Wednesday, March 9, 1988

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FARM CREDIT ADMINISTRATION

Farm Credit Administration; Correction of Sunshine Act Notice

SUMMARY: Pursuant to the Government in the Sunshine Act (5 U.S.C. 552b(e)(3)), the Farm Credit Administration gave notice on February 29, 1988 (53 FR 6057) of the regular meeting of the Farm Credit Administration Board (Board) scheduled to be held on Tuesday, March 1, 1988. This notice is to revise the agenda for that meeting: (A) To include items of discussion, and (B) to postpone Board action on other items to no later than the May 3 regular meeting.

FOR FURTHER INFORMATION CONTACT: David A. Hill, Secretary of the Farm Credit Administration Board, 1501 Farm Credit Drive, McLean, Virginia 22102-5090, (703) 883-4003.

ADDRESS: Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102-5090.

SUPPLEMENTARY INFORMATION: Parts of the meeting of the Board were open to the public (limited space available), and parts of the meeting were closed to the public. The agenda for Tuesday, March 1, is revised—

(A) To include the following items:

Open Session

1. Conditional approval for a lending limit exception in regard to a term loan for the Basin Electric Power Cooperative;
2. Amendments to the Farm Credit Banks of Texas pension and thrift plans; and
3. Cash patronage distribution for the St. Louis Bank for Cooperatives; Louisville Bank for Cooperatives; and the Jackson Bank for Cooperatives.

(B) To reflect postponement of the following items:

1. Summary Prior Approval;
6. FCA Policy on Prior Approvals Concerning Farm Credit System Human Resources Management;
7. Proposed Changes to Retirement and Severance Plans for the First District, Tenth District and the Farm Credit Corporation of America;
8. CEO Salary Proposals for the Central Bank for Cooperatives and the Federal Farm Credit Banks Funding Corporation; and
9. Salary Changes for the Springfield Districts.

Dated: March 4, 1988.

David A. Hill,

Secretary, Farm Credit Administration Board.

Corrections

Federal Register
Vol. 53, No. 46
Wednesday, March 9, 1988

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF EDUCATION

[CFDA No.: 84.129]

Invitation for Applications for New Awards Under the Rehabilitation Long-Term Training Program for Fiscal Year 1988

Correction

In notice document 88-3070 beginning on page 4201 in the issue of Friday, February 12, 1988, make the following correction:

On page 4202, in the first column, in the table, the entry opposite "Client assistance program training" should read "80,000 to 120,000".

BILLING CODE 1505-01-D
